<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 8-8. Additions and Alterations Outside Residential Structures—In Suburbs—Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. .... means not applicable or sample too small. - means zero or rounds to zero]

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 8-9. Alterations Within Residential Structures—In Suburbs—Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. ... means not applicable or sample too small. - means zero or rounds to zero]

| 13 Added furnace, boiler, duct work or radiators .....                | 76                   | 4                            | —            | —                 | 3        | 5                         | 2                   | 30         | 16      | 21    | 8    |
| 14 Added water heater .....   | 41                   | 8                            | 2            | —                 | 3        | 14                        | 4                   | 15         | 15      | 6     | 5    |
| 15 Added dishwasher .....   | 101                  | 6                            | 2            | 6                 | —        | 7                         | 1                   | 33         | 23      | 25    | 20   |
| 16 Added garbage disposal .....                                       | 85                   | 1                            | —            | —                 | —        | 8                         | 1                   | 27         | 23      | 20    | 15   |

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 8-11. Maintenance, Repairs and Other Work—In Suburbs—Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. ... means not applicable or sample too small. - means zero or rounds to zero]

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 9-8. Additions and Alterations Outside Residential Structures—Outside Metropolitan Statistical Areas—Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. ... means not applicable or sample too small. - means zero or rounds to zero]

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 9-9. Alterations Within Residential Structures—Outside Metropolitan Statistical Areas — Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. .... means not applicable or sample too small. - means zero or rounds to zero]

| Characteristics   | Total occupied units | Housing unit characteristics |              |                   |             | Household characteristics |                     |              | Regions      |              |              |  |

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 9-10. Major Replacements—Outside Metropolitan Statistical Areas — Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. ... means not applicable or sample too small. - means zero or rounds to zero]

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

**Table 9-11. Maintenance, Repairs and Other Work—Outside Metropolitan Statistical Areas — Owner Occupied Units**

[Numbers in thousands. Consistent with the 1990 Census. .... means not applicable or sample too small. - means zero or rounds to zero]

| Characteristics                                   | Total occupied units | Housing unit characteristics |              |                   |             | Household characteristics |                     |              | Regions      |              |              |  |

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>Limited to those persons 14 years and older who reported having a job the week prior to interview within the United States.

<sup>2</sup>Limited to householders who reported having a job the week prior to interview within the United States.

# Appendix A.

## Definitions

---

The definitions in this appendix are basically the same for both the American Housing Survey (AHS) National sample and the American Housing Survey Metropolitan sample. Definitions for some items have changed over time. For a discussion of historical changes, see Appendix C. The definitions in this appendix represent the situation at the time of this survey. To help find topics in this appendix, readers may want to use the Subject Index at the back of this book.

The AHS was conducted by personal interview. The survey interviewers were instructed to read the questions directly from the questionnaire. The definitions and explanations given for each subject are, to a considerable extent, drawn from various technical and procedural materials used in the collection of the data. These materials helped the field interviewers to understand more fully the intent of each question and, thus, to resolve problems or unusual cases. Additional explanatory information has been added to this portion of the text to assist the user in understanding the statistics.

**Age of householder.** The age classification refers to the age reported for the householder as of that person's last birthday.

**Additions to residential structures.** The data refer to the actual enlargement of the structure by adding one or more of the following:

- Room
- Porch
- Attached garage
- Carport
- Deck
- Any other outside attachments

Attached garages, porches, decks, and carports that were reported as replaced were counted as additions because most replacements of these types are believed to represent improvements and therefore, are more accurately described as an addition than a replacement.

See also "Amount spent" and "Number of jobs."

**Additions and alterations outside residential structures.** The data refer to additions and alterations to the residential lot or yard but not to the residential structure itself. The data include:

The addition of septic tanks

The addition or replacement of:

- Driveways or walkways
- Fencing or walls
- Patios, terraces, or detached decks
- Swimming pools or tennis courts
- Detached sheds, garages, or any other detached structure
- Any other major improvement or repair done to the lot or yard

See also "Amount spent" and "Number of jobs."

**Alterations within residential structures.** The data refer to changes or improvements made within or on the structure. The changes or improvements include:

- Creation of a room from previously unfinished space
- Total remodeling of previously existing finished space
- Simple improvement of existing finished space through such activities as the installation of paneling or ceiling tiles or the addition of insulation.

See also "Amount spent" and "Number of jobs."

**Amount spent.** The data are presented for all owner-occupied housing units that had expenditures for additions to their residential structures; additions and alterations on the property outside the residential structure; alterations within the residential structure; major replacements of relatively expensive items within the structure; and same types of maintenance, repairs, and other work to the residential structure. The amount spent is the total amount spent by the household on all jobs done during the 24-month time period prior to the date of interview. The amount spent is shown by whether or not members of the household did more than half of the work.

**Area definitions.** The data shown in this report relate to areas as defined for the 1980 census for urban, rural, farm, and nonfarm; and as of 1983, as defined by OMB for metropolitan and nonmetropolitan areas. The area definitions used in this report were not updated to include any OMB decisions after 1983 or the 1990 census results.

**Bedrooms.** The number of bedrooms in the housing unit is the count of rooms used mainly for sleeping, even if also used for other purposes. Rooms reserved for sleeping, such as guest rooms, even though used infrequently,

---

are counted as bedrooms. On the other hand, rooms used mainly for other purposes, even though used also for sleeping, such as a living room with a hideaway bed, are not considered bedrooms. A housing unit consisting of only one room, such as a one-room efficiency apartment, is classified by definition as having no bedroom.

**Central cities.** Every metropolitan statistical area has at least one central city, which is usually its largest city. Smaller cities are also identified as central cities if they have at least 25,000 population and meet the following two commuting requirements. First, the city must have at least 75 jobs for each 100 residents who are employed. Second, no more than 60 percent of the city's resident workers may commute to jobs outside the city limits. In addition, any city with at least 250,000 population or at least 100,000 persons working within its corporate limits qualifies as a central city, even if it fails to meet the above two commuting requirements. Finally, in certain smaller metropolitan statistical areas, there are places with between 15,000 and 25,000 population that also qualify as central cities, because they are at least one-third the size of the metropolitan statistical area's largest city and meet the two commuting requirements.

**Comparability with 1990 Census of Population and Housing data.** The concepts and definitions are essentially the same for items that appear in both the 1990 census and the AHS national reports.

A variety of data on mortgages and homeowner properties are presented in publications from the Residential Finance Survey. Differences in the concepts and definitions in this survey and the American Housing Survey publications include the following: the basic unit of tabulation in AHS is the housing unit; in Residential Finance publications, it is the property. All the data in AHS are provided by the occupant; in Residential Finance publications, mortgage is reconciled with responses from the lender.

In the American Housing Survey, units are classified as new construction if constructed 4 years or less from the date of interview. In publications from the 1990 Census of Housing, units are classified as new construction if constructed in 1985 through 1990.

Data on poverty level in the 1990 Census of Housing do not contain the income of household members unrelated to the householder. In the AHS, data on poverty level include the income of all household members, whether or not they are related to the householder.

Income data in the AHS are based on income for the 12 months prior to interview of those household members 14 years and older. The 1990 Census of Housing income data are for calendar year 1989 and for income of household members 15 years and older.

Differences between the AHS data and the 1990 census may also be attributed to several other factors. These factors include the extensive use of self-enumeration in the

census in contrast to personal interview in the survey; differences in processing procedures and sample designs; the sampling variability associated with the sample data from both the AHS and the census; the nonsampling errors associated with the survey estimates; and the nonsampling errors associated with census data.

**Comparability with current construction reports from the Survey of Construction.** The Census Bureau issues several publications under the general titles, "Current Construction Reports." The data for these reports are primarily from the Survey of Construction.

The Survey of Construction consists of approximately 8,300 permit-issuing places throughout the United States. The reports from the survey contain current data on housing starts and completions, construction authorized by building permits, new one-unit structures sold and for sale, characteristics of new housing, and value of new construction put in place. The concepts and definitions used in this report differ from some of those used in the Survey of Construction. The major difference is that the Survey of Construction shows counts and characteristics of housing units in various stages of construction through completion. The American Housing Survey shows counts and characteristics of the existing housing inventory. Additional differences between the AHS and the Survey of Construction may be attributed to factors such as the sampling variability and nonsampling errors of the data from the two surveys, survey procedures and techniques, and processing procedures.

**Complete bathrooms.** A housing unit is classified as having a complete bathroom if it has a room with a flush toilet, bathtub or shower, a sink, and hot and cold piped water. All facilities must be in the same room to be a complete bathroom. A half bathroom has either a flush toilet or a bathtub or shower but does not have all the facilities for a complete bathroom.

**Consolidated metropolitan statistical area.** A consolidated metropolitan statistical area (CMSA) is a Level A (population size of 1,000 or more) metropolitan statistical area when at least two primary metropolitan statistical areas are defined.

**Cooperatives and condominiums.** A cooperative is a type of ownership whereby a group of housing units are owned by a corporation of member-owners. Each individual member is entitled to occupy or rent out an individual housing unit and is a shareholder in the corporation that owns the property.

A condominium is a type of ownership that enables a person to own an apartment or house in a project of similarly owned units. The owner has the deed and very likely the mortgage on the unit occupied. The owner may also hold common or joint ownership in some or all common areas such as grounds, hallways, entrances, elevators, etc.

---

Cooperative or condominium ownership may apply to various types of structures including single-family houses, rowhouses, townhouses, etc., as well as apartment units.

**Current income.** Information on current income is not published separately. It is used in the calculation of “Ratio of value to current income,” and “Monthly housing costs as percent of current income.” It is felt that respondents who have only recently entered the job market and those who changed jobs during the past year often report a previous year’s income, which is too low to accurately reflect their current financial situation as it relates to the value of their home and their housing costs.

**Elderly.** Data for elderly include all households with a householder of 65 years of age and over.

**Elevator on floor.** Statistics are shown for the number of housing units in structures with two or more floors that have one or more passenger elevators on the same floor as the sample unit, and whether they are in working or nonworking condition. Excluded are elevators used only for freight.

**Family households.** Family refers to the householder and all (one or more) other persons living in the same household who may be related to the householder by blood, marriage or adoption. Married couples related to the householder of a family are included in the family and are not considered as separate families unless they reside in separate living quarters.

*Married couple.* Each household in this group consists of the householder and spouse and one or more other persons, if any.

*Male householder, no wife present.* This category includes families with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders who are widowed, divorced, or single.

*Female householder, no husband present.* This category includes families with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single.

*Own children under 18 years old.* Statistics on presence of own children of households are shown in this report. Children under 18 years old are defined as an own children if they are a single (never married) son, daughter, stepchild, or adopted child of a householder. Own children of sub-families are excluded from the total count of own children.

**Farm-nonfarm residence.** In rural areas, occupied housing units are subdivided into rural-farm housing (which comprises all rural units on farms) and rural-nonfarm housing (which comprises the remaining rural units). Occupied housing units are classified as farm units if the sales of agricultural products amounted to at least \$1,000 during the 12-month period prior to the interview. Occupied units in rural territory that do not meet the definition for farm housing are classified as nonfarm.

**Financial characteristics.** Financial characteristics are shown for all households, family, and nonfamily households. Data are shown for Household income, Monthly housing costs, Median monthly housing costs for owners, Monthly housing costs as percent of current income, and Value.

**Floors in home.** Finished floors are counted. For split level and bilevel houses, the highest number of floors that are physically over each other are counted. An unfinished attic is not counted as a floor.

**Flush toilet and flush toilet breakdowns.** A privy or chemical toilet is not considered a flush toilet. Flush toilets outside the unit were not counted. The statistics on breakdowns of flush toilet are shown for housing units with at least one flush toilet for the household’s use only. The flush toilet may be completely unusable because of a faulty flushing mechanism, broken pipes, stopped up soil pipe, lack of water supplied to the flush toilet, or some other reason.

Data on breakdowns are classified by whether any of the flush toilets were working in the 3 months prior to the interview, or while the household was living in the unit if less than 3 months, and the number of times the breakdown lasted 6 hours or more.

**Heating problems.** For breakdowns of heating equipment, statistics are shown for housing units occupied by the householder during the winter prior to the interview. The data are classified by whether the housing unit was uncomfortably cold for 24 hours or more, the number of times equipment breakdowns occurred lasting 6 hours or more, and causes for the breakdowns.

The heating equipment is broken down if it is not providing heat at its normal heating capacity through some fault in the equipment. Utility interruptions occur when there is a cut off in the gas, electricity, or other fuel supplying the heat. Inadequate heating capacity refers to heating equipment that is providing heat at its normal capacity, but the housing unit is still too cold for the occupants. Inadequate insulation refers to air drafts through window frames, electrical outlets, or walls that are cold.

**Hispanic.** The classification “Hispanic” refers to the origin of the householder occupying the housing unit. Detailed characteristics of housing units with Hispanic

---

householders are presented in chapter 5. Hispanic origin was determined on the basis of a question that asked for self-identification of persons living in the unit who were Hispanic or Spanish American. Hispanic persons may be of any race.

Data on Hispanic households shown in American Housing Survey National reports are collected in the 50 states and the District of Columbia, and therefore do not include households in Puerto Rico.

**Household.** A household consists of all the persons who occupy a housing unit. By definition, the count of households is the same as the count of occupied housing units.

**Household composition by age of householder.** Statistics by age of householder are presented separately for two-or-more-person households and for one-person households. Households having two or more persons are further subdivided as follows:

*Married-couple families, no nonrelatives.* Each household in this group consists of the householder and spouse, and other persons, if any, all of whom are related to the householder.

*Other male householder.* This category includes households with male householders who are married, but with wife absent because of separation or other reason where husband and wife maintain separate residences; and male householders who are widowed, divorced, or single. Also included are households with male householder, wife present and nonrelatives living with them.

*Other female householder.* This category includes households with female householders who are married, but with husband absent because of separation or other reason where husband and wife maintain separate residences; and female householders who are widowed, divorced, or single. Also included are households with female householder, husband present, and nonrelatives living with them.

Households consisting of only one person are shown separately for male householder and female householder under the category “one-person households.”

**Householder.** The householder is the first household member 18 years old and over who is the owner or renter of the sample unit. If no household member occupying the sample unit owns or rents the unit, the householder is the first household member listed who is 18 years old or older.

**Householder who worked last week.** This applies to a householder who worked at any time last week either as an employee for someone else, or in one’s own business, worked with or without pay in a business or farm operated by a relative, or worked part time. Not included in this total were persons absent from work all last week due to illness, vacation, strike, or layoff.

**Housing modifications.** People with physical limitations were asked if they had housing modifications or if they needed modifications. These modifications could include:

- Ramps
- Elevators or stair lifts
- Extra handrails or grab bars
- Extra wide doors or hallways
- Door handles instead of knobs
- Push bars on doors
- Modified wall sockets or light switches
- Modified sink faucets or cabinets
- Bathrooms and kitchens designed for easier accessibility
- Raised letters or braille
- Specially equipped telephones
- Flashing lights

Housing modification data presented in Table 15 does not include data not reported. As a result, for each modification, the total number of modifications needed and not needed is smaller than the total number of modifications present and not present in the home.

**Housing units.** A housing unit is a house, an apartment, a group of rooms, or a single room occupied or intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants do not live and eat with any other persons in the structure and that have direct access from the outside of the building or through a common hall that is used or intended for use by the occupants of another unit or by the general public. The occupants may be a single family, one person living alone, two or more families living together, or any other group of related or unrelated persons who share living arrangements (except as described in the section on group quarters). For vacant units, the criteria of separateness and direct access are applied for the intended occupants whenever possible. If the information cannot be obtained, the criteria are applied for the previous occupants. Both occupied and vacant housing units are included in the housing inventory, except that tents, caves, boats, railroad cars, and the like, are included only if they are occupied.

**Income.** The statistics on income are based on the respondent’s reply to questions on income for the 12 months prior to the interview and are the sum of the amounts reported for wage and salary income, self-employment income, interest or dividends, stock dividends, Social Security or railroad retirement income, public assistance or welfare payments, alimony or child support, and all other money income. The figure represents the amount of income received before deductions

---

for personal income taxes, Social Security, union dues, bond purchases, health insurance premiums, medicare deductions, etc. Medians for income are rounded to the nearest hundred dollars.

In this report, the statistics are shown for the money income for the household (the sum of the income of the householder and all other household members 14 years old and over.) Household income is shown separately for family households and nonfamily households.

