### National Agricultural Statistics Service

*Title:* Floriculture Survey.

*OMB Control Number:* 0535-0093.

*Summary of Collection:* The primary function of the National Agricultural Statistics (NASS) is to prepare current official state and national estimates of crop and livestock production. Since 1985 Congress has provided funds to conduct an annual Commercial Floriculture Survey that provides basic data on this important and growing industry. General authority for these data collection activities is granted under U.S. Code Title 7, Section 2204. This statute specifies that "The Secretary of Agriculture shall procure and preserve all information concerning agriculture which can be obtained by the collection of statistics \* \* \* and shall distribute them among agriculturists". The floriculture industry accounts for about 7 percent of agricultural cash receipts at the U.S. level. The survey is conducted in 36 states, which ensures 97 percent coverage of the U.S. value of production.

*Need and Use of the Information:* NASS will collect information to assess alternative agriculture opportunities. Data from the survey will provide statistics for Federal and State agencies to monitor the use of agricultural chemicals. If the information is not collected data users could not keep abreast of changes.

*Description of Respondents:* Farms; Business or other for-profit.

*Number of Respondents:* 13,600.

*Frequency of Responses:* Reporting: Annually.

*Total Burden Hours:* 6,057.

#### SUPPLEMENTARY INFORMATION:

##### Background

The World Trade Organization (WTO) was established on January 1, 1995, as the common international institutional framework for the conduct of trade relations among its members in matters related to the Uruguay Round Trade Agreements. The WTO is the successor organization to the General Agreement on Tariffs and Trade (GATT). U.S. membership in the WTO was approved and the Uruguay Round Agreements Act was signed into law by the President on December 8, 1994. The Uruguay Round Agreements became effective, with respect to the United States, on January 1, 1995. Pursuant to section 491 of the Trade Agreements Act of 1979, as amended, the President is required to designate an agency to be responsible for informing the public of the sanitary and phytosanitary (SPS) standard-setting activities of each international standard-setting organization, Codex, World Organisation for Animal Health, and the International Plant Protection Convention. The President, pursuant to Proclamation No. 6780 of March 23, 1995 (60 FR 15845), designated the U.S. Department of Agriculture as the agency responsible for informing the public of SPS standard-setting activities of each international standard-setting organization. The Secretary of Agriculture has delegated to the Administrator, Food Safety and Inspection Service (FSIS), the responsibility to inform the public of the SPS standard-setting activities of Codex. The FSIS Administrator has, in turn, assigned the responsibility for informing the public of the SPS standard-setting activities of Codex to the U.S. Codex Office, FSIS.

Codex was created in 1962 by two U.N. organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Codex is the principal international organization for encouraging fair international trade in food and protecting the health and economic interests of consumers. Through adoption of food standards, codes of practice, and other guidelines developed by its committees and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers, ensure fair trade practices in the food trade, and promote coordination of food standards work undertaken by international governmental and non-governmental organizations. In the United States, the United States Department of Agriculture (USDA); the Food and Drug Administration (FDA), Department of Health and Human Services (HHS); and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

As the agency responsible for informing the public of the SPS standard-setting activities of Codex, FSIS publishes this notice in the **Federal Register** annually. Attachment 1 (Sanitary and Phytosanitary Activities of Codex) sets forth the following information:

1. The SPS standards under consideration or planned for consideration; and
2. For each SPS standard specified:
  - a. A description of the consideration or planned consideration of the standard;
  - b. Whether the United States is participating or plans to participate in the consideration of the standard;
  - c. The agenda for United States participation, if any; and
  - d. The agency responsible for representing the United States with respect to the standard.

To obtain copies of those standards listed in Attachment 1 that are under consideration by Codex, please contact the Codex delegate or the U.S. Codex office. This notice also solicits public comment on those standards that are currently under consideration or planned for consideration and recommendations for new standards. The delegate, in conjunction with the responsible agency, will take the comments received into account in participating in the consideration of the standards and in proposing matters to be considered by Codex.

