

1. Whether the regulation is consistent with CPSC program goals.
2. Whether the regulation is consistent with other CPSC regulations.
3. Whether the regulation is current with respect to technology, economic, or market conditions, and other mandatory or voluntary standards.
4. Whether the regulation can be streamlined to minimize regulatory burdens, particularly any such burdens on small entities.

For each regulation being reviewed, please provide any specific recommendations for change(s), if viewed as necessary, a justification for the recommended change(s), and, with respect to each suggested change, a statement of the way in which the change can be accomplished within the statutory framework of the CPSA, FHSA, FFA, or PPPA, as applicable.

Comments and other submissions should be captioned "Fiscal Year 2006 Regulatory Review Project" and e-mailed to cpsc-os@cpsc.gov or faxed to (301) 504-0127. Comments or other submissions may also be mailed or delivered to the Office of the Secretary, Consumer Product Safety Commission, Room 502, 4330 East-West Highway, Bethesda, Maryland 20814. All comments and other submissions must be received by August 7, 2006.

Dated: May 31, 2006.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355-01-P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[CGD08-06-005]

RIN 1625-AA09

Drawbridge Operation Regulations; Arkansas Waterway, AR

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to change the operational language concerning the Rob Roy Drawbridge across the Arkansas Waterway at Mile 67.4 at Pine Bluff, Arkansas, the Baring Cross Railroad Drawbridge across the Arkansas Waterway at Mile 119.6 at Little Rock, Arkansas, and the Van Buren Railroad Drawbridge across the Arkansas Waterway at Mile 300.8 at Van Buren, Arkansas, to reflect the actual

procedures currently being followed. The Coast Guard is also proposing to remove the regulations governing the following three bridges because they are locked in the open-to-navigation position and are no longer considered to be drawbridges: Missouri Pacific Railroad Drawbridge (Benzal Railroad Drawbridge) across the Arkansas Waterway at Mile 7.6 at Benzal, Arkansas, the Rock Island Railroad Drawbridge across the Arkansas Waterway at Mile 118.2 at Little Rock, Arkansas, and the Junction Railroad Drawbridge across the Arkansas Waterway at Mile 118.7 at Little Rock, Arkansas. These revisions will make the regulations concerning the Arkansas River clearer, thus the mariners transiting the river will be able to transit the river with greater ease.

DATES: Comments and related material must reach the Coast Guard on or before August 7, 2006.

ADDRESSES: You may mail comments and related material to Commander, Eighth Coast Guard District, Bridge Branch, 1222 Spruce Street, St. Louis, MO 63103-2832. Commander (dwb) maintains the public docket for this rulemaking. Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, will become part of this docket and will be available for inspection or copying at room 2.107f in the Robert A. Young Federal Building, Eighth Coast Guard District, between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Roger K. Wiebusch, Bridge Administrator, (314) 539-3900, extension 2378.

SUPPLEMENTARY INFORMATION:

Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related material. If you do so, please include your name and address, identify the docket number for this rulemaking [CGD08-06-005], indicate the specific section of this document to which each comment applies, and give the reason for each comment. Please submit all comments and related material in an unbound format, no larger than 8½ by 11 inches, suitable for copying. If you would like to know they reached us, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period. We may change this proposed rule in view of them.

Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for a meeting by writing to the Eighth Coast Guard District, Bridge Branch, at the address under **ADDRESSES** explaining why one would be beneficial. If we determine that a meeting would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

