#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory  
Commission (NRC) is considering the  
issuance of a license amendment to  
Defense Logistics Agency, Defense  
National Stockpile Center (DLA/DNSC)  
for Materials License No. STC-133, to  
authorize release of its facility in Scotia,  
New York for unrestricted use. NRC has  
prepared an Environmental Assessment  
(EA) in support of this proposed action  
in accordance with the requirements of  
10 CFR Part 51. Based on the EA, the  
NRC has concluded that a Finding of No  
Significant Impact (FONSI) is  
appropriate. The amendment will be  
issued following the publication of this  
Notice.

##### II. EA Summary

The purpose of the proposed action is  
to authorize the release of the licensee's  
Scotia, New York facility for  
unrestricted use. DLA/DNSC was  
authorized by NRC from 1970 to use  
radioactive materials for storage and  
sampling purposes at the Scotia site. On  
January 8, 2005, DLA/DNSC requested  
that NRC release the facility for  
unrestricted use. DLA/DNSC has  
conducted surveys of the facility and  
provided information to the NRC to  
demonstrate that the site meets the  
license termination criteria in Subpart E

of 10 CFR Part 20 for unrestricted  
release.

The NRC staff has prepared an EA in  
support of the license amendment. The  
facility was remediated and surveyed  
prior to the licensee requesting the  
license amendment. The NRC staff has  
reviewed the information and final  
status survey submitted by DLA/DNSC.  
Based on its review, the staff has  
determined that there are no additional  
remediation activities necessary to  
complete the proposed action.  
Therefore, the staff considered the  
impact of the residual radioactivity at  
the facility and concluded that since the  
residual radioactivity meets the  
requirements in Subpart E of 10 CFR  
part 20, a Finding of No Significant  
Impact is appropriate.

##### III. Finding of No Significant Impact

The staff has prepared the EA  
(summarized above) in support of the  
license amendment to release the  
facility for unrestricted use. The NRC  
staff has evaluated DLA/DNSC's request  
and the results of the surveys and has  
concluded that the completed action  
complies with the criteria in Subpart E  
of 10 CFR part 20. The staff has found  
that the radiological environmental  
impacts from the action are bounded by  
the impacts evaluated by NUREG-1496,  
Volumes 1-3, "Generic Environmental  
Impact Statement in Support of  
Rulemaking on Radiological Criteria for  
License Termination of NRC-Licensed  
Facilities" (ML042310492,  
ML042320379, and ML042330385).  
Additionally, no non-radiological or  
cumulative impacts were identified. On  
the basis of the EA, the NRC has  
concluded that there are no significant  
environmental impacts from the  
proposed action, and has determined  
not to prepare an environmental impact  
statement for the proposed action.
