DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA-2006-25190]

Notice of a Change in Direction Finder Availability Throughout United States, Excluding Alaska

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Request for public comment.

SUMMARY: The Federal Aviation Administration (FAA) is requesting public comment on a proposal to decommission all 54 Direction Finders (DF) and the associated DF approaches in all states *other than Alaska*. DF's have been used sparingly over the last nine years and the equipment is beyond its useful lifecycle. Improved radar coverage, pilot education and technologies such as area navigation (RNAV) and global positioning satellite (GPS) have reduced the utilization of DF steers and have essentially made DF's obsolete. A Federal Safety Risk Management Panel (SRMP) has determined that if pilots need orientation assistance, that our existing orientation methods, VOR, ADF, and

GPS are reliable and meet the needs of our aviation community.

Decommissioning would coincide with the Flight Services service provider's plan to consolidate the 58 flight service stations to 20 facilities.