Wage or salary income is defined as the total money earnings received for work performed as an employee at any time during the 12-month period prior to the interview. It includes wages, salary, piece-rate payments, commissions, tips, cash bonuses, and Armed Forces pay. Self-employment income is defined as money income received from a business, professional practice, partnership, or farm in which the person was self-employed. Social Security or pensions includes cash receipts of Social Security pensions, survivors' benefits, disability insurance programs for retired persons, dependents of deceased insured workers, or disabled workers, and deductions for medicare and health insurance premiums. Cash receipts of retirement, disability, and survivors' benefit payments made by the U.S. government under the Railroad Retirement Act are also included. Separate payments received for hospital or other medical care are not included.

Income from all other sources includes money income received from sources such as periodic payments from interest or dividends; net rental income (or loss) from property rentals; net receipts from roomers or boarders; net royalties; public assistance or welfare payments which include cash receipts received from public assistance programs, such as old age assistance, aid to families with dependent children, and aid to the blind or totally disabled; unemployment insurance benefits; workmen's compensation cash benefits; periodic payments by the Veteran's Administration to disabled veterans; public or private pensions; periodic receipts from insurance policies or annuities; alimony or child support from people who are not members of the household; net gambling gains; and nonservice scholarships and fellowships.

Receipts from the following sources were not included as income: Value of income "in kind," such as, free living quarters, housing subsidies, food stamps, or food produced and consumed in the home; money received from the sale of property (unless the recipient was engaged in the business of selling such property); money borrowed; tax refund; withdrawal of bank deposits; accrued interest on uncashed savings bonds; exchange of money between relatives living in the same household; gifts of money; and lump-sum payments from inheritances, insurance policies, estates, trusts, gifts, etc.

The income statistics and the characteristics of the household refer to different periods in time. Income data refer to the 12 months prior to the interview, whereas the household characteristics refer to the date of interview.

Thus, household income does not include amounts received by persons who were members of the family during all or part of the income period, if these persons no longer resided with the family at the time of the interview. On the other hand, household income includes income reported by persons who did not reside with the household during the income period but who were members at the time of the interview. For most households, however, the income reported was received by persons who were members of the household throughout the income period.

There may be significant differences in the income data between the American Housing Survey and other Census Bureau surveys and censuses. For example, the time period for income data in the American Housing Survey refers to the 12 months prior to the interview while other income data generally refer to the calendar year prior to the date of the interview. Additional differences in the income data may be attributed to factors such as the various ways income questions are asked, the sampling variability and nonsampling errors between the American Housing Survey and other Census Bureau surveys and censuses, survey procedures and techniques, and processing procedures.

**Investment properties.** Investment property characteristics are shown for up to six additional properties. Investment properties may be single unit or multiunit buildings. Units reported as both vacation and investment properties are classified as vacation units.

**Journey to work.** This category includes statistics of the number of Owner occupied housing units for Workers, Principal means of transportation to work last week, Travel time from home to work, Distance from home to work, Departure time to work. These categories were cross classified by All workers, Householders who worked last week and Householders who worked at home last week. See individual listing.

*All workers.* This is limited to those people 14 years and older who reported having a job the week prior to interview within the United States.

*Principal means of transportation to work last week.* Means of transportation refers to the principal mode of travel used to get from home to work. Householders who used different means of transportation on different days of the week were asked to specify the one used most often. Householders who used more than one means of transportation to get to work each day were asked to specify the one used for the longest distance during the work trip. Mass transportation refers to bus or streetcar and subway or elevated railroad.

*Travel time from home to work.* The total elapsed time in minutes that the person reported it usually took to get from home to work during the week prior to interview was

---

counted as the travel time to work. The elapsed time included time spent waiting for public transportation and picking up members of car pools. Respondents were instructed to report travel time to the nearest minute.

*No fixed place of work.* Workers with no fixed place of work were those who did not usually work at the same location each day and did not usually report in to a central location to begin work each day.

*Distance from home to work.* The one-way, “door-to-door” distance in miles that the person reported usually traveling from home to work during the week prior to interview was counted as the travel distance to work. Respondents were instructed to report travel rounded to the nearest mile.

*Departure time to work.* Refers to the time (hour and minutes) the respondent left for work. The categories begin with 12:00 a.m. and progress to 11:59 p.m.

*Worked at home last week.* This is the number of hours worked by those who did regularly scheduled work for their employer at home.

**Living quarters.** Living quarters are classified as either housing units or group quarters. Usually, living quarters are in structures intended for residential use (for example, a one-unit structure, apartment house, hotel or motel, boarding house, or mobile home or trailer). Living quarters may also be in structures intended for nonresidential use (for example, the rooms in a warehouse where a watchman lives), as well as in places such as tents, caves, and old railroad cars. We count these as living quarters if they are occupied.

**Location of property.** Refers to the distance from current residence to the vacation or investment property. Statistics are shown for within 150 miles or 150 miles and greater from current residence.

**Maintenance, repairs, and other work.** Maintenance and repairs include the replacement of the following:

- Some siding
- Some interior water pipes
- Fuse boxes or breaker switches
- Insulation
- Finished flooring
- Ceiling tiles
- Furnace/heating equipment parts

Other work included:

- Extensive repairs made as a result of a major disaster
- Addition of wall-to-wall carpeting over already finished flooring
- Any other major improvement done inside the residence

See also “Amount spent” and “Number of jobs.”

**Major replacements.** The following is a list of relatively expensive items that, when replaced, are considered to be major replacements rather than additions or alterations to the residential structure.

- Roof over entire home
- All the siding
- All the interior water pipes
- All the electrical wiring
- Doors or windows
- Plumbing fixture (for example, sinks or bathtubs)
- Central air conditioning
- Furnace, heat pump or boiler
- Septic tank
- Water heater
- Dishwasher
- Garbage disposal

In general, the distinction between major replacements and additions and alterations is that major replacements are not innovations. Installation of a bathtub where there had not been one before is an alteration, but the substitution of a new bathtub for an old one is a major replacement.

See also “Amount spent” and “Number of jobs.”

**Median monthly housing costs for owners.** Two additional medians are shown separately for owner-occupied units. The first median includes maintenance costs in addition to those items included in “Monthly housing costs,” see item. The second excludes second and subsequent mortgages, installment loans or contracts, and maintenance costs; but includes all remaining items listed in “Monthly housing costs.”

**Medians.** We estimate each median from the printed distribution. If there are 10 million homes of a particular type, the median is the 5 millionth, or halfway point of these homes. Therefore, if 4 million homes are below \$400 rent, then the median is the millionth home above \$400. Finally, if the next interval printed in the book (from \$400 to \$449), has 3 million homes, the median is assumed to be one-third of the way through the interval (at \$417). Actually, this technique overestimates medians by a few percent since most homes cluster at the bottom of their intervals. The clustering happens because landlords ask for rent in round numbers, like \$400, and people give answers in round numbers, like \$20,000 income, or 40 years old. There is one special case in calculating medians: For numbers of people or rooms, we assume an interval like 3 means 2.50 to 3.49, so one-third of the way through is 2.83. This method is used rather than just saying that the median is 3, in order to give a more detailed picture of the distribution. We do not show the median at

all if the distribution is estimated to have fewer than 25 sample cases (50,000 homes in the national report, smaller numbers in the metropolitan reports).

**Metropolitan statistical areas.** Metropolitan statistical areas (MSAs) shown in the American Housing Survey are defined by the Office of Management and Budget. By current standards, as published in the *Federal Register* on January 3, 1980, an area qualifies for recognition as an MSA in one of two ways: if there is a city of at least 50,000 population, or a Census Bureau-defined urbanized area of at least 50,000 with a total metropolitan population of at least 100,000 (75,000 in New England). Except in the New England states, an MSA is defined in terms of entire counties. In New England, MSAs are composed of cities and towns. In addition to the county containing the main city, additional counties are included in an MSA if they are socially and economically integrated with the central county. An MSA may contain more than one city of 50,000 population and may cross state lines.

**Month costs for electricity and gas.** See Appendix C.

**Monthly housing costs.** The data are presented for owner-occupied and renter-occupied households. Monthly housing costs for owner-occupied units is the sum of monthly payments for all mortgages or installment loans or contracts, real estate taxes (including taxes on mobile homes or trailer sites if the site is owned), property insurance, homeowners association fee, cooperative or condominium fee, mobile home park fee, land rent, utilities (electricity, gas, water, and sewage disposal), fuels (oil, coal, kerosene, wood, etc.), and garbage and trash collection. As of 1989, data on the costs of electricity and gas are collected differently (see “Monthly costs of electricity and gas” definition). Because of this, “Monthly housing costs” in 1989 and beyond may not be entirely comparable with data published in previous years.

For renter-occupied housing units, monthly housing costs include the contract rent plus the estimated average monthly cost of utilities (electricity, gas, water, and sewage disposal), and fuels (oil, coal, kerosene, wood, etc.); property insurance, mobile home land rent, and garbage and trash collection if these items are paid for by the renter (or paid for by someone else, such as a relative, welfare agency, or friend) in addition to rent. Renter housing units occupied without payment of cash rent are shown separately as no cash rent. For rental units subsidized by a public housing authority, the federal government, or state or local governments, the monthly rental costs reflect only the portion paid by the household and not the portion subsidized. Before 1991, the monthly rental costs may have included the amount subsidized for many subsidized units.

**Monthly housing costs as percent of current income.** The yearly housing costs (monthly housing costs multiplied by 12) are expressed as a percentage of the total current income (see definition of current income.)

This percentage is calculated for the same owner- and renter-occupied housing units for which “Monthly housing costs” were computed (for exclusions see “Monthly housing costs”). The percentage was computed separately for each unit and rounded to the nearest percent. The measure was not computed for units where occupants reported no income or a net loss.

Two new questions were added to the American Housing Survey in 1989. Upon completion of the detailed income questions, respondents were asked, “Is your total family income THIS MONTH about the same as it was a year ago?” “About the same” was defined as within 10 percent or just cost of living adjustments. If the respondent answered “no,” a second question was asked, “What do you expect your total family income to be in the NEXT 12 MONTHS?” Current income for families whose most recent month’s income was NOT about the same as a year ago is the “total expected family income in the NEXT 12 MONTHS.” Current income for families whose most recent month’s income WAS about the same as a year ago is “family and primary individual income.” For the majority of families, current income equals income of families and primary individuals.

Before 1989, the item “Monthly housing costs as percent of income,” was computed by using the income of family and primary individuals only. It was felt that respondents who only recently entered the job market or who changed jobs during the past year often reported a previous year’s income, which was too low to accurately reflect their current situation. In addition to a change in the source of income used in calculations, the item uses new procedures to estimate the costs of electricity and gas (see “Monthly costs of electricity and gas” definition).

**Mortgage status on property.** The owner or the owner’s spouse was asked the status of mortgages or similar loans currently in effect on second homes or investment properties. A mortgage or similar debt refers to all forms of debt where the property is pledged as security for payment of the debt. It includes such debt instruments as deeds of trust, trust deeds, mortgage bonds, and vendors’ liens. In the first three arrangements, usually a third party, known as the trustee, holds the title to the property until the debt is paid. In the vendor lien arrangement, the title is kept by the buyer but the seller (vendor) reserves, in the deed to the buyer, a lien on the property to secure payment of the balance of the purchase price. Also included as a mortgage or similar debt, are contracts to purchase, land contracts, and lease-purchase agreements where the title to the property remains with the seller until the agreed upon payments have been made by the buyer.

**Multistructure modifications.** These are special modifications for building with multiunits. These include:

- Ramps
- Handrails

- Automatic doors
- Handicap parking
- Elevators with audio cuing or braille
- Accessibility for people with physical limitations to public use facilities of the building such as the lobby, laundry room and storage area

**Neighborhood conditions and neighborhood services.** The statistics presented in Table 4, as a percent of the total occupied units, are based on the respondent's opinion and attitude toward the neighborhood in which the resident lives. Thus, the respondent's answer may or may not reflect the actual description of the neighborhood. Furthermore, the respondent may not have the same opinion as a neighbor about the neighborhood services; for example, the respondent may feel that the street lighting or neighborhood shopping facilities are inadequate but a neighbor may not.

*Neighborhood conditions and wish to move.* Data on neighborhood conditions and wish to move in Table 4 are based on the respondent's answers to a three-part question concerning specific neighborhood conditions. The respondent was asked (1) if the condition was present, (2) if the condition was bothersome, and (3) if the condition was so objectionable that the respondent would like to move from the neighborhood.

- a. Street noise or heavy street traffic—Street noise refers to noise made by children playing outdoors, noise from a factory or business, or any other sounds that the respondent considers street noise. Traffic refers to the amount of vehicular traffic that the respondent considers "heavy."
- b. Neighborhood crime—This category refers to all forms of street and neighborhood crime such as petty theft, assaults against the person, burglary, etc., or any related activities that the respondent judges to be a crime.

*Neighborhood services.* Data on neighborhood services are based on the respondent's answer to a series of questions concerning neighborhood services.

The respondent was asked a three part question on public transportation: (1) if service is available, (2) if service is satisfactory, and (3) if any member of the household used the service at least once a week.

Data are also collected on satisfaction with neighborhood shopping such as grocery stores and drug stores and whether or not these stores are located within 1 mile of the neighborhood.

Respondents were asked a three-part question on public elementary schools: (1) if children within the household attended public elementary school or private elementary school, (2) if the public elementary school is satisfactory, and (3) if the public elementary school is within 1 mile of the neighborhood.

**New construction.** Housing units built in the 4 years prior to the date of the interview are classified as new construction.

**Nights spent at vacation unit.** Refers to the number of nights spent at the unit during the past year. The median number of nights is rounded to the nearest whole number.

**Nights unit rented.** This refers to the number of nights that the unit was rented during the past year (for investment properties only). The median number of nights rented is rounded to the nearest whole number.

**Nonfamily households.** These are housing units where the householder lives alone or with nonrelatives only. A lodger, servant, or other person unrelated to the householder is considered a member of the household but not of the family.

**Number of jobs.** The data are presented for the total number of additions to residential structures; additions and alterations on property outside residential structure; alterations within residential structure; major replacements of relatively expensive items within residential structures; and maintenance, repairs and other work done to residential structures. The estimated number of jobs is the number of each type of job done during the 24-month time period prior to the date of interview. One household adding two bathrooms would count as two bathrooms added (two jobs), as would two households each adding one bathroom. The count of each job type is shown by whether or not members of the household did more than half of the work.

**Number of persons per household reporting limitations.** This number is limited to the first 3 household members reporting a physical limitation.

**Occupied housing units.** A housing unit is classified as occupied if a person or group of persons is living in it at the time of the interview as their usual residence or if the occupants are only temporarily absent, for example, on vacation. However, if the unit is occupied entirely by persons with a usual place of residence elsewhere, the unit is classified as vacant. By definition, the count of occupied housing units is the same as the count of households.

**Other nonfamily households.** This category includes nonfamily households with more than 1 person.

**Overall opinion of neighborhood.** The data presented are based on the respondent's overall opinion of the neighborhood. The respondent defines neighborhood. The respondent was asked to rate the neighborhood based on a scale from 1 to 10, where 10 is the best and 1 is the worst.

---

**Overall opinion of structure.** The data presented are based on the respondent's overall opinion of the house or apartment as a place to live. The respondent was asked to rate the structure based on a scale from 1 to 10, where 10 is the best and 1 is the worst.

**Person or equipment aids.** People with physical limitations were asked if they had person or equipment aids or if they needed person or equipment aids. These could include the aid of another person, a cane, walker or crutches, a wheelchair, or a motorized or electric cart.

**Persons 65 years old and over.** See Elderly.

**Persons.** All people occupying the housing unit are counted. These people include not only occupants related to the householder but also any lodgers, roomers, boarders, partners, wards, foster children, and resident employees who share the living quarters of the householder. The data on persons show categories of the number of one person through seven-or-more-person households. The median for persons is rounded to the nearest tenth.

A person is counted at the usual place of residence for that person. This count refers to the place where the person lives and sleeps most of the time. This place is not necessarily the same as a legal residence, voting residence, or domicile.

**Persons per room.** Persons per room is computed for each occupied housing unit by dividing the number of people in the unit by the number of rooms in the unit. The figures shown refer, therefore, to the number of housing units having the specified ratio of persons per room.

