Vendor OSS Verification and Testing

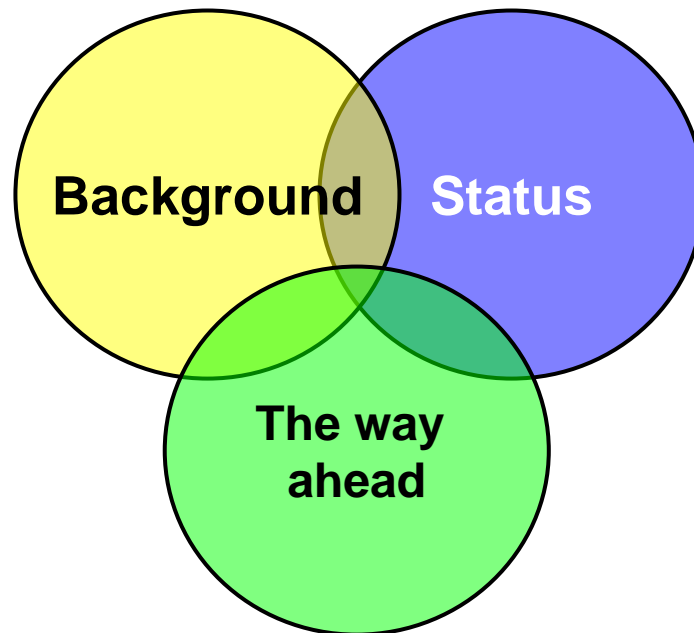

Mark Provus

Office of Technology Services

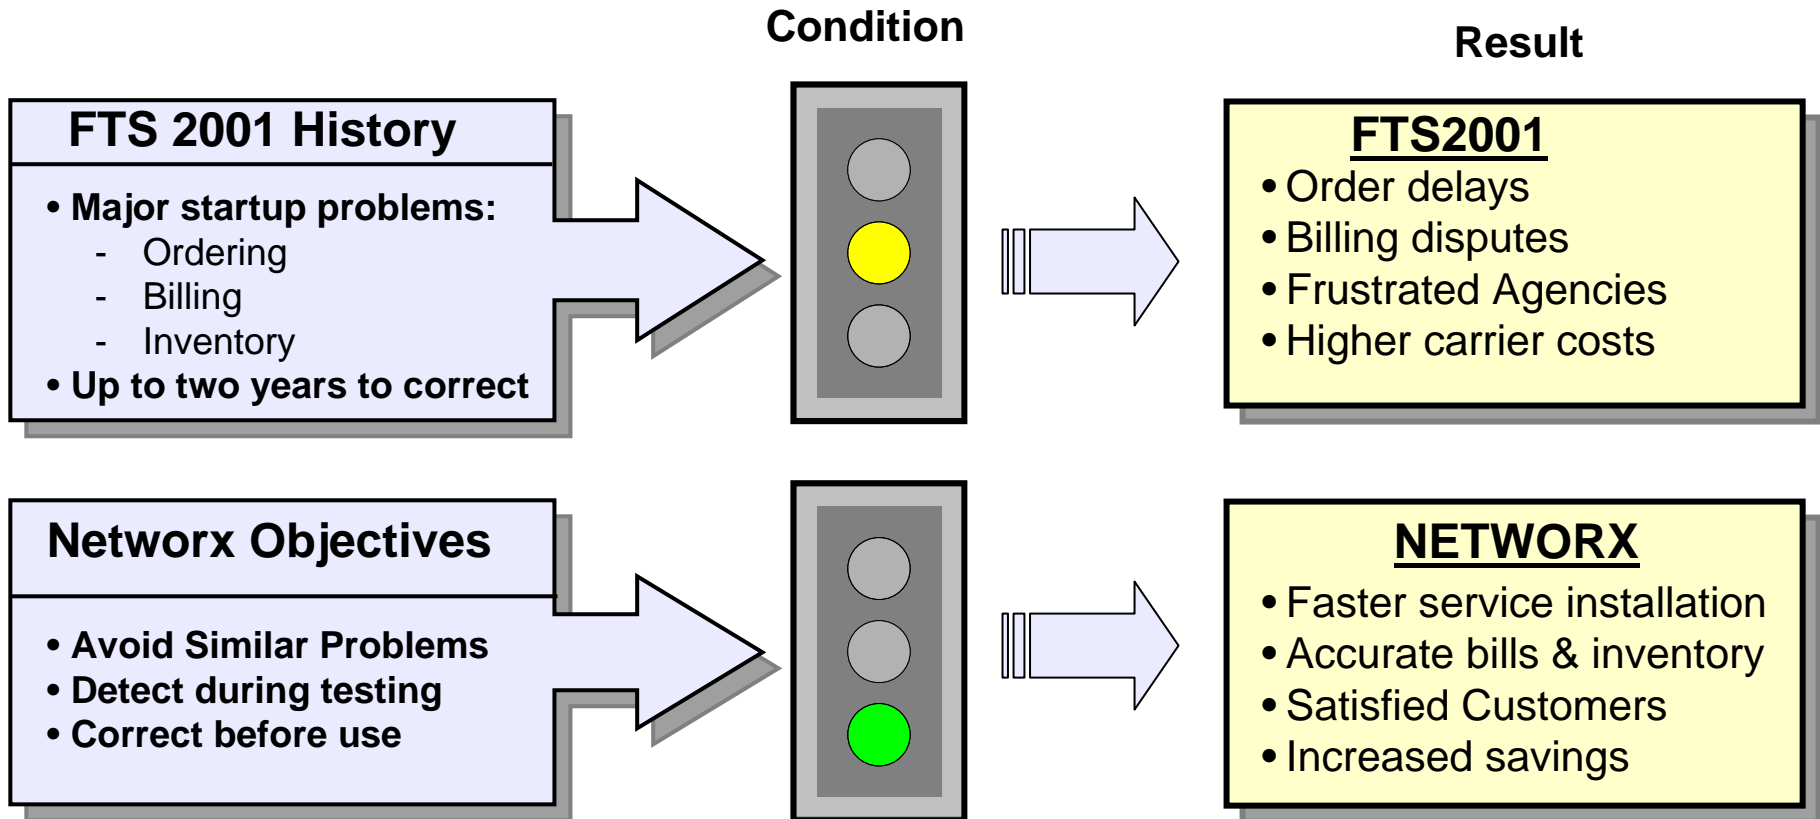

January 30, 2007

Background

Network Vendor's Operations Support Systems (OSS) Verification Testing

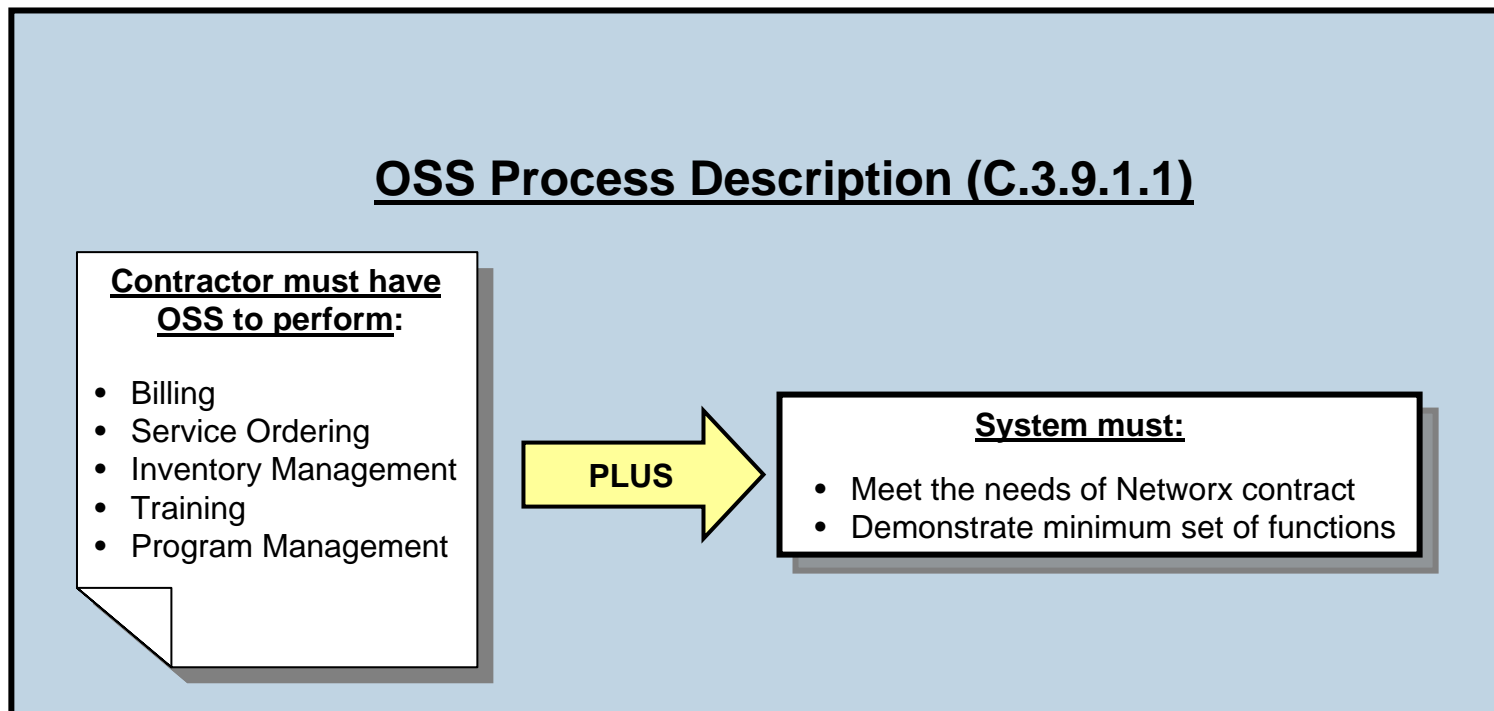

Background

Background

OSS Verification Testing defined by Networx RFPs

Background

House Government Reform Committee

OVERSIGHT HEARING

March 3, 2005

Subsequent guidance from the

Inter-Agency Management
Council

DECISIONS

Purpose of OSS Testing:

- Verify that vendors can demonstrate a defined, minimal functionality

Testing Requirements

- Criteria specific and limited
- Include only basic requirements to allow for faster transition

NOT INCLUDED

- Network Mgmt
- Billing Disputes
- OSS Performance

Background

Network OSS Verification Testing Activities

