## ACKNOWLEDGMENTS

This report presents data from the American Housing Survey, which was sponsored by the U.S. Department of Housing and Urban Development and conducted by the U.S. Census Bureau. It was prepared primarily under the direction of **Ronald J. Sepanik**, Director, Housing and Demographic Analysis Division, Department of Housing and Urban Development, and **Daniel H. Weinberg**, Chief, Housing and Household Economic Statistics Division, U.S. Census Bureau.

**Ronald J. Sepanik**, assisted by **David A. Vandenbroucke**, was responsible for overseeing the American Housing Survey resultant report on behalf of the Department of Housing and Urban Development.

Within the U.S. Census Bureau, this report was developed in the Housing and Household Economic Statistics Division. It was prepared under the supervision of **Leonard J. Norry**, Assistant Division Chief for Housing Characteristics, by **Jane M. Kneessi**, Chief, American Housing Survey Branch, assisted by **Paul P. Harple**, **William L. Hartnett**, **Mary Lynn Fessler**, **Sandra Lord**, **Georgina Torres**, and **Barbara T. Williams** performed specific activities related to data collection procedures, statistical presentation, organization of the report, and preparation of text materials. **Ethelery A. Johnson**, and **Mary S. Stultz** provided statistical assistance.

Under the direction of **Chester E. Bowie**, Chief, Demographic Surveys Division, **Anne C. Jean**, assisted by **Gemma M. Furno** and **Edward A. Hayes**, coordinated the operational aspects of the American Housing Survey. **Thomas J. Meerholz**, Assistant Division Chief, directed the systems and processing procedures. The computer programming and processing were performed under the supervision of **Thomas L. Blatt**, by **Debra K. P. Knoll**, **Scott W. Raudabaugh**, and **Susan K. Peters**. **Isabelle McCants** provided clerical and keying procedures and scheduling.

The Demographic Statistical Methods Division, under the direction of **Alan R. Tupek**, Chief, performed sampling and reinterview and related activities. **James Hartman** and **Alphonso Mason** developed the sample design, weighting, and computation of sampling variances and standard errors. **Chuck Edwards**, **Richard Frazier**, **Jeffrey Wneck**, **Pat Marks**, and **Kathleen Walsh** (National Processing Center) implemented the sample selection and prepared the sample controls. **Andrea Meier** and **Pamela Donofrio** conducted the reinterview design, procedures, analysis, and programming.

Field Division, under the direction of **Richard Bitzer**, Lead Assistant Division Chief for Surveys, administered the data collection, clerical processing, and data entry activities.

**Benjamin D. Cromer**, **Barbara M. Abbott**, **Gloria Davis**, and **Laurene V. Qualls** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **Michael G. Garland**, Assistant Chief, and **Gary J. Lauffer**, Chief, Publications Services Branch.

## Availability of Data Via Electronic Media

---

In addition to the data shown in this report, users may access a wealth of information based on the American Housing Survey (AHS), by way of the Internet. Through the AHS Web site, data charts are available for users to view the results from the 1993, 1995, 1997, and 1999 AHS National surveys. The AHS Web site also offers users the opportunity to download National microdata between the years 1993-95, by using the Data Extraction System, as well as offering 1997 and 1999 microdata, by using Ferret. A listing of books containing all National and Metropolitan publications dating back to 1993 is available through the Portable Document Format (PDF), within the AHS Web site.

# Major Changes This Year

(For previous years' changes, see Appendix C)

---

Questions on repairs, improvements, and alterations were redesigned to produce data more consistent with other surveys, such as the Consumer Expenditures Survey and the Survey of Residential Improvements and Repairs. Because of the changes, data are not comparable with previous American Housing surveys. New tables include:

- Additions to residential structures
- Additions and alterations outside residential structures
- Alterations within residential structures
- Major replacements
- Maintenance, repairs and other work

Data were collected on:

- Amount spent
- Number of jobs

To learn more about the modifications people make to their homes to accommodate people with physical limitations, a series of questions was added asking about changes made to homes and the disabilities people have. The section on Physical Limitations and Housing Modifications includes data on:

- Physical limitations
- Housing modifications
- Person or equipment aids
- Multistructure modifications
- Number of persons per household reporting limitations.

A new data item was added to the Journey to Work section:

- Worked at home last week.

For more detailed definitions, see Appendix A.

# Explanations and Cautions

## EXPLANATIONS

**Survey authority and confidentiality.** The U.S. Census Bureau conducts the American Housing Survey to obtain up-to-date housing statistics for the Department of Housing and Urban Development (HUD). Title 12, Sections 1701Z-1 and 1701Z-2g of the U.S. Code authorize the Secretary of HUD to collect data from public and private agencies and protect the confidentiality of the data. Title 12, Section 1701Z-10 mandates the collection of the data for the American Housing Survey. The guarantee of confidentiality made to respondents is provided by the U.S. Census Bureau. Title 13, Section 9a, of the U.S. Code provides that all information which would permit identification of individuals will be held in strict confidence. Such information may be seen only by sworn U.S. Census Bureau employees and may be used only for statistical purposes. Section 214 of Title 13 sets penalties for disclosing confidential information. Unauthorized disclosure of individual information by a sworn Census Bureau employee is punishable by a fine of up to \$5,000 or imprisonment of up to 5 years, or both. The U.S. Census Bureau is authorized under Title 31, Section 1535 of the U.S. Code, to perform special work or services for other federal agencies.

