

U.S. Climate Change Science Program

Synthesis and Assessment Product 5.2

Best Practice Approaches for Characterizing, Communicating and Incorporating Scientific Uncertainty in Climate Decision Making

M. Granger Morgan¹

with advice and contributions from

Hadi Dowlatabadi²; Max Henrion³; David Keith⁴;
Robert Lempert⁵; Sandra McBride⁶; Mitchell Small¹, and Thomas Wilbanks⁷

Lead Agency:

National Oceanic and Atmospheric Administration

Contributing Agencies:

Department of Energy

Department of Transportation

Environmental Protection Agency

National Aeronautics and Space Administration

National Science Foundation

¹Department of Engineering and Public Policy, Carnegie Mellon University.

²Institute for Resources, Environment and Sustainability, University of British Columbia.

³Lumina Decision Systems.

⁴Department of Chemical and Petroleum Engineering and Department of Economics, University of Calgary.

⁵The RAND Corporation.

⁶Duke University

⁷Environmental Science Division, Oak Ridge National Laboratory.

	Table of Contents	
34		
35		
36		
37	Preface	3
38	Executive Summary	5
39	Non-Technical Summary	9
40	1. Sources and types of uncertainty	31
41	2. The importance of quantifying uncertainty	44
42	3. Cognitive challenges in estimating uncertainty	52
43	4. Statistical Methods and Models	61
44	5. Methods for estimating uncertainty	74
45	6. Propagation and analysis of uncertainty	95
46	7. Making decisions in the face of uncertainty	107
47	8. Communicating uncertainty	134
48	9. Some simple guidance for researchers	143
