

## Memorandum

U.S. Department of Transportation

Federal Railroad Administration

Date: January 10, 2005

Reply to Attn of: G-05-21

Subject: Roadway Worker Protection Technical Bulletin

Other than maintenance of way crafts performing duties

From: Edward W. Pritchard

Director, Office of Safety Assurance and Compliance

To: Regional Administrators

Deputy Regional Administrators

Track Supervisory Specialists

Signal and Train Control Supervisory Specialists

**Operating Practices Supervisory Specialists** 

There is an on-going question with respect to other crafts who may be performing peripheral activities similar to engineering activities. For example, a train crew/hostler cleaning a switch during a train movement or a mechanical employee performing light building maintenance in a shop under blue signal protection.

The definition of a "Roadway Worker" means any employee of a railroad, or of a contractor to a railroad, whose duties include inspection, construction, maintenance or repair of railroad track, bridges, roadway, signal and communication systems, electric traction systems, roadway facilities or roadway maintenance machinery on or near track or with the potential of fouling a track, and flagmen and watchmen/lookouts as defined in this section. The Advisory Committee determined that the term roadway worker was intended to describe employees who are covered and not to describe when this coverage begins and ends. 61 FR 65962.

The question arises whether an individual normally not assigned to conduct roadway worker activities, but occasionally engaging in such duties is subject to the rule. If the work to be performed is included within the definition of roadway worker, the employee performing such work must do so in compliance with the roadway worker regulation.

This bulletin is based on consultation with FRA's Office of Chief Counsel. Anyone desiring a formal legal interpretation on any issues discussed in this bulletin should contact that office.
