II. Commercial Setting

China is the fastest-growing major market in the world. It is now the third-largest trading nation and America's third-largest trading partner. Total bilateral trade with the U.S. in 2005 was \$243 billion. Total U.S. exports to China in 2005 were \$41 billion, an increase of 19 percent over 2004. Through May 2006, U.S. exports have grown 37 percent over the same period last year. As America's fourth-largest export market, China provides excellent opportunities for U.S. companies in a number of industries. For instance, China's telecommunications products and services import market is estimated to exceed \$20 billion this year. Other strong industry import markets include a \$10 billion market for semiconductor equipment, water and wastewater treatment market of \$8 billion, a \$7 billion market for automotive components, and a medical equipment market that will exceed \$4 billion this year. In addition, as one of the world's major energy users, China's power generation equipment import market is expected to surpass \$5 billion in 2006. Other leading export sectors identified by the U.S. Embassy in China include, air traffic control, safety and security, mining, construction, education, and machinery.

While many U.S. companies have been extremely successful in China, some have struggled or failed. Huge opportunities exist in China, but the business environment in the country remains difficult. Major challenges include intellectual property rights violations, a lack of transparency in rules and regulations, and inadequate rule-of-law.
