

Expo Manufactura 2009

Expo Manufactura 2009 will be held in February 17-19, in the Cintermex international trade center in Monterrey, Mexico. More than 250 companies will be representing more than 500 national and international brands. This event will have, for the first time, a large plastics machinery and products pavilion as well as the traditional Manufacturing, Precasting, Cutting, Plotting, Laser, CNC, Automation, Welding, Cad Cam, Quality Control, Metal-mechanic, Maquiladora, Automotive, Electronic, Aerospace, Iron and Steel industries.

Considered as the most complete and important international industrial exhibition of the manufacturing sector in Mexico, winner of the award “Eventos” as the “Best Industrial Exhibition”, Expo Manufactura 2009 will present the best strategies and solutions directed to the sector, as well as some interesting novelties for industries such as the automotive, plastics, welding, aeronautic, metal-mechanic, medical devices, house appliances and capital goods.

Products such as electronic components, industrial modular construction elements, high technology in industrial plastic implements and accessories, thermal treatment machinery, analysis and forecasting software for molds manufacturing, solutions in automation of processes and production lines, fastening accessories for machines and tools, dispenser robots, and other products will be offered by exhibiting companies. Expo Manufactura is an event organized by E.J. Krause de Mexico and is supported by the Association for Manufacturing Technology (AMT), Expo Manufactura is an event certified by the US Commercial Service.