The United States' delegate will facilitate public participation in the United States Government's activities relating to Codex Alimentarius. The United States' delegate will maintain a list of individuals, groups, and

organizations that have expressed an interest in the activities of the Codex committees and will disseminate information regarding United States' delegation activities to interested parties. This information will include the current status of each agenda item; the United States Government's position or preliminary position on the agenda items; and the time and place of planning meetings and debriefing meetings following Codex committee sessions. In addition, the U.S. Codex Office makes much of the same information available through its Web page, [http://www.fsis.usda.gov/Regulations\\_&Policies/Codex\\_Alimentarius/index.asp](http://www.fsis.usda.gov/Regulations_&Policies/Codex_Alimentarius/index.asp). Please visit the Web page or notify the appropriate U.S. delegate or the Office of U.S. Codex Alimentarius, Room 4861, South Agriculture Building, 1400 Independence Avenue, SW., Washington, DC 20250-3700, if you would like to access or receive information about specific committees.

The information provided in Attachment 1 describes the status of Codex standard-setting activities by the Codex Committees for the time periods from June 1, 2005 to May 31, 2006, and June 1, 2006 to May 31, 2007. Attachment 2 provides the list of U.S. Codex Officials (includes U.S. delegates and alternate delegates). A list of forthcoming Codex sessions may be found at: <http://www.codexalimentarius.net/web/current.jsp?lang=en>.

#### Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, in an effort to ensure that the public and in particular minorities, women, and persons with disabilities, are aware of this notice, FSIS will announce it online through the FSIS Web page located at [http://www.fsis.usda.gov/regulations\\_&\\_policies/2006\\_Notices\\_Index/index.asp](http://www.fsis.usda.gov/regulations_&_policies/2006_Notices_Index/index.asp).

The Regulations.gov Web site is the central online rulemaking portal of the United States government. It is being offered as a public service to increase participation in the Federal government's regulatory activities. FSIS participates in Regulations.gov and will accept comments on documents published on the site. The site allows visitors to search by keyword or Department or Agency for rulemakings that allow for public comment. Each entry provides a quick link to a comment form so that visitors can type in their comments and submit them to FSIS. The Web site is located at <http://www.regulations.gov>.

FSIS also will make copies of this **Federal Register** publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, recalls, and other types of information that could affect or would be of interest to our constituents and stakeholders. The update is communicated via Listserv, a free e-mail subscription service consisting of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals who have requested to be included. The update also is available on the FSIS Web page. Through Listserv and the Web page, FSIS is able to provide information to a much broader, more diverse audience.

In addition, FSIS offers an e-mail subscription service which provides automatic and customized access to selected food safety news and information. This service is available at [http://www.fsis.usda.gov/news\\_and\\_events/email\\_subscription/](http://www.fsis.usda.gov/news_and_events/email_subscription/). Options range from recalls to export information to regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their account.

Done at Washington, DC on May 26, 2006.

#### Codex Committee on Residues of Veterinary Drugs in Foods

The Codex Committee on Residues of Veterinary Drugs in Foods determines priorities for the consideration of residues of veterinary drugs in foods and recommends Maximum Residue Limits (MRLs) for veterinary drugs. A veterinary drug is defined as any substance applied or administered to a food producing animal, such as meat or dairy animals, poultry, fish or bees, for therapeutic, prophylactic or diagnostic purposes or for modification of physiological functions or behavior.

A Codex Maximum Limit for Veterinary Drugs (MRLVD) is the maximum concentration of residue resulting from the use of a veterinary drug (expressed in mg/kg or ug/kg on a fresh weight basis) that is adopted by the Codex Alimentarius Commission to be permitted or recognized as acceptable in or on a food. An MRLVD is based on the Acceptable Daily Intake (ADI) and indicates the amount of residue in food that is considered to be without appreciable toxicological hazard. An MRLVD also takes into account other relevant public health risks as well as food technological aspects.

When establishing an MRLVD, consideration is also given to residues that occur in food of plant origin or the environment. Furthermore, the MRLVD may be reduced to be consistent with good practices in the use of veterinary drugs and to the extent that practical analytical methods are available.

