

Drive, Billings, Montana, 59101-4669, telephone (701) 227-7730 or (406) 896-5009.

SUPPLEMENTARY INFORMATION: This survey, executed at the request of the Crow Agency, through the Rocky Mountain Regional Director, Bureau of Indian Affairs, Billings, Montana, was necessary to determine Trust and Tribal land.

The lands we surveyed are:

Principal Meridian, Montana

T. 4 S., R. 32 E.

The plat, in 1 sheet, representing the dependent resurvey of a portion of the subdivisional lines and the adjusted original meanders of the former left bank of the Big Horn River, downstream, through sections 14, 15, 22, and 23, the subdivision of sections 14, 15, and 22, and the survey of the meanders of the present left bank of the Big Horn River, downstream, through sections 14, 15, and 22, and certain division of accretion lines in sections 14, 15, and 22, Township 4 South, Range 32 East, Principal Meridian, Montana, was accepted September 28, 2006.

We will place copies of the plat, in 1 sheet, and related field notes we described in the open files. They will be available to the public as a matter of information.

If BLM receives a protest against this survey, as shown on the plat, in 1 sheet, prior to the date of the official filing, we will stay the filing pending our consideration of the protest.

We will not officially file this plat, in 1 sheet, until the day after we have accepted or dismissed all protests and they have become final, including decisions or appeals.

Dated: October 18, 2006.

Thomas M. Deiling,

Chief Cadastral Surveyor, Division of Resources.

DEPARTMENT OF THE INTERIOR

National Park Service

National Register of Historic Places; Notification of Pending Nominations and Related Actions

Nominations for the following properties being considered for listing or related actions in the National Register were received by the National Park Service before October 7, 2006. Pursuant to section 60.13 of 36 CFR part 60 written comments concerning the significance of these properties under the National Register criteria for evaluation may be forwarded by United States Postal Service, to the National

Register of Historic Places, National Park Service, 1849 C St., NW., 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St., NW, 8th floor, Washington, DC 20005; or by fax, 202-371-6447. Written or faxed comments should be submitted by November 8, 2006

John W. Roberts,

Acting Chief, National Register/National Historic Landmarks Program.

BILLING CODE 4312-51-P

**INTERNATIONAL BOUNDARY AND
WATER COMMISSION UNITED
STATES AND MEXICO**
**United States Section; Notice of
Availability of a Draft Final
Environmental Assessment and
Finding of No Significant Impact for
Improvements to the Mission and
Common Levee Systems, in the Lower
Rio Grande Flood Control Project,
Located in Hidalgo County, TX**

AGENCY: United States Section,
International Boundary and Water
Commission (USIBWC), United States
and Mexico.

ACTION: Notice of Availability of Draft
Environmental Assessment (EA) and
Finding of No Significant Impact
(FONSI).

SUMMARY: Pursuant to Section 102(2)(c)
of the National Environmental Policy
Act of 1969; the Council on
Environmental Quality Final
Regulations (40 CFR parts 1500 through

1508); and the United States Section's
Operational Procedures for
Implementing Section 102 of NEPA,
published in the **Federal Register**
September 2, 1981, (46 FR 44083); the
United States Section hereby gives
notice that the Draft Environmental
Assessment and Finding of No
Significant Impact for *Improvements to
the Mission and Common Levee
Systems*, in the Lower Rio Grande Flood
Control Project, located in Hidalgo
County, Texas are available.

FOR FURTHER INFORMATION CONTACT:

Gilbert G. Anaya, Supervisory
Environmental Protection Specialist;
Environmental Management Division;
United States Section, International
Boundary and Water Commission; 4171
N. Mesa, C-100; El Paso, Texas 79902.
Telephone: (915) 832-4702, e-mail:
gilbertanaya@ibwc.state.gov.

SUPPLEMENTAL INFORMATION:**Background**

The USIBWC is authorized to
construct, operate, and maintain any
project or works projected by the United
States of America on the Lower Rio
Grande Flood Control Project (LRGFCP)
as authorized by the Act of the 74th
Congress, Sess. I Ch. 561 (H.R. 6453),
approved August 19, 1935 (49 Stat. 660),
and codified at 22 U.S.C. Section 277,
277a, 277b, 277c, and Acts amendatory
thereof and supplementary thereto. The
LRGFCP was constructed to protect
urban, suburban, and highly developed
irrigated farmland along the Rio Grande
delta in the United States and Mexico.

The USIBWC, in cooperation with the
TPWD, prepared this Draft
Environmental Assessment (Draft EA)
for the proposed action of raising the
Mission and Common Levee Systems
located in Hidalgo County, Texas to
improve flood control. These two
adjacent levee systems are part of the
LRGFCP that extends approximately 180
miles from the Town of Peñitas in south
Texas to the Gulf of Mexico. The
Mission Levee extends approximately
12 miles along the Rio Grande,
downstream from the Town of Peñitas.
The Common Levee System,
approximately 5.3 miles long, consists
of the Common Levee and Anzalduas
Dike, which connects the Common
Levee to Anzalduas Dam.

Proposed Action

The Proposed Action would increase
flood containment capacity of the
Mission and Common Levee Systems to
meet the 3-foot freeboard design
criterion for flood protection. Height
increases between 2 and 6 feet are
typically needed to reach the design

freeboard value throughout the Mission
Levee System. For the Common Levee,
typical increases in levee height range
from 3 to 8 feet, and for the Anzalduas
Dike, from 0 to 4 feet. The increase in
levee height will also expand the levee
footprint by lateral extension of the
structure.

Along with the increase in levee
height, structural improvements will
also be required for levee segments
throughout the downstream reach of the
Mission Levee and the Common Levee
System where seepage is a potential
problem. These improvements will
consist of either a slurry cutoff barrier
or a riverside impermeable liner.

Alternatives to the Proposed Action

A *No Action Alternative* was
evaluated for the Mission and Common
Levee Systems. This alternative will
retain the existing configuration of the
two systems, as designed over 30 years
ago, and the current level of protection
currently associated with this system.
Under severe storm events, current
containment capacity may be
insufficient to fully control Rio Grande
flooding, with risks to personal safety
and potential property damage.

Summary of Findings

Pursuant to National Environmental
Policy Act (NEPA) guidance (40 Code of
Federal Regulations 1500-1508), The
President's Council on Environmental
Quality issued regulations for NEPA
implementation which included
provisions for both the content and
procedural aspects of the required
Environmental Assessment. The
USIBWC completed an EA of the
potential environmental consequences
of raising the Mission and Common
Levee Systems to meet current
requirements for flood control. The EA,
which supports this Finding of No
Significant Impact, evaluated the
Proposed Action and No Action
Alternative.

Mission Levee System Evaluation*No Action Alternative*

The No Action Alternative was
evaluated as the single alternative action
to the Proposed Action. The No Action
Alternative will retain the current
configuration of the Mission Levee
System, with no impacts to biological
and cultural resources, land use,
community resources, or environmental
health issues. In terms of flood
protection, however, current
containment capacity under the No
Action Alternative may be insufficient
to fully control Rio Grande flooding
under severe storm events, with
