Title: Lower Colorado River Well Inventory.

OMB No.: 1006-0014.

Description of respondents: All diversions of mainstream Colorado River water along the lower Colorado River must be accounted for and, for non-Indian diverters, in accordance with a water use contract with the Secretary of the Interior. Each diverter (including well pumpers) must be identified and their diversion locations and water use determined. This requires an inventory of wells along the lower Colorado River and the gathering of specific information concerning each well.

Frequency: These data will be collected only once for each well owner or operator as long as changes in water use, or other changes that would impact contractual or administrative requirements, are not made.

Estimated completion time: An average of 20 minutes is required for Reclamation to interview individual well owners or operators. Reclamation will use the information collected during these interviews to complete the information collection form.

Annual responses: 1,500.

Annual burden hours: 500 hours.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Reclamation will display a valid OMB control number on the forms.