**Physical limitations.** People were asked about permanent physical limitations. These limitations included:

- Problems with entering or exiting the home
- Problems getting around inside the home
  - Going up and down steps
  - Opening and closing or going through any doors
  - Moving between rooms
  - Reaching the bathroom facilities including tub, shower, toilet or sink
  - Reaching the kitchen facilities including sink, stove, refrigerator and kitchen cabinets
- Difficulty with personal activities
  - Cooking and preparing food
  - Feeding themselves
  - Bathing, getting in and out of the tub or shower
  - Grooming and dressing
  - Doing housework and laundry tasks
- Difficulty seeing or hearing
- Other problems.

**Physical problems-moderate.** A unit has moderate physical problems if it has any of the following five problems, but none of the severe problems.

*Plumbing.* On at least three occasions during the last 3 months, all the flush toilets were broken down at the same time for 6 hours or more. (See flush toilet breakdowns.)

*Heating.* Having unvented gas, oil, or kerosene heaters as the primary heating equipment.

*Kitchen.* Lacking a kitchen sink, refrigerator, or burners inside the structure for the exclusive use of the unit.

*Hallways.* Having any three of the four hallway problems mentioned below.

*Upkeep.* Having any three or four of the overall list of six upkeep problems mentioned below.

**Physical problems-severe.** A unit has severe physical problems if it has any of the following five problems:

*Plumbing.* Lacking hot or cold piped water or a flush toilet, or lacking both bathtub and shower, all inside the structure for the exclusive use of the unit.

*Heating.* Having been uncomfortably cold last winter for 24 hours or more because the heating equipment broke down, and it broke down at least three times last winter for at least 6 hours each time.

*Electric.* Having no electricity, or all of the following three electric problems: exposed wiring; a room with no working wall outlet; and three blown fuses or tripped circuit breakers in the last 90 days.

*Hallways.* Having all of the following four problems in public areas: no working light fixtures; loose or missing steps; loose or missing railings; and no elevator.

*Upkeep.* Having any five of the following six maintenance problems: (1) water leaks from the outside, such as from the roof, basement, windows, or doors; (2) leaks from inside structure such as pipes or plumbing fixtures; (3) holes in the floors; (4) holes or open cracks in the walls or ceilings; (5) more than 8 inches by 11 inches of peeling paint or broken plaster; or (6) signs of rats or mice in the last 90 days.

**Places.** Two types of places are recognized by the Census Bureau, incorporated places and census designated places as defined below.

*Incorporated places.* Incorporated places are those that are incorporated under the laws of their respective states as cities, boroughs, towns, and villages.

---

*Census designated places (CDPs).* The Census Bureau has delineated boundaries for closely settled population centers without corporate limits. To be recognized for the census, CDP's must have a minimum population. If located in urbanized areas that have one or more cities of 50,000 or more population, CDP's must have a minimum population of 5,000. All other areas except for areas in Alaska and Hawaii require a minimum population of 1,000. The requirements are a population of 25 in Alaska and 300 in Hawaii.

Place size as shown in national reports reflects the place size as of the 1980 census. More detailed information on places appears in the 1980 Population Census PC (1)-A reports.

**Poverty status.** The poverty data in this report differs from official poverty estimates in two important respects. The first important difference is the use of a poverty definition that is based on household income in place of the official method that is based on the income of the family or the unrelated individual. Under the official approach, the poverty status of two unrelated individuals living together would be determined by comparing the income of each individual to the poverty threshold for an unrelated individual. The result might be that both were in poverty, both were out of poverty, or one was in poverty and one was not. Under the approach used in this report, the two unrelated individuals were treated as members of a two-person family and their poverty status was determined by comparing their combined income to the poverty threshold for a two-person family. The effect of using a poverty concept that is based on household income is to undercount the number of persons in poverty relative to the official estimate. A study based on the March 1975 Current Population Survey found that poverty estimates based on a household income concept were about 6 percent lower than official estimates. For more information, see *Technical Paper X, Effect of Using a Poverty Definition Based on Household Income*, U.S. Department of Health, Education, and Welfare, 1976. A second important difference between the poverty estimates in this report and the official poverty estimates has to do with the method used to measure income. The official annual poverty estimates are based on data collected in the March supplement to the Current Population Survey. The income questions asked in that survey are very detailed and measure the amount of income received during the previous calendar year. The income questions asked in the AHS are much less detailed and measure the amount received during the previous 12 months. Because interviews were conducted throughout the year, the income measures do not pertain to a fixed period. Many of the income questions in the AHS were asked on a household rather than an individual income basis. The lack of data for individuals made it necessary to adopt a poverty definition based on household income.

Officially, families and unrelated individuals are classified as being above or below the poverty level using the poverty index originated at the Social Security Administration in 1964 and revised by the Federal Interagency Committees in 1969 and 1980. The poverty index is based solely on money income and does not reflect the fact that many low-income persons receive noncash benefits such as food stamps, medicaid, and public housing. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). For further details, see Current Population Reports, Series P-60, No. 194, *Poverty in the United States: 1995*.

**Primary metropolitan statistical areas.** Within the metropolitan statistical areas classified as Level A (population size of 1,000,000 or more), some areas may qualify for separate recognition as primary metropolitan statistical areas (PMSAs). A PMSA is a large urbanized county, or cluster of counties, that demonstrates very strong internal economic and social links, in addition to close ties to the other portions of the Level A metropolitan statistical area.

**Purchase price.** Purchase price refers to the price of the house or apartment and lot at the time the property was purchased. Closing costs are excluded from the purchase price, and for mobile homes the value of the land is excluded. Median purchase price is rounded to the nearest dollar.

**Race.** The classification of "race" refers to the race of the householder occupying the housing unit. The concept of race as used by the Census Bureau does not denote a clear-cut scientific definition of biological stock. Race was determined on the basis of a question that asked for self-identification of a person's race. Detailed characteristics of units with Black householders are presented in chapter 4.

**Reasons for ownership.** Respondents indicated the reasons for owning additional residential property. The categories include previous usual residence, used for recreational purposes, investment purposes, unable to sell property, inherited property, and other reasons.

**Regions.** The standard census geographic regions are used in the tables of this report. States contained in each region are as follows: Northeast—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Pennsylvania, and New Jersey; Midwest—Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, North Dakota, and South Dakota; South—Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Tennessee, Kentucky, Arkansas, Louisiana, Oklahoma, and Texas; West—Montana,

---

Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Alaska, Washington, Oregon, Nevada, California, and Hawaii.

**Rent reductions.** Rent control means that an increase in rent is regulated by law. The jurisdiction, state or local, mandates that percentage rent increases are set and must be approved by a board, agency, department, division, office, etc.

A housing unit is classified as being in a public housing project if the structure in which the unit is located is owned by any local or state government agency, such as a housing and redevelopment authority or a housing development agency, and operated as public housing. These organizations may receive subsidies from the federal or state government, but the local agency owns the property.

A housing unit is classified as being subsidized if under certain programs the respondent pays a lower rent because a federal, state, or local government program pays part of the cost of construction, building mortgage, or operating expenses. These programs include (1) the rental assistance program where part of the rent for low-income families occupying the rental housing units is paid by the Department of Housing and Urban Development (HUD), (2) the FHA interest subsidy programs for rental and cooperative housing for low-income families, (3) the rent supplement program where part of the rent for low-income families occupying certain types of HUD-assisted rental housing projects is paid by the FHA, and (4) the direct loan program of HUD for housing the elderly. Units requiring income verification are subsidized units.

**Rooms.** The statistics on rooms are for the number of housing units with a specified number of rooms. Rooms counted include whole rooms used for living purposes, such as bedrooms, living rooms, dining rooms, kitchens, recreation rooms, permanently enclosed porches that are suitable for year-round use, lodgers' rooms, and other finished and unfinished rooms. Rooms used for offices by a person living in the unit are also included. The median for rooms is rounded to the nearest tenth.

A dining room, to be counted, must be a separate room. It must be separated from adjoining rooms by built-in floor-to-ceiling walls extending at least a few inches from the intersecting walls. Movable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in-walls. Bathrooms are not counted as rooms.

**Selected amenities:**

*Porch, deck, balcony, or patio.* The porch, deck, balcony, or patio must be attached to the sample unit, not just to the building or free standing. Porches may be enclosed or open.

*Telephone available.* A housing unit is classified as having a telephone if there is a telephone for receiving calls available to the occupants of the unit. The telephone may be

located outside or inside the housing unit, and one telephone may serve the occupants of several units. The number of housing units with a telephone available, therefore, does not indicate the number of telephones installed in homes.

*Usable fireplace.* Excludes the following: fireplaces that have been blocked off or whose chimney or flue have been filled, decorative or artificial fireplaces, and Franklin stoves. Free-standing fireplaces are included in this item.

*Separate dining room.* A separate dining room is an area separated from adjoining rooms by a built-in floor-to-ceiling wall extending at least a few inches from its intersecting wall. Built-in walls do not include movable or collapsible partitions or partitions consisting solely of shelves and cabinets.

*Living rooms, recreation rooms, etc.* Includes family rooms, dens, recreation rooms and/or libraries.

*Garage or carport.* The garage or carport must be on the same property but does not have to be attached to the house. Off street parking is considered driveway or parking lot privileges that is paid for as part of the rent. Data on garage or carport are not collected for occasional-use vacant and other vacant.

**Selected deficiencies.**

*Signs of rats.* The statistics on signs of rats refer to respondents who reported seeing rats or signs of rats inside the house or building during the last 3 months or while the household was living in the unit if less than 3 months. Signs of rats include droppings, holes in the wall, or ripped or torn food containers.

*Holes in floors.* Data are shown on whether there are holes in the interior floors of a housing unit. The holes do not have to go all the way through to a lower floor or to the exterior of the unit. The holes must be large enough to cause someone to trip.

*Open cracks or holes (interior).* Statistics are presented on whether or not there are open cracks or holes in the interior walls or ceilings of the housing unit. Included are cracks or holes that do not go all the way through to the next room or to the exterior of the housing unit. Hairline cracks or cracks that appear in the walls or ceilings but are not large enough to insert the edge of a dime and very small holes caused by nails or other similar objects are not considered to be open cracks or holes.

*Broken plaster or peeling paint (interior).* The area of peeling paint or broken plaster must be on the inside walls or ceilings and at least one area of broken plaster or peeling paint must be larger than 8 inches by 11 inches.

---

**Electric wiring.** A housing unit is classified as having exposed electric wiring if the unit has any wiring that is not enclosed, either in the walls or in metal coverings, or if the unit has any wiring outside the walls enclosed in some material other than metal. Excluded from the tabulation are appliance cords, extension cords, chandelier cords, and telephone, antenna, or cable TV wires.

**Electric wall outlets.** A housing unit is classified as having rooms without electric wall outlets, if there is not at least one working electric wall outlet in each room of the unit. A working electric wall outlet is one that is in operating condition; that is, can be used when needed. If a room does not have an electric wall outlet, an extension cord used in place of a wall outlet is not considered to be an electric wall outlet.

**Sewage disposal and sewage disposal breakdowns.** A public sewer is connected to a city, county, sanitary district, neighborhood, or subdivision sewer system. Included are only systems operated by a government body or private organization sewage treatment system serving six or more units. Small sewage treatment plants, which in some localities are called neighborhood septic tanks, are classified as public sewers. A septic tank or cesspool is an underground tank or pit used for disposal of sewage (serving five or fewer units). A chemical toilet, which may be inside or outside the unit, uses chemicals to break down or dissolve sewage. Housing units for which sewage is disposed of in some other way are included in the “other” category.

The data on breakdowns in the means of sewage disposal are limited to housing units in which the means of sewage disposal was a public sewer, septic tank, or cesspool. Breakdowns refer to situations in which the system was completely unusable. Examples include septic tank being pumped because it no longer perked, tank collapsed, tank exploded, sewer main broken, sewer treatment plant not operating as a result of electrical failure or water service interruption, etc.

Data on breakdowns are shown if they occurred in the 3 months prior to the interview or while the household was living in the unit if less than 3 months, and if the breakdown lasted 6 consecutive hours or more. Housing units with a breakdown in sewage disposal are also classified according to the number of breakdowns.

**Shared ownership.** This item is restricted to owner-occupied housing units. Shared ownership includes properties where the ownership of the investment property is shared with one or more nonhousehold members.

**Square footage of unit.** Housing size is shown for single family, detached housing units and mobile homes. Excluded from the calculation of square footage are unfinished attics, carports, attached garages, porches that are not protected from the elements (that is, screened porches), and mobile home hitches. Both finished and

unfinished basements are included. Median square footage is rounded to the nearest foot. Square footage is based on the respondent’s estimate of the size of the unit. If the respondent did not know the square footage, the interviewer measured the outside dimensions of the unit. Preliminary evaluation indicates that this item is somewhat unreliable.

**Stories between main and apartment entrances.** Data are presented for multiunit structures with two or more floors and are concerned with the number of floors from the main residential entrance level of the building to the main entrance of the unit. “Same floor” indicates that the main entrance of the sample unit is on the same level as the main entrance that residents use to enter the building.

**Stories in structure.** The statistics presented are restricted to multiunits. Finished attics are included in the number of stories. Unfinished attics are not. For split levels and bilevels, the number of stories is determined by the highest number of floors that are physically over each other.

**Suburbs.** Suburbs are defined in the AHS as the portion of each metropolitan area that is not in any central city.

**Tenure.** A housing unit is owner occupied if the owner or co-owner lives in the unit, even if it is mortgaged or not fully paid for. Also, a cooperative or condominium unit is owner occupied only if the owner or co-owner lives in it. All other occupied housing units are classified as renter occupied, including housing units rented for cash rent and those occupied without payment of cash rent.

**Type of housing unit.** This item refers to the type of housing unit used for vacation or recreational purposes. The types include single-family home, unit in multiunit building, mobile home, or other type.

**Type of property.** This item refers to the type of residential property used for investment purposes. These units used for both recreational and investment purposes are excluded from this category. The types include single family homes, multiunit buildings, unit in a multiunit buildings, mobile homes, or other type.

**Units in structure.** In determining the number of housing units in a structure, all units, both occupied and vacant, were counted. The statistics are presented for the number of housing units in structures of specified type and size, not for the number of residential structures.

A structure is a separate building if it has either open space on all sides or is separated from other structures by dividing walls that extend from ground to roof. Structures containing only one housing unit are further classified as detached or attached.

A one-unit structure is detached if it has open space on all four sides even though it has an adjoining shed or garage. A one-unit structure is attached if it has one or

---

more walls extending from ground to roof that divide it from other adjoining structures and does not share a furnace or boiler with adjoining structures such as in row-houses, townhouses, etc.

Mobile homes and trailers are shown as a separate category. When one or more rooms have been added to a mobile home or trailer, it is classified as a mobile home. Prior to the 1984 reports, these units were not classified as a mobile home or trailer.

**Urban and rural residence.** As defined for the 1980 census, urban housing comprises all housing units in urbanized areas and in places of 2,500 or more inhabitants outside urbanized areas. More specifically, urban housing consists of all housing units in (a) places of 2,500 or more inhabitants incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England states, New York, and Wisconsin), but excluding those housing units in the rural portions of extended cities; (b) census designated places of 2,500 or more inhabitants; and (c) other territory, incorporated or unincorporated, included in urbanized areas. Housing units not classified as urban constitutes are rural housing. Information on the historical development of the urban-rural residence definition appears in the 1980 Census of Population report, *Characteristics of the Population, Number of Inhabitants*, PC801-A.

**Vacation units.** Vacation homes or recreational homes characteristics are only shown for the first vacation home listed. Vacation homes exclude multiunit buildings and units with ownership shared with nonhousehold members. Units reported as both vacation and investment properties are classified as vacation units.

**Value.** Value is the respondent's estimate of how much the property (house and lot) would sell for, if it were for sale. Any nonresidential portions of the property are excluded from the cost. For vacant units, value represents the sale price asked for the property at the time of the interview, and may differ from the price at which the property is sold. Medians for value are rounded to the nearest dollar.

**Value of vacation or investment property.** Refers to the amount that the property is perceived to sell for on today's market. The value of shared ownership property is limited to respondent's share only.

**Water supply stoppage.** Water supply stoppage means that the housing unit was completely without running water from its regular source. Completely without running water means that the water system servicing the unit supplied no water at all, that is, no equipment or facility using running water (in kitchen and bathroom sinks, shower, in

bathtub, flush toilet, dishwasher, and other similar items) had water supplied to it, or all were inoperable. The reason could vary from a stoppage because of a flood or storm, to a broken pipe, to a shutdown of the water system, to a failure to pay the bill, or other reasons.

