BILLING CODE 6730-01-P

FEDERAL MARITIME COMMISSION
Ocean Transportation Intermediary License Revocations

The Federal Maritime Commission hereby gives notice that the following Ocean Transportation Intermediary licenses have been revoked pursuant to section 19 of the Shipping Act of 1984 (46 U.S.C. app. 1718) and the regulations of the Commission pertaining to the licensing of Ocean Transportation Intermediaries, effective on the corresponding date shown below:

- License Number:* 014399N.
Name: Philcon, Inc.
Address: 1025 Industrial Drive, Bensenville, IL 60106.
Date Revoked: December 20, 2005.
Reason: Surrendered license voluntarily.
License Number : 016430N.
Name: R.E. Rogers, Inc.
Address: 23824 Hawthorne Blvd., Suite 201, Torrance, CA 90505.
Date Revoked: January 6, 2006.
Reason: Surrendered license voluntarily.
License Number: 014410N.
Name: Tropical Shipping International Ltd.
Address: 821 Avenue E, Riviera Beach, FL 33404.
Date Revoked: December 7, 2005.
Reason: Surrendered license voluntarily.

Sandra L. Kusumoto,
Director, Bureau of Certification and Licensing.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these requests, call the CDC Reports Clearance Officer at (404) 639-4766 or send an e-mail to omb@cdc.gov. Send written comments to CDC Desk Officer, Office of Management and Budget, Washington, DC or by fax to (202) 395-6974. Written comments should be received within 30 days of this notice.

Proposed Project

Evaluation and Assessment of the Effectiveness of Activities Supporting Fire Prevention and Safety—New—The National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

This project will evaluate the effectiveness of fire safety and prevention education for second grade children and identify program components that contribute to successful outcomes. The fire safety prevention education programs are delivered by fire department personnel and funded by the United States Fire Administration's (USFA) Assistance to Firefighters Grant Program (AFGP). Deaths from fires and burns are the sixth most common cause of unintentional injury-related deaths in the United States with over three fourths of fire-related deaths and three fourths of fire-

related injuries the result of house fires. Children are particularly at high risk for injury with residential fire deaths rates approximately two times that of adult age groups. The prevention programs that are funded by AFGP provide local fire departments with resources to conduct fire safety education for elementary school children. None of these programs has been systematically evaluated to determine impact on fire safety knowledge, skills, and behaviors. The proposed project does not assume a direct link from knowledge, skills, and behaviors to reductions in fire death rates; however, these intermediate outcomes may predispose and enable children to protect themselves from fire-related injury.

Children's knowledge, skills, and behaviors will be studied as a function of time (pre-, immediate post-, and 6 month post-intervention), geographic setting (urban, rural, and suburban) and instructional format (classroom, safety trailer, and classroom + safety trailer). The design used in this study is a 3 x 4 factorial design with repeated measures. A survey will be used to assess children's fire safety knowledge, skills, and behaviors. Information will be also collected from the children's parents on fire safety activities within the home.

Teachers, school administrators, and the fire fighters delivering the program will complete surveys to gather information on messages delivered, props used, and possible additional exposures to fire safety education. Information will also be collected regarding the school and fire department personnel's perceptions about program sustainability and the relationship between the fire department and school. The only cost to the respondents is the time involved to complete the survey. The estimated total burden hours are 3276.

ESTIMATE OF ANNUALIZED BURDEN TABLE

Type of respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hours)
Fire Fighters	24	2	15/60
2nd Grade Children	2400	3	20/60
Parents of 2nd Grade Children	2400	2	10/60
Teachers of 2nd Grade Children	96	2	15/60
School Administrators	48	1	20/60

Dated: February 1, 2006.

Betsey Dunaway,

Acting Reports Clearance Officer, Centers for Disease Control and Prevention.

Proposed Project

Possession, Use, and Transfer of Select Agents and Toxins (OMB Control No. 0920-0576)—Revision—Office of the Director (OD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Public Health Security and Bioterrorism Preparedness and Response Act of 2002 (Pub. L. 107-188) specifies that the Secretary of Health and Human Services (HHS) shall provide for the establishment and enforcement of standards and procedures governing the possession, use, and transfer of select agents and toxins that have the potential to pose a severe threat to public health and safety. The Act specifies that entities that possess, use, and transfer these select agents register with the HHS Secretary. The HHS Secretary has designated CDC as the agency responsible for collecting this information.

