SUPPLEMENTARY INFORMATION: The Folsom Facility consists of 12 structures (dams and dikes), which impound the American River forming the Folsom Reservoir. Both Reclamation and the Corps share in the responsibility of ensuring that the Folsom Facility is maintained and operated under their respective agency dam safety regulations and guidelines, as defined by Congress. As a part of their responsibilities, Reclamation and the Corps have determined that the Folsom Facility requires structural improvements to increase overall public safety above existing conditions by improving the facilities' ability to reduce flood damages and address dam

safety issues posed by hydrologic (flood), seismic (earthquake), and static (seepage) events. While these events have a low probability of occurrence in a given year, due to the large population downstream of Folsom Dam, modifying the facilities is prudent and required to improve public safety above current baseline conditions.

Reclamation has identified the need for expedited action to reduce hydrologic, static, and seismic risks under its Safety of Dams Program. The Corps in partnership with the Reclamation Board/DWR and SAFCA have identified the need to reduce the risk of flooding in the Sacramento area. These agencies have combined their efforts resulting in common solutions to be phased-in for the structural and functional concerns of the Folsom Facility.

The Folsom DS/FDR Draft EIS/EIR discusses the project background, purpose and need, project description and alternatives, and related projects. The Draft EIS/EIR addresses the impacts of project construction on aquatic resources, terrestrial vegetation and wildlife, hydrology, water quality, groundwater, water supply, hydropower resources, socioeconomic, soils, minerals, geological resources, visual resources, agricultural resources, transportation and circulation, noise, cultural resources, land use, planning and zoning, recreation resources, public services and utilities, air quality, population and housing, public health and safety, public services and utilities, environmental justice, and Indian trust assets.
