

must be provided to LSC within seven business days of the date of the notice from the Corporation. If the submitter fails to respond to the notice from LSC within that time, LSC will deem the submitter to have no objection to the disclosure of the information.

(c) Upon receipt of written objection to disclosure by a submitter, LSC shall consider the submitter's objections and specific grounds for withholding in deciding whether to release the disputed information. Whenever LSC decides to disclose information over the objection of the submitter, LSC shall give the submitter written notice which shall include:

(1) A description of the information to be released and a notice that LSC intends to release the information;

(2) A statement of the reason(s) why the submitter's request for withholding is being rejected; and

(3) Notice that the submitter shall have 5 business days from the date of the notice of proposed release to appeal that decision to the LSC President, whose decision shall be final.

(d) The requirements of this section shall not apply if:

(1) LSC determines upon initial review of the requested records they should not be disclosed;

(2) The information has been previously published or officially made available to the public; or

(3) Disclosure of the information is required by statute (other than FOIA) or LSC regulations.

(e) Whenever a requester files a lawsuit seeking to compel disclosure of a submitter's information, LSC shall promptly notify the submitter.

(f) Whenever LSC provides a submitter with notice and opportunity to oppose disclosure under this section, LSC shall notify the requester that the submitter's rights process under this section has been triggered. Whenever a submitter files a lawsuit seeking to prevent the disclosure of the submitter's information, LSC shall notify the requester.

Victor M. Fortuno,

General Counsel and Vice President for Legal Affairs.

BILLING CODE 7050-01-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[I.D. 110502B]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper Grouper Fishery of the South Atlantic Region; Amendment 13; Public Hearing; Spiny Lobster Fishery of the Gulf of Mexico and South Atlantic; Scoping Meeting

AGENCY: National Marine Fisheries Service (NOAA Fisheries), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of public hearing and scoping meeting.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold a public hearing to address findings from the SAW/SARC (Stock Assessment Workshop/Stock Assessment Review Committee) process for the red porgy stock assessment. The hearing will include an overview of the recent Stock Assessment Workshop findings and the conclusions from the Stock Assessment Review Committee. In addition, the Council will conduct a public scoping meeting addressing issues affecting the spiny lobster fishery.

DATES: The red porgy public hearing and the public scoping meeting for spiny lobster will be held on Monday, December 2, 2002. See **SUPPLEMENTARY INFORMATION** for specific times for the public hearing and the scoping meeting.

ADDRESSES: The public hearing and scoping meeting will be held in New Bern, NC (see **SUPPLEMENTARY INFORMATION**).

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407-4699; telephone: 843-571-4366; fax: 843-769-4520; email address: kim.iverson@safmc.net.

SUPPLEMENTARY INFORMATION: A 1999 stock assessment showed red porgy stocks to be overfished and emergency action was taken to restrict both the commercial and recreational fishery, including a one fish per person recreational bag limit, a 50-pound (22.7-kg) incidental catch limit for the commercial sector, and a closed commercial season from January through April. A subsequent stock assessment and review through the SAW/SARC process concluded that red

porgy stocks remain overfished and the current management measures are warranted at this time. The Council is conducting the hearing in order to receive input from the public regarding these findings and obtain information regarding the effects of the current regulations. This information will be considered as the Council moves forward with the development of Amendment 13 to the Snapper Grouper Fishery Management Plan.

The scoping meeting will address issues affecting the spiny lobster fishery. These issues will include defining overfishing, possible federal regulation changes regarding the use of "shorts" or undersized lobsters used for bait by commercial harvesters, allowing the expansion of the commercial fishery north of Florida, and the distribution of tailing permits for spiny lobster.

The public hearing will be held at 6 p.m. with the public scoping meeting immediately following at the following location and date:

1. *December 2, 2002:* Sheraton Grand New Bern, 100 Middle Street, New Bern, NC 28560, telephone: 1-800-326-3745 or 252- 638-8112.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council (see **ADDRESSES**) by November 29, 2002.

Dated: November 8, 2002.

Bruce C. Morehead,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Atlantic Highly Migratory Species Fisheries; Atlantic Bluefin Tuna; Petition for Rulemaking

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of a petition for rulemaking; request for comments.

SUMMARY: NMFS announces receipt of, and requests public comment on, a petition from the North Carolina Division of Marine Fisheries (Petitioner)

to initiate rulemaking to amend the current Atlantic bluefin tuna (BFT) allocation criteria and to create a winter time-period subquota. The Petitioner has requested that NMFS commence the rulemaking process as soon as possible.

DATES: Comments must be received no later than 5 p.m., Eastern Standard Time, on December 18, 2002.

ADDRESSES: Written comments on the petition should be sent to Brad McHale, Highly Migratory Species Management Division, National Marine Fisheries Service, One Blackburn Drive, Gloucester, MA 01930-2298. Mark on the outside of the envelope: "Comments on Petition for Rulemaking." Comments may also be sent via a facsimile (fax) to (978) 281-9340. Comments will not be accepted if submitted via e-mail or the Internet. Copies of the letter constituting the petition are available upon request at the address mentioned above.

