Hospitality,
Entertainment
and Tourism
Industries**

American Consulate General, Hong Kong

Stewart J. Ballard
Chief Commercial Consul
American Consulate General
Hong Kong and Macau

June 8, 2005

PREFACE

It gives me great pleasure to present this new publication, “U.S. Products and Services for the Hospitality, Entertainment and Tourism Industries,” to our readers in Hong Kong, Macau, and China.

It is our hope that government officials and business executives will find this publication a useful resource as they consider how to learn more about, and source, innovative, high quality and competitive American products and services for these sectors.

American technology, quality and dependability, such as are highlighted in the offerings of the ninety-seven U.S. companies contained in this publication, can contribute positively and significantly to the development of new tourism, entertainment and hospitality facilities in Hong Kong, Macau and China.

Company Information

We are an international architecture and interior design firm that specializes in hotel projects and residential and office towers. We have done projects all over the world including China, South East Asia, Japan and Europe. We are used to working with local firms as well so cooperation projects work fine with our organization. Our interest in Macau would be to design quality projects for developers or possibly bringing the investment to the table as well as designing it acting as developers. If there are developers there or investors, we can work with those groups to create viable quality projects, with strong ROI potentials.

Job References

We have done over 350 hotel projects worldwide includes:

- 'Westin Tokyo' Japan
- Marriott Nagoya, Japan

Company Information

Hillier was founded by J. Robert Hillier in Princeton in 1966. Currently ranked as one of the largest architecture firms in the United States and recognized as one of the country's best-managed firms, Hillier is today a 320-person firm with a record of completed projects in 41 states and 27 countries outside the United States. These projects have been recognized by more than 250 national, state, and local design awards.

The firm has a representative office in Shanghai and is currently working on the design for projects throughout China. These projects include a 250,000 SM mixed-use project with a 5 star hotel in Chongqing, a 120,000 SM mixed-use retail entertainment district in Suzhou, and a 60,000 SM, 4 star hotel in Suzhou.

The firm has completed numerous hotels throughout the world including the 210,000 SM Star City Hotel and Casino mixed-use development in Sydney, Australia, master plans for Trump Hotel and Casinos in Atlantic City, New Jersey, and the Showboat Hotel and Casino, also in Atlantic City, New Jersey.

HOK International (Asia / Pacific) Limited

Ms. Christine P. Chung, Marketing Manager

24/F Kinwick Center

32 Hollywood Road

Central, Hong Kong

Phone: (852) 2534-0000

Fax: (852) 2534-0099

Email: Christine.chung@hok.com

Website: www.hok.com

Company Information

Founded in 1955 in St. Louis, HOK employs a staff of 1,850 professionals working in 24 offices worldwide. The HOK Hong Kong office was established in 1984 through close working relationships with clients and a proven track record of architectural expertise in Asia. To increase our commitment in Asia, HOK established its Beijing office at the beginning of 2003.

Our diversified practice offers comprehensive design services, including master planning, architecture, interior design and landscape architecture. HOK has successfully delivered projects globally, and has received numerous citations for award-winning designs.

HOK is and has consistently been ranked as one of the top two firms in its field in the world's most respected trade publications. According to *World Architecture* magazine 2004 survey, January 2005: HOK ranks as the largest architectural firm in the U.S. and the second-largest in the world. According to *Interior Design* magazine Best of 2005 Survey, January 2005: HOK ranks as the second-largest interior design firm. According to *Engineering News-Record* magazine, April 2004: HOK ranks as the world's largest Architectural/Engineering firm. The survey ranks HOK among the top 10 practices in the following market sectors: Sports (#1), Commercial Offices (#2), General Building (#4), Hotels, Motels and Convention Centers (#4), Government Offices (#6), Correctional Facilities (#7), Health Care (#18). HOK ranks as the second most admired design firm according to *Contract* magazine Most Admired Design Firms Survey, March 2004.

An important factor in the global success of HOK has been our ability to assemble the best team from our 15 specialised focus groups worldwide. These groups understand our clients' industries, thus allowing us to add value by satisfying their long-term service needs. We serve clients in the following markets: aviation, commercial offices, corporate, cultural, education, government, healthcare, hospitality, justice, mixed use, residential, retail, science and technology, sport/venue/event, and transportation.

