

diseases; attitudes toward marriage, childbearing, and parenthood; and men's and women's roles in raising children.

While the content of Cycle 7 will be similar to that of Cycle 6, the interviewing will be conducted over a 4.5-year period rather than all in one year, as in previous cycles. This continuous interviewing design is intended to reduce costs, increase efficiency, and contribute to continuous improvement in the collection, processing, and dissemination of the data. Sample size is expected to increase

from 12,571 in Cycle 6 to 17,400 total in the 4.5 years of data collection in Cycle 7. For this cycle, the "Pretest" will be conducted initially in the first 8 weeks of interviewing and, if no problems are found, those weeks will become part of the Main Study. If operational problems are found in that period, they will be corrected, and the "Main Study" will begin at that point. Emerging public policy issues may necessitate the addition of a few new questions. The burden table represents the survey collection averaged over the first three years of the survey.

Users of the NSFG include the National Institutes of Health National Institute of Child Health and Human Development; the Office of Population Affairs; NCHS/CDC; the Division of Reproductive Health, CDC; the Divisions of HIV/AIDS Prevention, CDC; the Office of the Assistant Secretary for Planning and Evaluation; and the Administration for Children and Families.

There are no costs to the respondents other than their time. The total estimated annualized burden hours are 6,457