Background and Purpose

The Arkansas Waterway is a part of the McClellan-Kerr Arkansas River Navigation System. The System rises in the vicinity of Catoosa, Oklahoma, and embraces improved natural waterways and a canal to empty into the Mississippi River in southeast Arkansas. The Arkansas Waterway Drawbridge Operation Regulations contained in § 117.123(a), state that the Cotton Belt Railroad (Rob Roy) Bridge, mile 67.4, requires the use of ship's horns and flashing lights on the bridge to communicate between mariners requesting openings and railroad dispatchers remotely operating the bridge. Although not stated in § 117.123(a), records indicate that the method of communication outlined in § 117.123(a) was to be used by mariners and the remote bridge operator as a back-up means of communications. The Coast Guard, however, has determined that the primary method of communications outlined in § 117.123(a) has not been used during the past 20 years. It is doubtful that the system of horns and flashing lights was ever used. Instead, mariners and remote bridge operators have communicated via VHF-FM radiotelephone for opening the Rob Roy Drawbridge. The Coast Guard also determined that editorial changes were needed to correct inaccuracies in the specific requirements for the Baring Cross Railroad Drawbridge and the Van Buren Railroad Drawbridge. Three bridges on the Arkansas Waterway: The Missouri Pacific Railroad Drawbridge (Benzal Railroad Drawbridge) at mile 7.6, the Rock Island Railroad Drawbridge at Mile 118.2, and the Junction Railroad Drawbridge at Mile 118.7, have all been removed from rail service. Meetings with the owners indicate that all three bridges have been permanently locked in the open-to-navigation position and that there are plans to convert them into fixed pedestrian bridges in the future. Therefore, they are considered fixed bridges and should not be included in the drawbridge regulations section of the CFR. Section (a) of § 117.139 references the § 117.123 cite for the

Missouri Pacific Railroad Drawbridge (Benzal Railroad Drawbridge), mile 7.6, so section (a) also requires removal from the regulations. Therefore, sections (b) and (c) of § 117.139 will need to be re-alphabetized.

Discussion of Proposed Rule

The proposed changes to § 117.123 and § 117.139 will correct inaccuracies as follows: (a) A complete rewrite of § 117.123(a) to show the proper operating procedures for the Rob Roy Bridge; (b) A deletion of two bridges (Rock Island Railroad Drawbridge and the Junction Railroad Drawbridge) from § 117.123(b) that are no longer drawbridges and a rewrite of this section to accurately reflect the remote operation of the remaining bridge, the Baring Cross Railroad Bridge; (c) Delete the Missouri Pacific Railroad Drawbridge (Benzal Railroad Drawbridge) from § 117.123(c) as it is no longer a drawbridge and make minor edits to § 117.123(c) for the Van Buren Railroad Drawbridge to make it consistent with the other drawbridges found in § 117.123; and (d) Remove § 117.139(a) in its entirety as it is no longer applicable because the subject bridge is no longer a drawbridge.

Regulatory Evaluation

This rule is not a “significant regulatory action” under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. It is not “significant” under the regulatory policies and procedures of the Department of Homeland Security.

The Coast Guard expects that these changes will have a minimal economic impact on commercial traffic operating on the Arkansas Waterway. The procedures are already in place at the three active drawbridges, the other three drawbridges have been locked in the open-to-navigation position, and the changes to the CFR documents the procedures.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule would not have a significant economic impact on a substantial number of small entities. This proposed rule is neutral to all business entities since it affects only how the vessel operators request bridge openings.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule so that they could better evaluate its effects on them and participate in the rulemaking. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact Mr. Roger K. Wiebusch, Bridge Administrator, Eighth Coast Guard District, Bridge Branch, at (314) 539–3900, extension 2378.

Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for Federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this proposed rule under that Order and have determined that it does not have implications for Federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This proposed rule would not affect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes.

Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these

standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Commandant Instruction M16475.1D, which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded that there are no factors in this case that would limit the use of a categorical exclusion under section 2.B.2 of the Instruction. Therefore this rule is categorically excluded under figure 2–1, paragraph 32(e) of the Instruction from further environmental documentation. Paragraph 32(e) excludes the promulgation of operating regulations or procedures for drawbridges from the environmental documentation requirements of the National Environmental Policy Act (NEPA). Since this proposed regulation would alter the normal operating conditions of the drawbridge, it falls within this exclusion. A “Categorical Exclusion Determination” is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 117

Bridges.

