DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2630-004]

PacifiCorp, Oregon; Notice of Availability of Final Environmental Assessment

September 28, 2006.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed the application

for a new license for the Prospect Nos. 1, 2, and 4 Hydroelectric Project, located on the Rogue River, Middle Fork Rogue River, and Red Blanket Creek in Jackson County, Oregon, and has prepared a Final Environmental Assessment (Final EA) for the project. The Final EA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

A copy of the Final EA is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket, visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

B. What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the Paperwork Reduction Act (PRA), EPA is soliciting comments and information to enable it to:

(1) Evaluate whether the proposed collections of information are necessary for the proper performance of the functions of the Agency, including

whether the information will have practical utility.

(2) Evaluate the accuracy of the Agency's estimates of the burdens of the proposed collections of information.

(3) Enhance the quality, utility, and clarity of the information to be collected.

(4) Minimize the burden of the collections of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies or other forms of information technology, e.g., permitting electronic submission of responses.

C. What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

II. ICRs To Be Renewed

A. For All ICRs

The Agency computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved ICRs listed in this notice. Where applicable, the Agency identified specific tasks and made assumptions, while being consistent with the concept of the PRA.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions to; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and

requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The listed ICRs address Clean Air Act information collection requirements in standards (*i.e.*, regulations) which have mandatory recordkeeping and reporting requirements. Records collected under the New Source Performance Standards (NSPS) must be retained by the owner or operator for at least two years and the records collected under the National Emission Standards for Hazardous Air Pollutants (NESHAP) must be retained by the owner or operator for at least five years. In general, the required collections consist of emissions data and other information deemed not to be private.

In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis as required by the Clean Air Act.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless the Agency displays a currently valid OMB control number. The OMB control numbers for EPA's regulations under Title 40 of the Code of Federal Regulations are published in the **Federal Register**, or on the related collection instrument or form. The display of OMB control numbers for certain EPA regulations is consolidated at 40 CFR part 9.

Affected Entities: Entities potentially affected by this action are new residential wood heaters.

Abstract: The Standards of Performance for New Stationary Sources, New Residential Wood Heaters, were proposed on February 18, 1987, promulgated on February 26, 1988, and are found at 40 CFR part 60, subpart AAA. The standards apply to each wood heater manufactured on or after July 1, 1988, or sold at retail on or after July 1, 1990. Wood heaters manufactured on or after July 1, 1990, or sold at retail on or after July 1, 1992, must meet more stringent emission standards. Two features of this rulemaking are unique to the New Source Performance Standard (NSPS) program. First, these standards were negotiated by representatives of groups affected by the NSPS, including those groups which are burdened by the information collection activities. Second, these regulations established a certification program instead of the usual NSPS requirement that each affected facility demonstrates compliance through new source review and testing. Under this certification program, a single wood heater is tested to demonstrate compliance for an entire model line. The certification approach significantly reduces the compliance burden, including information collection, for the manufacturers of wood heaters.

Wood heater manufacturers, testing laboratories, and retailers are required to submit reports and/or to maintain records that demonstrate compliance.
