
DETAILED BUDGET ESTIMATES

EXPLANATION OF ESTIMATES

“DETAILED BUDGET ESTIMATES” contains various tables and schedules in support of the budget. It includes explanations of the work to be performed and the money needed. It includes the language proposed for enactment by Congress on each item for which congressional action in an appropriations bill is required. It also contains the language proposed for the general provisions of appropriations acts that apply to entire agencies or groups of agencies.

ARRANGEMENT

The first section of this chapter presents general provisions of law that apply to all government activities (see explanation below). Sections for the Legislative Branch and the Judiciary follow. These are followed by sections for the Executive Branch. Information on the Executive Office of the President is presented first, followed by the cabinet departments in alphabetical order, the larger nondepartmental agencies, groupings for “International Assistance Programs” and “Other Defense Civil Programs,” and the remaining agencies, under the heading “Other Independent Agencies.” If the amounts in the individual accounts for other independent agencies are below the million-dollar reporting threshold applicable to data in the Appendix, the data are consolidated into a single set of schedules under “Other Commissions and Boards.” Appropriation language for these agencies is presented individually under the same heading.

A section for a large agency is usually organized by major subordinate organizations within the agency (usually bureaus) or by major program area.

Within each bureau or major program area, accounts usually appear in the following order:

- general fund accounts with current budget authority, in the following order: accounts for which appropriations are requested for the budget year; accounts for which appropriations were made in the current year and not requested in the budget year; other unexpired accounts; expired accounts;
- permanent general fund appropriations;
- special fund accounts with current budget authority, in the following order: accounts for which appropriations are

- requested for the budget year; accounts for which appropriations were made in the current year and not requested in the budget year; other unexpired accounts; expired accounts;
- permanent special fund appropriations;
- public enterprise funds;
- intragovernmental revolving funds and management funds;
- credit reform accounts, in the following order: program account, financing account, and liquidating account;
- trust funds;
- trust revolving funds.

By law, the Old-Age and Survivors Insurance and Disability Insurance trust funds (Social Security) are outside the budget totals. These accounts are presented in the Social Security Administration section. Also, by law the Postal Service Fund is outside the budget totals. A presentation for the Fund is included in the Other Independent Agencies section.

General provisions are provisions in appropriations acts that apply to more than one appropriation. In some instances, they apply only to the appropriations for one agency. In other instances, they apply to the appropriations for two or more agencies covered by the act. In one instance, they apply to all appropriations Government-wide. The proposed language for general provisions that are only applicable to one agency appears at the end of the section for that agency. The general provisions that apply to two or more agencies, appear at the end of the section for one of the agencies. The following table indicates the location of all general provisions. The first column of the table lists the most recently enacted appropriations and the major agencies responsible for programs funded by each act. The second column provides the location of the general provisions that apply to the agencies listed in the first column. The general provisions that are Government-wide in scope (identified “Departments, Agencies, and Corporations”), normally contained in the Treasury, Postal Service, and General Government Appropriations Act, appear in a separate section following this one. Proposed changes to general provisions are presented in the manner described below for appropriations language.

FORM OF DETAILED MATERIAL

APPROPRIATIONS LANGUAGE

The language proposed for inclusion in the 1999 appropriations acts is printed following the account title. Language for enacted 1998 appropriations, printed in roman type, is used as a base. Brackets enclose material that is proposed for deletion; italic type indicates proposed new language. If the appropriation is being proposed for the first time, all of the language is printed in italics. The amounts in appropriations language are stated in dollars. At the end of the final language paragraph, and printed in italic within parentheses, are citations to any relevant authorizing legislation and to the specific appropriations act from which the basic text of the 1998 language is taken. An illustration of proposed appropriations language for 1999 follows:

OPERATING EXPENSES

For necessary expenses of the Office of Climate Information, [\$30,290,000] *\$28,870,000* of which [\$150,000] *\$400,000* shall remain available until expended. (34 U.S.C. 218 et seq.; Department of Government Appropriation Act, 1997)

BASIS FOR SCHEDULES

Dollar amounts in *Appendix* schedules are stated in millions, unless otherwise specified.

The 1997 column of this budget presents the actual transactions and balances for that year, as recorded in agency accounts.

For 1998, the regular schedules include enacted appropriations. In addition, indefinite appropriations are included on the basis of amounts likely to be required.

The 1999 column of the regular schedules includes proposed appropriations for all programs under existing legislation, including those that require extension or renewal of expiring laws.

