

DEEP FREEZE!

The Impact of Science on U.S. Climate-Change Policy

By Judy Layzer, MIT Political Scientist, and Herman Karl, USGS Earth Scientist

- ❁ Why have science and scientists had so little impact on U.S. climate-change policy?
- ❁ Hear about the present implications of past societal collapses resulting from climate change
- ❁ Can citizens and scientists work together to find creative and durable solutions to the climate-change crisis?
- ❁ Learn how flood-management projects in the San Francisquito watershed may be affected by climate-change policy
- ❁ How can programs like the MIT-USGS Science-Impact Collaborative help thaw the deep freeze?
