SUPPLEMENTARY INFORMATION:**I. Abstract**

The purpose of this data collection is to provide information on the value of Hawaii's coral reef habitats to specific segments of the U.S. population. The study will measure total economic values for Hawaii's coral reefs. This effort is designed to provide defensible information for both resource managers and damage assessments on the value of coral reef habitats and alternative management actions. The project is designed as a phased three-year effort to ensure effective use of all the available information. This effort will involve development of extensive knowledge about how reef habitats are perceived, implication of alternative management actions, designing original survey instruments, interviewing of a large number of respondents (1500-2000), conducting formal statistical analysis of the data, and developing a decision

support system for use by resource managers. For total economic value, a nationally-oriented survey will be conducted using stated preferences methods.

II. Method of Collection

Up to 48 one-on-one cognitive interviews will be conducted. In addition, one pretest of the full survey instrument will be tested for a response of up to 150 usable observations. The final survey instrument will be administered to a sample of up to 2000 people.

III. Data

OMB Number: None.

Form Number: None.

Type of Review: Regular submission.

Affected Public: Individuals or households.

Estimated Number of Respondents: 2,198.

Estimated Time Per Response: 2 hours for an interview; 30 minutes for a pretest; and 30 minutes for a final survey.

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), as amended in 1996, provides for the nomination for members of Fishery Management Councils by state governors and Indian treaty tribes, for the designation of a principal state fishery official who will perform duties under the Magnuson-Stevens Act, and for a request by a state for reinstatement of state authority over a managed fishery. Nominees for council membership must provide the governor or tribe with background documentation, which is then submitted to NOAA with the nomination. The information submitted with these actions will be used to ensure that the requirements of the Magnuson-Stevens Act are being met.