Amounts for proposed new legislation are shown generally in separate schedules, following the regular schedules or in budget sequence in the respective bureau. These schedules

are identified as "Legislative proposals, subject to PAYGO" or "Legislative proposals not subject to PAYGO." The term "PAYGO" refers to the "pay-as-you-go" requirements of the Budget Enforcement Act of 1990. Appropriations language is included with the regular schedules, but usually not with the separate schedules for proposed legislation. Usually the necessary appropriations language is transmitted later upon enactment of the proposed legislation.

PROGRAM AND FINANCING SCHEDULE

This schedule provides the following information:

- obligations by program activity;
- budgetary resources available for obligation;
- detailed information on new budget authority (gross);
- change in unpaid obligations;
- detailed information on outlays (gross);
- offsets to gross budget authority and outlays; and
- net budget authority and outlays.

The "Obligations by program activity" section shows obligations for specific activities or projects. The activity structure is developed for each appropriation or fund account to provide a meaningful presentation of information for the program. Where the amounts are significant, this section distinguishes between operating expenses and capital investment and between direct and reimbursable programs. The last entry, "Total obligations," indicates the amount of budgetary resources required to finance the activities of the account.

The "Budgetary resources available for obligation" section shows the budgetary resources available or estimated to be available to finance the obligations. The resources available for obligation include the start-of-year unobligated balances of a prior year that have not expired, new budget authority, and adjusting entries, such as recoveries from prior year obligations. New obligations are subtracted from these resources, resulting in the end-of-year unobligated balances.

The "New budget authority (gross), detail" section provides detailed information on the total new budget authority available to finance the program. It includes information on the

type of budget authority that is available, rescissions, reductions, and amounts precluded from obligation.

The "Change in unpaid obligations" section shows the difference between obligations and outlays. New obligations are added to the obligations that were incurred in a previous year but not liquidated. Total disbursements (outlays, gross) are subtracted from these amounts. Adjusting entries, such as adjustments in expired accounts, are included, as appropriate, resulting in the end-of-year unpaid obligations. Where applicable, this section separately identifies total unpaid obligations, orders on hand from Federal sources, and obligated balances, which are the unpaid obligations less the orders on hand from Federal sources.

The "Outlays (gross), detail" section indicates whether the outlays pertain to current or permanent budget authority and to balances or new authority.

The "Offsets and net budget authority and outlays" sections indicate the amounts to be deducted from gross budget authority and outlays to arrive at the net budget authority and outlay amounts. Offsetting collections (cash) and the change in orders on hand from Federal sources are deducted from gross budget authority; only offsetting collections (cash) are deducted from gross outlays.

NARRATIVE STATEMENT OF PROGRAM AND PERFORMANCE

Narrative statements present briefly the objectives of the program and the work to be financed primarily for 1999. Measures of expected performance may be included, and the relationship to the financial estimates is described.

Object classes reflect the nature of the things or services purchased, regardless of the purpose of the program for which they are used. Object class entry 11.9, Total personnel compensation, is the sum of amounts in object classes 11.1 through 11.8. Except for revolving funds, reimbursable obligations are aggregated in a single line and not identified by object class. Amounts for any object class that are below the reporting threshold (i.e., amounts that are \$500 thousand or less) are reported together as a single entry. Data, classified by object, are illustrated in the following schedule:

Object Classification (in millions of dollars)				
Identification code 17-0643-0-1-452	1997 actual	1998 est.	1999 est.

99.9 Total obligations	238	237	239	

When obligations for personnel compensation are shown in the object classification schedule, a personnel summary generally will follow the object classification schedule, as illustrated below:

Personnel Summary

1005 Full-time equivalent of overtime and holiday hours	23	17	19	
Reimbursable: Total compensable workyears:				
2001 Full-time equivalent employment	8	12	12	

Federal civilian employment generally is stated on a full-time equivalent (FTE) basis for the executive branch. It is the total number of hours worked (or to be worked) divided by the number of compensable hours applicable to each fiscal year.

FINANCIAL STATEMENTS

Financial statements are presented for activities specifically required by the Government Corporation Control Act or other legislation, all direct and guaranteed loan financing accounts (balance sheets only), all Government-sponsored enterprise funds, and generally for other revolving and trust revolving funds conducting business with the public. They are occasionally presented for funds conducting business within the Government.

Statement of Operations

For many revolving funds there is a statement of operations that shows the resulting net income or loss for the year. This statement usually includes accrued revenue (e.g., revenue earned) and accrued expenditures (e.g., including costs incurred but not yet paid), whether funded or unfunded. The amounts in the 1996 column are audited.