HOK has also been at the forefront of sustainable design, theory and practice for many years. The HOK Guidebook to Sustainable Design, published in 2000, bring sustainable practices to all of our projects. As a company we are deeply committed to doing everything we can to safeguard our environment and to increase awareness of sustainable design issues and opportunities in the design professions. We actively encourage all aspects of sustainable design practice including the adoption of environmental assessment methodologies like the LEED programme from the US and Hong Kong's own excellent HK-BEAM standards. Our position as one of the very few truly global design offices brings a responsibility to push forward sustainable design practice wherever we can. This is a responsibility that HOK is proud to carry out. We are committed to developing resources and expertise to help lead the world towards sustainable communities and building environments.

Company Information

Our clients depend on us to go beyond the traditional role of architect. Our retail studio members excel at providing our clients with the highest level of service while keeping up with their increased growth and expansion programs. In response to their needs, we now provide comprehensive services to support their building portfolio management:

- **Development Services:** Market and site analysis, detailed site evaluations, comprehensive feasibility reports, preliminary site plans, consultant coordination, planning and zoning analysis, and entitlements and approvals.
- **Prototype Management:** Prototype development and documentation, centralized design standards, change management, and value engineering.
- **Cost Management:** Estimating, budgeting, financial feasibility, ROI analysis, life cycle cost projections, value engineering, change order validation, bid adjudication, claims assessment, and loan monitoring.
- **Interior Design:** Programming, space planning, interior architectural design, furniture selection, materials selections and specifications, construction documentation, and construction administration.
- **Graphic Design:** Identity design and development, tenant design standard manuals, and environmental way-finding.
- **site|folio™:** A proprietary software program developed by MulvannyG2 specifically for retail tenants and building owners to centralize building portfolio and project information, streamline communications internally and with all team members, and reduce the time and effort spent managing multiple projects.

MulvannyG2 has worked in all 50 states and Mexico and on projects throughout China and various cities within Asia. We currently have projects under construction in six countries on four continents. Working as a consultant to Asian architects, MulvannyG2 can provide the following services:

- Planning and urban design
- Master planning
- Due diligence
- Site planning
- Programming
- Conceptual design
- Design development
- Entitlements and permits
- Branding
- Interior design and space planning
- Tenant improvements
- 3-D rendering
- Cost management
- Construction documents
- Construction administration

Email: ayang@yangmolen.com

Website: www.yangmolen.com

Company Information

Yang Molen LLC, was founded by Architects April Yang, Jules Knowlton and Mark Molen and is based in Columbus, Ohio. Most of our work come from international design competitions. As a collaborative of architects and planners, our commitment is to create uniquely functional and sculptural architecture. We work to create interiors, buildings and environments which respond to the conditions of a modern world. As a firm we think of design as a synthesis of artistic expressions and problem solving processes – we enjoy working and collaborating with others. We also specialized in 3D visualization, which enables the effective communication among the client, the designers, the engineers and the general public.

Company Information

1. Technical consulting on building system performance
2. Ultra-HEPA filtration technology for indoor-air quality products.

Ultra-Filtration Product and Air Purifier Technology: An ultra-efficient filtration technology that is highly effective and very energy efficient. The technology and product is ideal for urban polluted environments such as Macau. Products based on this technology can easily cleanse the indoor air of second hand smoke and bacteria in confined spaces such as hotels and casinos. The technology has secured 16 US patents, fully UL-labeled and currently being distributed in the US under a well-known consumer product company.

Technical Services for High Performance Buildings: ABP offers consulting services to help owners in delivering high performing buildings that offer sustainable design, superior indoor air quality, and integrated daylight harvesting technology. The company has established a reputation as a premier consultant in building commissioning for green building and LEED projects in the US. Unique features include (1) deep resource pools of building system experts and building scientists with (2) a web-based diagnostic tool to enable design team and contractor in delivering quality buildings.

No exclusives in place. Looking for joint venture partner to start up formwork branch rental operation in Macau. Currently have USD\$700 million of formwork rental fleet in USA, want to duplicate rental model in Macau, splitting rent with local partner 50/50. Branch will act as primary distribution center to support full Dayton Superior Brand range in Macau.

Dorian Drake International, Inc.

Mr. Peter Tierney, Area Manager (Asia)

2 Gannett Drive

White Plains, NY 10604

Phone: (914) 640-1570

Fax: (914) 697-9064

Email: ptierney@doriandrake.com

Website: www.doriandrake.com

Company Information

Dorian Drake is the export management company of Hunter Fans. Hunter invented the ceiling fan in 1886. Fans include a life-time warranty and harmonized system of components.

