## Major Changes This Year

(For previous years' changes, see appendix C)

- The April 1997 edition of the *American Housing Survey for the United States in 1995* had errors in the items "Monthly Housing Costs" and "Monthly Housing Costs as Percent of Current Income." About 1.5 million of the subsidized renters were misclassified as "No cash rent." Thus, the published figures for no cash rent were too high, and the published figures for various other rent categories were too low. The errors affected subsidized renters, and therefore, affected total renters, total households, Blacks, Hispanics, and all other totals, except owners. The affected tables were 1A-7, 1B-7, 1C-7, 1D-7, 2-13, 2-17 through 2-23, and corresponding tables in chapters 4 through 10. The errors were corrected and revised data for these two items are published in this report.
- Eight new items are introduced in this report. These items are: "Sample Size," "Rooms Used for Business," "Homes Currently for Sale or Rent," "Safety of Primary Source of Water," "Source of Drinking Water," "Rent Paid by Lodgers," "Home Equity Loan," and "Educational Attainment of the Householder." See appendix A in this report for a complete definition of these items.
- The items "Nonrelatives' Shared Housing Costs" and "Location of Previous Unit" were deleted. "Educational Attainment of the Householder" replaces "Years of School Completed by the Householder."
- Table 16 (Repairs, Improvements, and Alterations) in all chapters has been deleted. Data on repairs, improvements, and alterations will appear in the *Supplement to the American Housing Survey for the United States in 1995* report, Series H151/95.
- There is an expanded definition of "Monthly Housing Costs" as it relates to vacant units. For a detailed definition of this item, see page 19 of appendix A.

## Explanations and Cautions

### EXPLANATIONS

**Survey authority and confidentiality.** The Bureau of the Census conducts the American Housing Survey to obtain up-to-date housing statistics for the Department of Housing and Urban Development (HUD). Title 12, Sections 1701Z-1 and 1701Z-2g of the U.S. Code authorize the Secretary of HUD to collect data from public and private agencies and protect the confidentiality of the data. Title 12, Section 1701Z-10 mandates the collection of the data for the American Housing Survey. The guarantee of confidentiality made to respondents is provided by the Bureau of the Census. Title 13, Section 9a, of the U.S. Code provides that all information which would permit identification of individuals will be held in strict confidence. Such information may be seen only by sworn U.S. Census Bureau employees and may be used only for statistical purposes. Section 214 of Title 13 sets penalties for disclosing confidential information. Unauthorized disclosure of individual information by a sworn Census Bureau employee is punishable by a fine of up to \$5,000 or imprisonment of up to 5 years, or both. The Bureau of the Census is authorized under Title 31, Section 1535 of the U.S. Code, to perform special work or services for other Federal agencies.

**Contents of book.** This book presents data on apartments; single-family homes; mobile homes; vacant housing units; age, sex, and race of householders; income; housing and neighborhood quality; housing costs; equipment and fuels; and size of the housing units. The book also presents data on mortgages, rent control, rent subsidies, previous unit of recent movers, and reasons for moving.

**Scope of the survey.** The American Housing Survey (AHS) is conducted by field representatives who obtain information from occupants of homes. They get information on vacant homes from informed people such as landlords, rental agents, or knowledgeable neighbors. The 1995 national survey was conducted from August 1995 through February 1996. This is a national sample of about 55,000 interviews conducted every other year. From 1973 when it started, to 1981, the AHS collected national data every year, instead of every other year, and was called the Annual Housing Survey.

### CAUTIONS

**Sampling and nonsampling errors.** The numbers in this book have errors from sampling and other causes (incomplete data, wrong answers, etc.). Table A shows how big the errors from sampling are. Nonsampling errors are usually even bigger.

As an example of how to use table A, suppose this book shows 1,000,000 homes of a certain type. The table shows the range of error is 112,000 homes. This means there are likely to be between 888,000 and 1,112,000 homes of this type. More precision cannot be obtained from this survey.

Appendix D gives more detailed formulas, to calculate errors for a wide range of items. Appendix D also gives some estimates of nonsampling errors.

Table A. **Sampling Error**

| 109,456,000 .....                                  | 99,000   |

**Undercoverage and nonresponse.** Each home in the AHS sample represents a large number of other homes. However, because of incomplete sampling lists (i.e., undercoverage) and nonresponse, the homes in the survey do not represent all homes in the country. Therefore, the raw numbers from the survey are raised proportionally so that the numbers published here match independent estimates of the total number of homes. These independent estimates are based on the 1990 Census of Housing, plus changes since then. Housing unit undercoverage and household nonresponse is about 7 percent. Compared to the level derived from the adjusted 1990 decennial census counts, housing unit undercoverage alone is about 1.9 percent.

The weighting procedures used for AHS-N partially correct for the bias due to nonresponse and housing unit, but not within household, undercoverage. The procedures assume the housing units missed by the survey are like those included, which is not entirely accurate. Housing unit undercoverage varies by age, ethnicity, and race of householder and type of household. For some groups, such as Blacks the undercoverage is at least 9 percent. Some AHS-N estimates are affected by missed persons within sample households. These are persons per room, square feet per person, some household composition items (e.g., persons per household), and income characteristics. We don't know the effect of this within household undercoverage on these characteristics. Appendix D shows how

complete the answers were for each question, before adjustments. Appendix B explains how the numbers were proportionally adjusted.

**Income and poverty.** Historically, the AHS underreports income and overreports poverty when compared with the Current Population Survey (CPS). Both surveys underreport income and overreport poverty when compared with tax returns and national income accounts. The AHS households mention fewer sources of income than CPS. The poverty data in the AHS are not published as an official count of households in poverty, but to show the housing characteristics of low-income households. For a discussion of income and poverty, see appendix C.

A detailed discussion of AHS income data is presented in the Census Bureau memorandum for the record, "Comparison of 1989 AHS and CPS Income Reporting." The memorandum for the record, "AHS Poverty Data, 1985 to 1993," presents a detailed discussion of AHS poverty data. Copies of both memoranda can be obtained by writing to the Housing and Household Economic Statistics Division (HHES), at the address below.

**Telephone interviewing.** The use of Computer Assisted Telephone Interviewing (CATI) in part of the AHS sample has significant effects on a variety of characteristics. The CATI portion of the sample produces lower estimates for many housing quality problems and higher estimates for some income and cost items. For more discussion of CATI, see appendix B and appendix C.

## DATA AVAILABILITY

The AHS data are presented nationally as well as for 44 selected metropolitan areas (see table on next page). Table B shows the sources for obtaining AHS data, the product available, and the pricing for each product. Each source or organization offering AHS data sets its own charges, so prices may vary between the sources. For the data user whose needs are not met by the book tabulations (printed books). Microdata are available on tapes and CD-ROM's so that data can be tabulated in any way desired. Microdata are also available on the Internet. Contact HHES for more details. To protect the confidentiality of the respondents; names, addresses, and places smaller than 100,000 people are not identified. The sample design generally will not support analysis for areas smaller than those shown in the books.

**New report.** *American Housing Survey: A Quality Profile*, Series H121/95-1 describes potential sources of errors in AHS data and quality control procedures used in the operation of the survey, and describes the magnitude of errors in AHS estimates. It covers both sampling and nonsampling errors but emphasis is on nonsampling errors. This report provides researchers and data users with a single source for a wide range of information on the quality of AHS data.

This report is for sale by Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.
