SUPPLEMENTARY INFORMATION:

History

On Monday, October 31, 2005, the FAA proposed to amend 14 CFR part 71 to establish Class D airspace, and establish Class E airspace at Camp Ripley, MN (70 FR 62257). The proposal was to establish Class D airspace, and establish Class E airspace extending upward from the surface of the earth to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class D airspace designations are published in paragraph

5000, and Class E airspace areas designated as surface areas in paragraph 6002, of FAA Order 7400.9N dated September 1, 2005, and effective September 16, 2005, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 establishes Class D airspace at Camp Ripley, MN, and establishes Class E airspace at Camp Ripley, MN, to accommodate aircraft executing instrument flight procedures into and out of Ray S. Miller Army Airfield. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