Fan Blades: Plywood vs MDF (low quality pressboard, tends to warp in humid climates.) Energy saving: fans take less electricity than a 100 watt light bulb. Saves energy by circulating cool air in summer and warm air in the fall/winter. Airmax motor - patented to cool itself internally with impellers. Easy-Lock blades / Easy-Lock Glass - ease of installation

Three levels of quality testing: 1) Factory level 2) Outside quality check - SGS, etc. 3) Hunter quality check. Fan hanging system can hold 500 lbs, 2x the UL rating. Very popular in resorts, hotels, casinos.

Company Information

“Incide PC Insulation” and “Krendl Insulation” machines manufactured by HMI Worldwide are used to apply insulation. HMI Worldwide also gives training and additional technical support for the entire process. Cellulose insulation is fire resistant, mold and insect repellent, and very effective thermal and acoustic insulation. The performance of cellulose insulation is superior to that of fiberglass and other insulation materials. It has been used extensively in the U.S. for over 50 years. Application of cellulose insulation is very easy. Cellulose can be used in residential and commercial buildings, athletic centers, auditoriums, theaters, factories, warehouses, and other large structures like hotels, clubs, restaurants, and casinos.

Fax: (281) 592-3086

Email: jim@nailor.com

Website: www.nailor.com

Company Information**VAV Terminal Box & Fan Coil Units with “ECM” Motor Technology”**

Nailor adopted the ECM (Electronically Commutated Motor) is an ultra high efficiency programmable brushless DC motor utilizing a permanent magnet motor and a built-in inverter in its VAV Terminal Box & Fan Coil Units. DC motors are significantly more energy efficient than AC motors and much easier to control. The major weakness of Fan Coils and Series Fan Powered Terminal units until now, has been their low fan motor efficiency. The widely used single speed fractional horsepower permanent split capacitor (PCS) induction motor in combination with an electric SCR speed controller is extremely inefficient at typical operating conditions.

Company Information

Dynabilt Technologies manufactures and distributes worldwide prefabricated steel modular insulated building components for commercial and residential buildings. This technology consists of the “Energy Star” Modutherm insulated load-bearing building wall panels (Patent # 5,722.198 & # 6,044,603), galvanized steel roof systems, and floors joists. These buildings and components reduce construction time and costs by more than 50% and are easily installed by minimum skilled persons. The ModuTherm state of the art wall panel system ensures a lifetime of durability and strength. Composed of galvanized steel, integrated with a structural polymeric insulated core, this combination of materials produces a synergistic effect taking advantage of the special qualities of each material. The steel provides the strength in both tension and compression while the polymeric material provides substantial support in compression.

Company Information

Thomas & Betts Corporation, founded in 1898, in the USA, has more than a century of experience in developing, manufacturing, and supporting a vast array of components for managing electricity. T&B has also established a global influence in the designing arena of lightning protection and emergency lighting with top brands such as FURSE and Emergi-Lite. We have top facilities throughout North America, Europe and Asia to meet global demands in the construction, industrial, residential, commercial, OEM, MRO and oil & gas industries. Thomas & Betts Corporation first issued shares to the public in 1959 and we are listed on the New York Stock Exchange under the symbol TNB.

Products Overview

Lightning Protection Products		
Product Genre	Brand Name	Brief Introduction
Earthing & Lightning Protection and Earthing	Furse® & FurseWeld®	Recognised leader in total solution to earthing & lightning protection and exothermic welding with more than 100 years of design and engineering experience.
Electronic Systems Protection	Furse®	Total Solution provider against transients for all types of power and data communication lines.
Electrical Products		
Product Genre	Brand Name	Brief Introduction
Cable Terminations	Color-Keyed®	Heavy duty industrial compression connectors for electrical cables. Together with Blackburn®, full range and sizes for all your termination requirements.
	Blackburn®	Mechanical & Compression grounding connectors, power tools and service entrance products.
	Sta-Kon®	Ring, fork, pin and blade terminals, splices, disconnects, ferrules and tools.
	Spec-Kon®	Crimp terminals, disconnects & splices. Ideal for OEM applications.
	Dragon Tooth®	Tooth® Insulation Piercing Compression Connector for magnet wire. Only kind available in the world.
	Shield-Kon®	RSK Connector for shielded or co-axial cable. Job references include NASA.