**Contents of book.** This book presents supplemental data for occupied housing units by type (apartments, single-family homes, and mobile homes) and family type; age, sex, and race of householders; income; housing and neighborhood quality; housing costs; equipment and fuels; and size of housing units. The book also presents data on journey to work, and additional residential units—both vacation and investment properties (for total-occupied and owner-occupied units). Also featured are data on repairs, improvements, and alterations; physical limitations; and housing modifications.

**Scope of the survey.** The American Housing Survey (AHS) is conducted by field representatives who obtain information from occupants of homes. The 1995 national survey was conducted from August 1995 through February 1996. This national sample of about 55,000 interviews was conducted every other year from 1973, when it started, to 1981, when data collection was changed to every year and the survey was renamed the Annual Housing Survey.

## CAUTIONS

**Sampling and nonsampling errors.** The numbers in this book included sampling error and other causes of error, such as incomplete or wrong answers. Table A shows how big the errors from sampling are. Nonsampling errors can be even bigger.

As an example of how to use table A, suppose this book shows 1,000,000 homes of a certain type. The table shows the range of error is 91,000 homes. This means there are likely to be between 909,000 and 1,091,000 homes of this type. More precision cannot be obtained from this survey.

Appendix D gives more detailed formulas to calculate errors for a wide range of items. Appendix D also gives some estimates of nonsampling errors.

**Undercoverage and nonresponse.** Each home in the AHS sample represents a large number of other homes. Because of incomplete sampling lists (i.e., undercoverage) and nonresponse, the homes in the survey do not represent all homes in the country. Therefore, the raw numbers from the survey are adjusted to match independent estimates of the total number of homes. These independent estimates are based on the 1990 Census of Housing, plus changes since then. Housing unit undercoverage and household nonresponse is about 7 percent. Housing unit undercoverage is about 1.9 percent, based on adjusted counts from the 1990 census.

The weighting procedures used for AHS-N partially correct for the bias due to nonresponse and housing unit undercoverage, but not undercoverage (missed people)

---

within households. The procedures assume the housing units missed by the survey are like those included, which is not entirely accurate. Housing unit undercoverage varies by age, ethnicity, and race of householder and type of household. For some groups, such as Blacks, the undercoverage is at least 9 percent. Some AHS-N estimates are affected by missed persons within sample households. These are persons per room, square feet per person, some household composition items (e.g., persons per household), and income characteristics. We don't know the effect of this within-household undercoverage on these characteristics. Appendix D shows how complete the answers were for each question, before adjustments. Appendix B explains how the numbers were proportionally adjusted.

**Income and poverty.** Historically, the AHS underreports income and overreports poverty when compared with the Current Population Survey (CPS). Both surveys underreport income and overreport poverty when compared with tax returns and national income accounts. The AHS questionnaire identifies fewer sources of income than the CPS. The poverty data in the AHS are not published as an official count of households in poverty, but to show the housing characteristics of low-income households. For a discussion of income and poverty, see appendix C.

A detailed discussion of AHS income data is presented in the Census Bureau memorandum for the record, "Comparison of 1989 AHS and CPS Income Reporting." The

memorandum for the record, "AHS Poverty Data, 1985 to 1993," presents a detailed discussion of AHS poverty data. Copies of both memorandums can be obtained by writing to the Housing and Household Economic Statistics Division (HHES), at the address in Table B.

**Telephone interviewing.** The use of Computer Assisted Telephone Interviewing (CATI) in part of the AHS sample has significant effects on a variety of characteristics. The CATI portion of the sample produces lower estimates for many housing quality problems and higher estimates for some income and cost items. For more discussion of CATI, see appendix B and appendix C.

#### **DATA AVAILABILITY**

The AHS data are presented nationally as well as for major selected metropolitan areas. Table B shows the sources for obtaining AHS data, the products available, and the pricing for each product. Each source or organization offering AHS data sets its own charges, so prices may vary. For the data user whose needs are not met by the book tabulations (printed books), microdata are available on tapes and CD-ROM's so that data can be tabulated in any way desired. Microdata are also available on the Internet. Contact HHES for more details. To protect the confidentiality of the respondents, names, addresses, and places smaller than 100,000 people are not identified. The sample design generally will not support analysis for areas smaller than those shown in the books.

<sup>1</sup>Ask for U.S. Census Bureau series H150 and H151. Depository libraries may order Superintendent of Documents prefix C3.215. Libraries often keep national books in a special catalog and section for U.S. Government documents. Metropolitan reports may be located in the general catalog, since these are not published by the Superintendent of Documents.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>The sum of the estimates for work done by household plus work not done by household will not add to total. See appendix A.

<sup>2</sup>The total number of jobs may be greater than the sum of jobs done/not done by household since the total may also include jobs that are not reported for type of worker.

<sup>1</sup>Figures may not add to totals because more than one category may apply.

<sup>2</sup>Limited to the first three household members reporting a limitation.

<sup>3</sup>Limited to households where at least one person reported a physical limitation.

<sup>4</sup>Data for housing modifications present or needed in multiunit structures may reflect structure modifications as well as unit modifications.

<sup>5</sup>Limited to multiunit structures where at least 1 household member reported a physical limitation.

<sup>1</sup>Figures may not add to totals because more than one category may apply.

<sup>2</sup>Limited to the first three household members reporting a limitation.

<sup>3</sup>Limited to households where at least one person reported a physical limitation.

<sup>4</sup>Data for housing modifications present or needed in multiunit structures may reflect structure modifications as well as unit modifications.

<sup>5</sup>Limited to multiunit structures where at least 1 household member reported a physical limitation.
