

significant policy and institutional reforms over the last several years. After being selected as a Threshold Program Country in FY06, the Government of Moldova proposed an ambitious anti-corruption Threshold Program and improved its performance on the "Control of Corruption" indicator from the 46th percentile to the 55th percentile.

- *Ukraine*: For the first time, Ukraine also passes the MCA selection eligibility criteria and has made significant improvements on all of the indicators in the "Ruling Justly" category. In addition, Ukraine passes one of the new supplementary Natural Resources Management indices. Ukraine was selected as a Threshold country in FY06, and in June 2006, the Board approved its Threshold program which is focused on accelerating anti-corruption efforts. MCC expects that implementation of Ukraine's Threshold Program will begin soon and will bolster the Government of Ukraine's reform efforts.

- *Jordan*: Jordan passes the MCA selection eligibility criteria, including "Control of Corruption," and has demonstrated its commitment to MCC principles through home-grown democratic reform initiatives, which MCC is currently supporting through the implementation of the Threshold Program agreement signed in October, 2006. Jordan has made significant reform commitments in its Threshold Program and MCC will require successful implementation of the Threshold Program as the Government of Jordan works to develop and implement a Compact. A Compact in Jordan could have a transformation impact as structural reforms over the last decade have liberalized the private investment regime, opened the trade environment, and established modern regulation and institutions for private sector development.

Finally, a number of countries that performed well on the quantitative elements of the selection criteria (i.e., on the policy indicators) were not chosen as eligible countries for FY07. As discussed above, the Board considered a variety of factors in addition to the country's performance on the policy indicators in determining whether they were appropriate candidates for assistance (e.g., the country's commitment to fighting corruption and promoting democratic governance; the availability of appropriated funds; and in which countries MCC would likely have the best opportunity to reduce poverty, generate economic growth and have a transformational impact).

Selection for Compact Negotiation

The Board also authorized MCC to seek to negotiate a Compact, as described in Section 609 of the Act, with each of the eligible countries identified above that develops a proposal that justifies beginning such negotiations. MCC will initiate the process by inviting newly eligible countries to submit program proposals to MCC (previously eligible countries will not be asked to submit another proposal for FY07 assistance). MCC has posted guidance on the MCC Web site (<http://www.mcc.gov>) regarding the development and submission of MCA program proposals. Submission of a proposal is not a guarantee that MCC will finalize a Compact with an eligible country. Any MCA assistance provided under Section 605 of the Act will be contingent on the successful negotiation of a mutually agreeable Compact between the eligible country and MCC, approval of the Compact by the Board, and availability of funds.

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-7102]

Notice of Consideration of Amendment Request for Decommissioning for Shieldalloy Metallurgical Corporation, Newfield, NJ and Opportunity to Request a Hearing

Commission.

ACTION: Notice of amendment request
and opportunity to request a hearing.

filed by January 16, 2007.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory
Commission (NRC) is considering
issuance of a license amendment to
Source Material License No. SMB-743
issued to Shieldalloy Metallurgical
Corporation (SMC or the licensee), to
authorize the decommissioning of its
Newfield Facility in Newfield, New
Jersey. SMC submitted its revised
Decommissioning Plan (DP) to NRC on
June 30, 2006, and by letter to SMC
dated October 18, 2006, the NRC found
the DP acceptable to begin a detailed
technical review of its adequacy.

II. Background

SMC has been conducting smelting
and alloy production at its Newfield site
since 1940, including past production of
chromium metal, ferrovanadium and
columbium nickel. Ferroalloy
production began in 1955 and ended in
June 1998. The SMC facility processed
pyrochlore, a concentrated ore
containing columbium (niobium), to
produce ferrocolumbium, an additive/
conditioner used in the production of
specialty steel and super alloy
additives. Pyrochlore contains more

than 0.05 percent by weight thorium
and uranium, and this material is
therefore regulated by the NRC as source
material. SMC was licensed by the NRC
to ship, receive, possess, use and store
source material under license SMB-743.
In August 2001, SMC notified the NRC
that it had ceased production activities
using source material. On August 27,
2001, the licensee provided notification
of its intent to decommission the
facility. The license is in timely
renewal, and was amended on
November 4, 2002 to authorize only
decommissioning activities.

SMC submitted its initial DP to the
NRC on October 21, 2005. The DP
proposed the use of a possession only
license for long term control of the site.
The NRC staff rejected the initial DP by
letter dated January 26, 2006. The staff
met with SMC (in a meeting open to the
public) on March 9, 2006, to discuss the
initial DP's deficiencies and a path
forward for development of an
acceptable DP. Pursuant to comments
received at the March 2006 meeting,
SMC submitted its revised DP by letter
dated June 30, 2006.

If the NRC approves the DP, the
approval will be documented in an
amendment to NRC License No. SMB-
743. However, before approving the
proposed amendment, the NRC will
need to make the findings required by
the Atomic Energy Act of 1954, as
amended, and NRC's regulations. These
findings will be documented in a Safety
Evaluation Report and an
Environmental Impact Statement.

III. Opportunity to Request a Hearing

The NRC hereby provides notice that
