This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards or with the North American Stratigraphic Code. Any use of trade names or references to specific products is for descriptive purposes only and does not imply endorsement by the U.S. Government.

This database, identified as "Regional geologic map of San Andreas and related faults in Carrizo Plain, Temblor, Caliente, and La Panza Ranges and vicinity, California: A digital database," has been prepared for release and publication by the Director of the USGS. Although this database has been submitted to agencies concerned with administrative compliance, the USGS retains the right to revise the data pursuant to further advice and review. Furthermore, it is released on condition that neither the USGS nor the U.S. Government may be held liable for any damages resulting from its authorized or unauthorized use.

Base scanned from 1973 publication based on a mosaic of 7-1/2 minute index contours and selected cultural features.

State Plane Projection  
 California coordinate system, zone 5

This map is a plot derived from data contained in the digital database Open-File Report 99-003 "Regional geologic map of San Andreas and related faults in Carrizo Plain, Temblor, Caliente, and La Panza Ranges and vicinity, California." A structural image of this map is included in the Open-File Report, but the Open-File Report does not contain a paper copy of this map. The Open-File Report consists of the digital data and a spreadsheet containing the database and indicating how to access the data from which the map was prepared as well as the PostScript images of the map. The spreadsheet also contains information on how to obtain a plot from the U.S. Geological Survey.
