l. A copy of the request to use alternative procedures is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. m. Applicant has demonstrated that it has made an effort to contact all federal and state resources agencies, non-governmental organizations (NGO), and others affected by the project. Applicant has also demonstrated that a consensus exists that the use of alternative

procedures is appropriate in this case. Applicant has submitted a communications protocol that is supported by the stakeholders.

The purpose of this notice is to invite any additional comments on Applicant's request to use the alternative procedures, pursuant to section 4.34(i) of the Commission's regulations. Additional notices seeking comments on the specific project proposal, interventions and protests, and recommended terms and conditions will be issued at a later date. Applicant will complete and file a preliminary Environmental Assessment, in lieu of Exhibit E of the application. This differs from the traditional process, in which an applicant consults with agencies, Indian tribes, NGOs, and other parties during preparation of the license application and before filing the application, but the Commission staff performs the environmental review after the application is filed. The alternative procedures are intended to simplify and expedite the licensing process by combining the pre-filing consultation and environmental review processes into a single process, to facilitate greater participation, and to improve communication and cooperation among the participants.

Applicant has met with federal and state resource agencies, NGO's, elected officials, environmental groups, and members of the public regarding the Blue Lake amendment project. Applicant intends to conduct the alternative licensing procedures process to file a license amendment application by May 2009.
