The Food and Drug Administration (FDA) administers laws concerning misbranded and adulterated foods, drugs, human biologics, medical devices, cosmetics, and human-made sources of radiation. The Budget provides a \$190.2 million (+17 percent) increase over the FY 1999 enacted program level. The Budget includes \$1,109.9 million for Salaries and Expenses, which includes funding for the food safety initiative and tobacco regulation, as well as new initiatives for injury reporting and product safety assurance in order to help meet FDA responsibilities under the FDA Modernization Act of 1997. Of the Salaries and Expenses amount, \$94.5 million will be used for payments to the General Services Administration for rent and rent related costs (an additional \$5.6 million will be derived from fees). The Budget reflects the transfer of the Seafood Inspection Division of the National Oceanic and Atmospheric Administration of the Department of Commerce to the FDA, which will be financed with \$12.7 million in currently authorized fees. In addition, the Budget includes \$183.2 million for user fees, an increase of \$30.7 million in user fees over FY 1999, which will be used to finance FDA activities. Of the \$183.2 million in user fees, \$17 million consists of new user fees related to the review of direct and indirect food additive petitions and for the review of medical device applications, which are represented in the legislative proposal schedule. The buildings and facilities appropriation of \$31.7 million provides funds for projects related to the repair, construction, alteration, and improvement of all buildings and facilities of FDA.

The Children's Hospitals Graduate Medical Education grant program is designed to provide temporary financial assistance for graduate medical education at free-standing children's hospitals. The Vaccine Improvement Program was established pursuant to Public Law 99-660 and Public Law 100-203, and serves as a source of funds to pay claims for compensation for vaccine related injury or death. Payment of claims associated with vaccine related injury or death occurring before October 1, 1988 are financed from the General Fund and are reflected in this account. Given sufficient carry-over funds from prior years' appropriations to pay for the balance of the pre-1988 backlog of claims yet to be adjudicated, no appropriation is requested in FY 2000 to cover payment of pre-1988 claims. Payment of claims associated with vaccine related injury or death occurring after October 1, 1988 are reflected in the Vaccine Improvement Trust Fund account.

P.L. 104-299 and P.L. 104-208 authorize HRSA to guarantee up to \$80 million in private loans to Health Centers for the costs of developing and operating managed care networks or plans and for the construction, renovation and modernization of medical facilities. Since this program has only used \$9 million of its available \$160 million in loan guarantee authority, HRSA will use the remaining existing loan guarantee limit over FY 1999 and FY 2000. As required by the Federal Credit Reform Act of 1990, this Financing Account records all cash flows to and from the Government resulting from the Health Center Loan Guarantee Program. The Program Account for this activity is displayed in the Health Resources and Services account (75-0350) as a line in the Program and Financing Schedule.

Title VII, part C of the Public Health Service Act established a revolving fund from which health professions schools could borrow in order to provide loans to their students.

Public Law 89-751, the Allied Health Professions Personnel Training Act of 1966, amended the Public Health Service Act to authorize the Federal Government to pay the difference between the interest paid by students to the schools and the interest payable by the schools to the Government National Mortgage Association (GNMA) and the Treasury.

Title VI and subsequently title XVI of the Public Health Service Act established a loan and loan guarantee fund for medical facilities with a maximum amount allowable for the Government's liability. Direct loans were made available for public facilities and guaranteed loans for private, nonprofit facilities. Funds under this authority were established in the amount of \$50 million for use in fulfilling guarantees in event of default, \$30 million as a revolving fund for direct loans and an amount for interest subsidy payments on guaranteed loans. Default and interest subsidy funds are replenished as necessary through the annual appropriation process.

The Supplementary Medical Insurance (SMI) program is a voluntary program which affords protection against the costs of physician and certain other medical services. The program also covers treatment of end-stage renal disease for eligible enrollees. SMI costs are financed by premium payments from enrollees and contributions from the general revenues.

The Budget proposes authorizing action that reduces budget authority by \$1.6 billion in FY 2000, repeals the existing Contingency Fund authority, and creates a new uncapped fund that could more effectively respond to State needs in the event of an unforeseen economic downturn.

AFDC expenditure claims for the period prior to States' transition to the Temporary Assistance to Needy Families Program have been lower than anticipated. As a result, unobligated balances remain in this account which are sufficient to cover expected State needs for child support enforcement activities through fiscal year 2000. The account is expected to return to its traditional appropriations cycle after then. As a result of P.L. 104-93, the Federal share of collections

is no longer used to reduce the budget authority requested in this account. Instead, spending authority from collections is limited to incentive and hold harmless payments. The net Federal share of collections after incentive and hold harmless payments are made to States is returned to the treasury in a receipt account. The text table below shows the traditional display of child support enforcement costs:

Head Start.—The proposed level will enable Head Start projects to continue comprehensive early childhood development services and is consistent with the President's goal to serve 1 million children by 2002, including a doubling of the number of infants and toddlers in Early Head Start. The proposed level will allow Head Start to expand beyond the 1999 enrollment level of 835,000 slots, adding 35,000 pre-school slots and 7,000 Early Head Start slots in 2000, for total enrollment of 877,000.

Social Services.—The proposed level will continue to support State, local, and private efforts to provide developmental and other services for children and youth, grants to improve support networks for persons with developmental disabilities, and economic development assistance to Native American populations.

Adoption Incentive Payments.—The proposed level includes \$20 million for bonus payments to States that increase the number of children adopted from the foster care system.

Departmental Management (DM) is a consolidated display of accounts that fund activities which provide leadership, policy, legal, and administrative guidance to HHS components; carry out the Department's civil rights and nondiscrimination enforcement programs; and support research to develop policy initiatives and improve existing HHS programs. DM also includes the activities of the Office of Public Health and Science, including adolescent family life, disease prevention and health promotion, physical fitness and sports, minority health, research integrity, women's health, and emergency preparedness. These accounts will continue to be appropriated separately, and are being displayed in a consolidated format to improve the readability of the presentation. Detailed information will continue to be available through the Department of Health and Human Services.

The Public Health and Social Services Emergency Fund supports three main activities in both the FY 1999 appropriation and FY 2000 Budget: Year 2000 computer conversion, preparing for and responding to the medical and public health consequences of potential bioterrorist events, and minority AIDS prevention and treatment. In FY 1999, \$189,053,000 was appropriated for Year 2000 computer conversion activities; \$133,600,000 was provided for bioterrorism activities; and \$50,000,000 for minority AIDS prevention and treatment. In FY 2000, a total of \$150,000,000 is provided for HHS' Year 2000 computer conversion activities; \$186,022,000 is provided for bioterrorism; and \$50,000,000 is provided for minority AIDS prevention and treatment.