<p>ORDERS (by Service Type)</p> <ul style="list-style-type: none"> • Single Orders • Bulk Orders

Verify		Test Case
• Order data accepted	Order data populated	1
• ACK • SOC • FOC • SOCN	Consistent with order	2 & 3

Other Checks		Test Case
• INVENTORY	Consistent with orders	4
• INVOICE	Complete/accurate	5
• SECURITY	Access Control, etc.	6

Background

What OSS Testing will accomplish:

Verify basic OSS functionality

- Ordering
 - Single orders
 - Bulk orders
 - Repeated for all services
- Order Acknowledgements
- Billing
 - Accuracy
 - Account code structure
- Inventory
- Security

It will **NOT** accomplish:

Extended OSS functionality testing

- Regression testing of all ordering features
- Billing dispute process
- Network Management
- Vendor OSS management processes
- Service QoS Standards/SLA compliance
- **Provide Vendor Certification and Accreditation**

Status

Schedule

Activity	Calendar Days Following Notice to Proceed												
	0	1-7	8-14	15-21	22-28	29-35	36-42	43-49	50-56	57-63	64-70	71-77	78-84
Contract Award													
Carrier Receives Test Data													
Government Accepts or Rejects Contractor Test Plan, Provides Comments													
Contractor Responds to Government Comments													
Government Accepts Contractor Test Plan													
60-Day Testing Period						60-Day Testing Period							
Contractor Performs OSS Verification Testing													
Contractor Provides OSS Verification Test Results Report													
Government Accepts Or Rejects Test Results Report													
Contractor Re-tests If Necessary													
Contractor May Request Additional Time For Testing If Necessary													

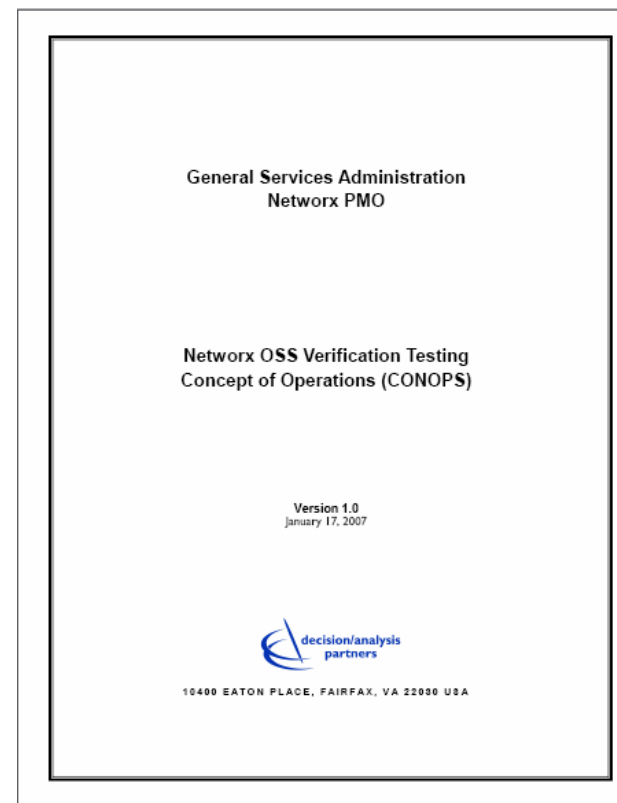

Actions/Accomplishments

- **OSS Verification Testing Support Team assembled**

- Core team staffed by experienced industry professionals
- decision/analysis partners
- Mitretek

