

participation and input, public meetings will most likely be held in Albion, Burley and Boise, Idaho. Specific dates and locations for public participation will be published in local newspapers and broadcast on local community calendars. Meetings and open houses will provide opportunity for the public to work collaboratively with the BLM to identify issues to be addressed in the planning process.

**ADDRESSES:** Comments regarding the proposed development of a wind-driven power generation facility should be sent to: Project Manager, Cotterel Mountain Wind Project, Bureau of Land Management, Burley Field Office, 15 East 200 South, Burley, Idaho 83318. Comments, including names and street addresses of respondents, will be available for public review at the above address during regular business hours, 7:45 a.m. to 4:30 p.m., Monday through Friday, except holidays, and may be published as part of the EIS. Individual respondents may request confidentiality. If you wish to withhold your name or street address from public review or from disclosure under the Freedom of Information Act, you must state this prominently at the beginning of your written comment. Such requests will be honored to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public inspection in their entirety.

**SUPPLEMENTARY INFORMATION:** Windland, Inc., a Boise based company, is proposing to install approximately 130 wind turbines, each having a generating capacity between 1.3 and 1.8 megawatts, on a site covering approximately 7 square miles on the Cotterel Mountains southeast of Burley, Idaho. The proposed project area is within the Burley Field Office, Upper Snake River District of the BLM. The 130 turbines situated on towers approximately 250 feet in height would produce a maximum of 200 megawatts of power, enough to provide electricity for 40,000 homes. Power from the project would be collected by an underground cable system and then fed into one of two proposed substations to be located on the project site. The fenced substation sites would occupy approximately two to four acres each. From the substation sites, power from the project would then be transported to one of two existing 138-kilovolt (kV) power transmission lines that are in the vicinity of the proposed project area, via new overhead transmission facilities. Other facilities

required as part of the proposed project are small pad mounted transformers located at the base of each wind turbine tower, access roads and one operation and maintenance building. The area permanently occupied by the project after final reclamation of disturbed areas would total approximately 68 acres. The project is scheduled to begin construction as early as June 2004, followed by commercial operation as early as November 2005 and would operate year-round for at least 30 years.

The purpose and need for the proposed project are to (1) provide wind-generated electricity from a site in Idaho to meet existing and future demands for electricity; and (2) to develop energy generation facilities that are consistent with the President's National Energy Policy which encourages the development of renewable energy resources, including wind energy, as part of an overall strategy to develop a diverse portfolio of domestic energy supplies for the nation's future.

**Public Participation:** Potential issues that have been identified to date include, but are not limited to the following general categories: Wildlife (including birds); vegetation (including weeds and invasive plant species); threatened, endangered and sensitive species; public access; visual concerns; cultural resources; Tribal concerns; rangeland resources; geology and soils; hydrology; recreation resources; hazardous materials; air quality; noise; and socio-economics. The BLM has established a 60-day scoping period during which, affected tribes, landowners, concerned citizens, special interest groups, local governments, and any other interested parties are invited to comment on the scope of the EIS. Scoping will help the BLM identify the full range of issues that should be addressed in the EIS. The Draft EIS/ Draft plan amendment, which is scheduled for completion in the fall of 2003, will be circulated for public review and comment. The BLM will consider and respond in the Final EIS/ proposed planned amendment to comments received on the draft. The Final EIS and proposed plan amendment are expected to be published early in 2004.

**FOR FURTHER INFORMATION CONTACT:** Scott Barker, Project Manager, Burley Field Office, 15 East 200 South, Burley, Idaho 83318, telephone (208) 677-6678.

Dated: October 28, 2002.

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

#### Agency Information Collection Activities Under OMB Review

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of data collection submission.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. § 3501 *et seq.*), the Bureau of Reclamation (we, our, or us) has forwarded a request for renewal (with revisions) of an existing approved information collection to the Office of Management and Budget (OMB): Crop Acreage and Yields and Water Distribution (Water User Crop Census Report [Form 7-332], and Crop and Water Data [Form 7-2045]), OMB Control Number: 1006-0001. We request your comments on the revised Crop Acreage and Yields and Water Distribution Forms and specific aspects of the information collection.

**DATES:** Your written comments must be received on or before January 21, 2003.

**ADDRESSES:** Send comments regarding the information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Department of the Interior, 725 17th Street, NW., Washington, DC 20503. A copy of your comments should also be sent to Ms. Diana Trujillo, Bureau of Reclamation, Water Resources Office, D-5300, PO Box 25007, Denver, CO 80225.

**FOR FURTHER INFORMATION CONTACT:** For further information or for a copy of the forms contact Diana Trujillo, Bureau of Reclamation, (303) 445-2914.

**SUPPLEMENTARY INFORMATION:** This is notice that a request for review, comment, and approval of a revised currently approved collection has been forwarded to OMB. A **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on July 17, 2002 (67 FR 46998). No public comments were received by Reclamation.