Regulations

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; Department of Homeland Security Delegation No. 0170.1; 33 CFR 1.05–1(g); section 117.255 also issued under the authority of Public Law 102–587, 106 Stat. 5039.

2. Replace the current § 117.123 in full with an amended § 117.123 as follows:

§ 117.123 Arkansas Waterway—Automated Railroad Bridges.

(a) Across the Arkansas Waterway, the draw of the Rob Roy Drawbridge, mile 67.4 at Pine Bluff, Arkansas, is

maintained in the closed position and is remotely operated. Any vessel requiring an opening of the draw shall establish contact by radiotelephone with the remote drawbridge operator on VHF–FM Channel 12 in Omaha, Nebraska. The remote drawbridge operator will advise the vessel whether the bridge can be immediately opened and maintain constant contact with the vessel until the span has opened and the vessel passage has been completed. The bridge is equipped with a Photoelectric Boat Detection System to prevent the span from lowering if there is an obstruction under the span. If the drawbridge cannot be opened immediately, the remote drawbridge operator shall notify the calling vessel and provide an estimated time for opening.

(b) Across the Arkansas Waterway, the draw of the Baring Cross Railroad Drawbridge, mile 119.6 at Little Rock, Arkansas, is maintained in the closed position and is remotely operated. Use the following procedures to request an opening of this bridge when necessary for transit:

(1) *Normal Flow Procedures.* Any vessel which requires an opening of the draw of this bridge shall establish contact by radiotelephone with the remote drawbridge operator on VHF–FM Channel 13 in North Little Rock, Arkansas. The remote drawbridge operator will advise the vessel whether the requested span can be immediately opened and maintain constant contact with the vessel until the requested span has opened and the vessel passage has been completed. If the drawbridge cannot be opened immediately, the remote drawbridge operator will notify the calling vessel and provide an estimated time for a drawbridge opening.

(2) *High Velocity Flow Procedures.* The area from mile 118.2 to mile 125.4 is a regulated navigation area (RNA) as described in § 165.817. During periods of high velocity flow, which is defined as a flow rate of 70,000 cubic feet per second or greater at the Murray Lock and Dam, mile 125.4, downbound vessels which require that the draw of this bridge be opened for unimpeded passage shall contact the remote drawbridge operator on VHF–FM Channel 13 either before departing Murray Lock and Dam, or before departing the mooring cells at Mile 121.5 to ensure that the Baring Cross Railroad Drawbridge is opened. The remote drawbridge operator shall immediately respond to the vessel’s call, ensure that the drawbridge is open for passage, and ensure that it remains in the open position until the downbound vessel has passed through. If it cannot

be opened immediately for unimpeded passage in accordance with § 163.203, the remote drawbridge operator will immediately notify the downbound vessel and provide an estimated time for a drawbridge opening. Upbound vessels shall request openings in accordance with the normal flow procedures as set forth above. The remote drawbridge operator shall keep all approaching vessels informed of the position of the drawbridge span.

(c) Across the Arkansas Waterway, the draw of the Van Buren Railroad Drawbridge, mile 300.8 at Van Buren, Arkansas, is maintained in the open position except as follows:

(1) When a train approaches the bridge, amber lights attached to the bridge begin to flash and an audible signal on the bridge sounds. At the end of 10 minutes, the amber light continues to flash; however, the audible signal stops and the draw lowers and locks if the photoelectric boat detection system detects no obstruction under the span. If there is an obstruction, the draw opens to its full height until obstruction is cleared.

(2) After the train clears the bridge, the draw opens to its full height, the amber flashing light stops, and the mid channel lights change from red to green, indicating the navigation channel is open for the passage of vessels.

§ 117.139 [Amended]

3. In § 117.139(a) remove paragraph (a) and redesignate paragraphs (b) and (c) as paragraphs (a) and (b), respectively.

Dated: May 16, 2006.

Ronald W. Branch,

Captain, U.S. Coast Guard, Commander, Eighth Coast Guard District, Acting.
