RE: CPSC Samples 96-800-2016  
GG4024 Acapulco Gloss Glaze

Dear Mr. Alaimo:

The U.S. Consumer Product Safety Commission (CPSC) reviewed the above referenced product distributed by your firm. Review of its label showed that it is a misbranded hazardous substance, because it does not comply with the requirements for placement. Therefore, distribution of this product is prohibited. The Commission's staff requests that you take the corrective actions described below.

A sample (96-800-2016) of your GG4024 Acapulco Gloss Glaze was collected by Investigator Charles F. O'Connell of the Boston office on September 24, 1996 during an inspection of your firm.

Please refer to the letter of March 13, 1996 from Compliance Officer Mary Toro of the Division of Regulatory Management. While her letter referred to copper compounds, the same general advice pertains to the lead compounds in the glaze.

The glaze is intended for adult ceramic hobbyist who would make decorative items for home or gifts on a leisure time basis. Thus, this product is an art materials as defined by section 16 CFR 1500.14(b)(8) of the Federal Hazardous Substances Act (FHSA). The FHSA was amended by the Labeling of Hazardous Art Materials Act (LHAMA). As required by that regulation, you submitted the formulation for review by a qualified toxicologist. You also submitted copies of the reports to Mr. O'Connell.

In addition to the LHAMA requirements, you must also meet the requirements for prominence, placement, and conspicuousness outlined in 16 CFR 1500.121. This section requires that the signal word and statements of hazard must be on the principal display panel (i. e. on the front under the brand name). Thus, on your label for Gloss Glaze #GG1700, the words WARNING: HARMFUL IF SWALLOWED " must be in this location. This should be followed by the statement "See additional cautions on panel." Other labeling may be elsewhere on the label. Your other glazes should be labeled appropriately in accordance with this regulation.

Distribution, sale or importation of a misbranded hazardous substance is a prohibited act under Section 4 of the FHSA. As a result of this violation, you could be subject to civil fines of up to \$1.5 million and/or criminal fines and imprisonment for not more than one year, or both. Please review Chapter 1 of the Handbook for details of these penalties.

In addition, you could be subject to an injunctive action or the products could be subject to seizure to prevent further distribution of the violative products. Please review Chapter 1 of the enclosed Regulated Products Handbook (Handbook) for details of these sanctions.

The staff requests that you ceased distribution of glazes which do not comply with 16 CFR 1500.121, pending correction, export or destruction. The staff also requests that you take necessary action to assure that all future shipments of art materials comply with this section.

See the procedures for obtaining authorization to recondition in Chapter 4 of the enclosed If any you wish to export these crayons you must follow the procedures outlined in Chapter 6 of the Handbook. Failure to do so could subject you to the penalties described in Chapter 1 of the Handbook.

If you disagree with the Commission staff's finding that this product violates the Commission's regulation, see Chapter 2 of the enclosed Handbook which describes the procedures for presenting your views and any supporting evidence to the staff.

Sections 15 and 37 of the Consumer Product Safety Act contain requirements for the reporting of information regarding certain products you manufacture, import or distribute. Chapter 5 of the Handbook describes the reporting requirements applicable to your firm. Chapter 7 of the Handbook contains information on the confidential treatment of information you submit to the Commission.

Please respond in writing within 10 days from the date you receive this letter, outlining the specific corrective actions you plan to take to address the hazard associated with this product. Please direct your response to Martin Bennett, Compliance Officer, at the address and telephone number shown above.

Sincerely,

Richard D. Swackhamer  
Director  
Eastern Regional Center

This inspection was conducted at the request of CERM as a result of ID1 950907CWE7271 regarding high levels of lead from ceramics. The firm is a manufacturer of ceramics art materials including glazes. All of the glazes have been certified by a toxicologist and bear the ASTM D-4326 label. A review of the firm's labels revealed too small a type size and warnings were on the side panels. Sample 96-800-2016 was collected.

Follow-up: Refer to CERM (Toto).

Gare Incorporated  
165 Rosemont Street  
Haverhill, MA. 01831  
960913ERC0590

SUMMARY OF FINDINGS:

An inspection of this manufacturer of ceramic art-materials was conducted under FPC 96-001, as a follow-up to investigation 950907CWE7271, which concerned a home ceramics operation where children had developed high blood levels of lead, and this consumer reported that she had purchased some of her ceramic glazes from Gare Inc.

This inspection disclosed that Gare Inc. manufactures ceramic glazes and molds. Management reported that they are fully aware of the requirements of the FHSA and LHAMA, that all of their products have been evaluated by Dr. Woodhall Stopford, a toxicologist at Duke University, that they are members of ACMI, <sup>EXS CPSA</sup> that most of their glazes are non-toxic, and that a small number of their glazes are toxic. They estimated that about-percent \* of the glazes that they ship are toxic and that they are gradually eliminating toxic glazes from their product line. <sup>6(b)(1)</sup>

Examination of the current labels for their glazes disclosed that they bear the designation, "Conforms to ASTM D-4326", as well as the firm's name, address and telephone number. However, it was observed that the signal words and statements of hazards are printed on side panels, rather than the principal display panels of the labels for their glazes that are hazardous and that they are not in the appropriate type sizes for this size label.

