

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it follows the U.S. Army's actions in renaming Wainwright AAF to Ladd AAF and thereby changes the Class E airspace description in FAA Order 7400.9D and represents the FAA's continuing effort to safely and efficiently use the navigable airspace.

This rule results in revised Class E airspace revised upward from 700 feet (ft.) and 1,200 ft. above the surface at Huslia, AK.

DATES: *Effective Date:* 0901 UTC, September 28, 2006.

SUPPLEMENTARY INFORMATION:

History

On Wednesday, April 5, 2006, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revise Class E airspace upward from 700 ft. and 1,200 ft. above the surface at Huslia, AK (71 FR 17039). The action was proposed in order to create Class E airspace sufficient in size to contain aircraft while executing one new and two amended SIAPs for the Huslia Airport. The new approach is the Very High Frequency Omni-directional Range (VOR)/Distance Measuring Equipment (DME) RWY 03. The amended approaches are (1) Area Navigation (Global Positioning System) (RNAV (GPS)) RWY 03, Amendment (Amdt.) One and (2) RNAV (GPS) RWY 21, Amdt. One. Class E controlled airspace extending upward from 700 ft. and 1,200 ft. above the surface in the Huslia Airport area is revised by this action. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No public comments have been received; thus the rule is adopted as proposed.

The area will be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1,200 ft. transition areas are published in paragraph 6005 of FAA Order 7400.9N, *Airspace Designations and Reporting Points*, dated September 1, 2005, and effective September 15, 2005, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to 14 CFR part 71 revises Class E airspace at the Huslia Airport, Alaska. This Class E airspace is revised to accommodate aircraft executing one new and two revised SIAPs, and will be depicted on aeronautical charts for pilot reference. The intended effect of this rule is to provide adequate controlled airspace for

Instrument Flight Rule (IFR) operations at Huslia Airport, Alaska.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart 1, section 40103, Sovereignty and use of airspace. Under that section, the FAA is charged with prescribing regulations to ensure the safe and efficient use of the navigable airspace. This regulation is within the scope of that authority because it creates Class E airspace sufficient in size to contain aircraft executing instrument procedures for the Huslia Airport and represents the FAA’s continuing effort to safely and efficiently use the navigable airspace.