Data on water supply stoppage are shown if they occurred in the 3 months prior to the interview, or while the household was living in the unit if less than 3 months, and if the breakdown or failure lasted 6 consecutive hours or more. Housing units with water supply stoppage are also classified according to the number of times the stoppages occurred.

**Worked at home.** Information is presented for workers who did any regularly scheduled work for their employer at home. This can include telecommuters; that is, a company employee who works from home full or part time during normal business hours, a real estate sales person, teleworker and any person who works at home on a regular job.

**Workers.** This includes all persons age 14 years and over who held a job any time the previous week of the survey within the United States. It includes those who worked at any time last week either as an employee for someone else, or in one's own business, work with or without pay in a business or farm operated by a relative, or worked part time. Not included in this total were persons absent from work all last week due to illness, vacation, strike, or layoff.

**Year householder moved into unit.** The data are based on the information reported for the householder and refer to the year of latest move. Thus, if the householder moved back into a housing unit previously occupied, the year of the latest move was to be reported; if the householder moved from one apartment to another in the same building, the year the householder moved into the present unit was to be reported. The intent is to establish the year the present occupancy by the householder began. The year the householder moves is not necessarily the same year other members of the household move; although, in the great majority of cases the entire household moves at the same time. The median year householder moved into unit is rounded to the nearest year.

**Year structure built.** Year structure built refers to when the building was first constructed, not when it was remodeled, added to, or converted. The figures refer to the number of housing units in structures built during the specified periods and in existence at the time of the interview. For mobile homes and trailers, the manufacturer's model year was assumed to be the year built. Median year built is rounded to the nearest year.

# Appendix B.

## Sample Design, Weighting, and Telephone Experiments

---

### SAMPLE DESIGN

This report is based on data from a sample of housing units interviewed between August 1995 and February 1996. The same basic sample of housing units is interviewed every 2 years until a new sample is selected. We update the sample adding newly constructed housing units and units discovered through coverage improvement efforts every enumeration.

For the 1995 American Housing Survey–National (AHS-N), we selected approximately 59,500 sample housing units for interview. About 3,600 of these units were ineligible because the unit no longer existed or because the unit did not meet our definition of a housing unit.

We classified about 4,200 of the remaining units (both occupied and vacant housing units), as “type A” noninterviews because (a) no one was at home after repeated visits, (b) the respondent refused to be interviewed, or (c) the interviewer was unable to find the unit.

### SAMPLE SELECTION

We have interviewed the current sample of housing units since 1985. First, we divided the United States into areas made up of counties or groups of counties and independent cities, which we refer to as primary sampling units (PSUs). We selected a sample of these PSUs. Then we selected a sample of housing units within these PSUs.

**Selection of sample areas.** The sample for AHS is spread over 394 PSUs. These PSUs cover 878 counties and independent cities with coverage in all 50 States and the District of Columbia. If there were a sufficient number of housing units in a PSU, the PSU was known as a *self-representing* PSU and was in sample with certainty. The sample from the PSU represents only that PSU. There are 170 self-representing PSUs.

We grouped the remaining PSUs into strata and selected one PSU per stratum to represent all PSUs in the stratum. We refer to these PSUs as *nonselving-representing PSU's*. The sample nonself-representing PSUs for AHS are a subsample based on the 1980 census.

**Selection of sample housing units.** The AHS sample consists of the following types of housing units:

- Housing units selected from the 1980 census
- New construction in permit issuing areas
- Housing units missed in the 1980 census
- Other housing units added since the 1980 census

**Housing units selected from the 1980 census.** We selected a sample of housing units from the 1980 decennial census files using an overall sampling rate of about 1 in 2,148. We determined the within-PSU sampling rate so the overall probability of selection for each sample housing unit was the same (e.g., if the probability of selecting a NSR PSU was 1 in 10, then the within-PSU sampling rate would be 1 in 214.8).

We classified the areas within a PSU into two types based on (a) the completeness of the addresses in the areas that make up the PSU and (b) the presence of a system to monitor new construction through building permits.

The two types of areas were known as address enumeration districts (EDs) or area enumeration districts. We selected the sample of 1980 census units differently in the two types of areas.

In *address ED's*, most of the housing-unit addresses were complete, and the construction of new housing units was monitored by building permits. We selected a sample of housing units from the list of units that received long-form questionnaires in the 1980 census.

We also used the census files to select a sample of living quarters in address EDs that did not meet the definition of a housing unit (e.g., military barracks, college dorm). We use this sample to identify units that convert to housing units after the 1980 census.

In *area EDs*, 4 percent or more of the 1980 census addresses were either incomplete or inadequate or new construction was not governed by building permits (mostly rural areas).

We selected a sample of housing units from the list of units that received 1980 census long-form questionnaires in several steps. First, we grouped area EDs based on certain characteristics of interest. Then we selected a systematic sample of EDs. We selected a sample of land areas in these EDs. Finally, we selected a sample of housing units that received 1980 census long forms within the land areas.

**New construction in permit issuing areas.** The building permit frame covers only non-mobile home new construction. We selected the sample of permit new-construction housing units from permits that were expected to be completed after, April 1, 1980. In certain permit areas and for structures of certain sizes, we included permits issued as early as March 1979. But, for the most part, we included permits issued since July 1979.

---

Within each PSU, we selected building permits monthly, based on certain geography characteristics. We created clusters of approximately four housing units and sub-sampled units within these clusters at the rate of 1 in 4, yielding clusters of size 1. The overall probability of selection of these units is about 1 in 2,148.

Some areas became permit issuing after the 1990 census. For these areas, we began selecting permits issued in January 1994 and later. Prior to this time, new construction was picked up as whole structure additions in area EDs not governed by building permits.

**Housing units missed in the 1980 census.** The Census Bureau conducted a special study, called the Housing Unit Coverage Study (HUCS), as part of the 1980 census. This study identified units at addresses missed or inadequately defined in the 1980 census. We included a sample of the units identified in the HUCS in the AHS sample.

**Housing units added since the 1980 census.** We pick up two other types of units added since the 1980 census: (a) units added within structures containing sample units and (b) whole structure additions that did not contain living quarters at the time of the 1980 census.

*Within structure additions.* These additions have a chance of being in sample, because there is at least one unit that existed at the time of the 1980 census that was eligible for selection. We identified these adds in structures with at least one unit selected from the 1980 census sample and the HUCS sample. We also pick up adds in permit new construction, e.g., units added since the structure was completed. The rules for identifying within structure additions differed in certain types of areas and frames.

In *area EDs*, all within-structure additions in structures containing at least one sample unit were interviewed for the AHS.

In *address EDs and in the HUCS and building permit frames*, we interviewed all within-structure additions in 1-15 unit structures containing at least one sample unit for AHS. In 16-or-more unit structures, we only interviewed a sample of units.

*Whole structure additions.* These types of additions are units in structures that contained no living quarters at the time of the 1980 census. We used area sampling methods to identify these in all types of areas. Under area sampling, we list all housing units within a land area and then select a systematic sample.

To identify whole structure additions in *address EDs*, we used land areas in sample for the National Health Interview Survey (NHIS). The NHIS uses an area sampling approach in all its sample EDs. We only used NHIS areas that were in AHS PSUs or in NHIS PSUs adjacent to AHS PSUs. Only units that were not already assigned to NHIS were eligible.

We matched these units to the 1980 census address registers. If the address matched to the census, the unit was ineligible. (Only the basic address, i.e., 801 Main Street, had to match. Apartment number, mobile home site number, etc., did not have to match.)

When we listed all the units in structure, we screened eligible units further to pick up units with no previous chance of selection. (The screening eliminated units such as non-mobile home new construction, which is covered by building permits, and census misses.) We updated these areas in 1991.

In *area EDs where new construction is not governed by building permits*, we used all land areas chosen for the area ED sample. We selected an expected four units, using area sampling methods, within these land areas to identify whole structure additions. However, we did not match this sample to the census. Instead, we screened this sample, using criteria similar to those used in address EDs. One important difference to note is that we did not eliminate new construction during the screening process. In 1993, we updated half of the segments (3 of the 6 panels). In 1995, we updated the other half of the segments.

In *area EDs where new construction is governed by building permits*, we only used one-third of the land areas chosen for the area ED sample. We selected an expected eight units using area sampling methods within these areas to identify whole structure additions. We screened this sample using the same criteria as for address EDs. Again, we did not match this sample to the census. The screening process eliminated non-mobile home new construction, because it is covered by the building permit frame. In 1993, we updated one-half of the segments. In 1995, we updated the other half of the segments. After the 1990 census, certain area EDs switched the management of new construction. About 800 sample EDs changed from not issuing building permits to issuing building permits. About 20 sample EDs changed from issuing building permits to not issuing building permits. This change was incorporated into the sample in 1995.

**Supplemental metropolitan sample.** In 1995, we reinstated units to six metropolitan areas (Los Angeles, Chicago, Detroit, Philadelphia, Northern New Jersey, and New York City). These units came from two places. Most were part of a parallel sample we selected along with our basic sample. Others were units we reduced before 1985 because of budgetary reasons. By adding these units back to the sample, we will be able to provide sample estimates for these metropolitan areas.

In four areas (Los Angeles, Chicago, Detroit, and Philadelphia), the additional units included units selected for the 1980 census and any new construction since the 1980 census. In these areas, we increased the sample by about 135 percent, slightly more than doubling it.

In Northern New Jersey and New York City, only renters from the 1980 census in certain urban areas from address

EDs were reinstated back into the sample. In these two metropolitan areas, we added about 275 sample units.

## WEIGHTING

### Housing Units

We assigned each unit a weight to reflect the correct probability of selection. After applying this weight, the AHS-N weighting procedure consists of two phases.

#### 1. First phase

In the first phase, we make a series of adjustments to account for units that could not be interviewed for a number of reasons. For each of these adjustments, we compute a factor and apply it to the appropriate units. The factors equal the following ratio:

$$\frac{\text{Interviewed housing units} + \text{Housing units not interviewed}}{\text{Interviewed housing units}}$$

The interviewed housing units have the above factor applied to them. The first of these adjustments, done only in permit segments, accounts for permits that could not be sampled and units that could not be found. Records representing these two situations were treated as noninterviews. These noninterviews make up “housing units not interviewed.” The “interviewed housing units” for the first adjustment actually include both interviews and noninterviews (excluding unable to locate units).

The second of the adjustments accounts for units in structures built before the 1980 census that could not be found. The unlocatable units are represented by both interviews and noninterviews (excluding unable-to-locate units).

The last of these adjustments accounts for “type A” noninterviews (excluding unable-to-locate units). (See the section on Sample Design for a description of “type A” noninterviews.)

When prior year AHS-N or 1980 census data are available, we use this information to determine the noninterview adjustment cell. The cells include the following characteristics:

- Tenure (i.e., owner or renter)
- Geography
- Type of housing unit (i.e., mobile home or non-mobile home)
- Units in structure
- Number of rooms
- Vacancy status (i.e., seasonal/migratory or other year round)

When previous data are not available, we compute adjustment factors using more general characteristics such as type of area and type of housing unit (i.e., mobile home, non-mobile home).

#### 2. Second phase

The second phase involves a three-stage ratio-estimation procedure that adjusts for the following: (a) sampling of nonself representing PSUs, (b) known sampling deficiencies in new construction, and (c) differences between sample estimates and estimates derived from independent sources for key characteristics.

The *first stage* of this procedure reduces the portion of the variance due to the sampling of nonself-representing PSUs. The procedure accounts for differences that existed at the time of the 1980 census between housing units estimated from the nonself representing sample PSUs and the 1980 census count of housing units from all nonself-representing strata.

We compute factors accounting for these differences separately for the following characteristics: (a) region, (b) tenure, (c) metropolitan area status, and (d) urban or rural status. In addition, we use ethnicity (i.e., Hispanic, non-Hispanic) in the South and West regions and race in the South region.

The first stage factor equals the following ratio:

$$\frac{\text{1980 census housing units for all nonself-representing strata in a cell}}{\text{Number of 1980 housing units in the same cell estimated from the sample nonself-representing PSUs}}$$

We calculate the numerators of the ratios by summing the 1980 census housing-unit counts for each cell across all nonself-representing strata. We compute the denominators by weighting the 1980 census housing-unit counts from each nonself-representing sample PSU by the inverse of the probability of selection for that PSU. Then we sum the weighted counts across all nonself-representing sample PSUs.

The *second stage* of the ratio estimation procedure adjusts the AHS sample estimate of new construction (i.e., units built since the 1980 census) to account for known deficiencies (see the section on nonsampling error in appendix D).

For non-mobile homes, we control the sample estimates to independently derived estimates from the Survey of Construction. For mobile homes we control the most current sample estimates to independently derived estimates from the Survey of Mobile Home Placements. These estimates are the best estimates available for these types of units.

We compute factors separately for each region. The second stage factor equals the following ratio:

---

Independently derived estimate for a cell  
AHS sample estimate in that cell

We compute the denominators of the above ratio by summing the existing weight on each record after the first stage of ratio estimation over all records for each cell in each region. The numerators come from either the Survey of Construction or the Survey of Mobile Home Placements.

The *third stage* of the ratio estimation procedure adjusts the AHS sample estimate of housing units to independently derived current estimates for key characteristics. We believe these characteristics are highly correlated with other characteristics of interest for AHS.

The third stage is done in two steps for occupied units. First, we control the sample estimate of occupied housing units to independently derived estimates for the following characteristics:

- Region
- Tenure
- Ethnicity (i.e., Hispanic head of household and non-Hispanic head of household)
- Household status (husband-wife, other male, or other female)
- Age of household head

Then we apply the factor from this step to the interviewed occupied units. Next, we control the new sample estimate of occupied housing units to independently derived estimates for similar characteristics. We substitute race for ethnicity in this step but all other characteristics are the same. We control the sample estimate of vacant housing units to an independently derived estimate for four type-of-vacant cells for each region.

We calculate all third stage factors similarly using the following ratio:

Independently derived estimate of housing units in a cell  
AHS sample estimate of housing units in that cell

For occupied units, we derive the numerators of the factors in three steps. First we compute an independent intercensal estimate of total housing units for 1995 by making adjustments to the 1990 census data to account for residential new construction as well as losses to the housing inventory since the 1990 census. For a more detailed description of how these numbers are obtained, refer to a similar process at the State level in the *Current Population Report*, Series P25, no. 1123. Then we determine the occupied portion of this independent control based on the sample proportion. Finally, we allocate the occupied portion of the independent control based on the Current Population Survey distribution for the third stage occupied cells.

For vacant units, we allocate the vacant portion of the independent control based on the distribution of vacant units from the Housing Vacancy Survey. This survey is a quarterly vacancy survey conducted by the Bureau of the Census.

We compute the denominators of the factors by summing the weights, with all previous factors applied, on all records in a cell. For the Hispanic/non-Hispanic and vacant cells, we use the weight after the second-stage of the ratio estimation procedure. For the Black/non-Black cells, we use the weight after the Hispanic/non-Hispanic portion of the third stage of the ratio estimation procedure.

We repeat the second stage and third stage of the ratio estimation procedure to bring the AHS sample estimate into closer agreement with the independent estimates. We used the final weight resulting from all iterations for the tabulations in this report.

As a result of the estimation procedure, the sampling error for most statistics is less than if the sample were simply weighted by the inverse of the probability of selection.

## Workers

We assigned each worker living in a housing unit the weight assigned to that unit.

## TELEPHONE EXPERIMENTS

In 1995, we used three different methods of interviewing: personal visit, decentralized telephone interviewing, and computer assisted telephone interviewing (CATI). Twenty-one percent of the interviews (12,067) were completed using CATI and twenty-five percent by decentralized telephone interviewing (14,688). However, most interviews were conducted by personal visits (31,563).

CATI was generally assigned to areas where it is difficult to hire and retain field representatives. These areas are typically large urban PSU's.

### 1. Decentralized telephone interviewing

**Possible effects of decentralized telephone interviewing on the data**—We conducted a large scale decentralized telephone interviewing experiment for the 1983 AHS-National. Prior to 1983 all interviews were done by personal visits. The experiment provided more detailed information about the effects of decentralized telephone interviewing on the data. We concluded telephone interviewing had the following effect on the data: (a) Telephone interviewing increased the item nonresponse rate for income items although this effect did not appear to cause changes in the published estimates. (b) Problems with neighborhood quality were underreported, although this effect was minimal.