Sample 96-800-2016 of the firm's Acapulco Gloss Glaze-GG 4024 was collected during this inspection for label examinations at FOER.

PERSONS INTERVIEWED AND INDIVIDUAL RESPONSIBILITY:

Investigator's credentials and a notice of inspection were presented to Mr. Jay Deaven, technical director, who accompanied me during the inspection, provided the information for this report and stated that Mr. Thomas L. Alaimo, the firm's \*\* president, is responsible for all of their operations.

- \* Gare has commented that 84% of their product line is non-toxic.
- \*\* Tom Alaimo was the President and owner of Gare, Incorporated.

Gare Incorporated  
165 Rosemont Street  
Haverhill, MA. 01831  
960913ERC0590

COMPLIANCE HISTORY:

This firm operates as a 1950 Massachusetts corporation, which has the following officers, at present:

Thomas L. Alaimo, President  
Thomas L. Alaimo, Jr. Vice President

The firm manufactures molds for ceramic use from plaster of paris and they also manufacture a line of ceramic glazes. They have no-regulatory history with the Commission.

INJURIES AND COMPLAINTS:

Mr. Deaven stated that [REDACTED] they are not aware of any reports of injuries or lawsuits resulting from the use of their products and that they carry product liability insurance with the Chubb Group, through the Mazonson Agency of Peabody, MA.

EX 3  
CPSA 6 (b)(1)

GUARANTIES:

None.

PRODUCT FORMULAS - PRODUCT LABELLING:

Mr. Deaven explained that his firm initially had all of their products reviewed by a toxicologist [REDACTED] after LHAMA had been passed, after two years ago the firm became members of ACMI of Boston, MA. and that at that time all of their products were evaluated by Woodhall Stopford, M.D. of Duke University, who is a board certified toxicologist. He further explained that all laboratory testing is 'performed on the firm's products by the Angeline Elizabeth Kirby Memorial Health Center of Wilkes-Barre, PA., with the results of this testing being forwarded to Dr. Stopford for use in his product evaluations (See Exhibit 1-photocopy of test report dated 1/19/90). Exhibit 8 contains copies of Representation Evaluation Reports of Dr. Stopford.

EX 3  
PSA  
6(b)(1)

5

Gare Incorporated  
165 Rosemont Street  
Haverhill, MA. 01831  
960913ERC0590

In response to my inquiries Mr. Deaven stated that by being a member of ACMI and with their interrelationship with Dr. Stopford the required submission of the criteria used for evaluating the toxicity of their art materials have been submitted to CPSC by ACMI. He also said that the firm has been gradually eliminating toxic glazes from their line [REDACTED]

EX 3 CPSC  
6(b)(4)

Mr. Deaven pointed out the cautionary labeling on the firm's toxic glazes, including the FHSA-type cautionary information and the listing of the firm's name, address, and telephone number on the labels. [REDACTED]

Dr. Stopford had told him that Gore, Inc. labelling complies with the requirements of LHAMA. [REDACTED]

Mr. Deaven also stated that the firm, as a member of ACMI, has their non-toxic glazes included on a list that is forwarded to schools, so that the schools will be aware of that these glazes are non-toxic and can use this list as a guide for purchasing purposes (See Exhibit 2). He also reported that all of the firm's glazes are listed with the Rocky Mountain Poison Control Center and that when these glazes are applied to plaster of paris and fired in a kiln a chemical reaction occurs, so that the glaze becomes a glass and is permanently bonded to the Plaster of Paris.

Mr. Deaven provided copies of the firm's catalog (Exhibit 4) and a copy of the firm's "Guideline for the safe use of Hobby Ceramic Art Materials"(Exhibit 3). He reviewed this document with me and pointed out that the first four pages of this document bear general safety information and that most of the firm's products have been evaluated by Dr. Stopford found to be non-toxic. \* Gare commented that 84% of their product line is non-toxic.

Gare Incorporated  
165 Rosemont Street  
Haverhill, MA. 01831  
960913ERC0590

This document was found to include the material safety data sheets for the firm's products and I advised him that if this document is provided to consumers, it must bear the FHSA cautionary information for each product. Mr. Deaven said that this document is sent to anyone, including consumers and as he reviewed it with me, he pointed out that the material safety data sheets do bear FHSA requirements, with the exception that the statements of hazards are in small letters, rather than capital letters.