CDC is requesting continued OMB approval to collect this information through the use of five separate forms. These forms are: (1) Application for Registration, (2) Request to Transfer Select Agent or Toxin, (3) Report of Theft, Loss, or Release of Select Agent and Toxin, (4) Report of Identification of Select Agent or Toxin, and (5) Request for Exemption.

The Application for Registration (42 CFR 73.7(d)) is used by entities to register with CDC. The Application for Registration requests facility information; a list of select agents or toxins in use, possession, or for transfer by the entity; characterization of the select agent or toxin; and laboratory information. Estimated average time to complete this form is 3 hours, 45 minutes for an entity with one principal investigator working with one select agent or toxin. CDC estimates that entities will need an additional 45 minutes for each additional investigator or agent. In our regulatory analysis, we have estimated that 70% of the 350 entities have 1-3 principal investigators, 15% have 5 principal investigators, and 15% have 10 principal investigators. We have used these figures to calculate the burden for this section. Estimated burden for the Application for Registration is 2,191 hours.

Entities may amend their registration (42 CFR 73.7(h)(1)) if any changes occur in the information submitted to CDC. To apply for an amendment to a certificate of registration, an entity must obtain the relevant portion of the application package and submit the information requested in the package to CDC. Estimated time to amend a registration package is 1 hour.

The Request to Transfer Select Agent or Toxin form (42 CFR 73.16) is used by entities requesting transfer of a select agent or toxin to their facility and by the entity transferring the agent. CDC revised the Request to Transfer Select Agent or Toxin form by removing the requirement that entities provide written notice within five business days when select agents or toxins are consumed or destroyed after a transfer. Estimated average time to complete this form is 1 hour, 30 minutes.

The Report of Theft, Loss, or Release of Select Agent and Toxin form (42 CFR 73.19(a)(b)) must be completed by entities whenever there is theft, loss, or release of a select agent or toxin. Estimated average time to complete this form is 1 hour.

The Report of Identification of Select Agent or Toxin form (42 CFR 73.5(a)(b) and 73.6(a)(b)) is used by clinical and diagnostic laboratories to notify CDC that select agents or toxins identified as the result of diagnostic or proficiency testing have been disposed of in a proper manner. In addition, the form is used by Federal law enforcement agencies to report the seizure and final disposition of select agents and toxins. Estimated average time to complete this form is 1 hour.

The Request for Exemption form (42 CFR 73.5(d)(e) and 73.6(d)(e)) is used by

entities that are using an investigational product that are, bear, or contain select agents or toxins, or in cases of public health emergency. Estimated average time to complete this form is 1 hour.

In addition to the standardized forms, this regulation also outlines situations in which an entity must notify or may make a request of the HHS Secretary in writing. An entity may apply to the HHS Secretary for an expedited review of an individual by the Attorney General (42 CFR 73.10(e)). To apply for this expedited review, an entity must submit a request in writing to the HHS Secretary establishing the need for such action. The estimated time to gather the information and submit this request is 30 minutes. CDC has not developed standardized forms to use in the above situations. Rather, the entity should provide the information as requested in the appropriate section of the regulation.

An entity may also apply to the HHS Secretary for an exclusion of an attenuated strain of a select agent or toxin that does not pose a severe threat to public health and safety (42 CFR 73.3(e)(1) and 73.4(e)(1)). The estimated time to gather the information and submit this request is 1 hour.

As part of the requirements of the Responsible Official, the Responsible Official is required to conduct regular inspections (at least annually) of the laboratory where select agents or toxins are stored. Results of these self-inspections must be documented (42 CFR 73.9(a)(5)). CDC estimates, that, on average, such documentation will take 1 hour.

As part of the training requirements of this regulation, the entity is required to record the identity of the individual trained, the date of training, and the means used to verify that the employee understood the training (42 CFR 73.15(c)). Estimated time for this documentation is 2 hours per principal investigator.

An individual or entity may request administrative review of a decision denying or revoking certification of registration or an individual may appeal a denial of access approval (42 CFR 73.20). This request must be made in writing and within 30 calendar days after the adverse decision. This request should include a statement of the factual basis for the review. CDC estimates the time to prepare and submit such a request is 4 hours.

Finally, an entity must implement a system to ensure that certain records and databases are accurate and that the authenticity of records may be verified (42 CFR 73.17(b)). The time to
