

water for drinking and cooking. Study participants will be selected from geographical areas of each state where groundwater is known or suspected to contain contaminants of public health concern. We will administer a

questionnaire at each household to obtain information on selection of water treatment type, adherence to suggested maintenance, and reasons for use of treatment device. We will also obtain samples of treated water and untreated

well water at each household to analyze for contaminants of public health concern. There is no cost to respondents other than their time.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Types of data collection	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Participant Solicitation Telephone Questionnaire	1200	1	5/60	100
Household Questionnaire	600	1	20/60	200
Total				300

Dated: February 14, 2006.

Joan F. Karr,
Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Proposed Collection; Comment Request; NCCAM Customer Service Data Collection

Summary: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, for opportunity for public comment on proposed data collection projects, the National Center for Complementary and Alternative Medicine (NCCAM), at the National Institutes of Health (NIH), will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Proposed Collection: Title: NCCAM Customer Service Data Collection. Type

of Information Collection Request: Renewal. Need and Use of Information Collection: NCCAM provides the public, patients, families, health care providers, complementary and alternative medicine (CAM) practitioners, and others with the latest scientifically based information on CAM and information about NCCAM's programs through a variety of channels, including its toll-free telephone information service and its quarterly newsletter. To ensure that NCCAM is effectively serving all audiences, NCCAM needs to continue to measure customer satisfaction with NCCAM telephone interactions and the NCCAM newsletter and to assess which audiences are being reached through these channels. This effort involves a telephone survey consisting of 10 questions, which are asked of 25 percent of all callers, for an annual total of approximately 1,210 respondents; a print newsletter survey consisting of 10 questions, which is sent to all print newsletter subscribers, for an annual total of approximately 339 respondents; and an online newsletter survey consisting of 14 questions, which all visitors to the newsletter page on the NCCAM Web site have the option of

completing until an annual total of 500 responses are received. NCCAM uses the data collected from the surveys to characterize NCCAM users and help program staff measure user satisfaction, assess impact of their communication efforts, tailor services to the public and health care providers, measure service use among special populations, and assess the most effective media and messages to reach these audiences. Frequency of Response: Once for the telephone survey, and three times for the newsletter survey (once every year to measure any changes in customer satisfaction and/or audience profile). Affected Public: Individuals and households. Type of Respondents: For the telephone survey, patients, spouses/family/friends of patients, health care providers, physicians, CAM practitioners, or other individuals contacting the NCCAM Clearinghouse; for the print newsletter survey, subscribers to the print NCCAM newsletter; and for the online newsletter survey, visitors to the newsletter page on NCCAM's Web site.

The annual reporting burden is as follows.

Type of respondents	Estimated number of respondents	Estimated number of responses per respondent	Average burden hours per response	Estimated total annual burden hours requested
Telephone survey: Individuals or households	1,210	1	0.075	91
Newsletter survey (print): Individuals or households	339	1	0.050	17
Newsletter survey (online): Individuals or households	500	1	0.050	25
Annualized totals	2,049			133

The annualized cost to respondents is estimated at \$1,770 for the telephone survey, \$507 for the print newsletter survey, and \$714 for the online

newsletter survey. There are no Capital Costs to report. There are no Operating or Maintenance Costs to report.

Request for Comments: Written comments and/or suggestions from the public and affected agencies are invited on the following points: (1) Whether the

proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

For Further Information Contact: To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Christy Thomsen, Director, Office of Communications and Public Liaison, NCCAM, 31 Center Drive, Room 2B11, Bethesda, MD 20892-2182; or fax your request to 301-402-4741; or e-mail thomsenc@mail.nih.gov. Ms. Thomsen can be contacted by telephone at 301-451-8876.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

Dated: February 14, 2006.

Christy Thomsen,

Director, Office of Communications and Public Liaison, National Center for Complementary and Alternative Medicine, National Institutes of Health.

National Institutes of Health

Statement of Organization, Functions, and Delegations of Authority

Part N, National Institutes of Health, of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (HHS) (40 FR 22859, May 27, 1975, as amended most recently at 69 FR 64081, November 3, 2004, and redesignated from Part HN as Part N at 60 FR 56606, November 9, 1995), is amended as set forth below to reflect the reorganization of the National Human Genome Research Institute, Division of Intramural Research, by establishing (1) the Molecular Neurogenetics Section in the Medical Genetics Branch and (2) the

Vascular Biology Section in the Genome Technology Branch. The sections are transferring from, respectively, the National Heart, Lung, and Blood Institute and the National Institute of Mental Health.

Section N-B, Organization and Functions, under the heading National Human Genome Research Institute (N4, formerly HN4), Division of Intramural Research (N45, formerly HN45) is amended as follows:

(1) In the Genome Technology Branch (N455, formerly HN455), immediately after the paragraph on Genomic Functional Analysis Section (N4556, formerly HN 4556), insert the following:

Vascular Biology Section (N4557, formerly HN 4557). Conducts clinical and laboratory investigations in the molecular mechanisms of cardiovascular disease including vascular cell biology, gene therapy, and cell cycle regulation of vascular cells.

(2) In the Medical Genetics Branch (N456, formerly HN456), immediately after the paragraph on Vertebrate Embryology Section (N4567, formerly HN4567), insert the following:

Molecular Neurogenetics Section (N4568, formerly HN 4568). (1) Conducts clinical and basic research into the factors contributing to the phenotypic variation observed in monogenic diseases, using Gaucher disease as a prototype disorder; (2) investigates the relationship between Gaucher disease and parkinsonism; and (3) explores new therapeutic approaches for Gaucher disease.

Delegations of Authority

All delegations and redelegations of authority to officers and employees of NIH that were in effect immediately prior to the effective date of this amendment and are consistent with this amendment shall continue in effect, pending further redelegation.

Dated: February 8, 2006.

Elias A. Zerhouni,

Director, National Institutes of Health.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning

opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: Mandatory Guidelines for Federal Workplace Drug Testing Programs (OMB NO. 0930-0158)—Revision

SAMHSA's Mandatory Guidelines for Federal Workplace Drug Testing Programs will request OMB approval for the Federal Drug Testing Custody and Control Form for Federal agency and federally regulated drug testing programs which must comply with the HHS Mandatory Guidelines for Federal Workplace Drug Testing Programs (69 FR 19644) dated April 13, 2004, and for the information provided by laboratories for the National Laboratory Certification Program (NLCP).

The Federal Drug Testing Custody and Control Form is used by all Federal agencies and employers regulated by the Department of Transportation to document the collection and chain of custody of urine specimens at the collection site, for laboratories to report results, and for Medical Review Officers to make a determination. The Federal Drug Testing Custody and Control Form approved by OMB three years ago is being resubmitted for OMB approval without any revision.

Prior to an inspection, a laboratory is required to submit specific information regarding its laboratory procedures. Collecting this information prior to an inspection allows the inspectors to thoroughly review and understand the laboratory's testing procedures before arriving at the laboratory.

The NLCP application form has not been revised compared to the previous form.
