

DEPARTMENT OF DEFENSE—MILITARY

MILITARY PERSONNEL

Resources presented under the Military Personnel title contribute primarily to achieving the Department's corporate goal 1 (Shape). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

ACTIVE FORCES

These appropriations finance the personnel costs of the active duty forces of the Army, Navy, Marine Corps, and Air Force. This includes pay and allowances of officers, enlisted personnel, cadets and midshipmen, permanent change of station travel and other military personnel costs. Changes in financial requirements are primarily related to military personnel strengths. In addition, these appropriations finance the future retirement benefits of the current active forces. While most of the entitlements financed by these appropriations are set by statute, the estimates reflect continuing efforts to improve management, including implementation of audit recommendations, improved management of military travel, prudent use of bonus programs, and other pay programs.

Included in the 2000 request is funding for a 4.4% pay raise. This raise will help ensure that military compensation remains attractive and competitive with private sector pay and that the military services continue to attract and retain highly qualified people. Illustrative of the high quality of service members is their educational achievements. Almost 94% of the individuals recruited into the military services in 1998 were high school graduates compared to 79% of the youth of the same age in the general population. Over 96% of personnel entering the services as commissioned officers are college graduates. Over 43% of the officers on active duty have advanced college degrees compared to less than 8% in the general population.

Also included is \$196 million in FY 2000 and \$809 million in FY 2001 to reform military pay as of July 1, 2000 to provide greater rewards for military promotions and \$796 million in FY 2000 and \$888 million in FY 2001 to increase retirement benefits. These reforms are partly financed by eliminating the military wage credit, saving \$317 million in FY 2000 and \$313 million in FY 2001.

The numbers of active duty military personnel provided for are shown in the following table.

RESERVE FORCES

These appropriations finance the personnel costs of the National Guard and Reserve forces, including the future retirement benefits of the current Reserve forces. The estimates reflect continuing efforts to improve management efficiency including, for example, more economical use of training and recruiting resources as well as the undertaking of active missions at lower costs.

The number of National Guard and Reserve personnel estimated to participate in the Selected Reserve training programs and the number of full-time active duty military personnel provided for are summarized in the following table. Included in the 2001 estimate is an undistributed 12,000 reduction in Army Reserve and Army National Guard forces mandated by the Quadrennial Defense Review (QDR) study. The actual allocation of this reduction will be determined at a later date.

The Reserve Officers' Training Corps program provides training for reserve and regular officer candidates who have enrolled in the course while attending a college at which an ROTC unit has been established. College graduates who satisfactorily complete the advanced course of the program are commissioned and may be ordered to active duty for a minimum of 3 years.

The Reserve Officers' Training Corps Vitalization Act of 1964, as amended, authorizes a limited number of scholarships for ROTC students on a competitive basis. Successful candidates for the scholarships generally serve a minimum period of 4 years on active duty upon graduation and appointment as a commissioned officer. A number of scholarship recipients will fulfill their entire obligation in the Reserve components.

The Armed Forces health professions scholarship program provides a source of active duty commissioned officers for the various health professions.

The numbers of commissioned officers graduated from these programs are summarized below:

OPERATION AND MAINTENANCE

These appropriations finance the cost of operating and maintaining the Armed Forces, including the Reserve components and related support activities of the Department of Defense, except military personnel pay, allowances and travel costs. Included are amounts for pay of civilians, contract services for maintenance of equipment and facilities, fuel, supplies, and repair parts for weapons and equipment. Financial requirements are influenced by many factors, including the number of aircraft squadrons, Army and Marine Corps divisions, installations, military strength and deployments, rates of operational activity, and the quantity and complexity of major equipment (aircraft, ships, missiles, tanks, et cetera) in operation. Special emphasis is placed on ensuring adequate funding for all programs that contribute directly or indirectly to the readiness of our armed forces. As such, the Department has undertaken important efforts to better assess our military readiness and the relationship between readiness and operation and maintenance program funding levels.

Resources presented under the Operation and Maintenance title contribute primarily to achieving the Department's corporate goals 1 (Shape and Respond) and 2 (Prepare). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

The Defense Health Program provides care to present and retired members of the armed forces, their dependents, and other eligible beneficiaries. Beneficiaries may obtain care from Army, Navy, and Air Force facilities or, for those beneficiaries under age 65, through TRICARE (formerly CHAMPUS).