## 2. Computer assisted telephone interviewing (CATI)

We conducted large-scale Computer Assisted Telephone Interviewing (CATI) experiments as part of the 1987 (6,400 CATI interviews), 1989 (5,800 CATI interviews), and 1991 (6,142 CATI interviews) enumerations for AHS-N. Although there were differences between CATI and non-CATI data in 1987, 1989, and 1991, we recommended continuing CATI for the 1993 AHS-N. We identified many positive aspects of CATI. One positive aspect is that with CATI supervisors have the ability to monitor and observe inexperienced CATI interviewers while they collect data. Another benefit of CATI is if we use CATI in geographic areas with interviewer retention problems, we could hire fewer new interviewers. Therefore, the CATI data we obtain would be at least as good as the non-CATI data we would settle for otherwise. We will continue to use CATI in these areas to reconcile questionable results from previous enumerations and to improve AHS data quality.

**Possible effects of computer assisted telephone interviewing (CATI) on the data**—There is strong evidence differences exist in data collected by CATI versus non-CATI. We do not know for sure, however, which method produces better data. Analysis of the CATI experiment conducted in 1987 indicated CATI had a substantial effect on some AHS-N characteristics.

Based on the results from the 1987 and 1989 analyses, we made the following changes to the CATI interview in 1991:

- We moved the heating equipment reconciliation from the end of the interview to right after the question. We also changed the response based on the reconciliation answer.
- We added a probe and reconciliation to the question on the presence of a mortgage. We also changed the response based on the reconciliation answer.
- We added a probe for lot size, units-in-structure, and the age of household appliances (e.g., refrigerator) if the respondent initially replied they did not know.
- We improved the training for CATI interviewers, putting more emphasis on probing and dealing with “don’t know” responses, and CATI supervisors.

Use of the probes resulted in substantial reductions in “don’t know” answers. Most of the items where probes were added showed at least 50 percent fewer “don’t know” responses in 1991 compared to 1989.

Other information from the 1991 experiment confirmed the results of the experiments conducted in 1987 and 1989.

We used the same method of analysis for the 1987, 1989, and 1991 experiments. We weighted data from the CATI and non-CATI treatment panels separately using the AHS-N estimation procedure described in the section on estimation. We produced estimates from the two treatments in data tables for characteristics provided in chapter 2 of the AHS-National publication. We used t-statistics to test differences between estimates from the CATI and non-CATI treatments.

The 1987 and 1989 analyses of the t-tests yielded similar results. The percents of significant differences observed at the 10 percent, 5 percent, and 1 percent significance levels were higher than what we expected by chance (e.g., we expected 10 percent of the tests to yield significant results, by chance, when tested at the  $\alpha = .10$  significance level). For 1991, results show fewer significant differences than in 1987 and 1989, although the proportion is still higher than expected. It appears the changes introduced in 1991 had some effect on the CATI responses.

**Table C. T-Test Results**

| Survey year | Proportion of significant tests (percent) |                |                |
|-------------|---|----------------|----------------|
|             | $\alpha = .10$                            | $\alpha = .05$ | $\alpha = .01$ |
| 1987 .....  | 11.1                                      | 6.2            | 1.9            |
| 1989 .....  | 11.7                                      | 6.8            | 2.3            |
| 1991 .....  | 10.2                                      | 5.9            | 1.7            |

For characteristics of total occupied units, the significant differences for estimates for panels assigned to CATI versus panels assigned to non-CATI treatment ranged from about 6 to 40 percent.

The following table shows which groups had the most significant differences between CATI and non-CATI estimates for 1987, 1989, and 1991.

**Table D. Groups With Differences Between CATI and Non-CATI Estimates**

| Groups  | 1987 | 1989 | 1991 |
|---|------|------|------|
| Owner occupied housing units .....                  | Y    | Y    | Y    |
| Urban housing units .....                           | Y    | Y    | Y    |
| Housing units with moderate physical problems ..... | Y    | Y    | Y    |
| Total occupied housing units .....                  |      | Y    | Y    |
| Housing units in the suburbs (in MSAs) ...          |      | Y    | Y    |
| Housing units which moved in the past year .....    |      | Y    | Y    |

For both 1987 and 1989, the analyses also revealed CATI had an effect on certain items within the groups. The following table contains those items and indicates whether CATI (C) or non-CATI (N) estimates were higher. If

**Table E. Items Within Groups Showing Differences Between CATI and Non-CATI Estimates**

| Items   | 1987 | 1989 | 1991 |
|---|------|------|------|
| Lot size .....  | I    | I    | I    |
| Water leakage .....   | N    | N    | N    |
| Income.....   | I    | I    | I    |
| Monthly housing costs as percent of income.....                 | N    | N    | N    |
| Housing ownership shared by person not living at the unit ..... | C    | C    | C    |
| Utilities paid separately from rent.....                        | C    | C    | C    |
| Owners with a mortgage .....                                    | N    | N    | N    |
| Routine maintenance costs.....                                  | I    | I    | I    |
| Heating equipment .....   | I    | I    | I    |
| Other (additional) heating fuels.....                           | N    | N    | N    |

neither estimates were higher, the results were termed inconclusive (I).

We used data from both CATI and non-CATI treatments to produce the data presented in the 1987, 1989, and 1991 publications. The 1987, 1989, and 1991 published estimates for the groups and items mentioned previously are different than if we used maximum decentralized telephone interviewing for all units. You can get detailed information on which specific characteristics are affected and the extent of the effect by writing to:

Demographic Statistical Methods Division  
Bureau of the Census  
Washington, DC 20233

**Conclusions.** The 1991 results confirmed the findings from both the 1987 and 1989 studies. There is strong evidence there are differences in data collected using CATI versus non-CATI methods. We do not know which method provides better data. However, we speculate that CATI income estimates are probably better than non-CATI, but that some other estimates are probably worse.

For income, CATI ensures all questions are asked. The computer will not allow the interviewer to skip any questions. For other items, we believe non-CATI estimates are more accurate because it is unlikely people would over-report things like water leaks.

These findings affect various types of estimates and comparisons. In particular, change estimates across 1985, 1987, 1989, and 1991 are biased and longitudinal analysis is adversely affected since we used CATI in 1987,

1989, and 1991. Personal visits were the only type of data collection done for 1985. The extent to which we use CATI in the future will determine the impact on longitudinal analyses involving data from 1985.

**Reconciliation experiment.** As part of the CATI, we conducted reconciliation studies in 1987, 1989, and 1991. If the responses for a particular year differed from the previous year, we asked the respondent to explain the difference. Our goal was to determine if there was a change since the previous year or if one of the responses was wrong.

*1987 reconciliation study.* The 1987 reconciliation study indicated respondents had difficulty reporting items such as the following: (a) presence of basement, (b) heating equipment, and (c) heating fuel.

The number of respondents who said their 1985 response was wrong was about the same as the number who said their 1987 response was wrong. Since we interviewed all households by personal visit in 1985, this indicates an effect due to certain questions rather than the mode of interview.

*1989 and 1991 Reconciliation Studies.* We conducted reconciliation studies in 1989 and 1991 with some of the questions from the 1987 study. The results were similar to the 1987 study. Results indicate problems reporting the presence of a basement, and type of heating equipment. More respondents indicated the prior year response, rather than the current year response, was wrong.

**1991 moderate physical problems (MPPs) study.** In 1991, an experiment was done to determine why CATI reported fewer moderate physical problems (MPPs) than non-CATI. The low estimates of MPPs found by CATI, relative to non-CATI in 1987 and 1989 AHS-N were likely caused by CATI underestimating MPPs and non-CATI overestimating MPPs. Thirty-seven percent of the differences between CATI and non-CATI were attributed to CATI missing a true MPP. And forty-two percent of the differences were attributed to non-CATI recording MPPs which reconciliation showed did not exist.

# Appendix C.

## Historical Changes

---

### INTRODUCTION

The American Housing Survey National (AHS-N) was first conducted in 1973. Between 1973 and 1981, it was conducted every year and was called the Annual Housing Survey. The last even-numbered year for the AHS-N was 1980. Since 1981, the survey has been conducted every other year. In 1985, the name was changed to the American Housing Survey. Other historical changes in the survey are listed below by subject area. The year refers to the year the change was made. In some cases, multiple years are mentioned together. In these cases, either corrections were made to the data in more than 1 year or there are specific years for which data are not comparable.

Only changes are noted in this appendix. For example, “Book Titles” has no entries for 1975 through 1977, since the same titles were published for those years as in 1974.

### Book Titles

**1973.** Annual Housing Survey: 1973

Part A. *General Housing Characteristics* (compared central city, suburban, and nonmetropolitan areas).

Part B. *Indicators of Housing and Neighborhood Quality*.

Part C. *Financial Characteristics of the Housing Inventory*.

Part D. *Housing Characteristics of Recent Movers*.

Supplement report number 1, *Financial Characteristics by Indicators of Housing and Neighborhood Quality*.

**1974.** Parts A, B, C, and D stayed the same.

Part E was added, *Urban and Rural Housing Characteristics*

Supplement report number 1 was changed to part F, *Financial Characteristics by Indicators of Housing and Neighborhood Quality*.

**1978.** Parts A, C, D, and E stayed the same.

Parts B and F from earlier years were combined into a new Part B, *Indicators of Housing and Neighborhood Quality by Financial Characteristics*.

A new part F, *Energy-Related Housing Characteristics* was added.

**1985.** Parts A, B, C, D, E, and F, were combined in one report, *American Housing Survey for the United States*.

A new report was added, Supplement to the *American Housing Survey for the United States* with data on family types, neighborhood quality, commuting, and ownership of additional residential units.

### Computer Assisted Telephone Interviewing (CATI)

**1987.** Large-scale CATI experiments were conducted as part of both the 1987, 1989, and 1991 AHS-N. Preliminary analysis of the CATI experiments indicated that CATI has a significant effect on the data. The experiments revealed that characteristics' data for owner housing, urban housing, and housing with moderate physical problems exhibited high numbers of significant differences between CATI and non-CATI estimates. The moderate physical problems subgroup had the highest incidence of significant differences. The analysis also showed significant differences for total occupied, suburban housing units, and moved in past year.

Little is known at this time about whether CATI or non-CATI produces better data. It is felt, however, the estimates of change in AHS-N between 1985 and 1987, 1985 and 1989, and 1985 and 1991 will be biased for many characteristics as a result of the introduction of CATI. Also see the discussion under the topic “Telephone Interviewing.”

### Head of Household/Householder

**1980.** Beginning in 1980, the concept head of household was dropped and replaced by householder. The head of household was the person regarded as the head by the respondent. However, if a married woman living with her husband was reported as the head, her husband was considered the head. The householder is the first household member listed by the respondent who is 18 years old or over and is an owner or renter of the sample unit.

### Housing Costs and Value

**1985.** Beginning in the 1985 AHS-N; value, mortgage data, and taxes are shown for all owners; rent for all renters; and utilities for all of both groups. From 1973 through 1983, these items were shown only for “specified” owners and renters. For comparability, Table 19 in of each chapter of the series H150 reports still shows data separately for “specified” owners and renters. “Specified” homes exclude 1-unit buildings on 10 or more acres, and owners in buildings with 2 or more units or with a business or medical office on the property.

Also in 1985, the terminology in the books changed. The new term “Monthly housing costs” includes the old terms “Selected monthly housing cost” for owners, “Gross rent” for renters, and “Contract rent” for vacant-for-rent units.

**1989.** See the discussion under the topics, “Income,” and “Monthly Housing Costs.”

### Housing Unit Definition

**1985.** Beginning with the 1985 AHS-N, there are one major and two minor differences in the housing unit definition. The major difference is that beginning in 1985, the AHS-N includes vacant mobile homes as housing units. Vacant mobile homes added an additional 698,000 seasonal and 642,000 year-round vacant units to the 1985 housing inventory. The 1973 through 1983 AHS-N excluded these units. A minor difference in the definition is the 1973 through 1983 requirement that a housing unit must have either direct access from the outside or through a common hallway, or complete kitchen facilities for the exclusive use of the occupants. In 1985, the complete kitchen facilities alternative was dropped with direct access required of all units. A second minor difference is in the definition of group quarters. In the 1973 through 1983 AHS-N, a household containing 5 or more persons unrelated to the householder was considered to be group quarters. In 1985, the cutoff was changed to 9 or more persons unrelated to the householder.

### Income

**1985.** See the discussion under the topic “Poverty.”

**1989.** Two new items in 1989 replaced similar items that were published in 1985 and 1987. They are “Monthly housing costs as percent of current income” and “Ratio of value to current income.” For income, these new items use “Current income.” In 1985 and 1987, the items “Value-income ratio” and “Monthly housing costs as percent of income” used the “Income of families and primary individuals in the last 12 months.” See Appendix A for a complete definition of “Current income,” and “Monthly housing costs as percent of current income.” We recommend caution when comparing prior years’ data with 1989 because of the differences in the definitions.

For comparative purposes, Table F shows monthly housing costs as a percent of both income in the last 12 months and current income. For total households and owner households, the medians are the same for both types of income; for renter households, the medians are 29 and 27 percent, respectively.

**Table F. Monthly Housing Costs as a Percent of Income**

| Characteristic                                    | Median (percent) |       |        |
|---|------------------|-------|--------|
|   | Total            | Owner | Renter |
| Monthly housing costs as percent of income using— |                  |       |        |
| Income in the last 12 months:                     |                  |       |        |
| 1987.....   | 22               | 18    | 29     |
| 1989.....   | 21               | 18    | 29     |
| Current income: 1989.....                         | 21               | 18    | 27     |

Table C in the introduction of the book *American Housing Survey for the United States in 1989*, series H150/89, shows the individual categories of percentages for 1989 for monthly housing costs as a percent of income in the last 12 months. Table 2-13 of the same report shows the individual categories for current income. For most households, current income is the same as income in the last 12 months. That is the situation for 83 percent of total households, 86 percent of the owners, and 78 percent of renters.

**1993.** Beginning in 1993, the questions on income sources of families and primary individuals were revised with the purpose of improved income reporting. The 1991 question, which reported interest or dividend income of \$400 or more, was divided into two separate questions in 1993. One new question reports interest income from different sources and one reports dividends from stocks. Neither of these two questions have an amount limitation. Also, starting in 1993 in the “Other” income category, we now include income from education loans, grants, and scholarships. Prior to 1993, these sources of income were not collected. Caution should be used when making comparisons with the 1991 and earlier surveys and the 1993 and later surveys for items “Household Income.”

Wage and salary income was under reported for some persons and households. The error occurred during the processing of the data collected by computer assisted telephone interviewing. When the respondent does not know or refuses to report wage and salary income, income is allocated during the processing. In 1993 this income was not allocated but was incorrectly processed as “zero” (no) income. This error did not occur in 1991 and earlier years and was corrected in 1995. Although the income data for 1993 are incorrect, analysis of median household income for 1991, 1993, and 1995 indicates that the impact of this error on 1993 data is minor.

### Married-Couple Families

**1985 and 1987.** It was discovered that the published 1985 and 1987 estimates of married-couple families with no nonrelatives were overestimates as a result of an error in processing. The 1985 overestimate was approximately 340,000, while the 1987 overestimate was 407,800. The

overestimated married-couple families with no nonrelatives should have been tabulated under two-or-more-person households as either other male or other female householders. This error was corrected in 1989. Table G provides corrected figures for 1987.

**Table G. Estimates of Married-Couple Families With No Nonrelatives and Other Two-or-More-Person Households: 1987**

| Characteristic                                 | Estimate   |
|--|------------|
| Married-couple families, no nonrelatives ..... | 50,084,000 |
| Other two-or-more-person households .....      | 18,853,000 |
| Male householder .....                         | 6,421,000  |
| Female householder .....                       | 12,432,000 |

**Monthly costs for electricity and gas.** Beginning in 1989, two procedures were introduced that attempt to correct the over reporting of electricity and gas costs in the AHS. In the first procedure, respondents were asked the amount of their electricity and/or gas bill for the previous months of January, April, August, and December. These months are the best predictors of annual costs. If the respondent provided data for at least 3 of the 4 months, the results were used to provide an annual estimate of costs. This estimate was then divided by 12 to provide average monthly costs.

The second procedure was applied to the remaining units. If the respondents did not know the amount of their electricity and/or gas bill at least 3 of the 4 months, we used their estimate of average monthly costs. A factor was then applied that, in effect, lowered these costs to make them consistent with electricity and gas costs reported in the Residential Energy Consumption Survey sponsored by the United States Department of Energy. Before 1989, respondents were only asked to provide an estimate of average monthly costs. Research done using the 1987 AHS has shown that this approach produces 15 to 20 percent overestimates of electricity and gas costs. The new procedures produce lower and more accurate estimates. On average, more than one-third of the respondents provided answers for at least 3 of the 4 months.