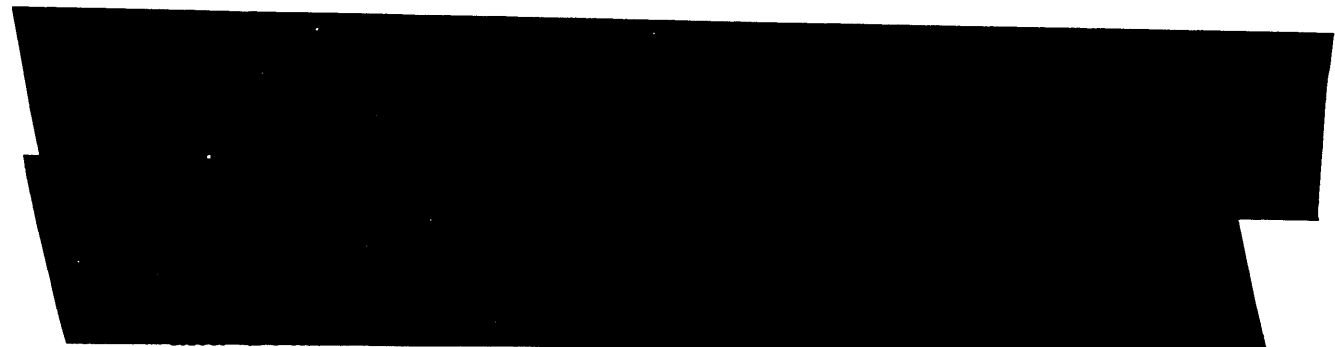

I also advised Mr. Deaven that the use of disclaimers, such as non-toxic on labeling of hazardous substances is prohibited and he reviewed the firm's guideline (Exhibit 3) with me and

*ER 3  
CPSA  
6(b)(1)*

Mr. Deaven reviewed the product formulas with me and explained that the firm has five general products which they manufacture,

*ER 3  
CPSA  
6(b)(4)*

Mr. Deaven pointed out that the formulas for the products that the firm manufactures are in a data base and he pointed out representative products formulas for me. (See Exhibit 5). He also pointed out that the material safety data sheets

*x

CPSA  
6(b)(4)*

**Gare Incorporated  
165 Rosemont Street  
Haverhill, MA. 01831  
960913ERC0590**

In reviewing the firm's catalog, it was observed that the labels for four aerosol products are shown:

1. Clear Gloss Finish
2. Super Gloss Finish
3. Porcelain Touch
4. Clear Matte Finish

Mr. Deaven explained that Aerosol Systems of Macedonia, Ohio 44056 manufactures these four products and packages them under his firm's Garesol Brand name. In response to my inquiries, Mr. Deaven stated that he does not know the formulations for these products because the manufacturer will not release them to his firm. These four labels (See Exhibit 6) bear FHSA cautionary labeling on both their principal display and rear panels. These four products are labeled "DANGER. Extremely Flammable, Vapor Harmful and Contents Under Pressure" and these warnings and the other FHSA-type cautionary information on these labels are in the appropriate type sizes for the size of these labels. To properly review these labels, their current formulations would have to be obtained from the manufacturers and Mr. Deaven said that these formulations are considered proprietary by Aerosol Systems. The material safety data sheets contain some formula information but these sheets are dated 1989 etc.

**SAMPLES COLLECTED:**

Sample 96-800-2016 consisting of 4-4oz jars of Acapulco Gloss Glaze GG 4024 was collected during this inspection. Sub 1 was forwarded to FOER Compliance and Subs 2-4 were forwarded to the sample custodian to be held for future instructions. A copy of C/R 96-800-2016 is attached as Exhibit 7.

**DISCUSSION WITH MANAGEMENT:**

Mr. Deaven stated that the firm has contracted with Dr. Woodhall Stopford M.D. of Duke University and ACMI for assistance in complying with the requirements of LHAMA, and that it is their intention to comply with LHAMA. He provided the information for this report and the only discussion that took place was that which was necessary to obtain this information.

\* Gare has commented that Dr. Stopford receives the formulations for spray cans contents directly from Aerosol Systems, since they are proprietary formulas, so he can do his evaluations. The MSDS Sheets are up to date based on contents.

6 (b)(5)

DISTRIBUTION - RECALL SYSTEM:

Mr. Deaven stated that the firm's products are sold nationwide through distributors (See rear pages of their catalog - Exhibit 4) and that via sales invoices all customers can be identified in the event of a recall.

EXHIBITS:

Attached to this report as exhibits are:

1. Photocopy of test report of 1/1/90 of the Angeline Elizabeth Kirby Memorial Health Center
2. Copy of list of the firm's non-toxic glazes for use in schools.
3. Copy of firm's guideline for the safe use of Hobby Ceramic Art Materials.
4. Copy of firm's current catalog.
5. Representative formulas for the firm's glazes
6. Labelling for the aerosols that are manufactured and packaged for the firm by Aerosol Systems.
7. Photocopy of C/R 96-900-2016
8. Representative evaluation reports of Dr. Woodhall Stopford.
9. Representative labels for the firm's products.