The Defense Health Program also manages funds appropriated to a new Research and Development account established by Congress in the FY 1999 Appropriations Act. These funds permit the Defense Department to conduct research into several areas relevant to the health of military personnel. The new account allows the Defense Health Program to centralize and use efficiently these funds.

Medical care is provided in military facilities as follows:

	1998	1999	2000	2001
Hospitals/Medical Centers	108	102	98	98
Clinics	480	489	489	489

These hospitals, medical centers and clinics are staffed by:

	Staff in thousands			
	1998	1999	2000	2001
Civilian work years	42	40	59	38
Military personnel	102	99	93	93
Percent of all active duty military personnel	6	6	6	6

The number of beneficiaries using the Defense Health Program is estimated as follows:

	Beneficiaries in thousands			
	1998	1999	2000	2001
Active Duty Personnel	1,589	1,560	1,539	1,527
Dependents of Active Duty Personnel	2,119	2,097	2,070	2,056
Retirees and dependents of retirees under age 65	1,911	1,896	1,884	1,871
Retirees and dependents of retirees over age 65	339	353	366	379
Total estimated Defense Health Program user population	5,958	5,906	5,859	5,833

Changes over time in the estimated number of users of the Defense Health Program largely reflect changes in the eligible population.

The defense environmental restoration program provides for the identification, investigation, and cleanup of contamination resulting from past DoD activities. At the beginning of 1999, the Department had 15,265 previously identified contaminated sites requiring no further action, leaving 9,689 active sites at approximately 700 military installations and 2,500 formerly used Defense properties. For the active sites, DoD is engaged in either a study to determine the extent of the contamination or the actual clean-up.

The Department's environmental restoration program is funded by five separate environmental restoration accounts, one for each military department, one for defense agencies and one for formerly used defense sites. These five decentralized accounts include restoration activities from preliminary assessment and site planning to studies, then clean-up and finally closeout of a site, functions formerly funded in the defense environmental restoration account.

This account was created in Public Law 105-277, the Omnibus Consolidated and Emergency Supplemental Act, 1999, to address requirements associated with Year 2000 (Y2K) computer conversion. A total of \$1,100 million in contingent emergency funding was provided, to be transferred to the Department of Defense as unforeseen requirements are identified.

The Department has submitted a management plan to the Office of Management and Budget that is currently under review. The review will assess departmental requirements and ensure that plan considers problems likely to arise both before as well as shortly after the beginning of the new millennium. Upon completion of the review, the President will notify Congress of the need to release the funds.

PROCUREMENT

Appropriations in this title support the acquisition of weapons, equipment, munitions, spares, and modification of existing equipment. Resources presented under the Procurement title contribute primarily to achieving the Department's corporate goal 2 (Prepare). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

Procurement to improve the capability of U.S. ground forces continues in 2000 and includes Army missile systems, Blackhawk helicopters, and tactical trucks. Major upgrade programs are also included for the ABRAMS tank, the Bradley Fighting Vehicle, the CH-47 helicopter and the AH-64 Apache Longbow attack helicopter. Marine Corps modernization emphasizes procurement of communications and electronic equipment and the V-22 Osprey tilt-rotor aircraft.

Modernization of our naval forces in 2000 is highlighted by continued procurement of the improved E/F version of the F/A-18 multi-role fighter. Procurement of the CH-60 helicopter, the T-45 trainer aircraft and remanufacture and upgrade of the AV-8B vertical/short takeoff and landing close air support aircraft continues. Procurement of Trident strategic missiles, conventional Tomahawk remanufactured missiles and Standard surface-to-air missiles also continues. Procurement of DDG-51 guided missile destroyers continues, along with funding for LPD-17 amphibious transport dock ships, and advance procurement for the CVN-77 aircraft carrier and a new attack submarine. Funding is also provided for the first ship of a new class of combat logistics ships.