FOR FURTHER INFORMATION CONTACT: Brad McHale, Fishery Management Specialist, (978) 281-9260.

SUPPLEMENTARY INFORMATION:

Petition for Rulemaking

On October 16, 2002, the Petitioner submitted a request to NMFS to initiate rulemaking for a regulatory amendment to 50 CFR 635.27 that would allocate 23 percent of the General category BFT quota to a new December 1 through January 31 time-period subquota. In 2002, the initial General Category quota equaled 647 mt, thus 23 percent would equal 150 mt. The Petitioner states that the quota allocated to the late season General category fishery does not provide reasonable opportunity to harvest BFT when they appear off the South Atlantic coast. The Petitioner believes that there is inequity in the current General category BFT management scheme and that it is necessary to create a General category December through January subquota to ensure fair and equitable treatment to all General category permit holders. The Petitioner explains that the current allocation of General category quota disadvantages General category permit holders who wish to commercially pursue BFT in the South Atlantic, confounds the collection of fishery data, and confounds management for optimum yield.

The Petitioner notes that the proposed amendment could remedy the above inequities, address concerns over National Standard 4, benefit all U.S. BFT fishermen, and have significant economic benefits to South Atlantic fishing communities. The Petitioner also recognizes the proposed amendment could have some negative effects on

participants who exploit available quota during earlier time-period subquotas. However, the Petitioner believes that the negative impacts could be mitigated if New England fishermen elect to pursue the BFT as they move south of the South Atlantic states.

The Petitioner acknowledges that operating under the National Standards set forth in the Magnuson-Stevens Fishery Conservation and Management Act is a NOAA priority and policy. To that end, the Petitioner believes that the proposed amendment addresses serious issues related to several National Standards. The Petitioner also believes that the proposed amendment is consistent with specific objectives contained in the Fishery Management Plan for Atlantic Tunas, Swordfish and Sharks (HMS FMP), including improved coordination of domestic conservation and management of the highly migratory species fisheries, considering the multi-species nature of these fisheries, overlapping regional and individual participation, international management concerns, and other relevant factors, as well as maintaining the fishing season and geographic range of the fishery within its historic context to improve scientific monitoring and enhance fishing opportunities. In addition, the Petitioner notes that the 2002 quota specifications and General category effort controls acknowledge that the BFT fishery has changed in recent years with higher catch rates in the fall/winter. According to Petitioner, the proposed amendment would allow more time to harvest the General category subquota and minimize the need to increase harvest limits to levels that could negatively affect prices to U.S. fishermen in international markets.

Issue Background

The request made by the Petitioner has been recently discussed in several public forums. During the development of the issue of opening a southern commercial handgear BFT fishery, the HMS Advisory Panel and public extensively discussed establishing a set-aside quota for a North Carolina General category fishery. However, the HMS AP did not reach consensus on whether or not to allow a new southern commercial fishery. At that time, NMFS maintained its position that allowing new gear types and large scale fisheries for BFT would not be consistent with rebuilding overfished stocks and preventing overfishing. In analyzing a variety of long-term effort controls in the BFT fishery, the HMS FMP concluded that the status quo management regime for the General category would assist attainment of optimum yield and

address allocation issues by lengthening the season over time and space in a category with high participation and catch rates.

During the 2002 HMS AP meeting, representatives from North Carolina presented a proposal to allocate General category BFT quota during a time and/or in an area so that North Carolina fishermen would have local access to the commercial handgear fishery. The HMS AP again extensively discussed the issue but did not reach consensus.

During the comment period for the 2002 BFT Quota Specifications and General Category Effort controls, NMFS received numerous comments, stating that North Carolina should have its own winter General category set-aside quota. These comments also stated that the current General category allocation scheme discriminates between residents of different states and fails to provide equitable fishing opportunities across different geographical areas. Commenters also requested that there be a December through January time-period subquota established for southern states.

At that time, NMFS maintained the current quota allocation scheme and did not implement a specific set-aside quota for North Carolina. NMFS stated it would continue to assess the order of magnitude and scope of the fishing activities that would be associated with a North Carolina General category BFT fishery and would continue to work with the HMS AP to address potential solutions.

Request for Comments

This document solicits comments from the public regarding the need to proceed with rulemaking to amend the current General category BFT quota allocation schedule and the provision that closes the General category BFT fishery on December 31 of each year. NMFS is specifically requesting that the public provide comments on the social, economic, and biological impacts this regulatory amendment would have on the General category BFT Fishery. NMFS will consider this information in determining whether to proceed with the development of amended regulations requested by the petition.

Dated: November 12, 2002.

John H. Dunnigan,

*Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.*
