SUPPLEMENTARY INFORMATION:

I. Background

OSHA promulgated regulation 29 CFR 1904.8 which currently requires employers to report any death of an employee from a work related incident or the in-patient hospitalization of three or more employees as a result of a work related incident to OSHA within 8 hours. OSHA investigates such incidents in order to provide the Agency with information on the causes of employment fatalities and serious injuries, to identify and require

correction of serious hazards, and to prevent the occurrence of such incidents in the future. Such information can also be a source of support for new and revised safety and health standards. Investigators will determine whether there was a violation of OSHA standards, and, if so, whether the violation may have contributed to the incident. Therefore, such investigations must be prompt and thorough if they are to provide valid, useful information and achieve their intended purposes.

OSHA currently has approval from the Office of Management and Budget (OMB) for information collection requirements contained in 29 CFR 1904.8. That approval will expire on July 31, 2000. This notice initiates the process of OSHA to request an extension of the current OMB approval. This notice also solicits public comment on OSHA's paperwork burden estimates from interested parties and seeks public response to several questions related to the development of OSHA's estimation. Interested parties are requested to review OSHA's estimates, which are based upon the most current data available, and to comment on their accuracy or appropriateness in today's workplace.