Significant Air Force programs include procurement of the first production lot of six F-22 fighter aircraft, in FY2000, continued procurement of C-17 airlift aircraft, the Advanced Medium Range Air-to-Air Missile (AMRAAM), the Joint Standoff Weapon (JSOW) precision munition, the Joint Direct Attack Munition (JDAM), satellites, and space launch vehicles. Procurement continues for the JPATS trainer aircraft, a joint Navy/Air Force program.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In all years, it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Appropriations in this title support modernization through basic and applied research, fabrication of technology-demonstration devices, and development and testing of prototypes and full-scale preproduction hardware. This work is performed by contractors, government laboratories and facilities, universities and nonprofit organizations. Research and development programs are funded to cover annual needs. Resources presented under the Research, Development, Test, and Evaluation title contribute primarily to achieving the Department's corporate goal 2 (Prepare). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for that appropriation. Funds for each fiscal year are available for obligation for a two-year period beginning on the first day of that fiscal year.

The 2000 budget provides for major technology and development efforts. These include science and technology programs emphasizing dual-use technologies, ballistic missile defense, Army digitization initiatives, the Crusader Artillery System, advanced anti-tank weapons, the RAH-66 Comanche Helicopter, the F-22 Advanced Tactical Fighter, the F/A-18 E/F improved multirole fighter aircraft, the Joint Strike Fighter program, development of a new attack submarine and new classes of aircraft carriers and surface combatants, the V-22 tiltrotor aircraft, the Evolved Expendable Launch Vehicle program, the Airborne Laser and a new space-based warning system.

The Department will continue to emphasize technology efforts that ensure that the Nation will maintain a technological advantage over potential adversaries. Advanced Concept Technology Demonstrations will continue to receive particular emphasis. Development and evaluation of technologies will be pursued through prototyping with further development and production based on identifiable threats and maturity of the technology. The Department's funding in the basic and applied research budget activities, below, is included in the 21st Century Research Fund.

MILITARY CONSTRUCTION

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 2000 it presents, by budget activity, the value of the program requested for the life of

the multiple-year appropriations, with comparable amounts in 1998 and 1999. Resources presented under the Military Construction title contribute primarily to achieving the Department's corporate goal 2 (Prepare). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

The budget authority for military construction programs for the Armed Forces, both Active and Reserve, shown in the individual schedules of this title is summarized in the following table:

MILITARY CONSTRUCTION PROGRAM

	[In millions of dollars]			
	1998 actual	1999 est.	2000 est.	2001 est.
Active Forces	2,079	2,242	1,155	3,787
Reserve Forces	464	499	78	406
Interservice activities	2,956	2,338	1,065	2,886
Total	5,499	5,079	2,298	7,079

The Military Construction programs are intended to provide facilities required as a result of new weapon systems entering the inventory including aircraft and naval vessels, to support chemical demilitarization and other high priority initiatives. The program continues initiatives to improve living and working conditions, reduce operating costs, increase productivity, and conserve energy by upgrading or replacing facilities which have become functionally obsolete or can be made more efficient through relatively modest investments in improvements. Also included in this request are resources required to realign and close bases consistent with the four closure rounds required by the Base Closure Acts of 1989 and 1990, and the expected land revenues which partially offset the one-time costs of closures.

The FY 2000 program is funded through a combination of FY 2000 appropriations and FY 2001 advance appropriations. The affected accounts identify in their specific appropriations request the amount requested in each fiscal year to support the FY 2000 construction program.

FAMILY HOUSING, DEFENSE

These appropriations finance all costs associated with construction, improvements, operations, maintenance and leasing of all military family housing. In addition to quality of life enhancements, the program contains initiatives to reduce operating costs and conserve energy by upgrading or replacing facilities which can be made more efficient through relatively modest investments in improvements.

The Family Housing Improvement Fund (FHIF) was created to finance the use of innovative methods authorized in the Housing Revitalization Act (HRA), P.L. 104-106, to meet the Department's housing needs. The HRA authorizes the Department to use limited partnerships, make direct and guaranteed loans, and convey Department-owned property to stimulate the private sector to increase the availability of affordable, quality housing for military personnel. The Department hopes to increase its reliance on the private sector to provide quality housing for all military personnel much sooner than possible with traditional family housing programs at currently planned funding levels.

