Respondents/Affected Entities: State and local agencies; members of the public.

Estimated Number of Respondents: 5,220.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 9,595.

Estimated Total Annual Cost: \$296,603, which includes \$100 annualized capital or O&M costs and \$296,500 annual labor costs.

Changes in the Estimates: There is a decrease of 6,245 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR. This adjustment is due to using actual data of the state and local officials requesting OCA data and the public visiting reading rooms. The previous ICR estimated that all 50 states plus U.S. territories and D.C. and at least 1,000 of the 1,500 active LEPCs will be requesting OCA data. However, EPA only received requests for OCA data from 9 LEPCs and 240 state officials in the past three years. The public burden and costs have also decreased from the previous ICR, due to the actual number of people that have visited the federal, state and local reading rooms.

SUPPLEMENTARY INFORMATION:

Notification of EAB Final Decision

The IEPA, acting under authority of a PSD delegation agreement, issued a PSD permit to Indeck-Elwood, LLC on October 10, 2003, granting approval to construct a coal-fired steam electric generating station in Elwood, Will County, Illinois. The American Lung Association of Metropolitan Chicago, Citizens Against Ruining the Environment, the Clean Air Task Force, Lake County Conservation Alliance, and the Sierra Club filed a petition for review with the EAB on November 17, 2003. The EAB denied in part, and remanded in part, the petition on September 27, 2006. The EAB remands the permit on the following issues: The inclusion of Source-Wide Condition 9, which allows Indeck Elwood to construct a power plant with less capacity than addressed by the permit applicant; IEPA's soils and vegetation analysis; the permit's substitution of work and operational practices for Best Available Control Technology numeric limits during start-up, shut-down, and malfunction events; and the permit's particulate matter emissions limits and the absence of a limitation for condensable particulate matter. On all other issues, review is denied.