Dick/Eric, In examining the report of an investigation (Case No. 950907CWE7271) conducted in September 1995 involving high blood levels in children attributed to a home ceramics operation, I find that we have not followed up on three suppliers of ceramic art materials mentioned by the consumer and potential sources of lead involved in the ceramics operation. While we did followup on the manufacturer of the glaze specifically used by this consumer and which was reportedly the primary source of lead being introduced into the operation, we should examine the other firms even though the extent to which she used their products is not clear.

The consumer involved in the home ceramics operation, reported purchased decals from the following two firms located in your Regions. Please followup with complete inspections of both firms as quickly as possible to determine if they are complying with the FHSA and LHAMA requirements. Be sure to determine whether the firms have lead or other hazardous substances in their decals. The decals used by the consumer were purchased prior to 1993.

Daytona Beach, FL 32114

*\* Conduct this portion only!*

- 2) Olympic Enterprises, Inc.  
715 McCartney Rd.  
Youngstown, OH 44505

*960913ERC0590*

In addition, she mentioned that she sometimes used glazes from Gare, Inc., 165 Rosemont St., Waverhill, MA 01831. Therefore please inspect this firm as well to cover their glazes for lead and compliance with FHSA and LHAMA.

The inspections should be conducted under the FHSA Adult program. Please provide copies of your reports to Mary Toro, CRM. You may wish to call her or myself if you have any questions.

Thank you! Bob

NO HEALTH LABELING REQUIRED

Products bearing the CP Certified Product Seal, the AP Approved Product Seal or the Health Label (Non-Toxic) Seal (HL/NT) of The Art & Creative Materials Institute, Inc. (ACMI) are certified in a program of toxicological evaluation by a medical expert to contain no materials in sufficient quantities to be toxic or injurious to humans or to cause acute or chronic health problems. This program is reviewed by ACMI's Toxicological Advisory Board. These products are certified by ACMI to be labeled in accordance with the chronic hazard labeling standard, ASTM D-4236, and Federal law, P.L. 100-695. In addition, products bearing the CP Seal meet specific requirements of material, workmanship, working qualities and color described in appropriate product standards issued by ACMI or other recognized standards organizations. Be sure to purchase products that bear the ACMI Seals!

December 3, 1987

## NOTICE TO ALL NURSING HOMES, MENTAL HEALTH INSTITUTIONS, HOSPITALS AND SCHOOLS (GRADES K-6)

Only ceramic art products that bear a NON-TOXIC logo on the label should be used in your programs. Art materials that have a health warning, such as lead containing glazes, must not be used nor products that lack a health warning but do not certify the contents as non-toxic.

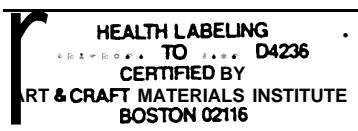

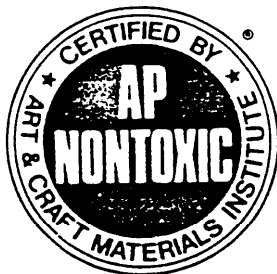

The exclusion of potentially harmful materials from your ceramic classes will ensure against accidental ingestion by your patients and students. For their protection, please read the following section carefully.

### READ LABELS WITH CARE:

In ceramics, as in all areas of human activity, proper usage of products ensures safety. Misuse of products may expose the ceramist to potentially harmful substances. Care should be taken to read all label instructions before using a product.

Hobby labels that comply with ASTM D4236 contain specific information on any toxic material in the product, potential health hazard associated with their use and directions on how to minimize risks.

To comply with this standard, hobby ceramic manufacturers must have their products approved by a certifying organization. Our organization is the Art and Craft Materials Institute which gives permission, upon strict prerequisites, to use the following seal on product labels.

“Products bearing the AP Approved Seal of the Art and Craft Materials Institute, Inc.” are certified in a program of toxicological evaluation by a medical expert, subject to review by the Institute’s Toxicological Advisory Board, to contain no materials in sufficient quantities to be toxic or injurious to humans or to cause acute or chronic health problems.

Dear Valued Customer,

Thank you for using our products. I hope you find our newest mold & color catalog, which includes several new features, to be helpful and easy to use. In this new catalog, we have tried to do the best possible job of presenting our molds and colors together with a variety of beautiful decorating techniques.

Ever since 1991, we at Gare have been manufacturing ceramic molds and color for hobbyists, students and manufacturers all around the world. As a family owned and operated business, I am proud that we are small enough to relate to your everyday needs and large enough to supply our customers worldwide with over 1200 innovative molds and 700 unique colors. All of these are made in our manufacturing plant here in New England to a group of people who are dedicated to quality, innovation and service. In addition to our innovative molds and unique colors we also offer a full array of brushes, kilns, kiln-ships, educational seminars and more. It had you to the conclusion that one company, Gare, can satisfy all your ceramic needs.

As you go through the following pages, I hope you get as excited about ceramics as I do and, along with our new decorating guide, I hope it gives you the inspiration and ideas for some beautiful projects which await you.