Flexible Conduits	Shureseal® & Shureflex®	Flexible conduits for a wide range of engineering applications. Materials include galvanised metallic, PVC and polyamide.
Conduit Fittings	T&B® Fittings	Conduit fittings for EMT, rigid, flex, metal clad cable, liquidtight, cord and Romex cable.
	OCAL®	PVC (urethane) corrosion protection for electrical conduits and fittings.
	Shamrock®	Electrical conduit pipe fittings.
	Steel City®	Metallic and non-metallic indoor & outdoor boxes and covers, spring steel fasteners, conduit fittings, hangers & clamps, floor boxes, duct and accessories.
Fastening	Ty-Rap®	Two-piece, specification-grade and steel barb tongue cable ties and tools.
	Ty-Fast®	One-piece cable ties. Ideal for OEM applications and competitively priced.
	Ty-Met®	Stainless-steel cable ties for hazardous locations.
	Ty-Grip®	Re-useable, releasable cable ties.
	Print-Ty®	Personalised cable ties.
	Deltec®	Strong, long-life & cost saving methods of securing communication cables.
Identification	Safe-Ty™	Low profile head with rounded edges.
	E-Z-Code®	Complete automated and pre-printed electrical identification products.
Electrical Interconnection Systems Interlocked reefer power outlet	Russellstoll®	Industrial and explosion proof plugs, receptacles, switches, ground indication systems and computer system interconnections.
	Mipco®	Recognized leader in refrigerated container industry, power interconnections and systems.
Pin and Sleeve Connectors	Pos-E-Kon®	Heavy Duty Multi-Circuit Rectangular Industrial Connectors.
Heat shrinkable products	Shrink-Kon®	Heavy, medium and thin wall tubing, wire and connector insulation.
Boxes and Covers	Steel City®, Union® & Bowers®	Full range of boxes and accessories including electrical switches, outlets, gangs etc.
Weather-Proof Electrical Products	Red•Dot®	Outdoor conduit bodies, boxes, covers, lightings etc.
Wiring Duct and Accessories	Taylor®	Total Solution for panel builders with products for organizing and protecting wiring.
Metal Framing	Superstrut® & Kindorf®	Channels, fittings and brackets, clamps, raceways, threaded components and other accessories.

Lightning Protection Products		
Product Genre	Brand Name	
Hazardous Location Lighting	Hazlux® & Hazlite®	HID, Incandescent, Fluorescent and Explosion-Proof lighting fixtures.
Emergency Lighting	Emergi-Lite	Complete system (Central Battery and Control) and standalone solution for emergency lighting.
Communication Products		
Product Genre	Brand Name	Brief Introduction
Structure Cabling	Omni-PLUS	Total Structured Cabling Solution. (Voice, Data and Fibre)
Telecommunication	Kold & Klose® and Flexshell®	Cold-applied sheath repair and splice management products for buried/aerial and pressurised/unpressurised cables.
CATV	LRC®	Leader in Hardline and Dropline CATV connectors and adaptors.

T&B products are: -

- Engineered and certified to meet international standards
- Well-reputed and field-proven
- Diverse so as to provide a total solution for various engineering uses
- Technologically made to lower installation, labour and maintenance costs

Company Information

Established in 1946, Arup is one of the world's largest independent multi-disciplinary engineering firms with nearly 7,000 employees worldwide. The ideas and principles of Ove Arup, the founder, are still a driving force today. Foremost among these is our belief in 'total design', which is characterized by:

- the integration of the design and construction process
- the interdependence of all professions involved
- the creative nature of engineering design
- the value of ingenuity and invention, and
- the social purpose of design

Arup has a strong presence and delivery record in Macau and our Hong Kong and US Offices have successfully completed many projects together in Asia.

Our integrated approach provides creative solutions that save both time and money, and coupled with design and coordination benefits that ultimately reduce project risk.

Company Information

Guttman & Blaevoet has provided continuous engineering services to architects and building owners since 1956. Our mission is to provide mechanical engineering and consulting services with an emphasis on designing healthy and productive indoor environments-while preserving the outdoor environment-with creative, appropriate and cost effective solutions. Our staff of 24 includes licensed mechanical engineers, designers, and CAD specialists, many of them not only have international backgrounds but also project experiences in Asian countries such as The Peninsula Hotels in Hong Kong and Bangkok, Thailand. Our projects have received awards for sustainable design, technology, and energy efficiency, including three national ASHRAE technology awards, the highest honor in the mechanical engineering industry in the U.S., in the last two years.

