[Docket No. FAA–2005–23270; Airspace Docket No. 05–ANM–16]

Proposed Revision to Class E Airspace; Laramie, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This proposal would revise Class E airspace at Laramie, WY. Additional controlled airspace is necessary to accommodate aircraft executing a procedure turn (PT) maneuver as part of the instrument approach procedure (IAP) at Laramie Regional Airport. Additional airspace also is necessary to accommodate aircraft executing a new holding pattern published at Laramie Regional Airport, Laramie, WY. This action would improve the safety of Instrument Flight Rules (IFR) aircraft executing this new procedure at Laramie Regional Airport. Additionally, this action reflects a change in the airport name from General Brees Field to Laramie Regional Airport.

DATES: Comments must be received on or before September 25, 2006.

ADDRESSES: Send comments on this proposal to the Docket Management System, U.S. Department of Transportation, Room Plaza 401, 400 Seventh Street, SW., Washington, DC 20590–0001. The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by revising Class E airspace at Laramie Regional Airport, Laramie, WY. Additional controlled airspace is necessary to accommodate aircraft executing a PT maneuver as part of the IAP at Laramie Regional Airport. Additional controlled airspace also is necessary to accommodate aircraft executing a new holding pattern published at Laramie Regional Airport, Laramie, WY. Controlled airspace is necessary where there is a requirement for IFR services, which include arrival, departure, and transitioning to/from the terminal or en route environment. Also, on December 30, 1992, Brees Field Airport (aka General Brees Field) was officially changed to Laramie Regional Airport, Laramie, WY. This action would reflect that change.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9N, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
