

coal reserves in the lands described below in Oliver County, North Dakota, hereinafter described as Federal coal lease application (LBA) NDM 95104 for competitive lease by sealed bid in accordance with the provisions for competitive lease sales in 43 CFR 22.2(a), and the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 *et seq.*).

DATES: The lease sale will be held at 11 a.m., Tuesday, September 12, 2006. Sealed bids must be sent by certified mail, return receipt requested, or be hand delivered to the address indicated below, and must be received on or before 10 a.m., September 12, 2006.

ADDRESSES: The lease sale will be held in the BLM Montana State Office, 920 Conference Room, 5001 Southgate Drive, Billings, Montana 59101-4669. Sealed bids clearly marked "Sealed Bid for NDM 95104 Coal Sale-Not to be opened before 11 a.m., Tuesday, September 12, 2006" must be submitted to the Cashier, BLM Montana State Office, at the address given above. The cashier will issue a receipt for each hand delivered sealed bid.

FOR FURTHER INFORMATION CONTACT: Connie Schaff, Land Law Examiner, or Rebecca Spurgin, Coal Coordinator, at 406-896-5060 or 406-896-5080, respectively.

SUPPLEMENTARY INFORMATION: This sale is being held in response to a LBA filed by The BNI Coal, Ltd on September 29, 2005. All coal LBAs submitted to BLM for processing prior to November 7, 2005 are not subject to cost recovery on a case-by-case basis (See 43 CFR 3000.10(d)(1), 70 FR 58872, October 7, 2005). The Federal coal resource to be offered consists of all recoverable reserves in the following described lands:

T. 142 N., R. 84 W., 5th P. M.
Sec. 28: W $\frac{1}{2}$.

Containing approximately 320 acres in Oliver County, North Dakota.

The LBA's total recoverable coal reserves are estimated to be 8.3 million tons (averaging 15.3 feet in thickness) and the average overburden depth is 100 feet.

The estimated coal quality on an as-received basis is as follows:

BTU	6,765 BTU/lb.
Volatile Matter	25.73 %
Fixed Carbon	28.72 %
Moisture	38.46 %
Sulfur Content	0.91 %
Ash Content	7.09 %

The tracts will be leased to the qualified bidder of the highest cash amount, provided that the high bid meets or exceeds the BLM's pre-sale

estimate of fair market value (FMV). No bid that is less than \$100 per acre, or fraction thereof, will be considered. The DOI has established a minimum bid of \$100 per acre or fraction thereof for Federal coal tracts. The minimum bid is not intended to represent FMV. The FMV will be determined by the Authorized Officer after the sale. In the event identical high sealed bids are received, the tying high bidders will be requested to submit follow-up bids until a high bid is received. All tie-breaking sealed-bids must be submitted within 15 minutes following the Sale Official's announcement at the sale that identical high bids have been received.

A lease issued as a result of this offering will provide for payment of an annual rental of \$3 per acre, or fraction thereof; and a royalty payable to the United States of 12.5 percent of the value of coal mined by surface methods and 8.0 percent of the value of coal mined by underground methods. The value of the coal will be determined in accordance with 30 CFR 206.250.

Bidding instructions for the tracts offered and the terms and conditions of the proposed coal lease are included in the Detailed Statement of Lease Sale. Copies of the Detailed Statement and the proposed coal lease are available at the Montana State Office at the address given above. Casefile NDM 95104 is available for inspection at the Montana State Office during normal business hours at the address above.

Dated: July 12, 2006.

National Park Service

Notice of Inventory Completion: U.S. Department of the Interior, National Park Service, Western Archeological and Conservation Center, Tucson, AZ; Correction

AGENCY: National Park Service, Interior.

ACTION: Notice; correction.

Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, Sec (5), of the completion of an inventory of human remains and associated funerary objects in the possession of the U.S. Department of the Interior, National Park Service, Western Archeological and Conservation Center, Tucson, AZ. The human remains and cultural items

were removed from sites along the Transwestern Pipeline Project in Arizona and New Mexico.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003 (d)(3). The determinations in this notice are the sole responsibility of the Chief, Museum Collections Repository, Western Archeological and Conservation Center.

This notice corrects the number of human remains and associated funerary objects reported in a notice of inventory completion published in the **Federal Register** on January 8, 2002. The error was identified by tribal representatives during consultation regarding repatriation of the Native American human remains and associated funerary objects identified in the published notice.

In the **Federal Register** of January 8, 2002, FR Doc. 02-384, page 914, the following corrections are made-

The fourth paragraph is corrected by substituting the following paragraph:

In 1959-1960, human remains representing 14 individuals were recovered from 4 sites during legally authorized excavations under the direction of National Park Service archeologist Wesley L. Bliss. The four sites were located along a linear transect through Cibola and McKinley Counties, NM, and Apache County, AZ, as part of the Transwestern Pipeline Project. No known individuals were identified.

The fifth paragraph is corrected by substituting the following paragraph:

Human remains representing two individuals were recovered from the TRW PPL L-WR-32 site. The four associated funerary objects are a Puerco black-on-white bowl, a bowl and one box of sherds of the White Mound black-on white ceramic type, and an Escavada black-on-white seed jar. Diagnostic artifacts found associated with the burials indicate that the human remains were buried during the Basketmaker III-Pueblo I phases (A.D. 500-950).

The seventh paragraph is corrected by substituting the following paragraph:

Human remains representing two individuals were recovered from the TRW PPL L-WR-43 site. The one associated funerary object is a Puerco black-on-red bowl. The diagnostic artifact found associated with the burials indicates that the human remains were buried during the Pueblo III phase (A.D. 1250-1300).

The tenth paragraph is corrected by substituting the following paragraph:

The manager of the Western Archeological and Conservation Center has determined that, pursuant to 25