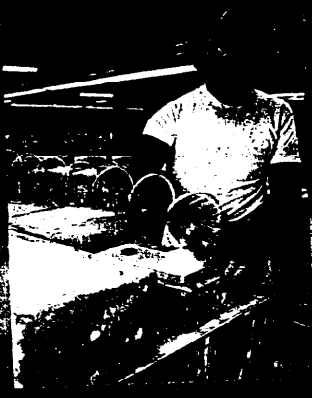

Thank again for your continued support.

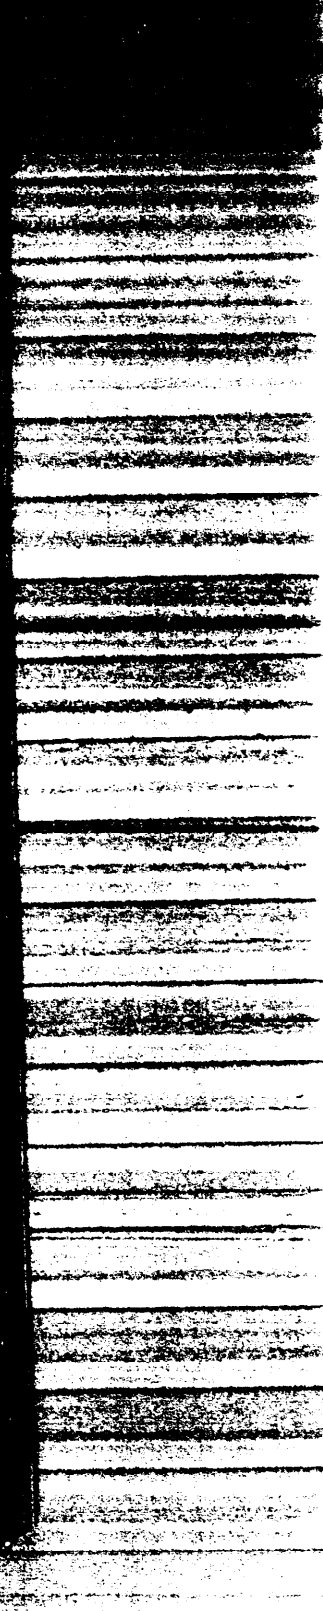

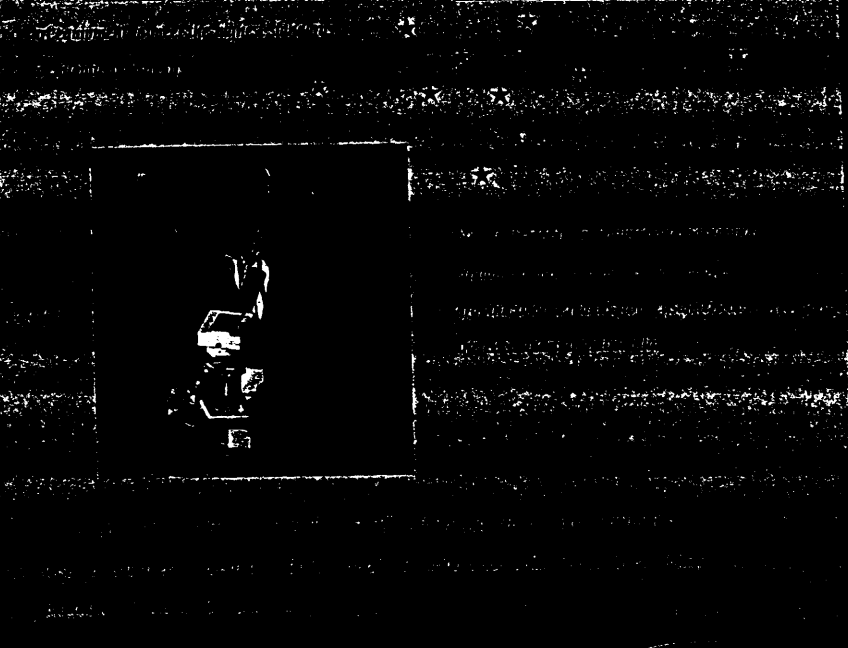

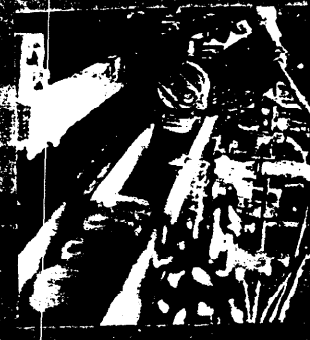

Sincerely,

*Thomas L. Alamo*

# Gareosol<sup>®</sup>

MANUFACTURED FOR

## gare<sup>®</sup>

165 Rosemont Street, Haverhill, MA 01830  
(508) 373-9131

## Clear Gloss finish

Non-fired Spray Fixative

**DANGER: EXTREMELY  
FLAMMABLE. CONTENTS  
UNDER PRESSURE. HARM-  
FUL OR FATAL IF SWALLOW-  
ED. VAPOR HARMFUL.**

**Carefully read all cautions  
and acute health hazards on  
the rear panel.**

NET WEIGHT 12 OZ. (340g)

### CLEAR GLOSS

GAREOSOL'S specially formulated clear gloss finish provides a unique high gloss protective coating.