Balance Sheet

The balance sheets show assets, liabilities, and equity for the fund at the close of each fiscal year. In addition to this information, which is similar to commercial balance sheet data, budget needs also require additional information, shown in the equity section. A disclosure is made of obligations incurred that have not yet accrued into liabilities (undelivered orders) and of budgetary resources for which no funding has been received (unfinanced budgetary resources). Unfinanced budgetary resources include orders from Federal customers that have not been filled (unfilled orders), and unfinanced budget authority in the form of authority to borrow for which borrowing has not taken place, and contract authority for which liquidating cash has not been received. Orders received from the public must be accompanied by advance payment. The amounts in the 1996 column are audited. Other amounts are unaudited and subject to change.

FEDERAL CREDIT SCHEDULES

Federal credit programs provide benefits to the public in the form of direct loans and loan guarantees. The Federal Credit Reform Act of 1990 requires that the estimated costs arising from the direct and guaranteed loans of a program be calculated on a net present value basis, excluding administrative costs. For most programs, direct loan obligations and loan guarantee commitments cannot be made unless appropriations for the cost have been provided in advance in annual appropriations acts. In addition, annual limitations on the amount of obligations and commitments may be enacted in appropriations language.

Appropriations for costs are recorded as budget authority in credit program accounts. The administrative expenses associated with a credit program are also financed in the program account, but on a cash basis. All cash flows arising from direct loan obligations and loan guarantee commitments are recorded in separate financing accounts. The transactions of the financing accounts are not included in the budget totals. Program accounts make subsidy payments, recorded as on-

budget outlays, to the financing accounts at the time of the disbursement of the direct or guaranteed loans.

The transactions associated with direct loan obligations and loan guarantee commitments made prior to 1992 continue to be accounted for on a cash flow basis and are recorded in liquidating accounts. In most cases, the liquidating account is the account that was used for the program prior to the enactment of the 1990 requirements.

Program and Financing schedules (described above) are shown for program, financing, and liquidating accounts. In addition, a Summary of Loan Levels, Subsidy Budget Authority, and Outlays by Program schedule is shown for program accounts. Status of Direct Loans and Status of Guaranteed Loans schedules (as applicable) are shown for liquidating accounts and financing accounts. Examples of these schedules are shown below. Summary information on Federal credit programs is provided in the chapter entitled "Underwriting Federal Credit and Insurance" in the *Analytical Perspectives* volume.

UNAVAILABLE COLLECTIONS SCHEDULE

This schedule is printed for special fund and trust fund accounts to show the amount of receipts that are credited to them. It also shows any balances of unappropriated receipts or receipts that are precluded from obligation because of a provision of law, such as a benefit formula or limitation on obligations. The schedule also is printed for other types of accounts with offsetting collections that are unavailable for obligation because of limitations on obligations.

STATUS OF CONTRACT AUTHORITY SCHEDULE

Contract authority is a form of budget authority that permits obligations to be incurred but requires a subsequent appropriation to liquidate (pay) the obligation. Where applicable, this schedule follows the program and financing schedule

and reports the amount of contract authority for which appropriations to liquidate have not been provided or requested.

BUDGET PLAN SCHEDULE

This schedule is printed only for certain accounts in the Department of Defense—Military chapter. It shows obligations incurred or estimated to be incurred from an appropriation, regardless of the timing of the obligation.

STATUS OF FUNDS SCHEDULE

This schedule reports balances, cash income, and cash outgo for major trust funds and certain other accounts. When present, it appears after the narrative statement for the fund or account.

STATUS OF CONTINGENT EMERGENCY FUNDING SCHEDULE

This schedule is printed for any account that has balances of emergency appropriations that are contingent on the President submitting a budget request to Congress designating an amount as an emergency requirement, as defined by the Balanced Budget and Emergency Deficit Control Act of 1985, as amended.

GENERAL FUND RECEIPT ACCOUNTS SCHEDULE

This schedule shows the amount of receipts attributed to an agency that are credited to the general fund of the Treas-

ury. It is printed at the end of the presentation for the agency, before any general provisions. (Receipts that are credited to a special fund or trust fund for which the agency is responsible are shown in an Unavailable Collections schedule presented with other schedules for the fund.)

ALLOCATIONS BETWEEN AGENCIES

In some cases, funds appropriated to the President or to an agency are allocated to one or more agencies that help to carry out a program. Obligations incurred under such allocations are included in the data for the account to which the appropriation is made in the allocating agency. The object classification schedule for such accounts identifies the amount of such obligations by performing agency. A note at the end of a bureau or equivalent grouping identifies allocations received from other agencies.

BUDGETS NOT SUBJECT TO REVIEW
