B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through www.regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

- Identify the document by docket ID number and other identifying information (subject heading, **Federal Register** date and page number).

- Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

- Describe any assumptions and provide any technical information and/or data that you used.

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- Provide specific examples to illustrate your concerns, and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

II. What Action is the Agency Taking?

EPA is printing a summary of revised pesticide petitions received under section 408 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a, proposing the establishment or amendment of regulations in 40 CFR part 180 for residues of pesticide chemicals in or on various food commodities. EPA has determined that this pesticide petition contains data or information regarding the elements set forth in FFDCA section 408(d)(2); however, EPA has not fully evaluated the sufficiency of the submitted data at this time or whether the data support granting of the pesticide petition. Additional data may be needed before EPA rules on this pesticide petition.

Pursuant to 40 CFR 180.7(f), a summary of the petition included in this notice, prepared by the petitioner along with a description of the analytical method available for the detection and measurement of the pesticide chemical residues is available on EPA's Electronic Docket at <http://www.regulations.gov/>. To locate this information on the home page of EPA's Electronic Docket, select "Quick Search" and type the OPP docket ID number. Once the search has located the docket, clicking on the "Docket ID" will bring up a list of all documents in the docket for the pesticide including the petition summary.

Amendment to Existing Tolerance

EPA established a tolerance in pea and bean, dried shelled, except soybean (Subgroup 6C of Crop Group 6) at 0.3 ppm in a **Federal Register** Final Rule dated October 29, 2004, (FR 63083) (FRL-7681-9) conditional on

submission of additional field residue data from Region 11. Upon EPA evaluation of the submitted conditional data, the petitioner requested EPA to establish the permanent tolerance at 0.5 ppm.

Similarly, EPA established a temporary tolerance in strawberry at 1.5 ppm in a **Federal Register** Final Rule dated October 29, 2004, conditional on submission of additional field residue data. This temporary tolerance expired December 31, 2005 and is currently at 0.4 ppm. Upon EPA evaluation of the submitted conditional data, the petitioner has requested EPA to establish the permanent tolerance at 1.2 ppm.

II. Background

What Action is the Agency Taking?

Under section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), at the discretion of the Administrator, a Federal or State agency may be exempted from any provision of FIFRA if the Administrator determines that emergency conditions exist which require the exemption. The Louisiana Department of Agriculture and Forestry has requested the Administrator to issue a specific exemption for the use of ethofenprox on rice to control rice water weevil, *Lissorhoptrus oryzophilus*. Information in accordance with 40 CFR part 166 was submitted as part of this request.

As part of this request, the Applicant asserts that the current emergency situation with respect to weevil management has arisen primarily from the continuing, and probably increasing, practice of cultivating crawfish in ponds

in close proximity to rice fields in southern Louisiana. The great majority of crawfish ponds (at least 75%) are close enough to rice fields to be affected by the management practices used in rice. All of the insecticides currently registered for use against the rice water weevil in Louisiana are toxic to crawfish. The use of ethofenprox for weevil control has one significant advantage over currently used liquid products in that it is formulated as a granular and thus there is far less potential for drift. The Applicant states that the estimated economic loss if no effective weevil controls are available is over 8 million dollars.

The Applicant proposes to make no more than two applications of 0.9% ethofenprox to 255,000 acres of rice in Louisiana between March 1 and August 1, 2006. A maximum of 45,645 pounds of active ingredient will be required.

This notice does not constitute a decision by EPA on the application itself. The regulations governing section 18 of FIFRA require publication of a notice of receipt of an application for a specific exemption proposing a first food use of a chemical.

The notice provides an opportunity for public comment on the application.

The Agency, will review and consider all comments received during the comment period in determining whether to issue the specific exemption requested by the Louisiana Department of Agriculture and Forestry.

SUPPLEMENTARY INFORMATION:

I. Information About the Document

The Agency endorses a hierarchy of approaches to derive human equivalent oral exposures from data from laboratory animals, with the preferred approach being physiologically based toxicokinetic modeling. Intermediate approaches include using some chemical-specific information. In lieu of data to support either of these

approaches, body weight scaling to the 3/4 power (BW^{3/4}) would be endorsed as a general default procedure to extrapolate toxicologically equivalent doses of chronic orally administered agents from laboratory animals to humans for the purpose of deriving an oral Reference Dose (RfD). Use of BW^{3/4} in derivation of RfD values would be parallel with current Agency use in derivation of cancer oral slope factors. Thus, this paper would harmonize the two main Agency oral dose-response extrapolation procedures. This generalized default procedure is viewed as an informed, species-specific, dosimetric adjustment factor (DAF) that addresses predominantly toxicokinetic and some toxicodynamic aspects of the interspecies uncertainty factor UF_A. Use of this procedure would result in derivation of a human equivalent exposure, specifically a human equivalent dose (HED) that is to be used in derivation of the oral RfD in a manner parallel to the human equivalent concentration (HEC) in derivation of an inhalation RfC.