This is a permanent high gloss finish which dries and stays clear. It brightens colors and will not blush or cloud stains. Provides protection to a completely sealed piece.

May be used over opaque stains before antiquing to make wiping off of antique stains easier. Excellent sealer for decoupage prints.

**FOR BEST RESULTS:** Use at room temperature. Hold can upright 10-12 inches from object. Begin spraying object and continue past other side. Continue spraying in this manner using overlapping strokes. Spray in light coatings to prevent running and sags of the spray or color underneath.

To prevent spray head clog, turn can upside down and press spray for several seconds after each use. If spray head clogs during use, turn spray head and press. If clogging persists, remove spray head; clean the hole at front and the slit at base with a pin. Replace spray head and turn.

This can is guaranteed to spray. Since seller cannot control application, seller makes no warranty, expressed or implied, nor accepts responsibility other than replacement of spray can.

**DANGER: EXTREMELY FLAMMABLE. MAY BE HARMFUL BY INGESTION OR BY BREATHING VAPORS. EXPOSURE MAY RESULT IN NAUSEA, HEADACHE, CONFUSION OR INSTABILITY. EXPOSURE MAY RESULT IN IRRITATION OF THE EYES OR CHEST. EXPOSURE MAY CAUSE HARM TO THE DEVELOPING FETUS OR BIRTH DEFECTS.**

CONTAINS: TOLUENE.

**PRECAUTIONS:** Avoid prolonged contact with skin. Avoid breathing vapors. Use exhaust fan to remove vapors and assure adequate cross ventilation. Do not use or store near heat, sparks or flame. **DO NOT USE IF PREGNANT OR CONTEMPLATING PREGNANCY. KEEP OUT OF REACH OF CHILDREN.**

**FIRST AID:** if symptoms persist, see a physician. If symptoms occur, move to fresh air. For further health information contact a poison control center. LABELING CONFORMS WITH ASTM 04236

# Porcelain Touch

Non-fired Spray Fixative

**DANGER: EXTREMELY FLAMMABLE. CONTENTS UNDER PRESSURE. HARMFUL OR FATAL IF SWALLOWED. VAPOR HARMFUL.**  
Carefully read all cautions and acute health hazards on the rear panel.

NET WEIGHT 12 OZ. (340g)

## PORCELAIN TOUCH

GARECSOL'S specially formulated PORCELAIN TOUCH creates the simulated look of high fired porcelain on your low fired ceramic pieces. This unique product may be used over fired gloss glazes; over opaque or translucent stains; and in conjunction with Gare Pastel Chalks.

PORCELAIN TOUCH is easy to use and dries quickly to give the immediate appearance of expensive porcelain. Ideal for use on doll heads and doll parts. To achieve this porcelain-like look, simply spray 2 light coats over bisque or glazed fired pieces.

**FOR BEST RESULTS:** Shake can vigorously for 3-5 minutes before using. Use at room temperature. Hold can upright 10-12 inches from object. Begin spraying object and continue past other side. Continue spraying in this manner using overlapping strokes. Spray in light coatings to prevent running and sags. To prevent spray head clog, turn can upside down and press spray for several seconds after each use. If spray head clogs during use, turn spray head and press. If clogging persists, remove spray head; clean the hole at front and the slit at base with a pin. Replace spray head and turn.

This can is guaranteed to spray. Since seller cannot control application, seller makes no warranty, expressed or implied, nor accepts responsibility other than replacement of spray can.

**DANGER: EXTREMELY FLAMMABLE. MAY BE HARMFUL BY INGESTION OR BY BREATHING VAPORS. EXPOSURE MAY RESULT IN NAUSEA, HEADACHE, CONFUSION OR INSTABILITY. EXPOSURE MAY RESULT IN IRRITATION OF THE EYES OR CHEST. EXPOSURE MAY CAUSE HARM TO THE DEVELOPING FETUS OR BIRTH DEFECTS.**

CONTAINS: METHYL ETHYL KETONE, TOLUENE.

**PRECAUTIONS:** Avoid prolonged contact with skin. Avoid breathing vapors. Use exhaust fan to remove vapors and assure adequate cross ventilation. Do not use or store near heat, sparks or flame. **DO NOT USE IF PREGNANT OR CONTEMPLATING PREGNANCY. KEEP OUT OF REACH OF CHILDREN.**

**FIRST AID:** If symptoms persist, see a physician. If symptoms occur, move to fresh air. For further health information contact a poison control center. LABELING CONFORMS WITH ASTM D4236

### CLEAR MATT

# Clear Matt finish

Non-fired Spray Fixative

**DANGER: EXTREMELY  
FLAMMABLE. CONTENTS  
UNDER PRESSURE. HARM-  
FUL OR FATAL IF SWALLOW-  
ED. VAPOR HARMFUL.**  
Carefully read all cautions  
and acute health hazards on  
the rear panel.