### Monthly Housing Costs

**1985.** See the discussion under the topic “Housing Costs and Value.”

**1989.** Beginning in 1989, the monthly housing costs questionnaire items for renters were revised to improve the reporting of actual rental costs. In 1987, the questionnaire reflected the total amount reportedly paid for monthly rental costs. These amounts may have included the partially subsidized amount provided by the public housing authority, the federal government, or state and local governments. The current questionnaire identifies those rental units that are subsidized and allows households to report only the costs they actually paid. The new

procedures in 1989 produce lower and more accurate estimates. Also see the discussion under the topic “Income.”

### Name Change

**1985.** In 1985, the AHS-N changed its name from the Annual Housing Survey to the American Housing Survey. See the introduction of this section, “Historical Changes.”

### Plumbing Facilities

**1985, 1987, and 1989.** See the discussion under the topic “Severe and Moderate Problems.”

**1993.** In 1993, there were 1,152,000 occupied housing units that reported a complete lack of plumbing facilities. The total number of units that reported such a lack decreased by about half between 1991 and 1993. Also, there was a decrease in these units between 1989 and 1991. Total occupied housing units with no plumbing facilities for exclusive use went from 2,253,000 in 1989 to 2,045,000 in 1991. In 1993, questionnaire item 29c on bathrooms for exclusive use was modified to provide more accurate estimates. The wording of the “answer options” to this question was changed to specify whether or not there was exclusive use of the facilities. Although the decrease between 1991 and 1993 seems unrealistic, we feel that the change in the 1993 questionnaire resulted in a better estimate. Caution should be used when making comparisons with the 1991 AHS-N survey and the 1993 and later surveys. The drop in the number of occupied units with no plumbing facilities also caused a drop in the number of units with severe physical problems from 2,874,000 in 1991 to 1,901,000 in 1993.

### Poverty

**1985.** Beginning in 1985 the AHS-N provides housing characteristics for households with income below the poverty level. The AHS-N poverty data are not comparable to poverty data published from the Current Population Survey (CPS). Table H presents the differences.

**Table H. Households in Poverty in AHS and CPS: 1985, 1987, and 1989**

| Year                 | AHS        | CPS        |
|----------------------|------------|------------|
| 1985 .....           | 13,266,000 | 11,996,000 |
| 1987 .....           | 11,969,000 | 11,807,000 |
| 1989 .....           | 12,403,000 | 11,369,000 |
| 1985-87 change ..... | -1,297,000 | -189,000   |
| 1987-89 change ..... | 434,000    | -438,000   |

Compared with the CPS, the AHS-N drop in poverty between 1985 and 1987 seems too large. The 1987 to 1989 AHS-N increase in poverty may be, in part, a compensation for the unrealistic 1985 to 1987 drop.

---

In general, AHS estimates of poverty are higher than the CPS estimates. Research indicates that the AHS-N slightly under reports income when compared with the CPS, thus over reporting poverty. Furthermore, the problem seems to be concentrated among elderly households. A detailed discussion of AHS-N poverty data is presented in the Census Bureau memorandum for the record, "AHS Poverty Data, 1985 to 1989." A detailed discussion of AHS-N income data is presented in the Census Bureau memorandum for the record, "Comparison of the 1989 AHS and CPS Income Reporting." Copies of these memoranda can be obtained by writing to the Housing and Household Economic Statistics Division, Census Bureau, Washington, DC 20233.

We wish to remind analysts that poverty data are published in the AHS-N not as an official count of households in poverty, but to show the housing characteristics of low-income households.

### Questionnaire

**1985.** A new questionnaire was introduced in the 1985 AHS-N. Most of the changes on the questionnaire were made to improve the quality of the data. As a result of these changes, however, several items in the 1985 AHS-N and later are not comparable to similar data for 1973 through 1983. A list of these items follows. A discussion of each item can be found under the topic of the same name.

Items changed on the 1985 questionnaire:

- Units in structure
- Rooms in unit

A number of new items were introduced in the 1985 AHS-N including:

- Square footage of unit
- Units with severe or moderate problems
- Elderly householder
- Mortgage status

**1995.** We made a change in the way the Alterations and Repairs questions were asked so the data would be more complete and consistent with other surveys. Because of the change, data are not comparable with previous surveys. Alterations and Repairs now include questions on:

- Additions to residential structures
- Additions and alterations outside residential structures
- Alterations within residential structures
- Major replacements
- Maintenance, repairs and other work

The questions collected data on:

- Amount spent
- Number of jobs

To learn more about the modifications people make to their homes to accommodate persons with physical limitations, we added a series of questions asking about changes they made to their homes and the disabilities people have. Physical Limitations and Housing Modifications now include data on:

- Physical limitations
- Housing modifications
- Person or equipment aids
- Multistructure modifications
- Number of persons per household reporting limitations.

A new data item was added to the Journey to work section:

- Worked at home last week.

For more detailed definitions, see Appendix A.

### Rooms in Unit

**1985.** The number of households with one or two rooms dropped from 3,215,000 in 1983 to 1,937,000 in 1985. As a result, the median number of rooms per unit increased from 5.2 to 5.3. This does not necessarily indicate an increase in the average size of housing units. In the 1983 AHS-N, respondents answered a single question asking for a total count of rooms in the unit. The potential to miss specific rooms is high in a question of this type. In the 1985 AHS-N, respondents were asked for a count of each specific type of room. The answers to these questions are then added together in the tabulations to provide a total count of rooms. Far fewer rooms are missed in this series of questions, which has apparently resulted in lower counts of one- and two-room units. It is also possible, however, that a few rooms may be double counted. For example, a living room may also have been counted as a family room for a count of two rooms when only one room actually exists.

### Sample

**1985.** A new sample was chosen for the AHS-N in 1985. In 1973 through 1983, a sample of housing units was selected from the 1970 census and updated to include units constructed since 1970. In 1985, a new sample was chosen from the 1980 census and updated to include units constructed since 1980. To the degree that the coverage of housing units is different between the 1970 and the 1980 censuses, comparisons of the results of the 1973 through 1983 surveys with the results of the 1985 and later surveys may be affected.

### Severe and Moderate Problems

**1985, 1987, and 1989.** The data concerning units with severe and moderate problems in 1989 and later are not entirely comparable with similar data published in 1985 and 1987. Units lacking complete plumbing facilities are

included in the count of units with severe physical problems. (Data on plumbing facilities in 1985 and 1987 were deficient because of the design of the questionnaire. As a result, the number of units with severe problems was underestimated in 1985 and 1987, and the number of units with moderate problems was overestimated. These deficiencies were corrected in the 1989 questionnaire. For additional discussion, see the topic "Plumbing Facilities" in the Appendix C of the *American Housing Survey for the United States in 1993*, series H150/93.

**1993.** See the discussion under the topic "Plumbing Facilities."

### Telephone Interviewing

**1981.** Beginning in 1981, decentralized telephone interviewing was conducted for a sample of units that were in sample during the previous enumeration. As a result of analysis conducted in both 1981 and 1983, it was concluded that data collected, using the decentralized telephone interviewing procedures, were not sufficiently different from data collected by regular personal interviews to preclude basing published data on both telephone and personal interview data. Also see the discussion under the topics "Computer Assisted Telephone Interviewing."

### Units in Structure

**1985.** In 1973 through 1983, data on units in structure were based on the respondent's answer to one question, "How many living quarters, both occupied and vacant, are there in this house (building)?" In 1985 and later, data on units in structure are based on the respondent's answers to a series of questions (see item 20 through 23 of the questionnaire in Appendix E). The method of collecting units-in-structure data was revised in 1985 as previous AHS experience has shown the concept to be difficult for respondents. Respondents particularly had difficulty distinguishing between single-family attached and units in multiunit structures. Table I shows the change in the occupied inventory by units in structure between the 1983 and 1985 AHS using the published data.

Table I. **Change in the Occupied Housing Inventory by Units in Structure: 1983-85**

| Units in structure               | 1983       | 1985       | 1983-85 change |
|----------------------------------|------------|------------|----------------|
| Single-family detached . . . . . | 53,544,000 | 55,076,000 | 1,532,000      |
| Single-family attached . . . . . | 4,109,000  | 4,102,000  | -7,000         |
| 2-or-more units in structure . . | 22,985,000 | 24,492,000 | 1,507,000      |

It is estimated that the 1983 AHS-N overestimated single-family detached by 118,000 and single-family attached by 641,000 units. The 1983 AHS-N underestimated units in multiunit structures by approximately

788,000. Table H provides more reasonable (revised) levels of 1983 to 1985 growth by adding (1983 overestimates) and subtracting (1983 underestimates) to the 1983-85 change shown in Table J.

Table J. **Revised Change in the Occupied Housing Inventory by Units in Structure: 1983-85**

| Units in structure               | 1983-85 change | Add 1983 over-estimate | Subtract 1983 under-estimate | 1983-85 revised change |
|----------------------------------|----------------|------------------------|------------------------------|------------------------|
| Single-family detached . . . . . | 1,532,000      | 118,000                | -                            | 1,650,000              |
| Single-family attached . . . . . | -7,000         | 641,000                | -                            | 634,000                |
| 2-or-more units in structure . . | 1,507,000      | -                      | 788,000                      | 719,000                |

### Weighting

**1981.** The independent household estimates (control totals) used in the weighting of data in the 1981 and 1983 AHS-N are Current Population Survey (CPS) estimates derived from the 1980 census. The CPS independent household estimates used in the weighting of data in the 1973 through 1980 Annual Housing Surveys were derived from the 1970 census. The 1980-based estimates are about 2 percent larger than the 1970-based estimates. This 2 percent effect was equally distributed among all types of units. Therefore, percentages and medians calculated during the 1973 through 1980 time period should be comparable to similar data calculated in 1981 and 1983.

**1985.** In 1985, the 1980 census count of occupied units was adjusted for undercount and projected to 1985 using the 1980 to 1985 Current Population Survey's (CPS) rate of change. The 1985 AHS-N was then ratio-estimated to this number. In 1983 and earlier years, the AHS-N was ratio-estimated directly into CPS estimates. The procedure used in 1985 resulted in 200,000 additional occupied units that would not have been estimated if the 1983 procedures had been employed in 1985.

Also in 1985, all vacant units were adjusted for undercount for the first time. This resulted in the addition of 400,000 vacant units (98,000 seasonal units and 302,000 year-round vacants) to the housing inventory.

**1991.** Beginning with 1991, the independent estimates (control totals) used in weighting the data (occupied and vacant independent estimates) are based on the 1990 census, plus change since then. The 1990-based weighting produces, on average, numbers that are about 2.5 percent lower than 1980-based weighting. This effect is not equally distributed among all types of units. Table K shows the effects of the weighting change by region for the year 1991.

**Table K. Difference Between 1980- and 1990-Based Weighting as a Percent of 1980-Based: 1991 and 1993**

| Type of unit                  | United States | North-east | Mid-west | South | West |
|-------------------------------|---------------|------------|----------|-------|------|
| 1991                          |               |            |          |       |      |
| Occupied . . . . .            | 2.4           | 3.5        | 2.7      | 2.0   | 1.7  |
| Built 1980 or later . . . . . | 0.1           | 0.0        | 0.1      | 0.1   | 0.1  |
| Built before 1980 . . . . .   | 2.9           | 3.9        | 3.1      | 2.6   | 2.2  |

Table L presents counts of occupied homes using 1990-based weighting. This weighting is consistent with the weighting used to produce the 1991 and later detailed tables in Chapters 1 through 10 of the series H150 books. These data should be used when measuring the change in the size of the occupied inventory over time. These data provide the most accurate count of the total number of occupied homes for the years 1985, 1987, and 1989.

**Table L. Occupied Housing Units Using 1990-Based Weighting: 1985, 1987, and 1989**

[Numbers in thousands]

| Characteristics           | 1985   |        | 1987   |        | 1989   |        |
|---------------------------|--------|--------|--------|--------|--------|--------|
|                           | Owner  | Renter | Owner  | Renter | Owner  | Renter |
| United States . . . . .   | 54,394 | 31,279 | 56,649 | 31,885 | 58,193 | 32,809 |
| Northeast . . . . .       | 10,922 | 7,106  | 11,418 | 7,089  | 11,660 | 7,011  |
| Midwest . . . . .         | 14,226 | 7,242  | 14,696 | 7,133  | 15,122 | 7,234  |
| South . . . . .           | 19,217 | 9,876  | 19,985 | 10,190 | 20,627 | 10,694 |
| West . . . . .            | 10,030 | 7,056  | 10,550 | 7,472  | 10,784 | 7,870  |
| Race                      |        |        |        |        |        |        |
| White and other . . . . . | 50,222 | 25,866 | 52,323 | 26,253 | 53,772 | 26,924 |
| Black . . . . .           | 4,172  | 5,413  | 4,326  | 5,632  | 4,420  | 5,885  |

# Appendix D. Errors

All numbers in this book are estimates. As in other surveys, errors come primarily from wrong answers, incomplete data, and sampling.

## **NONSAMPLING ERRORS**

Nonsampling errors are usually the largest source of errors, larger than sampling errors. For example the changes in weighting in 1981 and 1991 (see appendix C) corrected some of the error due to incomplete data. Just that one correction averaged 2.5 percent in 1991. Worse errors from wrong answers and from incomplete data apply to some items, discussed in the next paragraphs.

**Wrong or inconsistent answers.** Wrong answers happen because people misunderstand questions, cannot recall the correct answer, or do not want to give the right answer. Table P shows which items have been measured for inconsistency when people are reinterviewed after a few weeks. The actual survey cannot catch and reconcile these inconsistencies, so a high rate of wrong answers remains for some items. The Census Bureau categorizes these levels of inconsistency into three ranges:

1. Less than 20 is considered a low level of inconsistency.
2. Between 20 and 50 is considered a moderate level of inconsistency.
3. Greater than 50 is considered a high level of inconsistency indicating that responses are not reliable.

Not all questions have been checked for inconsistencies. The ones checked were the questions where inconsistencies seemed likely. Questions measuring opinions were likely to have high inconsistencies.

The numbers in Table P are percents. They are nearly the same as: 100 minus the correlation between answers in the original interview and the reinterview. For example, an inconsistency of 20 means a correlation of 80 percent, which is good. This is the correlation between answers to the same question, usually from the same respondents, a month apart. Wrong answers make results wrong and mean that data on groups (e.g., income groups) are infected with data from people who really are not like the group at all. Readers should be wary of drawing firm conclusions from items with high inconsistency.

**Table M. Undercoverage Units**

| Type of unit                                    | Reason for undercoverage  |
|---|---|
| Mobile homes . . . . .                          | Poor coverage of new mobile home parks in address enumeration districts   |
| Conventional new construction . . . . .         | Permits issued fewer than 6 months before interviewing are not considered   |
| New construction in special places . . . . .    | Not covered in either permit or nonpermit areas   |
| Whole structure additions . . . . .             | These units are chosen with the aid of screening questions. Eligible units could be missed and ineligible units included because of incorrect answers to the screening questions. |
| Conversions from nonresidential units . . . . . | Nonresidential units at the time of the 1980 census, which converted to residential units were missed.  |

**Coverage errors.** Each home in the AHS-N sample represents a large number of other homes. However, because of incomplete sampling lists (i.e., undercoverage) the homes in the survey do not represent all homes in the country. Therefore, the raw numbers from the survey are raised proportionally so that the numbers published here match independent estimates of the total number of homes. These independent estimates are based on the 1990 Census of Housing, plus an accounting of changes since then. Housing unit undercoverage is about 2.3 percent. Table M lists units that have known coverage deficiencies.

**Incomplete data.** Incomplete data happen because sampling lists are incomplete, and because people refuse the interview or some of the questions, or do not know answers. Table Q (at the end of this appendix) shows which items have the least complete data. These are primarily items that people forget or consider personal: mortgages, other housing costs, and income. The computer may assign or “impute” values for these items according to rules developed by subject matter specialists. We do not know how close the imputed values are to the actual values. Incompleteness can cause large errors, since when even 10 percent of homes are missed by a particular question, they represent about 10 million homes which have to be estimated, on little or no basis (there are about 100 million homes in the U.S.). The survey estimates them by assuming that they are like some group of homes that did

give data, an assumption that is never exactly true. Thus, it is not surprising that large biases, as shown in Table R, are possible when the survey has data for only 50 to 90 percent of homes for particular items. Again readers should be wary of items with highly incomplete data.<sup>1</sup>

**Effect on income.** The nonsampling errors interact particularly badly for income. Income questions are inconsistently answered (Table P), incompletely answered (Table Q), and the totals fall short of totals known from the National Income Accounts, especially for the elderly.<sup>2</sup>

### SAMPLING ERRORS

**Definition.** Error from sampling reflects how estimates from a sample vary from the actual value. (Note: “actual value” means the value that would appear if all housing units had been interviewed, under the same conditions, rather than only a sample. A confidence interval is a range which contains the actual estimate with a specified probability.)