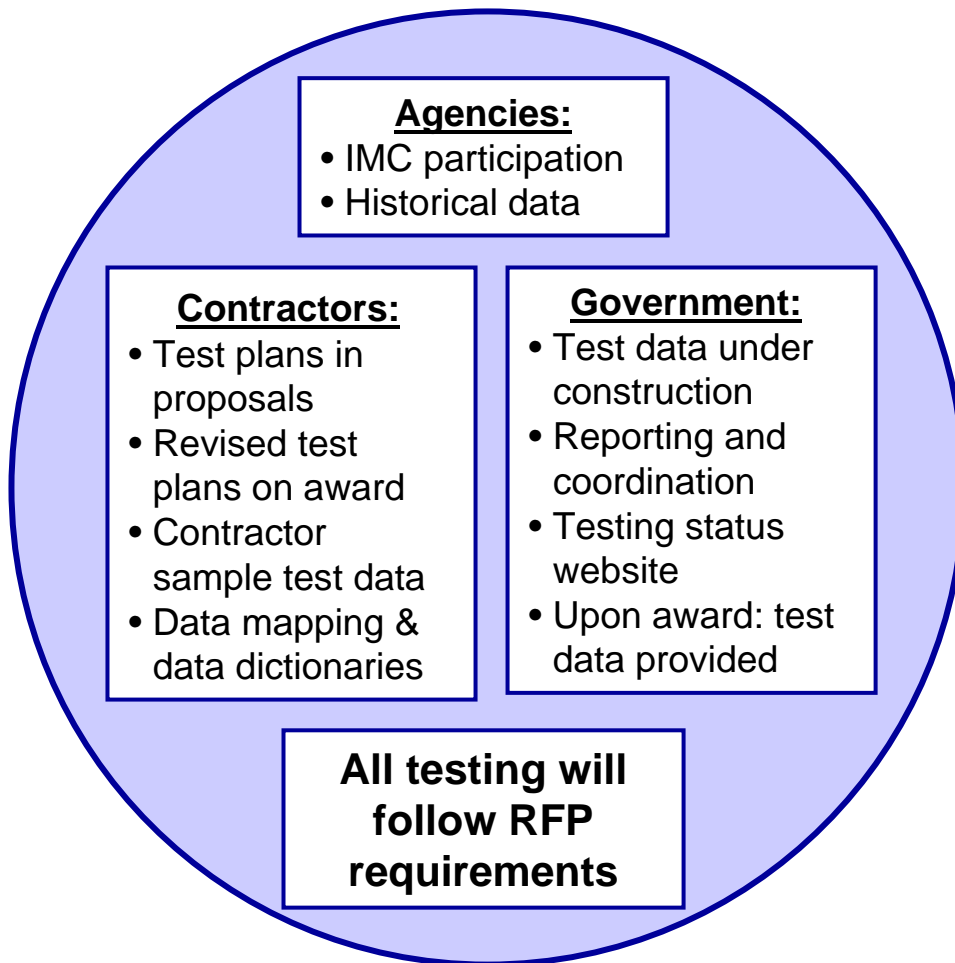

- **Actual on-site OSS Verification Testing**

- Core team supplemented by additional members
- All with significant OSS experience
- Will allow concurrent testing in multiple locations

- **CONOPS Document completed**

OSS Verification Testing

OSS Verification Testing Status Website

- Password protected/secure login
- Available for contractor personnel to review their own test results
- Available to GSA to review testing status of all contractors
- Updated daily during testing
- Dashboard + drill-down for additional details

OSS Verification Testing Requirements

Three testing iterations:

1

Vendors process their own test data, prepare report per RFP

2

Government provides test data in standard format using historical data

3

Government provides on-site, randomly-created test data

Summary

**OSS Verification Testing
will be performed efficiently
and effectively**

**OSS Verification
Testing for Universal
and Enterprise
may overlap**

- A win-win activity:**
- **Problems caught early**
 - **Disputes minimized**
 - **Costs avoided**

Testing Completion: the gateway to service and revenue
