# ANY QUESTIONS?

You'd never dream of dumping garbage into Puget Sound. But let waste run down your storm drain and that's exactly what you're doing. Because storm drains lead directly to our natural waterways where fish live. So how can you help keep our waters free from harmful pollution? Stencil all storm drains at your business with: "Dump No Waste-Drains to Stream." And check and clean your storm drainage system regularly.

It's not a lot to ask when you consider what's on the line. For more information call (206) 296-1900.
