Clean Air Act Approval of Revisions to Operating Permits Program in Oregon

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve, as a revision to Oregon's title V air operating permits program, a 1999 statute addressing the State's requirements for judicial standing to challenge State-issued title V permits. In a Notice of Deficiency published on November 30, 1998 (63 FR 65783), EPA notified Oregon of EPA's finding that the State's requirements for judicial standing did not meet minimum Federal requirements for program approval. This program revision would resolve the deficiency identified in the Notice of Deficiency. EPA is also proposing to approve, as a revision to Oregon's title V air operating permits program, changes to Oregon's title V regulations made in 1999 that reorganize and renumber the regulations and increase title V fees.

In the Final Rules section of this **Federal Register**, the EPA is publishing its approval as a direct final rule without prior proposal because the Agency views this as a non-controversial determination and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated.

If the EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Written comments must be received on or before July 10, 2002.

ADDRESSES: Written comments should be mailed to Denise Baker, Environmental Protection Specialist, Office of Air Quality, Mailcode OAQ-

Research, Development, and Demonstration Permits for Municipal Solid Waste Landfills

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to add a new section to the Criteria for Municipal Solid Waste Landfills (MSWLF) to allow states to issue research, development, and demonstration (RD&D) permits for landfill operations at variance with some parts of the MSWLF criteria, provided landfill operators demonstrate that these operations will not result in an increased risk to human health and the environment. EPA is proposing this alternative to promote innovative technologies for the landfilling of municipal solid waste. Variance from the following MSWLF criteria would not be allowed: location restrictions, ground water monitoring, corrective action requirements, the financial assurance criteria, procedures for

excluding hazardous waste, and explosive gases control requirements.