Company Information

The Headquarters of Parsons Brinckerhoff is located in New York, U.S. Parsons Brinckerhoff Asia (PBA) is one of the leading M&E and Traffic Consultants in Hong Kong and Macau with more than 500 staff in South China and over 900 staff in Asia.

Parsons Brinckerhoff has properly registered office in Macau. It is located at 8/F, Macau Landmark. PBA has been working in Macau since 1984. We have completed many other important commercial and government projects in Macau.

We have very good knowledge and relationship with Authorities and Utility Companies in Macau. We are competent in dealing with large-scale commercial development.

As our Headquarters are in New York, U.S., we are very familiar with the U.S. codes and standards including the international Building Codes (IBC). Our fire engineering expert will assist the architect in dealing with the application of IBC in Macau.

Apart from conventional civil, structural electrical and mechanical engineering, we have in-house technology groups and specialists who have expert knowledge and experience in the following areas:

- District cooling
- Health Care Engineering
- IT/Telecom
- Fire Engineering
- Green and Sustainable Engineering
- Façade Engineering

The experts directly communicate with our Headquarters in U.S. and other experts in Europe and Australia. This strong in-house connection ensures the latest technology to be properly deployed in the prestigious projects.

Company Information

The Lido Group through its subsidiaries, builds restructures, advises, acquires and operates telecommunications and utility companies. TLG focuses on solutions to non-routine, complex business issues. TLG'S capacity to assist its clients is based upon its principals' broad senior executive, technical, operational and financial experience, which is augmented by their knowledge of market opportunities and risks, creative implementation strategies and mission-appropriate financing vehicles.

The Lido Group brings together some of the industry's leading thinkers and achievers to use its knowledge capital to deliver timely solutions to complex problems. With an average of over 20 years of industry experience, there are few projects we tackle that someone on our team hasn't seen before. And it's the learning from those previous experiences—the successes, the mishaps, the resources, the hindsight—that directly benefits our clients.

Company Information

Carol R. Johnson Associates is an award-winning landscape architectural design and environmental planning firm with offices in Boston, MA, and Knoxville, TN. Founded in 1959, our practice has expanded over the years into a 55-person firm serving national and international clients. Our office has developed a reputation for excellence in the design of both natural and urban environments. Our design approach integrates natural systems with built features, achieving high quality, cost-effective solutions through the use of innovative and environmentally sensitive design. We are adept at working with complex sites for which standard landscape design technologies may not be desirable. To every project we bring design leadership, energy, experience, fresh imagination, and a collaborative spirit.

Company Information

EDAW has been in practice now for over sixty years. Our work in Asia Pacific region dates back to 1965, the year we did our first resort project in Hawaii on the Mauna Kea Beach Resort for Lawrence Rockefeller. We have been practicing in China for nearly twenty years.

We provide a broad range of services that includes: tourism/eco-tourism development, historical preservation, site selection/evaluation, concept development, programming, master planning, infrastructure planning, site engineering, landscape design, environmental analysis and environmental graphics.

We are currently the largest consulting firm specializing in land-based services, with a professional staff of more than 1,000 people, with 26 offices worldwide. Our specialists in economics, environment, planning and design allow us to approach complex challenges with expertise, creativity and vision.

EDAW is well known for its resort and community planning. Our “Green Communities” approach and “Conservation Development” are among the most progressive development models practiced and used today.

Company Information

Founded in 1953 by Hideo Sasaki, Sasaki Associates is an interdisciplinary firm of more than 270 professionals practicing in the fields of planning and urban design, architecture, landscape Architecture, civil engineering, and interior design. Hideo Sasaki was internationally respected as a landscape architect, planner, teacher, and mentor. He instilled the firm he founded with a spirit of critical thinking and open inquiry, and he pioneered the concept of interdisciplinary planning and design. All of our disciplines are represented in the ownership and management of the firm, giving our work a practical dimension that focuses on designing projects that are buildable. Hideo insisted that every project be put in its cultural, historical, geographical, environmental, social and economic context – an approach that is even more important today than it was when he first developed it.