Acceptable Daily Intake (ADI): An estimate by the Joint FAO/WHO Expert Committee on Food Additives (JECFA) of the amount of a veterinary drug, expressed on a body weight basis, that can be ingested daily over a lifetime without appreciable health risk (standard man = 60 kg).

The Committee met in Cancun, Mexico on May 8–12, 2006. The reference document is ALINORM 06/29/31. The Committee worked on:

- Draft MRLs for Trichlorfon (metrifonate), Flumequine (in black tiger shrimp), Pirlimycin, Cypermethrin and Alpha-cypermethrin, and Doramectin (in cow's milk) at step 7

#### **Codex Committee on Pesticide Residues**

The Codex Committee on Pesticide Residues recommends to the Codex Alimentarius Commission establishment of maximum limits for pesticide residues for specific food items or in groups of food. A Codex Maximum Residue Limit for Pesticide (MRLP) is the maximum concentration of a pesticide residue (expressed as mg/kg), recommended by the Codex Alimentarius Commission to be legally permitted in or on food commodities and animal feeds. Foods derived from commodities that comply with the respective MRLPs are intended to be toxicologically acceptable, that is, consideration of the various dietary residue intake estimates and determinations both at the national and international level in comparison with the ADI\*, should indicate that foods complying with Codex MRLPs are safe for human consumption.

Codex MRLPs are primarily intended to apply in international trade and are derived from reviews conducted by the Joint Meeting on Pesticide Residues (JMPR).

(a) Review of residue data from supervised trials and supervised uses including those reflecting national good agricultural practices (GAP). Data from supervised trials conducted at the highest nationally recommended, authorized, or registered uses are included in the review. In order to accommodate variations in national pest control requirements, Codex MRLPs take into account the higher levels shown to arise in such supervised trials, which are considered to represent effective pest control practices.

(b) Toxicological assessments of the pesticide and its residue.

The following items will be considered by the Commission at its 29th Session in July 2006. The relevant document is ALINORM 06/29/24.

To be considered at Step 8:

\* Acceptable Daily Intake (ADI) of a chemical is the daily intake which, during an entire lifetime, appears to be without appreciable risk to the health of the consumer on the basis of all the known facts at the time of the evaluation of the chemical by the Joint FAO/WHO Meeting on Pesticide Residues. It is expressed in milligrams of the chemical per kilogram of body weight.

#### **Codex Committee on Methods of Analysis and Sampling**

The Codex Committee on Methods of Analysis and Sampling:

(a) Defines the criteria appropriate to Codex Methods of Analysis and Sampling;

(b) Serves as a coordinating body for Codex with other international groups working in methods of analysis and sampling and quality assurance systems for laboratories;

(c) Specifies, on the basis of final recommendations submitted to it by the other bodies referred to in (b) above, Reference Methods of Analysis and Sampling appropriate to Codex Standards which are generally applicable to a number of foods;

(d) Considers, amends, if necessary, and endorses, as appropriate, methods of analysis and sampling proposed by Codex (Commodity) Committees, except that methods of analysis and sampling for residues of pesticides or veterinary drugs in food, the assessment of microbiological quality and safety in food, and the assessment of specifications for food additives do not fall within the terms of reference of this Committee;

#### Codex Committee on Food Hygiene

The Codex Committee on Food Hygiene has four primary responsibilities. The first is to draft basic provisions on food hygiene applicable to all food. These provisions normally take the form of Codes of Hygienic Practice for a specific commodity (e.g. bottled water) or group of commodities (e.g., milk and milk products). The second is to suggest and prioritize areas where there is a need for microbiological risk assessment at the international level and to consider microbiological risk management matters in relation to food hygiene and in relation to the risk assessment activities of FAO and WHO. The third is to consider, amend if necessary, and endorse food hygiene provisions that are incorporated into specific Codex commodity standards by the Codex commodity committees. The fourth is to provide such other general guidance to the Commission on matters relating to food hygiene as may be necessary. The 38th Session of the Committee will meet in Houston, TX, December 4–8, 2006. The Committee will discuss the following:
