SUPPLEMENTARY INFORMATION: Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the SAB Ecological Processes and Effects Committee will hold a public meeting to provide advice on the EPA Ecological Research Program's Multi-Year Plan and discuss other Committee business. The SAB was established by 42 U.S.C. 4365 to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C., App. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Background: The EPA Office of Research and Development has developed a draft Ecological Research Program Multi-Year Plan that establishes long-term and annual goals for the Agency's Ecological Research Program and discusses planned research. The Multi-Year Plan describes a new direction for the Ecological Research Program intended to fill the need for a better understanding of the implications of human impacts on ecosystems and the services they provide. The redirected Ecological Research Program builds on past research efforts in ecosystem monitoring, restoration, and functioning to develop operational methods for incorporating quantitative information on ecosystem services into decision making.

EPA's Office of Research and Development has requested that the SAB provide advice on the program focus, research questions, and implementation approach articulated in the Agency's draft Ecological Research Program Multi-Year Plan. The SAB has been asked to comment on: (1) The utility of the program in offering meaningful contributions to ecological sciences and providing useful information for decision making, (2) the adequacy of the proposed goals, objectives, and research questions in meeting the overall purpose of the program, (3) the proposed implementation approach, (4) anticipated challenges to achieving the overall goal of the program, and (5) ways to measure the progress, productivity, efficiency, and effectiveness of the program.

To augment the expertise on the SAB Ecological Processes and Effects Committee, the SAB Staff Office has selected several SAB committee members with expertise in valuing ecosystem services to participate in this advisory activity. The roster and biosketches of members of the Ecological Processes and Effects Committee augmented for the advisory on EPA's Ecological Research Program are posted on the SAB Web site at: <http://www.epa.gov/sab>.

Availability of Meeting Materials: The draft Ecological Research Program Multi-Year Plan to be reviewed by the SAB Committee will be posted on the EPA Office of Research and Development SAB Web site at: <http://www.epa.gov/ord/htm/multi-yearplans.htm>. Azinphos-methyl; Product Cancellation Order and Amendments to Terminate Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice publishes EPA's order for the cancellations and amendments to terminate uses, voluntarily requested by the registrants

and accepted by the Agency, of products containing the pesticide azinphos-methyl (AZM), pursuant to section 6(f)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This cancellation order follows an August 8, 2007 **Federal Register** Notice of Receipt of Requests from the AZM registrants to voluntarily cancel and amend to terminate uses of all their AZM product registrations by September 30, 2012. Subject to the terms and conditions described in Unit II below and except as provided in the existing stocks provisions of the cancellation order, the order terminates distribution, sale and use of AZM products labeled for use on Brussels sprouts and nursery stock effective as of today's date; and prohibits use of such products on Brussels sprouts and nursery stock effective September 30, 2008; terminates AZM use on walnuts, almonds, and pistachios effective October 30, 2009; and cancels all AZM products effective September 30, 2012. The cancellation of AZM products serves to terminate the six remaining uses of AZM (apples, pears, cherries, blueberries, alkali bee beds, and parsley) on September 30, 2012. All distribution, sale and use of such products will be prohibited as of that date except as provided in the existing stocks order of the notice. While the alkali bee bed use was not specifically identified in the registrants' voluntary cancellation requests, the registrants requested cancellation of all AZM products, which includes products labeled for the bee bed use. These are the last AZM products registered for use in the United States. In the August 8, 2007 notice, EPA indicated that it would issue an order implementing the cancellations and amendments to terminate uses, unless the Agency received substantive comments within the 30-day comment period that would merit its further review of these requests. The Agency did not receive any comments on the notice. Accordingly, EPA hereby issues in this notice a cancellation order granting the requested cancellations and amendments to terminate uses. Any distribution, sale, or use of the AZM products subject to this cancellation order is permitted only in accordance with the terms of this order, including any existing stocks provisions.

DATES: This order is February 20, 2008.