Nothing exists in isolation. Physical, cultural, historical, and behavioral factors must be reflected in the finished work. We create integrated environments. Instead of adhering to a signature style, we produce a signature result: handsome, environmentally sound, economically vital work that enriches the lives of its users.

Company Information

3M is a diversified technology company serving customers and communities with innovative products and services. Each of our seven businesses has earned leading global market positions.

These seven businesses are Consumer and Office, Electro and Communications, Health Care, Industrial, Safety, Security & Protection, Graphics & Transportation, and Optical Systems.

Here below are the highlighted products which can serve the Hotels, Casinos and Convention Center Projects in Macau.

1. **3M™ VHB™ Tapes** – all-acrylic construction tape used for assembly and mounting of interior and exterior signage, attachment of decorative metals and trim. It's a strong adhesive that eliminate or reduce holes to drill, rivets, screws, epoxies and weld. <Contact : Horace Tong (852) 28066387>
2. **3M™ Scotchshield™ Safety & Security Films** – multiple micro layers formed window film that is stronger and more impenetrable. It bonds to the inside of windows for strong and durable protection. <Contact : Nelson Fung (852) 28066373>
3. **3M™ Scotchtint™ Sun Control Films** – reduce solar heat gain, glare, and to block harmful UV that significantly improve energy saving and cost. <Contact : Nelson Fung (852) 28066373>
4. **3M™ Fire Barrier Protection Products** – use intumescent, endothermic or ablative technologies to provide a highly dependable seal to help stopping the spread of fire, smoke and toxic fumes. <Contact : Nelson Fung (852) 28066373>
5. **3M™ FASARA™ Interior Design Films** – decorative films applied to glass creating a beautiful glass-etched appearance for privacy purpose with low cost. <Contact : Nelson Fung (852) 28066373>
6. **3M Commercial Care Products** – provide a variety of innovative and cost-effective cleaning solutions that help protect facilities and people, while creating clean, safe and comfortable environments. Products include Chemicals, Hard Floor Maintenance, Hand Pads, Sponges and Wipes, Entrance Matting, Personalized Matting, Work Area Flooring Products, Slip-Resistant Tapes and Treads. <Contact : Nelson Fung (852) 28066373>

7. **3M Safety, Security and Protection Solutions** – products for personal and building safety, security, insulation, occupational health and environmental safety, library systems, commercial care, food service and corrosion protection. <Contact : Sunny Pong (852) 28066360>
8. **3M Library Systems** - provides products that streamline the flow of library materials, including theft protection system, library patron self-checkout systems, and radio frequency identification solutions. <Contact : Iris Sze (852) 28066173>
9. **3M Commercial Graphics Materials** – supplies a variety of color films for interior design and decoration. <Contact : Violet Chau (852) 28066256>
10. **3M Electrical Solutions** - solutions to wire management challenges: from wire connectors, wire markers, terminals, lubricants, animal deterrents and cable prep tools to heat shrink products, cable splices, cable terminations and other cable accessories. This includes Cold Shrink, the cold-applied insulating technology that 3M pioneered. <Contact : Jovi Ki (852)28066208>
11. **3M Communications - 3M Enterprise Networks** brings the most innovative solutions to the world through a complete offering of cabling, connecting, protecting and testing products that meets the demanding specifications for use in premises applications. <Contact : Jovi Ki (852)28066208>

Moreover, other innovative solutions for your projects would be – Electrical Tapes, Floor Liner, Safety-Walk™ Slip-Resistant Materials, Matting System, Floor Pad and Chemicals, Marble Care System, Carpet Care Chemicals & Accessories, Adhesives, Masking Tape, Protective Tapes, Air Filter, Touch Systems, and Meeting & Presentation Solution etc.

Please feel free to let us upon any product inquiries and we can send you and your developers related product catalogs/samples.

AssureTec Systems, Inc.

Mr. Bob Schmitt, VP Market Development
200 Perimeter Road
Manchester, NH 03103-3326
Phone: (603) 641-8443
Fax: (603) 641-9535
Email: bob.schmitt@assuretec.com
Website: www.assuretec.com

Company Information

Founded in August of 2001, AssureTec Systems, Inc. was established with the belief that the knowledge of one's identity is the most fundamental component necessary to detect and deter individuals associated with illegal acts. The AssureTec management and development team has many years of experience in delivering leading-edge solutions to the world security markets.

