SUPPLEMENTARY INFORMATION:

I. Background

The collection of this information is necessary to determine eligibility of applicants to the Job Corps program. The forms in this collection are:

ETA 652, Job Corps Data Sheet, ETA 655, Statement from Court or Other Agency,

ETA 682, Child Care Certification.

These forms are the initial forms completed for each applicant. They serve as the basic document for determining eligibility for Job Corps. They also provide demographic

characteristics for program planning, evaluating and reporting purposes. This activity, previously authorized by Title IV-B of the Job Training Partnership Act and currently authorized under the Title I, Subtitle C of the Workforce Investment Act of 1998, is the major responsibility of the Job Corps admissions counselor.

The ETA 652, Job Corps Data Sheet, is used to obtain information for screening and enrollment purposes to determine eligibility for the Job Corps program in accordance with the Workforce Investment Act. It is prepared by the admissions counselor for each applicant and has no further impact on the public. The ETA 655, Statement from Court or Other Agency, collects essentially information for determining the suitability of an applicant to participate in the Job Corps program. It is used to document past behavior problems for all applicants, as well as provide a basis for projecting future behavior. It is collected by the Job Corps admissions counselor who

requests the information from proper authorities. The ETA 682, Child Care Certification, is used to certify an applicant's arrangements for dependent child(ren) while the applicant is in Job Corps.

II. Review Focus

The Department of Labor is particularly interested in comments which:

- * Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- * Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- * Enhance the quality, utility, and clarity of the information to be collected; and
- * Minimize the burden of the collection of information on those who

are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
