Subject: Supplemental Rationale and Data for the Draft 3 ENERGY STAR Imaging Equipment Specification
Attachments: Draft 3 FA Supplemental Rationale 3-24-06.pdf; Draft 3 OM FA Dataset 3-24-06.xls; Updated Draft 2 IE Comment Responses 03-24-06.pdf

This message is being sent to you on behalf of EPA and DOE's ENERGY STAR® program.

Dear ENERGY STAR Imaging Equipment Stakeholder:

In follow up to the March 17, 2006 distribution of the Draft 3 ENERGY STAR Program Requirements (Version 1.0) for Imaging Equipment products, please find attached the following materials:

- Operational Mode (OM) Data Corresponding to the Draft 3 ENERGY STAR Program Requirements for Imaging Equipment (Version 1.0); and
- Supplemental Rationale for EPA Decisions Informed by Manufacturer-submitted Functional-adder Data.

Please note that the OM dataset has been masked with regard to identifying information, such as manufacturer, brand name, and model number. The Supplemental Rationale document is intended to help stakeholders better understand how this data was used to inform the development of the Draft 3 OM Eligibility Criteria.

Also attached, please find an updated Draft 2 Comment Response Summary, as the original distribution neglected to respond a few comments shared by a stakeholder. The attached, updated version includes these comments and the corresponding EPA responses, both of which are highlighted for easy identification and review on pages 8, 11, and 17.

As a reminder, all manufacturers and other interested parties are encouraged to review the Draft 3 ENERGY STAR specification (Version 1.0) for Imaging Equipment and provide comments by **April 7, 2006**.

Please direct any questions or comments on the attached to Katharine Kaplan Osdoba, EPA, at osdoba.katharine@epa.gov or Erin Trager, ICF Consulting, at etrager@icfconsulting.com. Thank you for your continued support of ENERGY STAR.
