## NUCLEAR REGULATORY COMMISSION

[Docket No. 72–61;EA–06–115]

### In the Matter of Florida Power and Light Company, St. Lucie Nuclear Plant Independent Spent Fuel Storage Installation Order Modifying License (Effective Immediately)

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Issuance of Order for Implementation of Additional Security Measures Associated with Access Authorization.

#### FOR FURTHER INFORMATION, CONTACT:

Christopher M. Regan, Senior Project Manager, Licensing and Inspection Directorate, Spent Fuel Project Office, Office of Nuclear Material Safety and Safeguards (NMSS), U.S. Nuclear Regulatory Commission (NRC), Rockville, MD 20852. Telephone: (301)

415–1179; fax number: (301) 415–8555; e-mail: [CMR1@nrc.gov](mailto:CMR1@nrc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

Pursuant to 10 CFR 2.106, the NRC (or The Commission) is providing notice, in the matter of St. Lucie Nuclear Plant Independent Spent Fuel Storage Installation (ISFSI) Order Modifying License (Effective Immediately).

##### II. Further Information

NRC issued a license to Florida Power and Light Company (FP&L), authorizing the operation of an ISFSI, in accordance with the Atomic Energy Act of 1954 and Title 10 of the *Code of Federal Regulations* (10 CFR) part 50 and 10 CFR part 72. Commission regulations at 10 CFR 72.212(b)(5) and 10 CFR 73.55(h)(1) require FP&L to have a safeguards contingency plan to respond to threats of radiological sabotage and to protect the spent fuel against the threat of radiological sabotage.

Inasmuch as an insider has an opportunity equal to, or greater than, any other person, to commit radiological sabotage, the Commission has determined these measures to be prudent. This Order has been issued to all licensees that currently store spent fuel or have identified near-term plans to store spent fuel in an ISFSI.

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, using large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees, to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. On October 16, 2002, the Commission issued Orders to the licensees of operating ISFSIs to put the actions taken in response to the Advisories in the established regulatory framework and to implement additional security enhancements that emerged from NRC's ongoing comprehensive review. The Commission has also communicated with other Federal, State, and local government agencies and industry representatives to discuss and evaluate the current threat environment, to assess the adequacy of security measures at licensed facilities. In addition, the Commission has been conducting a comprehensive review of its safeguards and security programs and requirements.

As a result of its consideration of current safeguards and security requirements, as well as a review of information provided by the intelligence
