SUPPLEMENTARY INFORMATION:

Background

The U.S. Forest Service has offered a recreational residence program on National Forest System lands since the 1920's. The program was initiated with the objective of encouraging city-dwellers to enjoy the recently established national forests by permitting them to construct vacation homes on specified plots. It expanded through the 1960's to encompass a total of 19,000 cabins nationwide before the program was discontinued.

There are now about 15,000 Forest Service cabins nationwide, each of which is maintained under the terms and conditions of SUPs issued by the managing Forest. Though some cabins have been traded on the open market, many are still owned by the descendants of the individuals who built them.

Eighty-eight (88) recreational residences are located on the Safford Ranger District of the Coronado National Forest near Safford, Arizona: 14 at an area known as Columbine and 74 at Turkey Flat. The owners of these recreational residences hold Forest Service SUPs that allow each unit to be occupied under specific terms and conditions. Restrictions imposed on the use of recreational residences on National Forest System lands include, among other conditions, a prohibition on year-round residency and vacation rental, and constraints on proposed remodeling that would change the footprint or character of a residence.

Special-use permits issued for recreational residences on the Safford Ranger District are scheduled to expire on December 31, 2008. Forest Service Handbook (FSH) 2709.11, Chapter 41.23a(2), requires that special-uses program staff "initiate the analysis and action to issue a new permit 2 years prior to expiration of the current term permit". The Handbook further states that, because "recreation residences have been in place for many years, and experience in administering this use has shown that continuing the use does not cause significant environmental impacts, issuance of a new permit can be made without further environmental documentation" [2709.11, Chapter 41.23a(1)]. However, "if the use has not been analyzed sufficiently as part of an EA or EIS completed within 5 years of permit expiration, (the program must) complete the appropriate environmental analysis and documentation" [2709.11, Chapter 41.23a(1)(b)]. Because NEPA documentation for the SUPs issued for recreational residences on the Safford District was completed more than five years prior to the upcoming permit expiration, the Forest Service has decided to prepare an EIS for the proposed permit renewal action.

Proposed Action

The Forest Service's proposed action is to renew SUPs issued for recreational residences on the Safford Ranger District upon their expiration on December 31, 2008. The renewal period would extend 20 years, from January 1, 2009, through December 31, 2028. Permit holders would be required to abide by all terms and conditions expressed in their respective SUPs and in accordance with the annual Operation and Maintenance (O&M) Plan conveyed with each SUP. (Examples of an SUP and O&M Plan are available for public review on the Coronado National Forest Web site at "<http://www.fs.fed.us/r3/coronado>".) Prior to the renewal of an SUP, each recreational