The budget includes new appropriations for the FHIF in 2000 and 2001 for privatization initiatives at 10 locations and for administrative expenses.

The budget plan for each appropriation is shown as a separate table immediately following the program and financing schedules for those appropriations that are available for obligation for more than one year. In 2000 and 2001 it presents, by budget activity, the value of the program requested for the life of the multiple-year appropriation, with comparable amounts in 1998 and 1999.

Resources presented under the Family Housing, Defense title contribute primarily to achieving the Department's corporate goals 1 (Shape) and 2 (Prepare). A detailed description of the corporate goals is contained in the FY 2000 Performance Plan in the Department's 1999 Annual Report to the President and Congress. This performance plan is required by the Government Performance and Results Act of 1993.

The National Defense Stockpile is planned and operated under the authority of the Strategic and Critical Materials Stockpiling Act. The purpose of the Stockpile is to decrease or preclude a dangerous and costly dependence by the United States upon foreign sources for supplies of strategic and critical materials in times of national emergency. The quantities of the materials stockpiled as required by the Stockpiling Act are to be sufficient to sustain the United States during a national emergency involving military conflict that necessitates an expansion of the Armed Forces together with a significant mobilization of the economy of the United States.

The National Defense Stockpile Transaction Fund provides for the financing of acquisition, disposal and upgrading of strategic and critical stockpile materials, and all related expenses such as transportation, development of specifications, testing, quality studies, and relocation of materials, and operation of the Defense National Stockpile Center.

The FY 2000 budget proposes transferring \$50 million to the operation and maintenance accounts of the Navy, Army, and Air Force to provide funding for readiness-related programs. Also, the FY 2000 budget proposes transferring to the Defense Reutilization and Marketing Service all FY 2000 stockpile revenue in excess of \$393,500,000.

Section 662 of the Defense Authorization Act for 1992 and 1993, Public Law 102-190, established the Voluntary Separation Incentive (VSI) Fund to help manage the ongoing military force drawdown. VSI provides annual payments to selected active-duty Service members with more than six but less than 20 years of service who leave the service voluntarily. The Act provided that after January 1, 1993, all voluntary separation incentive payments shall be made from the fund. The fund is financed through actuarially-determined Government contributions from the Department of Defense personnel appropriations to cover the unfunded liability and the present value of future benefits for those separating and interest on the investments. The Act, as amended by Section 561 of Public Law 105-261 requires that the total present value costs of VSI benefit payments be deposited in the fund by September 30, 2001, when the authority to approve VSI benefits ends. Permanent authority to make these payments is contained in section 8044 of the 1997 Defense Appropriations Act.

This account funds separation payments for former Department of Defense employees who are not United States citizens and who worked outside the United States. The payments are determined according to the applicable labor laws of the various countries.

The National Security Education Act of 1991 established a program for undergraduate scholarships, graduate fellowships, and grants to educational institutions in critical area studies, foreign languages and other international fields.

This program enhances the quality of U.S. educational programs in these fields by making it possible for more U.S.-citizen students to study abroad. The programs will develop a larger pool of potential U.S. Government employees with knowledge of particular cultures, languages, and governments. The program is to be carried out by the Secretary of Defense in consultation with the National Security Education Board. The Board will establish the criteria for awards.

(b) **EVALUATION OF COMPLIANCE IN SELECTED EXERCISES.**—In conducting the military exercises described in subsection (c), the Secretary of Defense shall ensure that—

In such a case, the system excluded shall be replaced in accordance with the year 2000 contingency plan for the system.

(2) If the Secretary of Defense excludes an information technology or national security system from the year 2000 simulation phase of an exercise as provided in paragraph (1), the Secretary shall notify Congress of that exclusion not later than two weeks before commencing that exercise. The notice shall include a list of each information technology or national security system excluded from the exercise, a description of how the exercise will use the year 2000 contingency plan for each such system, and a description of the effect that continued year 2000 noncompliance of each such system would have on military readiness.

