SUPPLEMENTARY INFORMATION:

I. Abstract

The National Institute of Standards and Technology (NIST) sponsors the Manufacturing Extension Partnership (MEP), a national network of fifty-nine (59) locally based manufacturing extension centers working with small manufacturers to help them improve their productivity, profitability, and enhance their overall economic competitiveness.

NIST MEP surveys all clients provided substantive services and collects data on sales, investment, cost savings, and jobs impacts as well as a limited set of qualitative questions. NIST MEP surveys center clients for two primary purposes:

- To collect aggregate information on program performance indicators to report to various stakeholders on program performance. The survey provides information about the quantifiable impacts that clients attribute to the services provided by MEP centers. NIST MEP also conducts other episodic studies to evaluate the system's impact that corroborate and complement the survey results.

- To provide center-specific program performance and impact information for center use. Centers use this information to communicate results to their own stakeholders, at both the state and federal level. Center management and NIST MEP use these results to evaluate center performance and effectiveness. The MEP Center Review Criteria and review process place strong emphasis on a center's ability to demonstrate impacts based on the survey results.

The specific information obtained from clients about the impact of MEP services is essential for NIST officials to monitor and report on program performance and plan program improvements aimed at improving program efficiency and effectiveness. This information is not available from existing programs or other sources. The collection of information is currently conducted by a contractor. This submission under the Paperwork

Reduction Act represents a request for an extension of a currently approved collection.

II. Method of Collection

The survey data will be collected through a combination of phone and web-based surveys.