NET WEIGHT 12 OZ. (340g)

GAREOSOL'S specially formulated CLEAR MATT can be used over opaque stains as a final protective coating. CLEAR MATT dries quickly and will provide a permanent soft satin matt sheen to your finished piece.  
**FOR BEST RESULTS:** Shake can vigorously for 2-3 minutes before using. Use at room temperature. Hold can upright 10-12 inches from object. Begin spraying object and continue past other side. Continue spraying in this manner using overlapping strokes. Spray in light coatings to prevent running and sagging.

To prevent spray head clog, turn can upside down and press spray for several seconds after each use. If spray head clogs during use, turn spray head and press. If clogging persists, remove spray head; clean the hole at front and the slit at base with a pin. Replace spray head and turn.

This can is guaranteed to spray. Since seller cannot control application, seller makes no warranty, expressed or implied, nor accepts responsibility other than replacement of spray can.

**DANGER: EXTREMELY FLAMMABLE. VAPORS MAY CAUSE FLASH FIRE. VAPORS MAY IGNITE EXPLOSIVELY. VAPOR HARMFUL, MAY BE HARMFUL BY INGESTION OR BY BREATHING VAPORS. EXPOSURE MAY RESULT IN IRRITATION OF THE EYES OR CHEST. EXPOSURE MAY RESULT IN NAUSEA, CONFUSION OR INSTABILITY. EXPOSURE MAY CAUSE HARM TO THE DEVELOPING FETUS OR BIRTH DEFECTS.**

**CONTAINS:** Toluene (CAS 106-68-3), Propane (CAS 74-98-6), Isobutane (CAS 75-28-5), n-Butane (CAS 106-97-8), Ethyl Acetate (141-78-6), Xylene (CAS 1330-20-7), Diacetone Alcohol (CAS 123-42-2), Zinc Stearate (CAS 557-05-1).

**PRECAUTIONS:** Avoid breathing vapors. Keep away from eyes. Wear safety goggles or face shield. Use exhaust fan to remove vapors and assure adequate cross ventilation. Prevent buildup of vapors - open all windows and doors - use only with cross ventilation. Close container after use. Keep away from heat, sparks and open flame. Do not smoke, extinguish all flames and pilot lights, and turn off stoves, heaters, electric motors and other sources of ignition during use and until all vapors are gone. **DO NOT USE IF PREGNANT OR CONTEMPLATING PREGNANCY. KEEP OUT OF REACH OF CHILDREN.**

**FIRST AID:** If eye contact occurs, rinse immediately with water then flush with tap water for 15 minutes. If swallowed, get prompt medical attention. If symptoms occur, move to fresh air. If symptoms persist, see a physician. For further health information contact a poison control center.

**WARNING:** THIS PRODUCT CONTAINS A CHEMICAL KNOWN TO THE STATE OF CALIFORNIA TO CAUSE CANCER, BIRTH DEFECTS, OR OTHER REPRODUCTIVE HARM.

NET WEIGHT 11 3/4 OZ. (333g)

## SUPER GLOSS

GAREOSOL'S specially formulated super gloss finish provides a unique super high gloss protective coating.

You may obtain a higher gloss with additional applications. Remember, 2 light coats are better than one heavy coat.

This is a permanent super gloss finish which dries and stays clear. It brightens colors and will not blush or cloud stains. Provides protection to a completely sealed piece.

May use over opaque stains before anti-queing to make wiping off of antique stains easier. Excellent sealer for decoupage prints.

**FOR BEST RESULTS:** Use at room temperature. Hold can upright 10-12 inches from object. Begin spraying object and continue past other side. Spray in light coatings to prevent running and sags.

To prevent spray head clog, turn can upside down and press spray for several seconds after each use. If spray head clogs during use, turn spray head and press. If clogging persists, remove spray head; clean the hole at front and the slit at base with a pin. Replace spray head and turn.

This can is guaranteed to spray. Since seller cannot control application, seller makes no warranty, expressed or implied, nor accepts responsibility other than replacement of spray can.

**DANGER: EXTREMELY FLAMMABLE. MAY BE HARMFUL BY INGESTION OR BY BREATHING VAPORS. EXPOSURE MAY RESULT IN NAUSEA, HEADACHE, CONFUSION OR INSTABILITY. EXPOSURE MAY RESULT IN IRRITATION OF THE EYES OR CHEST, EXPOSURE MAY CAUSE HARM TO THE DEVELOPING FETUS OR BIRTH DEFECTS.**

CONTAINS: TOLUENE.

