SUPPLEMENTARY INFORMATION:

I. Background

Title II of the Indian Self-Determination Act Amendments of 1994 (Pub. L. 103-413, the "Tribal Self-Governance Act" or the "Act") instituted a permanent self-governance program at the Department of the Interior (DOI). Under the self-governance program, certain programs, services, functions, and activities, or portions thereof, in the DOI bureaus other than the Bureau of Indian Affairs (BIA), are eligible to be planned, conducted, consolidated, and administered by a self-governance tribal government.

Under section 405(c) of the Act, each bureau is required to publish annually: (1) A list of non-BIA programs, services, functions, and activities, or portions thereof, that are eligible for inclusion in agreements negotiated under the self-governance program; and (2) programmatic targets for these bureaus.

Under the Act, two categories of non-BIA programs are eligible for self-governance funding agreements:

(1) Under section 403(b)(2) of the Act, any non-BIA program, service, function or activity that is administered by the DOI that is "otherwise available to Indian tribes or Indians," can be administered by a tribal government through a self-governance funding agreement. The DOI interprets this provision to authorize the inclusion of programs eligible for self-determination contracts under Title I of the Indian Self-Determination and Education Assistance Act (Pub. L. 93-638, as amended). Section 403(b)(2) also specifies "nothing in this subsection may be construed to provide any tribe with a preference with respect to the opportunity of the tribe to administer programs, services, functions and activities, or portions thereof, unless such preference is otherwise provided by law."

(2) Under section 403(c) of the Act, the Secretary may include other programs, services, functions, and activities or portions thereof that are of "special geographic, historical, or cultural significance" to a self-governance tribe.

Under section 403(k) of the Act, funding agreements cannot include programs, services, functions, or activities that are inherently Federal or where the statute establishing the existing program does not authorize the type of participation sought by the tribe. However, a tribe (or tribes) need not be identified in the authorizing statutes in order for a program or element to be included in a self-governance funding agreement. While general legal and policy guidance regarding what constitutes an inherently Federal function exists, DOI will determine whether a specific function is inherently Federal on a case-by-case basis, considering the totality of circumstances.

II. Eligible Non-BIA Programs of the Minerals Management Service

Below is a listing of the types of non-BIA programs, or portions thereof, that may be eligible for self-governance funding agreements because they are either "otherwise available to Indians" under Title I and not precluded by any other law, or may have "special geographic, historical, or cultural significance" to a participating tribe. The list represents the most current information on programs potentially available to tribes under a self-governance funding agreement.

The Minerals Management Service (MMS) will also consider for inclusion

in funding agreements other programs or activities not included below, but which, upon request of a self-governance tribe, MMS determines to be eligible under either sections 403(b)(2) or 403(c) of the Act. Tribes with an interest in such potential agreements are encouraged to begin such discussions.

The MMS provides stewardship of America's offshore resources and collects revenues generated from mineral leases on Federal and Indian lands. The MMS is responsible for the management of the Federal Outer Continental Shelf lands, which are submerged lands off the coasts that have significant energy and mineral resources. Within the Offshore Minerals Management program, environmental impact assessments and statements, and environmental studies may be available if a self-governance tribe demonstrates a special geographic, cultural or historical connection.

The MMS also offers mineral-owning tribes other opportunities to become involved in its Minerals Revenue Management (MRM) functions. These programs address the intent of tribal self-governance but are available regardless of self-governance intentions or status and are a good prerequisite for assuming other technical functions. Generally, MRM functions are available to tribes because of the Federal Oil and Gas Royalty Management Act of 1982 (FOGRMA) at 30 U.S.C. 1701. The MRM functions that may be available to self-governance tribes are as follows:

1. *Audit of Tribal Royalty Payments.* Audit activities for tribal leases, except for the issuance of orders, final valuation decisions, and other enforcement activities.

2. *Verification of Tribal Royalty Payments.* Financial compliance verification and monitoring activities, and production verification.

3. *Tribal Royalty Reporting, Accounting, and Data Management.* Establishment and management of royalty reporting and accounting systems including document processing, production reporting, reference data (lease, payor, agreement) management, billing and general ledger.

4. *Tribal Royalty Valuation.* Preliminary analysis and recommendations for valuation and allowance determinations and approvals.

For questions regarding self-governance contact Shirley M. Conway, Regulations Manager, Minerals Revenue Management, Minerals Management Service, MS 5438 MIB, 1849 C Street, NW., Washington, DC 20240, telephone 202-208-3512, fax 202-501-0247.

III. Programmatic Targets

During Fiscal Year 2009, upon request of a self-governance tribe, MMS will negotiate funding agreements for its eligible programs beyond those already negotiated.

Dated: September 24, 2008.

Randall B. Luthi,

Director, Minerals Management Service.

SUPPLEMENTARY INFORMATION:

Background.—On November 19, 2003, the Department of Commerce issued an antidumping duty order on imports of refined brown aluminum oxide from China (68 FR 65249). The Commission is conducting a review to determine whether revocation of the order would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. It will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full review or an expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

Definitions.—The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by the Department of Commerce.

(2) The *Subject Country* in this review is China.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the *Subject Merchandise*. In its original determination, the Commission defined the *Domestic Like Product* as all merchandise corresponding to the scope of the investigation, as well as any refined brown aluminum oxide where particles with a diameter greater than 3/8 inch constitute at least 50 percent of the total weight of the entire batch, as long as this product has been crushed, screened, and sorted into consistent sizes.

(4) The *Domestic Industry* is the U.S. producers as a whole of the *Domestic Like Product*, or those producers whose collective output of the *Domestic Like Product* constitutes a major proportion of the total domestic production of the product. In its original determination, the Commission defined the *Domestic Industry* as all U.S. producers of the domestic like product, as defined above, with the exception of Great Lakes Minerals, which was excluded from the domestic industry as a related party.