**Counts.** Most numbers in this book are counts of housing units (e.g., units with basements or units with an elderly person). These counts have error from sampling. Table N gives a convenient list of errors for a range of numbers. These errors are an overestimate for most items. To get a more accurate answer, use the appropriate formula shown in Table S or T (at the end of this appendix). As with the other types of errors, readers should be wary of numbers with large errors from sampling.

The error from sampling cannot be known exactly. We approximate it using the following formula for constructing a 90-percent confidence interval:

$$1.64 \times \sqrt{3.12 \times A - .000029 \times A^2}$$

where A is a number (a count of units) in this book.

This formula is an overestimate for most items. To get a more accurate estimate, use the appropriate formula in table S or T.

For example if A is 200:

$$1.64 \times \sqrt{3.12 \times 200 - .000029 \times 200 \times 200} = 41$$

<sup>1</sup>Statistical note: The November 1990 paper, *How Response Error, Missing Data and Undercoverage Bias Survey Data*, estimates that 90 percent of errors from incomplete data are less than:  $200 + .58 \times (\text{lesser of } A \text{ or } 100,000 - A)$ , where A is any count published in this book (in thousands, result also in thousands). Weights are adjusted to reduce these errors, but it is not known how much error remains. *How Response Error, Missing Data and Undercoverage Bias Survey Data*, order number HUD-6458, is available from HUD User at the address in the “Explanations and Cautions” section at the front of this book.

<sup>2</sup>Data are in the *Codebook for the American Housing Survey*, available from HUD User at the address in the “Explanations and Cautions” section at the front of this book.

Table N. **Errors From Sampling to Compute a 90-Percent Confidence Interval**

| When this book lists one of the following numbers— | The chances are 90 percent that the actual value is inside the range of plus or minus— |
|--|--|
| 0  | 5  |
| 10   | 9  |
| 100  | 29   |
| 500  | 65   |
| 1,000  | 91   |
| 2,500  | 143  |
| 5,000  | 200  |
| 10,000   | 276  |
| 25,000   | 401  |
| 50,000   | 474  |
| 75,000   | 437  |
| 90,000   | 351  |
| 109,456  | 99   |

Source: These errors were computed based on a formula in Table S or T with high error. This table represents a conservative example. The numbers are in thousands.

The 90-percent confidence interval can then be formed by adding and subtracting this error to the survey estimate of 200 (i.e.,  $200 \pm 41$ ). Statements such as “the actual value is in the range  $200 \pm 41$  (159 to 241),” are right 90 percent of the time and wrong 10 percent of the time.<sup>3</sup>

Numbers in the book are printed in thousands, so 200 means 200,000. The formulas are designed to use numbers directly from the book; do not add zeros. The result is also in thousands, so 50 means 50,000.

**Percents.** Any subgroup can be shown as a percent of a larger group. The error from sampling for a 90-percent confidence interval for this percent is:

$$1.64 \times \sqrt{3.12 P (100 - P) / A}$$

where P is the percent; A is the denominator, or base of the percent.<sup>4</sup>

This formula is an overestimate for most items. To get a more accurate estimate, replace the first number under the square root sign with the first number under the square root sign of the appropriate formula in table S or T.

For example, the error from sampling for a 90-percent confidence interval for 40 percent of 200 (meaning 200,000) is:

$$1.64 \times \sqrt{3.12 \times 40 \times 60 / 200} = 10.0$$

Statements such as “the actual percent is in the range 30.0 percent to 50.0 percent” are right 90 percent of the time. This formula is an overestimate for most items. To

<sup>3</sup>The formula in the text is based on 1.64 times the error from sampling. This formula gives “90-percent confidence interval errors.” For 95-percent confidence interval errors multiply by 1.96 instead of 1.64; for 99-percent confidence multiply by 2.58 instead of 1.64.

<sup>4</sup>This formula is actually  $1.64 \times \sqrt{(p(100-p)/n)}$ , since  $3.12/A$  adjusts the data to the effective sample size.

get a more accurate estimate, change the first number under the square root sign here, 3.12, to the first number given under the square root sign of the appropriate formula in Table S or T.

Note that when a ratio C/D is computed where C is *not* a subgroup of D (for example, the number of Hispanics as a ratio of the number of Blacks) the error from sampling is different. The error from sampling for a 90-percent confidence interval for a ratio C/D<sup>5</sup> is:

$$(C/D) \sqrt{((\text{error for C}) / C)^2 + ((\text{error for D}) / D)^2}$$

**Medians.** Table O calculates the error from sampling for a 90-percent confidence interval for medians.<sup>6</sup>

<sup>5</sup>The error for C should be interpreted as the error for a 90-percent confidence interval for C. Likewise, the error for D should be interpreted as the error for a 90-percent confidence interval for D.

<sup>6</sup>For small bases, use the more accurate approach in Table 5 in Appendix D of the *American Housing Survey for the United States in 1995*.

<sup>7</sup>The factor 2.0 is a conservative estimate for most items. For a better approximation, find the appropriate formula in Table S or T and divide the first number under the square root sign by 3.12. Take the square root of this answer and multiply by 2.0 to get your factor.

**Differences.** Two numbers from this book, like 34 and 40 or 40 percent and 45 percent have a “statistically significant difference,” if their ranges of error from sampling for a 90-percent confidence interval do not overlap. When ranges of error for a 90-percent confidence interval do overlap, numbers are still statistically different if the result of subtracting one from the other is more than<sup>8</sup>:

<sup>8</sup>Error for first number should be interpreted as the error for a 90-percent confidence interval for the first number. Likewise, error for second number should be interpreted as the error for a 90-percent confidence interval for the second number.

**Table O. Calculating the Error From Sampling for a 90-Percent Interval for Medians**

| Steps for calculations   | The formula   | An example   | Your data |
|--|---|--|-----------|
| How many total units is the median based on (in thousands, exclude “not reported” and “don’t know”)? | A   | 200  | _____     |
| What are the end-points of the category the median is in?  | X - Y   | \$50-74  | _____     |
| What is the width of this category (in dollars, rooms, or whatever the item measures)?               | W   | \$25   | _____     |
| How many housing units are in this median category (in thousands)?                                   | B   | 30   | _____     |
| Then the error from sampling for the median is approximately: <sup>7</sup>                           | $\frac{2.0 \times W \times \sqrt{A}}{B}$            | $\frac{2.0 \times 25 \times \sqrt{200}}{30}$<br>= 24 | _____     |
| The 90-percent confidence interval for the median is:  | median $\pm \frac{2.0 \times W \times \sqrt{A}}{B}$ | median $\pm$ \$24                                    | _____     |

---

$$\sqrt{(\text{error for 1st number})^2 + (\text{error for 2nd number})^2}$$

For example, if the first number is 34 with an error of 17 and the second number is 40 with an error of 18, then the 90-percent confidence interval error for this difference of 1 is:

$$\sqrt{17^2 + 18^2} = 25$$

Since the difference is less than this error, these two numbers are not statistically different.

**Table P. Different Answers a Month Apart**

| Item   | When measured <sup>1</sup> | Level of inconsistency | Confidence interval <sup>2</sup> |
|--|----------------------------|------------------------|----------------------------------|
| Other kinds of heating equipment (central warm-air) . . . . .              | 89-MS                      | 91                     | [73-100]                         |
| Mortgage payment include anything else (first mortgage) . . . . .          | 90-MS                      | 90                     | [72-111]                         |
| Water came in from other places . . . . .                                  | 89-MS                      | 81                     | [64-100]                         |
| Moved for other, financial/employment . . . . .                            | 85-MS                      | 80                     | (62-104)                         |
| Moved for other, housing related . . . . .                                 | 85-MS                      | 79                     | (65-97)                          |
| Police protection problem in neighborhood . . . . .                        | 89-MS                      | 78                     | [63-95]                          |
| Poor city/county service in neighborhood . . . . .                         | 89-MS                      | 78                     | [63-95]                          |
| Moved for other reason . . . . .   | 85-MS                      | 73                     | (64-85)                          |
| Moved for better quality house . . . . .                                   | 85-MS                      | 69                     | (58-82)                          |
| Moved because other family/personal related . . . . .                      | 85-MS                      | 68                     | (54-86)                          |
| Cost for water supply and sewage disposal . . . . .                        | 81-N                       | 68                     | (61-76)                          |
| Other problem in neighborhood . . . . .                                    | 89-MS                      | 67                     | [61-74]                          |
| Undesirable industries/businesses in neighborhood . . . . .                | 89-MS                      | 66                     | [54-82]                          |
| Rats . . . . .   | 89-MS                      | 65                     | [54-69]                          |
| Noise in neighborhood . . . . .  | 89-MS                      | 64                     | [57-72]                          |
| Other kinds of heating equipment (none) . . . . .                          | 89-MS                      | 63                     | [60-67]                          |
| Peeling paint on the ceiling . . . . .                                     | 81-N                       | 63                     | (49-80)                          |
| Other kinds of heating equipment (unvented room) . . . . .                 | 89-MS                      | 62                     | [45-86]                          |
| How LIKELY to move to place prefer to live in 5 years . . . . .            | 85-MS                      | 62                     | (54-71)                          |
| How LIKELY to still be living in this unit in 5 years . . . . .            | 85-MS                      | 60                     | (49-74)                          |
| Gross income . . . . .   | 82-MS                      | 59                     | not available                    |
| Open cracks or holes in building . . . . .                                 | 81-N                       | 58                     | (47-72)                          |
| Electric fuses or breaker switches blown . . . . .                         | 81-N                       | 58                     | (50-68)                          |
| Other major repairs over \$500 each—repair done . . . . .                  | 85-MS                      | 57                     | (50-64)                          |
| People in neighborhood . . . . .   | 89-MS                      | 57                     | [52-62]                          |
| Central air conditioning/dehumidifier . . . . .                            | 80-N                       | 56                     | not available                    |
| Satisfactory police protection . . . . .                                   | 77-N                       | 55                     | (49-62)                          |
| Moved for lower rent or less expensive house to maintain . . . . .         | 85-MS                      | 55                     | (43-70)                          |
| Broken plaster or peeling paint . . . . .                                  | 89-MS                      | 55                     | [46-65]                          |
| Water came in from walls, doors, windows . . . . .                         | 89-MS                      | 55                     | [45-67]                          |
| A working electric wall outlet . . . . .                                   | 77-N                       | 55                     | (42-71)                          |
| Other kinds of heating equipment (fireplace with no insert) . . . . .      | 89-MS                      | 54                     | [49-59]                          |
| Shopping . . . . .   | 77-N                       | 54                     | (47-61)                          |
| Broken plaster on the ceiling . . . . .                                    | 81-N                       | 53                     | (40-70)                          |
| Water came in from roof . . . . .  | 89-MS                      | 53                     | [46-60]                          |
| Payments the same during whole length of the mortgage . . . . .            | 85-MS                      | 52                     | (46-59)                          |
| Litter in neighborhood . . . . .   | 89-MS                      | 51                     | [44-60]                          |
| Main reason moved . . . . .  | 85-MS                      | 51                     | (47-55)                          |

| Clothes washer   | 85-N                       | 8                      | (6-9)                            |
| Number of units in building  | 85-N                       | 8                      | (6-9)                            |
| Number of bedrooms   | 85-N                       | 7                      | (6-8)                            |
| Number of full bathrooms   | 85-N                       | 6                      | (5-8)                            |
| Dishwasher   | 85-N                       | 6                      | (5-7)                            |
| Cooking fuel   | 85-N                       | 5                      | (4-6)                            |
| Clothes dryer  | 85-N                       | 5                      | (4-7)                            |
| Number of apartments   | 85-N                       | 5                      | (4-8)                            |
| Garbage disposal   | 85-N                       | 5                      | (4-7)                            |
| Central air conditioning   | 85-N                       | 5                      | (4-6)                            |

<sup>1</sup>This notation consists of the year followed by the survey from which the item was measured. For example, 89-MS means that the item was measured during the 1989 AHS-Metropolitan Survey (MS) and 81-N means that the item was measured during the 1981 AHS-National (N) Survey.

<sup>2</sup>The confidence intervals enclosed by square brackets are at the 90-percent significance level, all others are at the 95-percent significance level. The confidence intervals for the years prior to 1989 have a significance level of 95 percent, since that time it has been the policy of the U.S. Census Bureau to publish a 90-percent significance level for all testing.

**Table Q. Completeness Rates for Characteristics**

[See completeness rates under nonsampling errors in appendix D for further details. ... means not applicable or sample too small. - means zero or rounds to zero]

|    | Characteristics   | Total occupied units | Tenure |        | Housing unit characteristics |              |                   |          | Household characteristics |          |               |                    |                     |

<sup>1</sup>Completeness of sampling lists: A small part of the total HU's in the U.S. is not represented in the AHS sample. This undercoverage occurs from imperfections in the sampling frame. We use weighting adjustments to account for these units. There are two main sources of undercoverage: (1) Deficiencies in sampling lists used for AHS (e.g., 1980 census or permit lists), and (2) Errors in the field resulting in completely overlooking certain HU's that belong in sample. The rate represents the proportion of HU's in the U.S. that are covered by the AHS sample frames.

<sup>2</sup>All interviews: A type A noninterview results when the interviewer is unable to obtain the necessary information to complete an interview from an occupied unit. We adjust the weights of interviewed units which most closely resemble type A noninterviews to help reduce the bias from these cases. The interview rate reflects the completeness of the sampling lists as well as the type A noninterviews.

<sup>3</sup>Compared to the 1991 publication, we switched rows 2 and 3. Type A noninterview rate (line 2 in 1991) is titled "All interviews" (line 3 in 1993). Undercoverage rate (line 3 in 1991) is titled "Completeness of sampling lists (percent)" (line 2 in 1993).

| 250 .....            | 135                    |
| 500 .....            | 144                    |
| 1,000 .....          | 162                    |
| 2,500 .....          | 216                    |
| 5,000 .....          | 307                    |
| 10,000 .....         | 489                    |
| 15,000 .....         | 670                    |
| 25,000 .....         | 1,033                  |
| 40,000 .....         | 1,578                  |
| 50,000 .....         | 1,941                  |
| 75,000 .....         | 1,200                  |
| 90,000 .....         | 655                    |
| 100,000 .....        | 292                    |
| 109,456 .....        | 126                    |

**Error Formulas From Sampling to Compute a 90-Percent Confidence Interval**

The letter “A” in the formulas in Tables S and T represents a number (a count of units) in this book (see page D-2 for an example of how “A” is used).

Use the formulas in Table T for items pertaining to workers.

**Table S. Error Formulas From Sampling to Compute a 90-Percent Confidence Interval for Items Not Listed in Table T**

| Characteristics  | Error formulas   |
|--|--|
| U.S., Elderly, Urban, Hispanic, Mobile homes, MSA-suburb, New construction, Central city, Black, Vacants ..... | $1.64 \times \sqrt{2.48 \times A - 0.000023 \times A^2}$ |
| Midwest .....  | $1.64 \times \sqrt{2.48 \times A - 0.000095 \times A^2}$ |
| West .....   | $1.64 \times \sqrt{2.48 \times A - 0.000109 \times A^2}$ |
| Northeast .....  | $1.64 \times \sqrt{2.48 \times A - 0.000116 \times A^2}$ |
| Rural, Outside MSA .....   | $1.64 \times \sqrt{3.12 \times A - 0.000029 \times A^2}$ |
| South .....  | $1.64 \times \sqrt{3.12 \times A - 0.000080 \times A^2}$ |

Note: The formulas are based on 1.64 times the error from sampling. These formulas give 90-percent confidence interval errors. For 95-percent confidence interval errors multiply by 1.96 instead of 1.64; for 99-percent confidence interval errors, multiply by 2.58 instead of 1.64.