We have revised the currently approved collection to reflect industry standards concerning units used to measure yields for certain crops (*i.e.*, using pounds instead of bales for cotton lint and using pounds instead of tons for hops). Other changes include:

- In Section II-e on both forms, "Acres irrigated by", we are adding the option to choose "Flood" along with the

current options of "Sprinkler" and "Drip".

- In Section II-g on both forms, "Acres not irrigated", we are adjusting the format of the box to allow checkmark indications for the options of "dry cropped", "fallow", and "idle", in addition to the number of acres.

- Within each subsection (*i.e.*, Cereals, Forage, Vegetables, etc.) in Section III on both forms, "Crop Production", we are placing the items in alphabetical order.

- In Section III on both forms, we are moving "Cantaloupe", "Watermelon", and "Honey Ball, Honeydew, etc." from the "Vegetables" subsection to the "Fruits" subsection.

- In Section I on Form 7-332, "Irrigator Information", we are including a box that asks for the respondent's telephone number so any potential questions may be directed to that person.

- We are removing the footnotes to both forms and incorporating the footnotes within the body of the instructions that accompany each form.

There have been editorial changes to the current Form 7-332 and Form 7-2045, and to the instructions that accompany these forms. These changes have been made to increase the respondents' understanding of the forms and understanding of the instructions to the forms. The proposed changes will be included starting with the 2003 Crop Acreage and Yields and Water Distribution information collection.

*Title:* Crop Acreage and Yields and Water Distribution.

*Forms:* Form 7-332, Water User Crop Census Report; and Form 7-2045, Crop and Water Data.

*Abstract:* The annual crop census is taken on all Bureau of Reclamation projects, along with collection of related statistics, primarily for use as a tool in administering, managing, and evaluating the Federal Reclamation program. The census is used to assist in the administration of repayment and water service contracts, which are used to repay the irrigators' obligation to the Federal Government. The census will provide data to facilitate the required 5-year review of ability-to-pay analysis, which is being incorporated into new repayment and water service contracts. The basis for these reviews is an audit by the Office of the Inspector General, Department of the Interior.

Data from the census are utilized to determine class 1 equivalency factors, *i.e.*, the number of acres of class 2 and class 3 land that are required to be equivalent in productivity to class 1 land.

In recent years, the census has provided data which are used to administer international trade agreements, such as the North American Free Trade Agreement. Data from the census are also used by the Office of the Inspector General, General Accounting Office, and the Congressional Research Service to independently evaluate our program and to estimate the impacts of proposed legislation. These data are supplied to other Federal and State agencies to evaluate the program and provide data for research.

*Description of Respondents:* Irrigators and water user entities in the 17 Western States who receive irrigation water service from Bureau of Reclamation facilities. Also included are entities who receive other water services, such as municipal and industrial water through Bureau of Reclamation facilities.

*Frequency of Collection:* Annually.  
*Estimated completion time:* Form 7-332, 15 minutes; Form 7-2045, 480 minutes.

*Annual responses:* Form 7-332, 25,000 responses; Form 7-2045, 225 responses.

*Annual burden hours per form:* Form 7-332, 6,250; Form 7-2045, 1,800.

*Total Annual burden hours:* 8,050.

*Comments are invited on:* (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Reclamation, including whether the information will have practical utility; (b) the accuracy of our burden estimate for the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information being collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including increased use of automated collection techniques or other forms of information technology.

Department of the Interior practice is to make comments, including names and home addresses of respondents, available for public review. Individual respondents may request that we withhold their home address from public disclosure, which we will honor to the extent allowable by law. There also may be circumstances in which we would withhold a respondent's identity from public disclosure, as allowable by law. If you wish us to withhold your name and/or address, you must state this prominently at the beginning of your comment. We will make all submissions from organizations or businesses, and from individuals identifying themselves as

representatives or officials of organizations or businesses, available for public disclosure in their entirety.

Dated: November 12, 2002.

## INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-753-756 (Review)]

### Cut-to-Length Carbon Steel Plate From China, Russia, South Africa, and Ukraine

**AGENCY:** International Trade Commission.

**ACTION:** Notice of Commission determinations to conduct full five-year reviews concerning the antidumping duty orders on cut-to-length carbon steel plate from China, Russia, South Africa, and Ukraine.

**SUMMARY:** The Commission hereby gives notice that it will proceed with full reviews pursuant to section 751(c)(5) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(5)) to determine whether revocation of the antidumping duty orders on cut-to-length carbon steel plate from China, Russia, South Africa, and Ukraine would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. A schedule for the reviews will be established and announced at a later date. For further information concerning the conduct of these reviews and rules of general application, consult the Commission's rules of practice and procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

**EFFECTIVE DATE:** December 9, 2002.

**FOR FURTHER INFORMATION CONTACT:** Mary Messer (202-205-3193), Office of Investigations, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its Internet server (<http://www.usitc.gov>). The public record for