Identification of players in casinos is one of the most important aspects of casino management. Whether it's enrolling someone for a player's club, checking identities as people are hired, cashing checks at the cage, or just making sure that people are old enough to enter the casino, authentication of documents is critical.

Almost all fraud in casinos is accompanied by the use of false identification. In addition, reporting requirements dictate that the casino have a process to correctly identify individuals conducting large transactions in the casino. Proper identification cannot be done without accurate document authentication. AssureTec's i-Dentify system is the most advanced identity authentication system in the world. In less than 4 seconds an ID card can be verified and all the information from the device capture & stored.

Website: www.fibersensys.com

Company Information

Fiber SenSys is the leading manufacturer of fiber optic intrusion detection systems. The company designs, manufactures and markets solutions for intrusion detection and analysis for both perimeter and Local Area Network (LAN) physical-layer data protection. Founded in 1990 by Corning, Inc. and a group of fiber optic engineers, Fiber SenSys now offers a wide range of fiber optic intrusion detection products built on this proven technology, including SecurLAN, the perimeter intrusion detection system for physically protecting data cables against tampering.

Acquired in November 2000, by CompuDyne Corporation, Fiber SenSys remains committed to advancing innovative security solutions in the military, government, and commercial markets. All research and development, sales/marketing, and manufacturing functions are managed at the company headquarters in Tualatin, Oregon.

Fiber SenSys has an established base of military/defense, government, utility, and corporate clients certified specifically for physical-layer defense of local area networks. The company is a certified provider of Protected Distribution Systems (PDS) equipment for the U. S. Air Force. This certified approval demonstrates Fiber SenSys' unique, recognized focus on the architecture and standards required for physical-layer IT security. With SecurLAN, the company is committed to continuing to provide meaningful support for IT Security and business development requirements.

Website: www.hpgroup.com and www.wscp.com

Company Information

Warm Springs Composite Products - WSCP - is a leading international supplier of fire door components, a necessity in the construction of high-rise commercial and industrial projects. They use the special material, which is called Tectonite - a strong, low heat transferring, light mineral based material, which makes for superb tooling. WSCP offers a full range of fire door products from high volume components and banded door core to unique custom products. Special orders and custom banded doors, anything to do with fire rated door components with the very best certifications.

WSCP also manufactures Tectonite™ Magnesium Repair Cement –

Super Strength Repair

Just add water

Tenacious Bonding, Fast Setting and High Strength

2700-3000 PSI in 30 Minutes - 5,000 PSI in 24 Hours

This is an all season / all weather, repair and anchoring material. It is a single component, inorganic, high performance cement. The product adheres to concrete, masonry, metal, asphalt, and to itself, without the need of a bonding agent and may be used both inside and outside and in hot and cold temperatures. Tectonite™ Magnesium Repair Cement has been formulated for repair and anchoring of work that requires exceptional bonding, adhesion and strength. The product has been designed for jobs where availability of working time for the repair is limited or “down time” must be minimized

Job References

WSCP supplies 3 of USA's 4 top producers of fire rated doors ongoing and the largest manufacturer is Great Britain.

Distributor/Representative

Economics Research Associates has been a consultant to the gaming industry since 1966, dealing with private operators, governments, and industry associations. Gaming clients have included Harrah's, Resorts International, Fitzgeralds, Casino America, Sands, Eldorado, Gaming Industry Association, Commonwealth of Puerto Rico, Harvey's at Lake Tahoe, and the Cities of Reno, Las Vegas and Atlantic City. This experience has covered the establishment of gaming in new jurisdictions (Atlantic City), analysis and government testimony for industry groups (Gaming Association), as well as feasibility, marketing, and operations analysis for new, existing, and expanded gaming operations.

Job References**GENERAL EXPERIENCE****Economic Impact of Gaming on the State of Nevada**

Three assignments for Gaming Industry Association of Nevada, and Nevada Resort Association.

Socio-Economic Impact of Gaming in Connecticut

Prepared for the State of Connecticut.

Analysis of Effects of Proposed Reporting and Withholding Requirements on Gaming Industry

Prepared for Gaming Industry Association and presented to US Congress House Ways and Means Committee to defeat proposed legislation.

Analysis of Effects of Proposed Reporting and Withholding Requirements on Off-Track Betting Industry

Prepared for National Association of Off-Track Betting.

Analysis of Effects of Proposed Tax Reform Legislation on the Horse Industry

Prepared for American Horse Council.