**PRECAUTIONS:** Avoid prolonged contact with skin. Avoid breathing vapors. Use exhaust fan to remove vapors and assure adequate cross ventilation. Do not use or store near heat, sparks or flame. **DO NOT USE IF PREGNANT OR CONTEMPLATING PREGNANCY. KEEP OUT OF REACH OF CHILDREN.**

**FIRST AID:** If skin contact occurs, wash with soap and water for 5 minutes. If symptoms persist, see a physician. If symptoms occur, move to fresh air. For further health information contact a poison control center.

EMERGENCY AND FIRST AID PROCEDURES

- EYE CONTACT:** Flush with water for 15 minutes while holding eyelids open. Get medical attention.
- SKIN CONTACT:** Flush with water. Follow by washing with soap and water. Remove contaminated clothing and do not reuse until laundered. If irritation persists, get medical attention.
- INHALATION:** Remove **victim** to fresh air and **provide oxygen** if breathing is difficult. Give artificial respiration if not breathing. Get **Medical** attention.
- INGESTION:** DO NOT INDUCE VOMITING. If vomiting occurs spontaneously, keep head **below hips** to prevent aspiration of liquid into the lungs. Get medical attention. \*\*

\*\* NOTE TO THE PHYSICIAN: If more than 2.0 ml per kg has been ingested and vomiting has not occurred, emesis should be induced with supervision. Keep victims head below hips to prevent aspiration. If symptoms such as loss of gag reflex, convulsions or unconsciousness occur before emesis, gastric lavage using a cuffed endotracheal tube should be considered.

WASTE DISPOSAL METHOD

Dispose of in a facility approved under RCRA regulations for hazardous waste. Containers must be leak proof and tightly sealed.

ENVIRONMENTAL HAZARDS

This product is an oil under the clean water act. KEEP OUT OF SURFACE WATERS AND ANY WATER COURSES OR SEWERS ENTERING OR LEADING TO SURFACE WATERS.

70

### IV. HEALTH HAZARD DATA

<b>THRESHOLD LIMIT VALUE</b>	See Section II
<b>EFFECTS OF OVEREXPOSURE</b>	<p>Eyes: Can cause severe irritation, redness, tearing, blurred vision.</p> <p>Skin: Prolonged or repeated contact can cause moderate irritation, defatting, dermatitis.</p> <p>Breathing: Excessive inhalation of vapors can cause nasal and respiratory irritation, dizziness, weakness, fatigue, nausea, headache, possible unconsciousness, and even asphyxiation.</p> <p>Swallowing: can cause gastrointestinal irritation, nausea, vomiting and diarrhea. Aspiration of material into the lungs can cause chemical pneumonitis which can be fatal.</p>
<b>EMERGENCY AND FIRST AID PROCEDURES</b>	SEE PAGE 3

### V. REACTIVITY DATA

<b>STABILITY</b>		<b>CONDITIONS TO AVOID</b>	Avoid heat, open flames and strong oxidizing agents.
UNSTABLE	STABLE		
	xxx		
<b>INCOMPATIBILITY (materials to avoid)</b>	Strong oxidizing agents		
<b>HAZARDOUS DECOMPOSITION PRODUCTS</b>	Carbon monoxide, carbon dioxide and unidentified organics may be formed during combustion.		
<b>HAZARDOUS POLYMERIZATION</b>		<b>CONDITIONS TO AVOID</b>	
May Occur : Will not Occur			
	x x x		

### VI. SPILL OR LEAK PROCEDURES

<b>STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED</b>	<p>Small Spills: take up with an absorbent material and place in leak proof drums for disposal.</p> <p>Large Spills: Eliminate potential source of ignition. Wear appropriate respirator and protective clothing. Shut off source of leak if safe to do so. Dike and contain. Remove with vacuum trucks, or pump to storage/salvage vessels. Soak up residue with absorbent material. Place in leak proof drums. Flush area with water to remove trace residue.</p>
---	---

### VII. SPECIAL PROTECTION INFORMATION . . .

<b>RESPIRATORY PROTECTION (specify type)</b>	Use a NIOSH/MSHA jointly approved air supplied respirator		
<b>VENTILATION</b>	<b>LOCAL EXHAUST</b>	Sufficient to maintain below TLV	<b>SPECIAL</b> --
	<b>MECHANICAL (general)</b>	Use explosion proof	<b>OTHER</b> --
<b>PROTECTIVE GLOVES</b>	Wear resistant gloves		<b>EYE PROTECTION</b> Chemical splash goggles are advised
<b>OTHER PROTECTIVE EQUIPMENT</b>	To prevent repeated or prolonged contact with skin, wear impervious clothing and boots		

### VIII. SPECIAL PRECAUTIONS

<b>PRECAUTIONARY LABELING</b>	<p>Caution! Combustible</p> <p>Store away from strong oxidizing agents in a cool, dry place with adequate ventilation. Keep away from heat and open flames. Keep containers tightly sealed.</p>
<b>OTHER HANDLING AND STORAGE CONDITIONS</b>	<p>Wash with soap and water before eating, drinking, smoking or using toilet facilities. Launder contaminated clothing before reuse-</p>
