

Publications Relating to HOMER

Articles Describing HOMER

Lambert T, Gilman P, Lilienthal P, Micropower system modeling with HOMER, *Integration of Alternative Sources of Energy*, Farret FA, Simões MG, John Wiley & Sons, December 2005, ISBN 0471712329

Lilienthal PD, Lambert TW, Gilman P, Computer modeling of renewable power systems, Cleveland CJ, editor-in-chief, *Encyclopedia of Energy*, Elsevier Inc., Volume 1, pp. 633-647, NREL Report No. CH-710-36771, 2004

Peer-Reviewed Papers

Rehman S et al, Feasibility study of hybrid retrofits to an isolated off-grid diesel power plant, *Renewable & Sustainable Energy Reviews*, **11** (2007) 635-653

Georgilakis PS, State-of-the-art of decision support systems for the choice of renewable energy sources for energy supply in isolated regions, *International Journal of Distributed Energy Resources*, **2** (2) 129-150, December 2005

Khan MJ, Iqbal MT, Pre-feasibility study of stand-alone hybrid energy systems for applications in Newfoundland, *Renewable Energy*, **30** (6) 835-854, 2005

Shaahid SM, El-Amin I, Rehman S, Al-Shehri A, Bakashwain J, Ahmad F, Potential of autonomous/off-grid hybrid wind-diesel power system for electrification of a remote settlement in Saudi Arabia, *Wind Engineering*, **28** (5) 621-628, 2004

Iqbal MT, A feasibility study of a zero energy home in Newfoundland, *Renewable Energy*, **29** (2) 277-289, 2004

Iqbal MT, Pre-feasibility study of a wind-diesel system for St. Brendan's, Newfoundland, *Wind Engineering*, **27** (1) 39-51, 2003

Conference Papers

Economic Analysis of Distributed Generators, Dobariya CV, Agalgaonkar AP, Khaparde SA, Kulkarni SV, Abhyankar AR, *Proceedings of the International Conference on Computer Applications in Electrical Engineering Recent Advances*, Roorkee, India Sep. 29 - Oct. 1, 2005

Designing High Reliability Power Systems for PEMEX Using HOMER, Arturo Romero Paredes Rubio, *World Renewable Energy Congress VIII*, Denver, Colorado, 2004

The Complementary Operations and Diverse Applications of Hybrid System (Small-scale Wind Power and PV) Used in Land Aquafarms in Taiwan, Chi-ming Lai, Ta-hui Lin,

Che-ming Chiang, Chien-hung Lu, Wei-chang Chen, *World Renewable Energy Congress VIII*, Denver, Colorado, 2004

The Eolic Resource In The Electricity Production With Renewable Resources In Rural Areas, Luis Ruben Bautista, *World Renewable Energy Congress VIII*, Denver, Colorado, 2004

An Economic Evaluation of Small-scale Wind-diesel Hybrid Systems in Kachchh, India, Christopher Joshi Hansen & John Bower, *World Renewable Energy Congress VIII*, Denver, Colorado, 2004

Application of HOMER software for village electrification project – A case study for village Jarha, Shirish Garud, Parimita Mohanty, *World Renewable Energy Congress VIII*, Denver, Colorado, 2004

The economics of hybrid power systems for sustainable desert agriculture in Egypt. Kamel S, Dahl C, *Proceedings of the Sustainable Energy and Development Conference*, June 2-7, 2002, Dubrovnik, Croatia.

Theses and Dissertations

Bailey PN, Oracha Chotimongkol O, Isono S, Demand Analysis and Optimization of Renewable Energy – Sustainable Rural Electrification of Mbanayili, Ghana, Masters Thesis, University of Michigan, April 2007

Henryson M, Svensson M, Renewable power for the Swedish Antarctic station Wasa, Masters Thesis, Department of Energy Technology, KTH Royal Institute of Technology, Stockholm, Sweden, 2004

Langåsen B-M, Rural electrification in Uganda: Powering the Masindi district, Masters Thesis, Department of Energy and Process Engineering, Norwegian University of Science and Technology, Trondheim, Norway, Spring 2004

Hansen CJ, Bower J, An economic evaluation of small-scale distributed electricity generation technologies, Oxford Institute for Energy Studies, Oxford, UK, October 2004

Camerlynck J, Modelling of renewable energy systems in the Maldives, Internship Report, Department of Science Technology and Society, Utrecht University, Utrecht, The Netherlands, 2004

van Alphen K, The implementation potential of renewable energy technologies in the Maldives, Utrecht University, Utrecht, The Netherlands, August 2004

Devine M, Analysis of electric loads and wind-diesel energy options for remote power stations in Alaska, Masters Thesis in Mechanical Engineering, University of Massachusetts Amherst, October 2004

LoVecchio J, The use of GIS as a decision support system for assessing the feasibility of installing wind energy at the Sunshine Village ski resort in Banff National Park, Alberta, Masters Thesis, Department of Geography, University of Calgary, September 2003

Kamel S. An optimization approach to hybrid power systems for remote area applications in Egypt, PhD Thesis in Economics, Colorado School of Mines, January 2003.

Wenisch J, *A neural network model to specify optimal equipment sizes for hybrid renewable power systems*, Masters Thesis in Civil Engineering, University of Colorado, Fall 2002

NREL Technical Papers

Levene J, Kroposki B, Sverdrup G, *Wind Energy and Production of Hydrogen and Electricity – Opportunities for Renewable Hydrogen*, NREL/CP-560-39534, March 2006 (www.nrel.gov/docs/fy06osti/39534.pdf)

Givler T, Lilienthal P, *Using HOMER Software, NREL's Micropower Optimization Model, to Explore the Role of Gen-sets in Small Solar Power Systems; Case study: Sri Lanka*, NREL/TP-710-36774, May 2005 (www.nrel.gov/docs/fy05osti/36774.pdf)

Cotrell J, Pratt W, *Modeling the feasibility of using fuel cells and hydrogen internal combustion engines in remote renewable energy systems*, NREL/TP-500-34648, September 2003 (www.nrel.gov/docs/fy03osti/34648.pdf)

NREL White Papers

Bakisae J, Cameron D, Jimenez T, Baring-Gould I, *Hybrid wind/diesel optimization and regional cost analysis for remote Alaskan native villages*, August 2004

Givler T, Lilienthal P, *Using HOMER, NREL's micropower optimization model, to compare solar and hybrid off-grid power systems*, August 2004

Walker B, *Renovation of the photovoltaic-diesel generator system at natural bridges national monument*, August 10, 2001

Wei Guo, *A case study of wind-diesel hybrid system in China*, January 4, 2000

Other Papers

Manwell, J. F., McGowan, J. G., and Blanco, G., *Potential for wind energy development on New England islands*, University of Massachusetts Renewable Energy Research Laboratory Report, Jan. 2002.

Lipman T, Ramos R, Kammen DM, *An assessment of battery and hydrogen energy storage systems integrated with wind energy resources in California*, California Energy Commission, Publication numer CEC-500-2005-136, September 2005

Cook C, Drouilhet S, *The benefits of using dispersed energy storage in conjunction with distributed photovoltaics for a diesel based utility grid*, February 2006

Greacen C, Prasitpianchai S, Suwannakum T, *Renewable energy options on islands in the Andaman Sea: hybrid solar / wind / diesel systems*, February 2007, available from www.palangthai.org/docs.