**Table T. Error Formulas From Sampling to Compute a 90-percent Confidence Interval for Items Pertaining to Workers**

| Characteristics  | Error formulas                     |
|--|------------------------------------|
| U.S., Elderly, Urban, Hispanic, Mobile homes, MSA-suburb, New construction, Central city, Black, Vacants, Midwest, West, Northeast ..... | $1.64 \times \sqrt{2.48 \times A}$ |
| South, Rural, Outside MSA .....  | $1.64 \times \sqrt{3.12 \times A}$ |

Note: The formulas are based on 1.64 times the error from sampling. These formulas give 90-percent confidence interval errors. For 95-percent confidence interval errors, multiply by 1.96 instead of 1.64; for 99-percent confidence interval errors, multiply by 2.58 instead of 1.64.

# Index for Tables and Appendixes

---

**Age of householder:** comparisons 1-1, owners 2-1, renters 3-1, Black 4-1, Hispanic 5-1, elderly 6-1, in central city 7-1, in suburbs 8-1, outside SMSA 9-1, urban 10-1, rural 11-1, definition Appendix A “Age of householder”

**Additions to residential structures:** owners 2-7, Black 4-7, Hispanic 5-7, elderly 6-7, in central city 7-7, in suburbs 8-7, outside SMSA 9-7, definition Appendix A “Additions to residential structures”

**Additions and alterations outside residential structures:** owners 2-8, Black 4-8, Hispanic 5-8, elderly 6-8, in central city 7-8, in suburbs 8-8, outside SMSA 9-8, definition Appendix A “Additions and alterations outside residential structures”

**Alterations within residential structures:** owners 2-9, Black 4-9, Hispanic 5-9, elderly 6-9, in central city 7-9, in suburbs 8-9, outside SMSA 9-9, definition Appendix A “Alterations within residential structures”

**Amount spent:** owners 2-7, 2-8, 2-9, 2-10, 2-11, Black 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-7, 6-8, 6-9, 6-10, 6-11, in central city 7-7, 7-8, 7-9, 7-10, 7-11, in suburbs 8-7, 8-8, 8-9, 8-10, 8-11, outside SMSA 9-7, 9-8, 9-9, 9-10, 9-11, definition Appendix A “Amount spent”

**Area definition:** definition see Appendix A “Area definitions”

**Bedrooms:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Bedrooms”

**Central cities:** comparisons 1-4, 1-5, 1-6, 1-12, owners 2-4, 2-5, 2-6, 2-7, 2-8, 2-9, 2-10, 2-11, 2-12, renters 3-4, 3-5, 3-12, Black 4-5, 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-4, 6-5, 6-7, 6-8, 6-9, 6-10, 6-11, 6-12, in central city 7-1, 7-2, 7-3, 7-4, 7-5, 7-7, 7-8, 7-9, 7-10, 7-11, definition Appendix A “Central cities”

**Comparability with 1990 Census of Population and Housing Data:** see Appendix A “Comparability with 1990 Census Population and Housing Data”

**Comparability with current construction reports from the Survey of Construction:** see Appendix A “Comparability with current construction reports from the survey of construction”

**Complete bathrooms:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Complete bathrooms”

**Consolidated metropolitan statistical area:** see Appendix A “Consolidated metropolitan statistical area”

**Cooperatives and condominiums:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Cooperatives and condominiums”

**Current income:** comparisons 1-2, owners 2-2, renters 3-2, Black 4-2, Hispanic 5-2, elderly 6-2, in central city 7-2, in suburbs 8-2, outside SMSA 9-2, urban 10-2, rural 11-2, definition Appendix A “Current income”

**Elevator on floor:** comparisons 1-12, 1-13, 1-14, 1-15, 1-16, owners 2-12, 2-13, 2-14, 2-15, 2-16, 2-17, renters 3-12, 3-13, 3-14, 3-15, 3-16, 3-17, elderly 6-12, 6-13, 6-14, 6-15, 6-16, definition Appendix A “Elevator on floor”

**Family households:** comparisons 1-1, 1-2, 1-3, 1-4, 1-14, owners 2-1, 2-14, renters 3-4, 3-14, Black 4-4, Hispanic 5-4, elderly 6-4, 6-14, in central city 7-4, in suburbs 8-4, outside SMSA 9-4, urban 10-4, rural 11-4, definition Appendix A “Family households,” Appendix C “Married-couple families”

**Farm-nonfarm residence:** comparisons 1-4, 1-5, 1-6, 1-12, owners 2-4, 2-5, 2-6, 2-7, 2-8, 2-9, 2-10, 2-11, 2-12, renters 3-4, 3-5, 3-12, Black 4-5, 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-4, 6-5, 6-7, 6-8, 6-9, 6-10, 6-11, 6-12, definition Appendix A “Farm-non farm residence”

**Financial characteristics:** comparisons 1-2, owners 2-2, renters 3-2, Black 4-2, Hispanic 5-2, elderly 6-2, in central city 7-2, in suburbs 8-2, outside SMSA 9-2, urban 10-2, rural 11-2, definition Appendix A “Financial characteristics”

**Floors in home:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Floors in home”

**Flush toilet and flush toilet breakdowns:** comparisons 1-3, owners 2-3, renters 3-3, Black 4-3, Hispanic 5-3, elderly 6-3, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Flush toilet and flush toilet breakdowns”

**Heating problems:** comparisons 1-3, owners 2-3, renters 3-3, Black 4-3, Hispanic 5-3, elderly 6-3, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Heating problems”

**Hispanic:** comparisons 5-1, owners 5-2, renters 5-3, in central city 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, in suburbs 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, outside SMSA 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, urban 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, rural 5-1, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, definition Appendix A “Hispanic”

**Household:** definition see Appendix A “Household”

**Household composition by age of householder:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Household composition by age of householder”

**Householder:** definition see Appendix A “Householder,” Appendix C “Head of household/householder”

**Householder who worked last week:** comparisons 1-5, owners 2-5, renters 3-5, Black 4-5, Hispanic 5-5, elderly 6-5, in central city 7-5, in suburbs 8-5, outside SMSA 9-5, urban 10-5, rural 11-5, definition Appendix A “Householder who worked last week”

**Housing modifications:** comparisons 1-12, 1-13, 1-15, 1-16, 1-17, owners 2-12, 2-13, 2-15, 2-16, 2-17, renters 3-12, 3-13, 3-15, 3-16, 3-17, elderly 6-12, 6-13, 6-15, 6-16, 6-17, definition Appendix A “Housing modifications”

**Housing units:** definition see Appendix A “Housing units”

**Income:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendixes A and C “Income”

**Investment properties:** comparisons 1-6, owners 2-6, definition Appendix A “Investment properties”

**Journey to work:** comparisons 1-5, owners 2-5, renters 3-5, Black 4-5, Hispanic 5-5, elderly 6-5, in central city 7-5, in suburbs 8-5, outside SMSA 9-5, urban 10-5, rural 11-5, definition Appendix A “Journey to work”

**Living quarters:** definition see Appendix A “Living quarters”

**Location of property:** comparisons 1-6, owners 2-6, definition Appendix A “Location of Property”

**Maintenance, repairs, and other work:** owners 2-11, Black 4-11, Hispanic 5-11, elderly 6-11, in central city 7-11, in suburbs 8-11, outside SMSA 9-11, definition Appendix A “Maintenance repairs and other work”

**Major replacements:** owners 2-10, Black 4-10, Hispanic 5-10, elderly 6-10, in central city 7-10, in suburbs 8-10, outside SMSA 9-10, definition Appendix A “Major replacements”

**Median monthly housing cost for owners:** comparisons 1-2, 1-14, owners 2-2, 2-14, renters 3-2, 3-14, Black 4-2, Hispanic 5-2, elderly 6-2, 6-14, in central city 7-2, in suburbs 8-2, outside SMSA 9-2, urban 10-2, rural 11-2, definition Appendix A “Median monthly housing cost for owners”

**Medians:** definition see Appendix A “Medians”

**Metropolitan statistical areas:** definition see Appendix A “Metropolitan statistical areas”

**Monthly housing costs:** comparisons 1-2, 1-14, owners 2-2, 2-14, renters 3-2, 3-14, Black 4-2, Hispanic 5-2, elderly 6-2, 6-14, in central city 7-2, in suburbs 8-2, outside SMSA 9-2, urban 10-2, rural 11-2, definition Appendixes A and C “Monthly housing cost”

**Monthly housing costs as percent of current income:** comparisons 1-2, 1-14, owners 2-2, 2-14, renters 3-2, 3-14, Black 4-2, Hispanic 5-2, elderly 6-2, 6-14, in central city 7-2, in suburbs 8-2, outside SMSA 9-2, urban 10-2, rural 11-2, definition Appendix A “Monthly housing cost as percent of current income,” Appendix C “Monthly housing costs as percent of income”

**Mortgage status on property:** comparisons 1-6, owners 2-6, definition Appendix A “Mortgage status on property”

**Multistrucre modifications:** comparisons 1-12, owners 2-12, renters 3-12, elderly 6-12, definition Appendix A “Multi structure modifications”

**Neighborhood conditions and neighborhood services:** comparisons 1-3, 1-14, owners 2-3, 2-14, renters 3-3, 3-14, Black 4-3, Hispanic 5-3, elderly 6-3, 6-14, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Neighborhood conditions and neighborhood services”

**New Construction:** comparisons 1-4, 1-5, 1-6, 1-12, owners 2-4, 2-5, 2-6, 2-12, renters 3-4, 3-5, 3-12, Black 4-4, 4-5, 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-4, 6-15, 6-7, 6-8, 6-9, 6-10, 6-11, 6-12, in central city 7-4, 7-5, 7-7, 7-8, 7-9, 7-10, 7-11, in suburbs 8-4, 8-5, 8-7, 8-8, 8-9, 8-10, 8-11, outside SMSA 9-4, 9-5, 9-7, 9-8, 9-9, 9-10, 9-11, urban 10-4, 10-5, rural 11-4, 11-5, definition Appendixes A and B “New Construction”

**Nights spent at vacation unit:** comparisons 1-6, owners 2-6, definition Appendix A “Nights spent at vacation unit”

**Nights unit rented:** comparisons 1-6, owners 2-6, definition Appendix A “Nights unit rented”

**Nonfamily households:** definition see Appendix A “Non family households”

**Number of jobs:** owners 2-10, Black 4-10, Hispanic 5-10, elderly 6-10, in central city 7-10, in suburbs 8-10, outside SMSA 9-10, definition Appendix A “Number of jobs”

**Number of persons per household reporting limitations:** comparisons 1-12, owners 2-12, renters 3-12, elderly 6-12, definition Appendix A “Number of persons per household reporting limitations”

**Occupied housing units:** definition see Appendix A “Occupied housing units”

**Other nonfamily households:** definition see Appendix A “Other nonfamily households”

**Overall opinion of neighborhood:** comparisons 1-3, 1-14, owners 2-3, 2-14, renters 3-3, 3-14, Black 4-3, Hispanic 5-3, elderly 6-3, 6-14, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Overall opinion of neighborhood”

**Overall opinion of structure:** comparisons 1-3, 1-14, owners 2-3, 2-14, renters 3-3, 3-14, Black 4-3, Hispanic 5-3, elderly 6-3, 6-14, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Overall opinion of structure”

**Person or equipment aids:** comparisons 1-12, 1-13, 1-16, owners 2-12, 2-13, 2-16, 2-17, renters 3-12, 3-16, elderly 6-12, 6-16, definition Appendix A “Person or equipment aids”

**Person 65 years and over (in the household):** see Elderly comparisons 1-1, 1-14, owners 2-1, 2-14, renters 3-1, 3-14, Black 4-1, Hispanic 5-1, elderly 6-1, 6-14, in central city 7-1, in suburbs 8-1, outside SMSA 9-1, urban 10-1, rural 11-1, definition Appendix A “Elderly”

**Persons** comparisons 1-1, 1-14, owners 2-1, 2-14, renters 3-1, 3-14, Black 4-1, Hispanic 5-1, elderly 6-1, 6-14, in central city 7-1, in suburbs 8-1, outside SMSA 9-1, urban 10-1, rural 11-1, definition Appendix A “Persons”

**Persons per room:** comparisons 1-1, 1-14, owners 2-1, 2-14, renters 3-1, 3-14, Black 4-1, Hispanic 5-1, elderly 6-1, 6-14, in central city 7-1, in suburbs 8-1, outside SMSA 9-1, urban 10-1, rural 11-1, definition Appendix A “Person per room”

**Physical limitations:** comparisons 1-12, 1-13, owners 2-12, 2-13, renters 3-12, 3-13, elderly 6-12, 6-13, definition Appendix A “Physical limitations”

**Physical problems—moderate:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendixes A and B “Physical problems moderate”

**Physical problems—severe:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendixes A and B “Physical problems severe”

**Poverty status:** comparisons 1-4, 1-5, 1-6, 1-12, owners 2-4, 2-5, 2-6, 2-7, 2-8, 2-9, 2-10, 2-11, 2-12, renters 3-4, 3-5, 3-12, Black 4-4, 4-5, 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-4, 6-5, 6-7, 6-8, 6-9, 6-10, 6-11, 6-12, in central city 7-4, 7-5, 7-7, 7-8, 7-9, 7-10, 7-11, in suburbs 8-4, 8-5, 8-7, 8-8, 8-9, 8-10, 8-11, outside SMSA 9-4, 9-5, 9-7, 9-8, 9-9, 9-10, 9-11, urban 10-4, 10-5, rural 11-4, 11-5, definition Appendix A “Poverty status,” Appendix C “Poverty”

**Primary metropolitan statistical areas:** definition see Appendix A “Primary metropolitan statistical areas”

**Purchase price:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Purchase price”

**Race:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Race”

**Reasons for ownership:** comparisons 1-6, owners 2-6, definition Appendix A “Reasons for ownership”

**Regions:** comparisons 1-14 definition Appendix A “Regions”

**Rent reductions:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Rent reductions”

**Rooms:** comparisons 1-1, owners 2-7, 2-9, 2-14, renters 3-1, Blacks 4-1, 4-7, 4-9, Hispanic 5-1, 5-7, 5-9, elderly 6-1, 6-7, 6-9, in central cities 7-1, 7-7, 7-9, outside SMSA 9-1, 9-7, 9-9, urban 10-1, rural 11-1, definition Appendix A “Rooms,” Appendix C “Rooms in unit”

**Selected Amenities:** comparisons 1-3, owners 2-3, renters 3-3, Black 4-3, Hispanic 5-3, elderly 6-3, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Selected Amenities”

**Selected deficiencies:** comparisons 1-3, 1-14, owners 2-3, 2-14, renters 3-3, 3-14, Black 4-3, Hispanic 5-3, elderly 6-3, 6-14, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Selected deficiencies”

**Sewage disposal and sewage disposal breakdowns:** comparisons 1-3, owners 2-3, renters 3-3, Black 4-3, Hispanic 5-3, elderly 6-3, in central city 7-3, in suburbs 8-3, outside SMSA 9-3, urban 10-3, rural 11-3, definition Appendix A “Sewage disposal and sewage disposal breakdowns”

**Shared ownership:** comparisons 1-6, owners 2-6, definition Appendix A “Shared ownership”

---

**65 and older (householders):** comparisons 1-1, 1-2, 1-3, 1-4, 1-5, 1-6, 1-12, owners 2-1, 2-2, 2-3, 2-4, 2-5, 2-6, 2-7, 2-8, 2-9, 2-10, 2-11, 2-12, renters 3-1, 3-2, 3-3, 3-4, 3-5, 3-12, Black 4-1, 4-2, 4-3, 4-4, 4-5, 4-7, 4-8, 4-9, 4-10, 4-11, Hispanic 5-1, 5-2, 5-3, 5-4, 5-5, 5-7, 5-8, 5-9, 5-10, 5-11, elderly 6-1, 6-2, 6-3, 6-4, 6-5, 6-7, 6-8, 6-9, 6-10, 6-11, 6-12, 6-13, 6-14, 6-15, 6-16, 6-17, in central city 7-1, 7-2, 7-3, in suburbs 8-1, 8-2, 8-3, outside SMSA 9-1, 9-2, 9-3, urban 10-1, 10-2, 10-3, rural 11-1, 11-2, 11-3, definition Appendix A “Elderly”

**Square footage of unit:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Square footage of unit”

**Stories between main and apartment entrances:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Stories between main and apartment entrances”

**Stories in structure:** comparisons 1-14, owners 2-14, renters 3-14, elderly 6-14, definition Appendix A “Stories in structure”
