SUPPLEMENTARY INFORMATION:

Title: Request for Administrative Review.

OMB Number: 0584-0520.

Expiration Date: April 30, 2006.

Type of Request: Revision of a currently approved collection of information.

Abstract: The Food and Nutrition Service (FNS) of the U.S. Department of Agriculture is the Federal agency responsible for administering the Food Stamp Program. The Food Stamp Act of 1977, as amended, (7 U.S.C. 2011-2036) requires that the FNS determine the eligibility of retail food stores and certain food service organizations who apply to participate in the Food Stamp Program. If a food retailer or wholesale food concern is aggrieved by certain administrative action by FNS, that store has the right to file a written request for review of the administrative action with FNS.

The information collection burden for retail food stores and certain food service organizations has slightly increased over the past three fiscal years. The number of respondents reported in the previously approved collection was based on a collective total of three consecutive fiscal years (FY 2001-2003). In accordance with the Paperwork Reduction Act of 1995, this notice reflects an estimated total annual burden on respondents based solely on fiscal year 2005 data. Therefore, while the previously approved collection reflects 1,140 as the total number of respondents for fiscal years 2001-2003, this notice accurately reflects 652 respondents for fiscal year 2005, a slight annual increase over the last three fiscal years.

Estimate of Burden: The public reporting burden for this collection of information is estimated to average 0.17 an hour per response.

Respondents: Retail food stores and wholesale food concerns.

Estimated Number of Respondents: 652.

Number of Responses per Respondent: 1.2.

Estimated Time per Response: 0.17 minutes.

Estimated Total Annual Burden on Respondents: 133 hours.

Dated: February 3, 2006.

Administrator, Food and Nutrition Service.

Forest Service

Information Collection; Request for Comments; Urgent Removal of Timber

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the extension of an information collection associated with timber sale contract term extensions for urgent removal of salvage timber from other than National Forest system lands. Regulations at 36 CFR 223.53 allow timber sale purchasers to ask for extensions of certain National Forest timber sale contracts when the manufacturing facilities or logging equipment capacity available to purchasers are insufficient to provide for both the rapid harvest of damaged non-National Forest System timber in need of expeditious removal and the continued harvest of undamaged (green) timber under contract with the Forest Service. When requesting an urgent removal extension purchasers are required to provide documentation supporting the need. The collected information is necessary for the contracting officer to make a determination whether the purchaser meets the conditions for receiving an urgent removal extension on one or more National Forest System timber sale contracts.

DATES: Comments must be received in writing on or before April 17, 2006 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to Director, Forest Management, 1400 Independence Avenue, SW., Mail Stop 1103, Washington, DC 20250-0003.

SUPPLEMENTARY INFORMATION:

Title: Urgent Removal of Timber.

OMB Number: 0596-0167.

Expiration Date of Approval: June 30, 2006.

Type of Request: Extension of currently approved collection.

Abstract: In order to facilitate the expeditious removal of timber in other ownerships damaged by catastrophic events beyond the landowner's control, the Forest Service promulgated a final rule at § 223.53 of Title 36 of the Code of Federal Regulations on January 2, 2004 (69 FR 29).

Periodically, catastrophic events such as severe drought conditions, insect and disease outbreaks, wildfires, floods, and windthrow occur on forested lands within, or near, NFS lands. As a result of such catastrophic events, substantial amounts of private and other public timber may be severely damaged. This damaged timber must be harvested within a relatively short time period to avoid substantial losses due to deterioration in both the quantity and quality of the timber. The critical time period for harvesting this damaged timber and avoiding substantial deterioration varies with the season of the year, the species of timber, the damaging agent, and the location of the damaged timber. In most cases, substantial deterioration can be avoided if the damaged timber is harvested within 1 year of the catastrophic event. The number of wildfires, and the extent of damage to public and private forested land experienced in recent years resulted in the Forest Service adjusting its contracting procedures to support the urgent removal of damaged timber on non-NFS lands.

This information collection provides data to permit the discretionary extension of certain National Forest System timber sale contracts by the Contracting Officer. Such extensions will allow purchasers to divert
