

Computer- Notebooks & Tablets Computers QP List

Current as of November 03, 2008

Includes All ENERGY STAR Qualified Models Submitted to EPA, Including Models that Are Not Available in the U.S. and Models that May No Longer Be Available in the Market.

*Idle power levels are based on hardware characteristics specific to each system. Some models may be customized by the consumer in ways that change applicable idle level category to which they are evaluated and manufacturers are required to report power data in idle for the highest power configuration at each level under which they would like the system to qualify. For a description of categories for idle criteria, please refer to the Version 4.0 ENERGY STAR Computers Eligibility Criteria at http://www.energystar.gov/ia/partners/product_specs/program_reqs/Computer_Spec_Final.pdf.

PD_ID	Product (Unit) Type	Partner Name	Brand	Model Name	Model Number	Processor Brand	Processor Name	Processor Speed	System Memory