[SEC. 8128. (a) FINDINGS.—The Congress finds that—

(1) child experts estimate that as many as 250,000 children under the age of 18 are currently serving in armed forces or armed groups in more than 30 countries around the world;

(2) contemporary armed conflict has caused the deaths of 2,000,000 minors in the last decade alone, and has left an estimated 6,000,000 children seriously injured or permanently disabled;

(3) children are uniquely vulnerable to military recruitment because of their emotional and physical immaturity, are easily manipulated, and can be drawn into violence that they are too young to resist or understand;

(4) children are most likely to become child soldiers if they are poor, separated from their families, displaced from their homes, living in a combat zone, or have limited access to education;

(5) orphans and refugees are particularly vulnerable to recruitment;

(6) one of the most egregious examples of the use of child soldiers is the abduction of some 10,000 children, some as young as 8 years of age, by the Lord's Resistance Army (in this section referred to as the "LRA") in northern Uganda;

(7) the Department of State's Country Reports on Human Rights Practices for 1997 reports that in Uganda the LRA kills, maims, and rapes large numbers of civilians, and forces abducted children into "virtual slavery as guards, concubines, and soldiers";

(8) children abducted by the LRA are forced to raid and loot villages, fight in the front line of battle against the Ugandan army and the Sudan People's Liberation Army (SPLA), serve as sexual slaves to rebel commanders, and participate in the killing of other children who try to escape;

(9) former LRA child captives report witnessing Sudanese government soldiers delivering food supplies, vehicles, ammunition, and arms to LRA base camps in government-controlled southern Sudan;

(10) children who manage to escape from LRA captivity have little access to trauma care and rehabilitation programs, and many find their families displaced, unlocatable, dead, or fearful of having their children return home;

(11) Graca Machel, the former United Nations expert on the impact of armed conflict on children, identified the immediate demobilization of all child soldiers as an urgent priority, and recommended the establishment through an optional protocol to the Convention on the Rights of the Child of 18 as the minimum age for recruitment and participation in armed forces; and

(12) the International Committee of the Red Cross, the United Nations Children's Fund (UNICEF), the United Nations High Commission on Refugees, and the United Nations High Commissioner on Human Rights, as well as many nongovernmental organizations, also support the establishment of 18 as the minimum age for military recruitment and participation in armed conflict.

(b) IN GENERAL.—The Congress hereby—

(1) deplores the global use of child soldiers and supports their immediate demobilization;

(2) condemns the abduction of Ugandan children by the LRA;

(3) calls on the Government of Sudan to use its influence with the LRA to secure the release of abducted children and to halt further abductions; and

(4) encourages the United States delegation not to block the drafting of an optional protocol to the Convention on the Rights of the Child that would establish 18 as the minimum age for participation in armed conflict.

(c) SENSE OF THE CONGRESS.—It is the sense of the Congress that the President and the Secretary of State should—

(1) support efforts to end the abduction of children by the LRA, secure their release, and facilitate their rehabilitation and reintegration into society;

(2) not block efforts to establish 18 as the minimum age for participation in conflict through an optional protocol to the Convention on the Rights of the Child; and

(3) provide greater support to United Nations agencies and nongovernmental organizations working for the rehabilitation and reintegration of former child soldiers into society.]

[SEC. 8129. SEC. [8130] 8056. TRAINING AND OTHER PROGRAMS. (a) PROHIBITION.—None of the funds made available by this Act may be used to support any training program involving a unit of the security forces of a foreign country if the Secretary of Defense has received credible information from the Department of State that [a member of such] *the* unit has committed a gross violation of human rights, unless all necessary corrective steps have been taken.

(b) MONITORING.—[Not more than 90 days after the enactment of this Act, the] *The* Secretary of Defense, in consultation with the Secretary of State, shall [establish procedures to] ensure that prior to a decision to conduct any training program referred to in subsection (a), full consideration is given to all credible information available to the Department of State relating to human rights violations by foreign security forces.

(c) WAIVER.—The Secretary of Defense, after consultation with the Secretary of State, may waive the prohibition in subsection (a) if he determines that such waiver is required by extraordinary circumstances.

[(d) REPORT.—Not more than 15 days after the exercise of any waiver under subsection (c), the Secretary of Defense shall submit a report to the congressional defense committees describing the extraordinary circumstances, the purpose and duration of the training program, the United States forces and the foreign security forces involved in the training program, and the information relating to human rights violations that necessitates the waiver.]

[SEC. 8131.