INDIVIDUAL FACILITIES**Harrah's**

Market potential and facility development program for the Harrah's Marina Hotel in Atlantic City. This was the first hotel located off the Boardwalk and has proven to be the most consistently profitable casino project in Atlantic City.

Fitzgeralds	Market and consumer research into Reno gaming patterns and behavior. Our groundbreaking consumer study of gaming patterns and behavior led to a restructuring of facility layout and marketing programs that were directed at attracting high value customers with particular gaming patterns. Within two years after implementing these recommendations, Fitzgeralds saw a doubling of market share.
Harvey's Resort	Strategic plan for this quality Lake Tahoe resort hotel and casino. This repositioning study provided the strategic plan for converting a traditional gaming property to a full service resort destination
Fitzgeralds/Eldorado	Market analysis and development program for casino expansion and entertainment opportunities in downtown Reno.
Claridge	Development of expansion alternatives and other revenue enhancement strategies to make the Claridge a more competitive property. Implemented programs included expanded gaming space, a better entertainment mix, enhanced parking, and a restructured marketing program. This resulted in substantial operating improvements for this Atlantic City property. In this assignment, ERA acted as the prime consultant, ensuring that the architectural program and construction plan was consistent with market needs
Nevada National Bank	Analysis of casino hotel market potential for I-80 property in Reno.
Convention Properties	Market feasibility and development program for 3,000 room casino/entertainment/convention complex in Reno.
South China Industries	Analysis of casino opportunities in Macau after 2001.
Rail Properties	Prepare development program for casino operations in New Zealand.
The Mint	Analysis of casino floor layout and expansion plans for this Las Vegas casino hotel that has now been acquired by the Horseshoe Club.
Sands	Analysis of Las Vegas market potential and repositioning of this Las Vegas property.
Las Vegas, Atlantic County; and Reno/Sparks Convention and Visitors Bureaus	Analysis of each area's image as a vacation and convention destination.
Commonwealth of Puerto Rico	Analysis of gaming regulations and their effect on the industry. Recommendations for changing existing restrictions were implemented.
Resorts International	Market potential for Atlantic City casino development and feasibility of various development concepts and related attraction opportunities.
State of West Virginia	Assessment of economic impact, development strategy, and competitive position for proposed gaming in West Virginia.

Mohegan Casino	Expansion planning for this casino on tribal lands in Connecticut.
Casino America/ Alter Corp.	Market potential and development/marketing program for riverboat gaming and related attractions in Iowa. The “Diamond Lady” was the first gaming boat to be operational and performed according to ERA projections. Follow-on assignments for Casino America include the evaluation of riverboat gaming opportunities in Missouri, Mississippi, Louisiana, Texas, Indiana, Pennsylvania, West Virginia and Massachusetts.
Casino Magic	Market feasibility and resort development program for Casino Magic in Bay St. Louis, Mississippi.
Delta Hotels	Examination of casino potential in Ontario, Canada.
Pratt Hotels	Evaluation of economic impacts of casino gaming and development opportunities in Mexico.
Harrah’s	Concept Development for Entertainment and Amusement attractions related to riverboat casino expansion.
Ladbroke Racing	Market and economic analysis of casino gaming potential for Western Pennsylvania. Analysis of card club potential for selected horse racing tracks in California.
Metropolitan Structures	Market and location analysis for casino gaming in Chicago.
Western Gaming	Casino potential and development program for peripheral entertainment and amusement uses.
United Hainan Enterprises	Investor search for proposed resort and casino development on Hainan Island, China.
Calgary Centre	Market analysis and development program for downtown casino/convention/entertainment complex.
Pratt Hotels	Casino potential in Mobile, Alabama.
Hornblower	Visitation potential at riverboat casino locations in Louisiana.
City of St. Louis	Strategic plan for the implementation of casino gaming and estimates of patronage and economic impact.
City of New Orleans	Analysis of proposed casino policies and impacts on existing and proposed retail development.
Boomtown Hotel and Casino	Analysis of market potential and economic impacts on existing and proposed retail development.

**Horseshoe Club/Mirage
Resorts**

Potential for large scale casino resort development off the coast of China.

STDM

Opportunities for gaming as part of new town development in Asia.

Primm South

Development plan for the expansion of gaming and entertainment attractions at Stateline, Nevada

**Fremont Street Hotel
Association**

Analysis of entertainment concepts for revitalizing downtown Las Vegas.
